With reference to the signal AFHQ-475 of 23 October,

self explanatory.

I will inform you of the terms of the final Operation

24 October, 43.

B.G.S.
Headquarters,
15 Army Group.

1. I write to refer to the signal AMGOT 475 of 23 Oct, copy of which was marked by Signals for B.G.S.

2. The printing presses and plates of the Banca d'Italia are located at Aquila, about 50 miles North East of Rome. Our last information from the Italian Government is that the Germans surround the town of Aquila but have not yet destroyed the printing presses or the plates for noteprinting. We are also extremely anxious that these plates should not be destroyed as their destruction will entail the continuance for many months of shipments of Allied Military Lira from Washington, both by sea and air, thus employing valuable military transport.

3. In addition to the aspect of sabotage mentioned in the signal, it may be possible, if tactical reasons permit, to instruct the Armies to refrain from bombing and shelling these buildings.

4. I should be grateful to learn if you are able to take the action proposed in the signal so that I can duly inform A.F.H.Q.

Subject: Draft Operation Instruction No. 30.

G.Ops.,
Headquarters,
15 Army Group.

SECRET - U.S. SECRET.
ANG/303/4.
1. November. 43.

With reference to your letters 15AG/16/G(Ops) dated 25.Oct.43 and 15AG/43/1/G(Ops) dated 31.Oct.43.

I am returning herewith the town plan of ROMA, duly marked. The buildings marked thereon, are:-

1. The Head Office of the Banca d'Italia, Map.Ref. 746670 (Note Store).
2. The main agency of the Banca d'Italia, Map.Ref. 738676 (-do-).
3. The Poligrafico, Map.Ref. 753696, designated on the map as the MINISTERO CONTE DEL CONTI, where bonds, Treasury bills, and Italian Government currency notes are printed. It may also contain valuable stocks of security paper.
4. The Mint, known as Regio Zecca, Map.Ref. 762667. I am told that all minting of coins is done in this building; and have received no confirmation that the Mint is located in three separate areas.
5. The Post Office, Map.Ref. 740677, which will contain large stocks of stamps and the records for the post offices and postal savings banks of Italy and Sicily.

It is sincerely hoped that this building will not be occupied by troops, as was the case in PALERMO and NAPLES, as the resulting dislocation through destruction of records is extremely grave.

I attach a plan of the town of A. ULLA, (scale not shown), showing the location of the printing works of the Banca d'Italia. Here are housed the presses, plates and a stock of security paper for the printing of all Banca d'Italia notes.

To Sheet 2..../

6597

Sheet 2.

I would like to mention the town of FABRIANO in the Compartimentó of MARCHE, where the paper is manufactured for all bank notes and bonds. Even if it is found that the Germans have destroyed the plates at AQUILA, fresh dies can be manufactured in a few weeks. But there is a serious shortage of paper, not only in Italy but also in the U.K. and U.S.
