(Summary of A.C.I. 1618 of 1943 issued 6th November, 1943.)

60. Refund of Insurance Contributions—Personnel Enlisted or Enrolled Overseas.

Regulations have been made which relieve soldiers, auxiliaries of the A.T.S. and members of V.A.Ds. who have enlisted or enrolled outside the British Islands on or after 3rd September, 1939, of their liability to insurance under the National Health Insurance and Contributory Pensions Acts during their war service. (The term British Islands means Great Britain, Northern Ireland, Isle of Man and the Channel Islands.)

These regulations also apply to nursing officers of Q.A.I.M.N.S.(R.), the T.A.N.S. and its Reserve who are insured as other ranks.

All men and women concerned will cease to be compulsorily insurable with effect from the date of their enlistment or enrolment and can claim a refund of the whole amount of the pensions contributions deducted from their army pay since that date. In order to obtain this refund and prevent the further deduction of pensions contributions from their pay, they should at once submit their claims, stating the name of the country in which they enlisted or enrolled, to their C.Os.

Men and women who were insured for health and/or pensions purposes at the time of joining for service, and who are now relieved from compulsory insurance under these regulations should, if they wish to maintain their insurance under the normal rules for voluntary contributors, write to the Ministry of Health, Insurance Department, Blackpool, Lancs., from which further information can be obtained.

(Summary of A.C.I. 1632 of 1943 issued 6th November, 1943.)

58. Fuel Saving.

You all know from reading the papers that coal will be very short this winter. The factories at home, and operations overseas, are all calling for more coal. The Army is asked to do its best to save fuel and light of all kinds. Stop waste of fuel wherever you see it.

You may not get all the warmth you would like this winter; your physical fitness will help you to do with less.

There will always be enough fuel for cooking, and for drying your wet clothes.

Coal is the scarcest fuel of all. So use coke wherever you can. It will do well in open fires if you take a little trouble with it after you have started the fire with coal. Use all the coal dust you can once the fire is going. Add it to the fire carefully—don't chuck it on in heaps and put the fire out.
