On this PABX, some numbers are dialled direct from extensions including military long distance board and RAC. Incoming calls are received at PAX manual board and plugged direct into a full multiple. Extensions may dial PABX operator for information but if operator is asked to connect an extension through her board to any outside exchange she must ask extension to hang up and be recalled under KINGS for you consider advisable to have direct LINES to military. LD and RAC in view of necessity to reverse call or shall we continue dialling LD and RAC direct from extensions. We shall later have two private ACC lines from PABX Manual Board to Naples which will require call reversal but do not think this justifies handling all LD and RAC call this way as PABX positions will be loaded up
