TO : All Branches, Headquarters Force 141.

The following extract from Staff Memorandum Number 39, AFHQ, dated 18 May 1943, is published for the information of all staff officers:

II - ALLIED FORCE HEADQUARTERS PRINTING SECTION.

1. An AFHQ printing press is in operation at No. 5 Rue Clauzel, Algiers.

2. The machinery consists of two flat beds; two platoons, two linotypes and usual accessories. All ordinary printing can be carried out up to a maximum size of 27" X 24".

3. The staff consists of some 26 men. All personnel have been carefully "vetted" and have signed the security form under the Official Secrets Act. Security precautions at the plant are effective and only authorized admission is permitted. When work is in progress it cannot be seen by unauthorized persons.

4. At present the plant and staff are fully occupied on printing essential G.R.O's, L of C.R.O's and reprints of Army Forms in addition to less important matter.

5. If urgent highly secret work has to be undertaken this can be carried out under proper security conditions but at the expense of normal routine work. It is emphasized, however, that under these conditions the output is limited.

6. All applications for such printing should be made in the first instance to either A.Q.M.C. or D.A.Q.M.G. - Q.2 (Room 12, ST. GENEVIEVE). Both these officers are suitably classified and will be in a position to give rulings as to priorities.

NO: W 1149

Decided to reestablish internal postal communication as soon as transportation and other conditions permit, postcards to be used first and later letter communication. (FOR MARSHALL FROM KISSENEOWER CITE CIVIL AFFAIRS DIVISION CITE AMGOT)

This raises question of postage as to which following alternatives have been considered:

1. Printing in LONDON or WASHINGTON new issue AMGOT stamps.
2. Overprinting of UNITED STATES and BRITISH stamps with word AMGOT and LIRA values.
3. Manual or machine stamping all cards and letters.
4. Overprint work AMGOT on existing stocks of stamps in HORRIFIED in black. Estimate this alternative requires three light weight electric overprinting machines with personnel for operation.

Propose adopt alternative one if supply can be made available to arrive HORRIFIED by D plus 30. Otherwise, propose alternative two advise whether either of foregoing practicable. Consider three undesirable because difficulty of control. Consider four least practical because probability of limited supply stamps in area.

Forward any particulars available on existing HORRIFIED stamp tariff together with any specimens of more usual denominations. New arrangements will have to allow for variations in exchange.
