HEADQUARTERS
ALLIED CONTROL COMMISSION
Public Health Sub-Commission.

orig. sent to Lt. Col. Cripps of suggestions from Lt. Col. Cripps to the line.

26 January 1944

Subject: Central Medical Supply Depot

To : The Deputy Chief of Staff, (Through Administrative Directorate)

1. By letter, this Headquarters, dated 15 January 1944, Subject: Central Medical Depot and Regional Medical Depots, this Sub-Commission was authorized and directed to staff and operate a Central Medical Supply Depot and such Regional Medical Supply Depots as might be required.

2. The undersigned made a trip to MHS, AFHQ, Medical Section, MATOUSA, and Medical Section, SOS, MATOUSA, by direction of this Headquarters, in an effort to obtain early action on a requirement for trained officer and enlisted personnel, in order to carry out the intent of the letter above referred to. An attempt was to be made to have attached to the 2675 Regt. one (1) Advance Platoon, Medical Depot Company, as per T/O & E 8-661. As a result of the conference with Medical Section, MATOUSA, that section was agreeable to furnishing the required officers and enlisted men, from the personnel available in this theater. The MHS Section, AFHQ, was agreeable to authorizing the required four (4) officers and twelve (12) enlisted men, from the sixty-four (64) authorized, the remainder to be Italian laborers. The Personnel Section, AMB, AFHQ, directed a request to G-1, AFHQ, through G-4, AFHQ, pointing out the urgent need for this personnel. G-4 AFHQ, concurred in this request, recommending however that Medical Section, MATOUSA furnish half, and that G-1, AFHQ, make provisions for the remainder. In an interview with G-1, attended by a representative, Medical Section, MATOUSA, Personnel Section, MHS, AFHQ, and the undersigned, G-1, AFHQ, (23 January) pointed out that the 2675 Regt., was overstrength, and that by orders of the War Department, no further overstrength would be permitted. The Personnel Section, MHS, AFHQ, then stated that with the transfer of personnel to another theater, that the 2675 Regt. would shortly be under-strength. It was then agreed that an additional notation was to be made on the back-slip, to this effect, and that G-1, would probably give favorable consideration. The undersigned felt that he should return to his proper station and continue the organization of a proper organization to handle Medical Supplies. It is believed that not more than four (4) officers will be made available, and it is anticipated that this number may be cut to two (2). It is believed the enlisted men required will not be furnished, due to the over-strength of this 2675 Regt.

3. The warehouse which is to be used as the Central Medical Supply Depot, has been operated in the past by Region III, this office offering suggestions as to allocation of supplies only, and this office having loaned a trained officer to warehouse the supplies on hand. Since this is now to be a Central Depot, operated by one of the Sub-Commissions of this Headquarters it is requested that the necessary steps be taken to insure that this depot building is officially assigned to this Headquarters. It is further requested

that necessary action be taken to renovate this building, in order, that the medical supplies now on hand, and those expected, may be properly safeguarded. Repeated attempts have been made with Region III, to have this work done expeditiously, but to date, there is no electricity, no water, and there is no safe place to store opened boxes of drugs and narcotics. There is no means of locking any of the several doors, and as a result the officer in charge of the warehouse has employed civil police as a guard day and night. It is essential that the elevator be put in operating condition, since the upper floor of this building will be required for storage. This subject was reported this date to the Deputy Chief of Staff, and this Sub-Commission was advised to again contact Region III, which is being done. This report is being made, as it is believed this warehouse may be the subject of official inquiry at a later date.

4. In addition to personnel, this Sub-Commission, will require the motor transport authorized for one (1) section, Advance Platoon, Medical Supply Depot, as per T/O & E. 8-661, in order to properly operate such a depot. This depot now has one weapons-carrier, loaned by this Headquarters, the driver having been furnished from the enlisted men assigned to this Sub-Commission. It is therefore requested that this necessary transport be assigned to this depot.

5. The Advance Platoon, Medical Supply Company is authorized certain Medical Items of equipment to operate a depot, such as tool chests, box-openers etc., which can be obtained through Medical Supply Channels. It is proposed to place a requisition with G-4 of this Headquarters for this type of equipment.

6. In view of the fact, that sufficient personnel will not be made available to this Sub-Commission, it will not be possible to furnish officer personnel, or establish Regional Depots under this Sub-Commission. It is therefore planned to have the Regional Public Health Officers operate such Regional Depots using Italian personnel entirely. This type of operation, will throw an additional burden on the Regional Public Health Officers, in that they will be required to maintain accounting records, and prepare all requisitions for medical supplies to be used for a given advance period, and further to approve all issues of supplies from their warehouses. Although this is not an ideal situation, it will make the utmost use of Italian chains of distribution.

7. Bulk shipments of medical supplies are being unloaded at Bari, Taranto, Reggio and Naples which indicated the requirement for sub-depots of the Central Depot, thus using all personnel which can be anticipated, with only one assistant in this Headquarters for liaison and field inspection trips.

8. In view of the reorganization of this Headquarters and the Central Economic Committee, direction is requested regarding chain of operation and correspondence from this Sub-Commission, Supply Division, to HQS, AFHQ., and Medical Section, MATUSA. What plan is contemplated for submission of requisitions and the maintaining of necessary records on requisitions and shipments previously contemplated for Central Economic Committee.

For Brigadier Parkinson

Subject :- Typhus Control.

A.P.H.Q. Adv. Adm. Echelon,
C.M.F.

3035/A.L.

11 Jan. '44.

1. In order that Military and Civil Anti-Typhus measures may be co-ordinated and all available resources utilised to the best advantage, it has been decided to set up a Committee of Control. This will be called the Typhus Control Board.

The Board will be composed of members, each of whom has, and will retain, responsibility for Typhus control measures within his own sphere. Their responsibilities are defined below. As members of the Board each member is entitled to express his opinion on any aspect of Typhus control which might affect his present or future responsibilities.

The object of the Board is to ensure co-ordination between its members and to provide means for producing a unified policy.

2. The Board will consist of the following :-

Name.	Appointment.	Responsibility.
Brigadier R.W. Galloway.	DDNS, APHQ Adv. Adm. Ech.	Chairman of the Board. Co-ordination of all matters affecting Allied Forces.
Brig.-Gen. Leon.A. Fox (or his rep. Colonel R.A. Bishop)	Head of U.S. Typhus Commission	Technical advice to Military on Anti-Typhus measures and control. The initial organisation and direction of anti- Typhus measures for the civilian population, with the exception of hospi- talisation. These responsibilities will eventually be taken over

The Board will be composed of members, each of whom has, and will retain, responsibility for Typhus control measures within his own sphere. Their responsibilities are defined below. As members of the Board each member is entitled to express his opinion on any aspect of Typhus control which might affect his present or future responsibilities.

The object of the Board is to ensure co-ordination between its members and to provide means for producing a unified policy.

2. The Board will consist of the following :-

<u>Name.</u>	<u>Appointment.</u>	<u>Responsibility.</u>
Brigadier R.W. Galloway.	DDMS, AFHQ Adv. Adm. Ech.	Chairman of the Board. Co-ordination of all matters affecting Allied Forces.
Brig.-Gen. Leon.A. Fox (or his rep. Colonel H.A. Bishop)	Head of U.S. Typhus Commission	Technical advice to Military on Anti-Typhus measures and control. The initial organization and direction of Anti-Typhus measures for the civilian population, with the exception of hospitalisation. These responsibilities will eventually be taken over by A.M.G.
Colonel D.C. Cheyne (or his rep Colonel Public Health Crichton).	Director of A.M.G.	In carrying out his responsibilities for the control of Anti-Typhus measures among the civil population, the Head of U.S. Typhus Commission will act through the normal machinery of A.M.G. for dealings with the Italian Civil authorities.
		Co-operation with Typhus Commission and ultimate control as specified above. Responsibility for organization and administration of Civil Hospitals and ancillary services.

Sheet 2.

Colonel Ernest.	Surgeon, Penin- sular Base Section.	Executive control and direction of Anti-Typhus measures - U.S. troops.
Colonel McQuat	ADMS 57 Area (representing DDMS No. 2 District)	Executive control and direction of Anti-Typhus measures - British troops.
Lt.-col. H.D. Chalico.	ADM, AFHQ Adv. Adm. Ech.	Secretary.

3. The Board will advise the D/C.A.O., A.F.H.Q. Adv. Adm. Echelon on all matters of policy affecting Typhus Control and will report to him as often as is considered necessary.

It will direct the activities of the Local Committee in NAPLES. (This consists of Medical representatives of the Allied Forces, the U.S. Typhus Commission and A.M.C., together with certain Public Health Officers and Physicians, as indicated in the Appendix).

4. The first meeting will be held at a date to be decided by the Chairman. Subsequent meetings will be held at such intervals as may be considered necessary from time to time.

W. J. Johnston

WJR/emb. Major-General,
Deputy Chief Administrative Officer.

APPENDIX "A"
+++++

A Local Committee will be formed to discuss the various problems connected with Typhus Control in the NAPLES area. It will consist of the following Military and Civil Medical representatives :-

Brig.-Gen. Fox and/or representatives of the Typhus Commission,
Region Public Health Officer

ORIGINAL

Reestablishment of ITALIAN RED CROSS in south Italy appears desirable for handling such matters as welfare and whereabouts enquiries, death notifications to families of PW. deceased in Allied Camps. International Red Cross Committee recommend MARQUIS DE THEODOLI at present in LISBON, as being most qualified to organize and direct ITALIAN RED CROSS.

Appreciate your advice after consultation BADOGLIO:

1. Is time now ripe for reestablishment of Red Cross in South ITALY?
2. Is MARQUIS DE THEODOLI desired to head it?

18 November 1943

SUBJECT: Child Welfare.

TO : Chief of Staff - AMG.

Notwithstanding the many obvious evils of the Fascist regime certain programs were carried on particularly in relation to children which were both socially sound and had great popular appeal. With the abolition of the Fascist party and also through the exigencies of war these childrens programs have largely ceased to exist. In view of the shortage of grain, the difficulties in opening the schools, the rising child delinquency rates and the large numbers of unoccupied children roaming the streets, it is recommended that a "Childrens Committee" be set up with representatives from the Public Health and Welfare Sub-Commissions, Education S. C., Public Safety S. C., Finance etc., to immediately assist the Italian Government to put in action some or all of the following activities:

1. The development of simple play areas (open air or if available indoor areas) to be operated by Italian officials and supervised by Italian personnel. This work was formerly done under the supervision of the G.I.L.
2. The development of a hot lunch program for children using playground, school and parish house and other facilities particularly in the more depressed areas. (Italian and Allied Red Cross to help in this) Both the G.I.L. and O.N.M.I. were involved in this in the past.
3. An extension of the Maternal and child health services including the opening of more Communal and Provincial free clinics. Formerly under the direction of the O.N.M.I.
4. An extension of the free medical services for crippled and handicapped children. Also formerly under the function of O.N.M.I. and the G.I.L.
5. The prompt opening of schools (it is realized this is already under consideration) and the enforcement of the compulsory education laws.
6. The obtaining and or manufacture of childrens clothing, particularly shoes and stockings.
7. The promoting of childrens entertainments, music and other cultural activities for children a former G.I.L. and Popolavoro function.

- 2 -

8. The organization and extension of the work with child delinquents through the newly created Provincial child welfare departments. This program should include the establishment of an institution for the care of delinquent children sentenced by the courts. The initiation of more adequate facilities for the probation and parole of children and the use of pre-sentence social investigation by the courts.
9. The development of a program for the care of mentally handicapped children for which no facilities now exist in Region I.
10. Such other practical programs as may be suggested to the committee.

It is suggested the proposed program be presented to the Italian people as a unified whole and widely advertised through the press and the radio. It will be well to present it with some fanfare and ceremony.

The financing of these childrens activities would require only moderate expenditures of money and any money spent in this way will be amply repaid. The results achieved by those who have worked in the childrens field in the United States and Great Britain have demonstrated the great political and public relations value of having children take home and discuss around the family table their small pleasures and new found knowledge.

9. The development of a program for the care of mentally handicapped children for which no facilities now exist in Region I.
10. Such other practical programs as may be suggested to the committee.

It is suggested the proposed program be presented to the Italian people as a unified whole and widely advertised through the press and the radio. It will be well to present it with some fanfare and ceremony.

The financing of these childrens activities would require only moderate expenditures of money and any money spent in this way will be amply repaid. The results achieved by those who have worked in the childrens field in the United States and Great Britain have demonstrated the great political and public relations value of having children take home and discuss around the family table their small pleasures and new found knowledge.

APO 512.

Public Health Sub-Commission.

Minutes of meeting on Child Welfare called by
Colonel Spofford on 30 November 1943.

Present:

Lt. Col. Wilson C. Williams:	Public Health Sub-Commission.
Major Driffeld-White	: Col. Spofford's Office.
Major R.A. Persell	: Administrative Directorate.
Major Shenwood	: Education.
Major Ernest F. Witte	: Public Health Sub-Commission.
Captain Joel C. Earnest	: Public Health Sub-Commission.
2nd Lieut J. Vlcek	: Public Health Sub-Commission.
Lieut. George W. Willis	: Finance.
Lieut. Fred C. Philby.	: Public Safety.

1. At 1645 the meeting was called to order by Lt. Col. Williams.
2. Major Driffeld-White stated that it was impossible for Colonel Spofford to attend, though he had originally planned to do so as he was much interested in the subject of the meeting.
3. Lt. Col. Williams read the letter of 27th November 1943 from Brigadier G.S. Parkinson to Chief of Staff (Attention Col Spofford) on the subject of Child Welfare. This letter outlines specific proposals for joint action and was the basis for the following discussion:-

I. "The development of simple play areas (open air or if available indoor areas) to be operated by Italian Officials and supervised by Italian personnel. This work was formerly done under the supervision of G.I.L."

Major Witte outlined the need for playgrounds as a measure to occupy the children and keep them off the streets. He stated Bishop Gioacchino Di Leo had already made a request that some recreational and cultural program be started to replace that which was formerly carried on by the G.I.L. - Lt. Philby strongly endorsed the need for recreational activities for those hours when children were not in school, particularly the two hours before dark. Major ~~Shenwood~~ Education, stated the average school day was normally four hours. Major ~~Shenwood~~ to obtain further information on this and also on the number of urban areas where schools would not be opened, and the Enforcement of the truancy laws, Lt. Vlcek is to obtain names of competent G.I.L. workers who might be available for work on this activity.

It was agreed in principle that the program should be pushed.

II. "The development of a hot lunch program for children using playground school and parish house and other facilities particularly in the more depressed areas. (Italian and Allied Red Cross to help in this)"

1. At 1645 the meeting was called to order by Lt. Col Williams.
2. Major Driffeld-White stated that it was impossible for Colonel Spofford to attend, though he had originally planned to do so as he was much interested in the subject of the meeting.
3. Lt. Col. Williams read the letter of 27th November 1943 from Brigadier G.S. Parkinson to Chief of Staff (Attention Col Spofford) on the subject of Child Welfare. This letter outlines specific proposals for joint action and was the basis for the following discussion:-

I. "The development of simple play areas (open air or if available indoor areas) to be operated by Italian Officials and supervised by Italian personnel. This work was formerly done under the supervision of G.I.L."

Major Witte outlined the need for playgrounds as a measure to occupy the children and keep them off the streets. He stated Bishop Gioacchino Di Leo had already made a request that some recreational and cultural program be started to replace that which was formerly carried on by the G.I.L. - Lt. Philby strongly endorsed the need for recreational activities for those hours when children were not in school, particularly the two hours before dark. Major ~~Wood~~ Education, stated the average school day was normally four hours. Major ~~Wood~~ to obtain further information on this and also on the number of urban areas where schools would not be opened, and the enforcement of the truancy laws, Lt. Vlcek is to obtain names of competent G.I.L. workers who might be available for work on this activity.

It was agreed in principle that the program should be pushed.

II. "The development of a hot lunch program for children using playground school and parish house and other facilities particularly in the more depressed areas. (Italian and Allied Red Cross to help in this). Both the G.I.L. and O.N.M.I. were involved in this/in the past."

Major ~~Wood~~, Education, to obtain information on the provisional school plans for this item. Captain Earnest suggested that cold food could be used particularly nuts, fruits etc, as a start and that the effects on the school attendance would be very marked. - Lt. Col Williams requested that the Supply branch of Industry and Commerce attend the next meeting.

III. "An extension of the free medical services including the opening of more Communal and Provincial free clinics. Formerly under the direction of the O.N.M.I."

General agreement by those present - Education to determine what school health examinations program is being carried on.

- 2 -

- IV. "An extension of the free medical services ~~including the opening~~ for crippled and handicapped children, also formerly under the function of O.N.M.I. and G.I.L." ^W
It was felt that this program should have to await more Medical and Hospital facilities than now available.
- V "The prompt opening of schools (it is realized this is already under consideration) and the enforcement of the compulsory education laws."
This item covered in discussion of item 1. Lt. Philby, Public Safety, suggested that usually women made the best truancy investigators. *Nothing can be done about truancy until school accommodation is adequate.*
- VI "The obtaining and or manufacture of childrens clothing, particularly shoes and stockings."
Discussion of this item to await meeting with "Supply" and "Industrial Planning" present.
- VII. "The prompting of childrens entertainments, music and other cultural activities for children a former G.I.L. and Popolavoro function."
Covered in discussions on Item 1.
- VIII. "The organisation and extension of the work with child delinquents through the newly created Provincial child welfare departments. This program should include the establishment of an institution for the care of delinquent children sentenced by the courts. The initiation of more adequate facilities for the probation and parole of children and the use of pre-sentence special investigation by the courts."
Discussion on this item to await a meeting with Legal Sub-Commission and Prisons Section of Public Safety.
- IX. "The development of a program for the care of mentally handicapped children for which no facilities now exist in Region I".
Covered on discussion on item 4 and same decision.
- X. It was agreed that "Supply" and "Legal" should be asked to attend the next meeting. Public Safety suggested that a school child patrol program would be of benefit in character development and also in reducing the usually high traffic death rates of children.

4777

VII. "The prompting of childrens entertainments, music and other cultural activities for children a former G.I.L. and Dopolavoro function."

Covered in discussions on Item 1.

VIII. "The organisation and extension of the work with child delinquents through the newly created Provincial child welfare departments. This program should include the establishment of an institution for the care of delinquent children sentenced by the courts. The initiation of more adequate facilities for the probation and parole of children and the use of pre-sentence special investigation by the courts." Discussion on this item to await a meeting with Legal Sub-Commission and Prisons Section of Public Safety.

IX. "The development of a program for the care of mentally handicapped children for which no facilities now exist in Region I".

Covered on discussion on item 4 and same decision.

X. It was agreed that "Supply" and "Legal" should be asked to attend the next meeting. Public Safety suggested that a school child patrol program would be of benefit in character development and also in reducing the usually high traffic death rates of children.

SUBJECT: - Child Welfare

TO : - Chief of Staff - A.M.G. HQ.
Attention Col. Spofford.

Notwithstanding the many obvious evils of the Fascist regime certain programs were carried on particularly in relation to children which were both socially sound and had great popular appeal. With the abolition of the Fascist party and also through the exigencies of war these childrens programs have largely ceased to exist. In view of the shortage of grain, the difficulties in opening the schools, the rising child delinquency rates and the large numbers of unoccupied children roaming the streets, it is requested that a conference be called under your chairmanship with representatives from the Public Health and Welfare Sub-Commission, Education Sub-Commission, Public Safety Sub-Commission, Finance and Public Relations, to discuss ways of immediately assisting the Italian Government to put in motion some or all of the following activities:

1. The development of simple play areas (open air or if available indoor areas) to be operated by Italian officials and supervised by Italian personnel. This work was formerly done under the supervision of the G.I.L.
2. The development of a hot lunch program for children using playground, school and parish house and other facilities particularly in the more depressed areas. (Italian and Allied Red Cross to help in this) Both the G.I.L. and O.N.M.I. were involved in this in the past.
3. An extension of the free medical services including the opening of more Communal and Provincial free clinics. Formerly under direction of the O.N.M.I.
4. An extension of the free medical services for crippled and handicapped children, also formerly under the function of O.N.M.I. and the G.I.L.
5. The prompt opening of schools (it is realized this is already under consideration) and the enforcement of the compulsory education laws.
6. The obtaining and or manufacture of childrens clothing, particularly shoes and stockings.
7. The promoting of childrens entertainments, music and other cultural activities for children a former G.I.L. and Dopolavoro function.

4776

PAGE "2"

8. The organization and extension of the work with child delinquents through the newly created Provincial child welfare departments. This program should include the establishment of an institution for the care of delinquent children sentenced by the courts. The initiation of more adequate facilities for the probation and parole of children and the use of pre-sentence special investigation by the courts.
9. The development of a program for the care of mentally handicapped children for which no facilities now exist in Region I.
10. Such other practical programs as may be suggested to the committee.

It is suggested the proposed program be presented to the Italian people as a unified whole and widely advertised through the press and the radio. It will be well to present it with some fanfare and ceremony.

MEMORANDUM: - Conference with Col. Spofford regarding
15th Army and A.M.G. relationships - Ad-
vance Echelon needs.

Problems that have arisen in the past, factors contributing to these problems and practical solutions were discussed, including: -

1. Need for mutual exchange of ideas and information through direct contact of staffs in the field and a more direct inter-Army-A.M.G. communications.
2. Mutual agreement as to status of A.M.G. personnel on visits to 15th Army areas and their subsequent return to A.M.G. Headquarters.
3. Exchange of 15th Army and A.M.G. directives, changes of laws and regulations, new laws and regulations etc., for guidance of each group as indicated.
4. Development of definite policies governing medical supplies and equipment with thought that the 15th Army program might be so developed that major changes in procurement, distribution and accounting would be unnecessary when A.M.G. takes over.
5. Joint planning for inauguration of special service programs such as malaria and typhus control, etc.
6. Existing facilities for pharmaceutical, biological, etc., manufacture and laboratory facilities to be utilized for meeting established needs.

Arrangements have been made for Major Scheele, Public Health Sub-Commission, to visit 15th Army for purpose of initiating discussions and planning for solution of above.

RA P.H. *Conf. with Brig. Parker 318*
meeting 20 Nov. 1943 ✓
18 Nov 1943

2. D/Chief of Staff (C + S. S.)

Subject: Relationship of 15 ARMY and ACC personnel.

Reference attached.

1. I have discussed this suggestion with Brig. Parkinson and Lt. Col. Williams and it appears to be based on the fact that the Public Health officers attached to 15 ARMY Group formations are not sending back information to this Headquarters in sufficient quantity for the making of a true picture.
2. The intention therefore, is to send officers from the sub-Commission to collect information of activities on the ground and pass (or bring) it back.
3. The same officers would, it is suggested, remain in the areas concerned and serve as a nucleus around which to build ACC (Public Health) in the said areas.
4. Whilst the need for information is appreciated the suggested means of obtaining it (para 2) seems wrong when there are so many officers already in the area. A precedent would be set that would vitiate the whole working of AMG and ACC — every sub-Commission would want to do the same thing. The drain on man-power would be enormous.

4772

5. The idea in para 3 seems a misconception. A.C.C. will not have officers of its sub-commissions.

stationed in areas but will, it is understood, use some existing C.A.O.'s and specialists as CONTROL OFFICERS, its own officers visiting occasionally to advise on local matters and supervise the activities of the Italian authorities.

6. I think the better plan would be, in the first instance, to call back a fairly senior officer of each department (medical, welfare and sanitary) from each of the AMG. HQ of 15 ARMY ^{Wp} 5 ARMY and 8 ARMY in order that they shall report fully to the sub-commission, being replaced temporarily if considered necessary.
7. At the same time further firm orders should be given to AMG officers to send back as full reports as possible on
 - a) their activities
 - b) the conditions pertaining at the time they move on.
8. Regions could be instructed to do the same thing it being understood that information from those already formed is also lacking.

Driffeld White

13 November 1943

SUBJECT: - Relationship of 15th Army and ACC Personnel.

TO : - Chief of Staff, H.Q., A.M.G.

The following is suggested for consideration in the formulation of a directive outlining policies under the subject heading above:

1. An advance public health (A.C.C.) group, consisting of at least one medical, welfare and sanitary (sanitary engineer) officer should be attached routinely to and move in with the 15th Army Group as new regions are in the process of occupation. These individuals would remain in the regions as the combat units moved on and would serve as service directors in the above fields when the full A.C.C. complement moved in.

Such a policy would enable the 15th Army and A.C.C. to coordinate all service plans on the ground and will largely eliminate difficulties of the transition period from A.M.G. to A.C.C. later on. It would simplify personnel as well as program problems that have developed in other regions.

Subject: Public Health Report.

Memo to: Colonel D. G. Cheyne.

AMG/506/17.
11. Nov. 43.

Reference Section 2.

Whilst I agree that not only is the establishment of Medical Officers small and that it is also as yet not filled, but there apparently is a great scarcity of Medical Officers and it does not seem to me much use to ask for more until the vacancies which do exist have been filled. Since you wrote the minute, Major Sandford and Major Snedecker have turned up and we will continue to press Palermo and A.F.H.Q. to complete the establishment

On the other hand the position is perhaps not quite so bad as you suggest, inasmuch as there are, I think, some medical officers included in the staffs of Regions III and IV, which, for the purpose of operating forward areas will come under you until such time as the Regions are transferred to AMG Rear. Will you please let me know how many of these officers are available to supplement the establishment which is directly speaking that of AMG, 15 Army Group and AMG, 5th and 8th Armies. If you are able to secure the services of any Medical Officers from the D.D.M.S. 8th Army, I will welcome their addition to the staff by way of posting to vacancies or on attachment. Will you please go into this with Major Pearey and let me have a minute on the subject.

Reference Section 4. I appreciate the difficulties to which you refer but as a matter of policy Gp. Capt. Benson has tried to restrict the number of Liaison Officers with higher formations as much as possible as he has found from experience, as others have, that Civil Affairs Liaison Officers with Divisions and even more so with Brigades, tend to become dogsbodies instead of doing the work of C.A.O's. I will take the matter up with Gp. Capt. Benson when I go up to 8th Army but much as I appreciate your remarks I do not think it will be appropriate to take the matter up formally. Gp. Capt. Benson has had much experience of this and I think we must leave this subject in his hands.

/JC.

Major-General 
Chief Civil Affairs Officer.

Copy to: HQ, AMG., PALERMO (Above is with ref. to Col. Cheyne's minute AMG/506/15 dated 8 Nov 43, copy attached)

Subject: Public Health Reports.

C.C.A.O. (through S.S.O.)

144/506/15.

8 Nov 43.

Note by Colonel D. Gordon Cheyne, C.B.E., M.C., M.D.
Director of Public Health, AMG 15 A.C.

On completion of a series of visits to H.Q. Armies, Corps and Divs on the entire Italian front, it is desired to submit the following report. This follows conferences at H.Q. of all formations with A.M.S. rep, D.D.S.M.S., A.D.A.M.S. Surgeons as well as rep of A/Q, Inspector General and others.

1. Refugees.

(a) This problem was studied in detail in both the 5th and 8th Armies. Briefly the situation is as follows. Large numbers of refugees are returning to FOGGIA - a much bombed and severely damaged town. FOGGIA is to be an Air Corps Centre of great importance. It is estimated that 14,000 people will have to be reestablished elsewhere. In towns nearer the front notably GALLIPOLI several thousands of people will also have to be redistributed. In the 5th Army forward areas many towns are severely damaged. In addition large numbers of persons are coming through the lines, these numbers are likely to increase with the arrival of more severe weather conditions, compelling people to come in from outlying districts to vacate quarters only suitable for fair weather conditions. Naples may well have a refugee problem though this has not yet developed to any extent.

(b) The responsibility of redistribution is a joint Military and Civil one, the collection in the forward area is clearly a military one, the redistribution in back areas is clearly an Italian responsibility. This is accepted by all concerned. To improve the efficiency in the forward areas requests were submitted for representatives of the Displaced Persons Sub-Commission of the Allied Control Commission to be sent forward. An officer of experience - Major Matthews was available in territory controlled by 15 Army Group AMG was immediately sent to 8th Army. Another officer Dept. Grantham of the subcommission arrived and later Lt-Col. McFarland head of the Sub-commission visited this L. in and went to AMG 8th Army. An organization has been evolved which is working satisfactorily up to a point but is by no means complete. Many hundreds of refugees have been brought to an evacuation centre near LECERA where they are either entrained or embussed and sent to Bari for onward transmission to LECERA the centre which has been selected by the Italian Government as a centre for redistribution. Feeding has been the concern of the Army. There has been no medical inspection. It is considered that this is a grave omission which may be attended by the greatest risks to the health of the Armies - our primary concern. It is considered essential that the organization be perfected so that a machinery may be evolved now which will insure satisfaction while the numbers concerned are comparatively low. It seems that this is a heaven sent opportunity to perfect an organization which can be easily expanded to cater for possibly very large numbers of refugees when Typhus and Relapsing Fever - the killers - are common.

(a) This problem was studied in detail in both the 5th and 8th Armies. Briefly the situation is as follows. Large numbers of refugees are returning to FOGLIA - a much bombed and severely damaged town. FOGLIA is to be an Air Corps Centre of great importance. It is estimated that 14,000 people will have to be reestablished elsewhere. In towns nearer the front notably CAMPOBASSO several thousands of people will also have to be redistributed. In the 5th Army forward areas many towns are severely damaged. In addition large numbers of persons are coming through the lines, these numbers are likely to increase with the arrival of more severe weather conditions, compelling people to come in from outlying districts to vacate quarters only suitable for fair weather conditions. Naples may well have a refugee problem though this has not yet developed to any extent.

(b) The responsibility of redistribution is a joint Military and Civil one, the collection in the forward area is clearly a military one; the redistribution in back areas is clearly an Italian responsibility. This is accepted by all concerned. To improve the efficiency in the forward areas requests were submitted for representatives of the Displaced Persons Sub-Commission of the Allied Control Commission to be sent forward. An officer of experience - Major Matthews was available in territory controlled by 15 Army Group AGF was immediately sent to 8th Army. Another officer Capt. Grantham of the sub-Commission arrived and later Lt-Col. McFarland head of the sub-Commission visited this R.M. and went to AMG 8th Army. An organization has been evolved which is working satisfactorily up to a point but is by no means complete. Many hundreds of refugees have been brought to an evacuation centre near LUCANIA where they are either entrained or embussed and sent to ARI for onward transmission to LACCE the centre which has been selected by the Italian Government as a centre for redistribution. Feeding has been the concern of the Army. There has been no medical inspection. It is considered that this is a grave omission which may be attended by the gravest risks to the health of the Armies - our primary concern. It is considered essential that the organization be perfected so that a meddler may be evolved now which will insure satisfaction while the numbers concerned are comparatively low. It seems that this is a heaven sent opportunity to perfect an organization which can be easily expanded to cater for possibly very large numbers of refugees when Typhus and Relapsing Fevers - the killers of the line home diseases are actually prevalent. We cannot afford to forget the lessons of the 1917-25 period in Russia and the Balkans when these diseases were taking their mighty tolls.

(c) The following recommendations are submitted, several of which are extracted from reports by Major Matthews and others.

(1) Representatives of Italian Government should be sent forward to care for the refugees at some collecting point probably the Refugee Interrogation point, and to see to the feeding and general welfare for the onward journey.

(11) The registration of Italian refugees should be the concern of Italian authorities in forward towns.

318 4767

- (iii) Some form of medical inspection at the R.I.P. is absolutely essential and arrangements should include facilities for disinfection, bathing etc. This should be carried out by Italian authorities under the general direction and supervision of AMMOT Medical personnel. For this, some form of improvised washing and disinfection plant is essential as with the onward move of Amies the R.I.P. will similarly advance and the disinfecting arrangements must be mobile. The Italians may be able to supply this. The possibility should be explored.
- (iv) Some form of transit camp is essential on ordinary humanitarian grounds where the next hot meal etc. can be provided.
- (v) The organization of the Displaced Persons Sub-Commission would appear to be in need of overhaul or possibly reconstruction to be able to carry out its developmental intention. Beyond sending one officer forward this organization is not functioning.
- (vi) The whole organization should be in duplicate following each Army.
- (vii) The redistribution of the refugees is essentially the concern of the Italian Government but its dealings so far have not suggested great activity on its part in this direction and help or guidance appear to be essential again on purely humanitarian grounds.

2. Availability of Medical Officers in 15 Army Group.

The U.S./S.C of Medical Officers in 15 Army Group is as follows.
This may not be final.

	T.O.	Available.
<u>15 Army Group.</u>		
Colonel	1	1
Major	1	-
<u>6 Army.</u>		
Lt-Col.	1	1
Captains.	2	-
<u>2 Army.</u>		
Lt-Col.	1	-
Major	1	-
<i>by plane</i>	1	1

- (vi) The whole organization should be in duplicate following each Army.
- (vii) The redistribution of the refugees is essentially the concern of the Italian Government but its dealings so far have not suggested great activity on its part in this direction and help or guidance appear to be essential again on purely humanitarian grounds.

2. Availability of Medical Officers in AMF 15 Army Group.

The W.E./M.O of Medical Officers in 15 Army Group is as follows.
This may not be final.

	<u>T.O.</u>	<u>Available.</u>
<u>15 Army Group.</u>		
Colonel	1	1
Major	1	-
<u>8 Army.</u>		
Lt-Col.	1	1
Captains.	2	-
<u>2 Army.</u>		
Lt-Col.	1	-
Major	1	-
<i>Expatriates</i>	<u>7</u>	<u>3</u>
	<u>7</u>	<u>3</u>

It is submitted with due respect that this establishment is entirely inadequate if the duties of the Division are to be properly performed on the lines contemplated. The above numbers when the T.O. is actually complete will allow only of ordinary routine work on a modest scale. The duties of these officers is to be out contacting the Administrative Medical Officers or Surgeons of Corps and Divs. The distances are very great. The need of AMF Medical Officers is in the forward areas immediately towns are occupied. Medical problems unlike those of Supplies, Ordnance and other services start at the foremost points. It is from these that the line are to come with the 15 Army and Halaping Fevers. It is there that the problem of creating civil hospitals immediately arises and it is to these points that civil medical aid must be taken. These are duties which demand a medical officer, they cannot be undertaken by a C.A.O. Medical officers are required to advise on dealing with civilian refugees.

2 (Contd.).

There may be occasions when mass movements of refugees might be fraught with the gravest risks to the health of armies. The present establishment allows of few of these duties being adequately performed. A recommendation for a field team of some ten medical men, Sanitarian and Welfare officers has not been favourably received by the Allied Control Commission to whom it was referred before separation took place. It was suggested by that body these duties might be performed by Region Officers who are not even under command of 15 Army Group AMB. The recommendation is resubmitted in the strongest possible way, for only in this way can these immediate problems, whose solution brooks no delay, be tackled. It is further recommended that the T.O. should be such that at least one M.O. be attached to each Corps and that a small party say 3 Medical Officers be attached as necessary to 86 Area, which contains the spearhead of military medical administration outside the fighting formations.

While this report was notably being compiled a communication was received from Brig. A.E. Phillips, D.S.O., D.D.M.S. 8th Army requesting that these officers be available, and later Brig. R. Galloway, D.S.O., D.D.M.S. A.F.H.Q. Advanced Admin Echelon has said that such officers would be welcome at 86 Area. The B.D.M.S. 8th Army emphasized the urgent medical work which had to be undertaken in cities and smaller towns after the occupation work which the Army medical officers with all the good intention as the world could ill afford time to perform. It is therefore strongly recommended that this is supported and forwarded to higher authority.

3. Civil Hospitals in the Forward Area.

The military necessity has compelled the authorities to take over completely several civil hospitals. In Tunisia this was not the usual custom though portions of civil hospitals notably at Algiers, Bouc Aires, and other centres were taken over. If the Army takes over wholly such civil hospitals the problem of the medical care of civilians becomes a much more difficult one. The civil population and AMB are deeply appreciative of all the military medical services have done and are doing, but if it were possible to leave for civil use a portion of civil hospitals this would be much appreciated. It will be the concern of AMB M.O.s to take over houses as civilian hospitals and to organize the supply of doctors, nurses, medicines and equipment from more fortunate centres, or from AMB in the case of supplies. All these are urgent matters. The 8th Army has now been provided with a supply of drugs, dressings and material equipment for use in the early phases and before the arrival of Regional Medical supplies. It is hoped similarly to equip 5th Army AMB. The supplies forward barely allow of much being given to care of civilians.

4. Relationship with AMB Non-Medical Officers with Corps and Divs.

My impression was that the liaison was not sufficiently close. In few cases were AMB Officers actually living as part of a Div or Corps H.Q., and usually appeared to be in separate messes. Concerned as I am mainly with health matters which however have repercussions as many branches of the staff and services, it is felt that liaison should be at the closest and that the AMB

While this report was actually being compiled a communication was received from Brig. A.M. Phillips, D.S.O., D.D.M.S., 8th Army requesting that these officers be available, and later Brig. R. Galloway, D.S.O., D.D.M.S., A.F.H.Q. Advanced Admin Echelon has said that such officers would be welcome at 86 Area. The D.D.M.S., 8th Army emphasized the urgent medical work which had to be undertaken in cities and smaller towns after the occupation work which the Army medical officers with all the good intention in the world could ill afford time to perform. It is therefore strongly recommended that this is supported and forwarded to higher authority.

3. Civil Hospitals in the Forward Area.

The military necessity has compelled the authorities to take over completely several civil hospitals. In Tunisia this was not the usual custom though portions of civil hospitals notably at Algiers, Souk Ahras, and other centres were taken over. If the Army takes over wholly such civil hospitals the problem of the medical care of civilians becomes a much more difficult one. The civil population and AMOT are deeply appreciative of all the military medical services have done and are doing, but if it were possible to leave for civil use a portion of civil hospitals this would be much appreciated. It will be the concern of AMOT M.O.s to take over houses as civilian hospitals and to organize the supply of doctors, nurses, medicine and equipment from more fortunate centres, or from AMOT in the case of supplies. All these are urgent matters. The 8th Army has now been provided with a supply of drugs, dressings and material equipment for use in the early phases and before the arrival of Regional Medical supplies. It is hoped similarly to equip 5th Army AMOT. The supplies forward barely allow of much being given to care of civilians.

4. Relationship with AMOT Non-Medical Officers with Corps and Divs.

My impression was that the liaison was not sufficiently close. In few cases were AMOT Officers actually living as part of a Div or Corps H.Q., and usually appeared to be in separate messes. Concerned as I am mainly with health matters which however have repercussions as many branches of the staff and services, it is felt that liaison should be of the closest and that the AMOT representative should be well known to the Div H.Q. as a whole. The importance of their duties is considerable and as Liaison Officer with a Div he should not be moved off to act as C.A.O. of a recently taken town as sometimes happens. It is in these early phases when he should be of a sufficiently versatile nature to advise, pending the arrival of an AMOT M.O. the various members of Div H.Q. of procedure in so far as AMOT is concerned. Perhaps the medical part of his duties at this stage are as important as any because exactly as do medical problems in battle e.g. evacuation of wounded etc. begin at the very front so do the purely AMOT problems. For this reason as well as for many others an AMOT officer of substance must be on the spot. Therefore the strength of AMOT officers forward should allow of posting of officers forward as C.A.O.s. These medical problems took no leave the Div. Liaison to do his proper job. delay in their solution of the primary objects of AMOT in the forward areas

namely safeguarding and assisting the Task Forces are to be achieved.

At J American Div the Inspector General strongly recommended that the AMPOF Representative should be a permanency at Div H. J. One formation has put in a recommendation for an AMPOF Officer at Bde H. J.

I would request that if you are in agreement with the general recommendations these be forwarded with your remarks to the proper authority.

Proposed Directive to SACs regarding Public Health Sub-Commission's Responsibilities.

3082/EN

C.O.A.O. - AMB, Headquarters,
(Through Acting Administrative Director)

2nd November, 3.

The Public Health Sub-Commission will interpret existing regulations and direct the enforcement of such general or special regulations and programmes through R. C. A. Officers as may be required for the protection of military and civilian health and for the satisfactory handling of all basic public health, medical care and welfare problems.

Basic responsibilities will include:-

1. The development of technical and administrative procedures and policies, including regulations, for the guidance of all regional groups in the administration of public health and related services. Public Health Sub-Commission personnel will assume a consultant or emergency supervisory relationship as required with regional Public Health and Welfare agencies working for the maintenance of the most effective service at all times.
2. The training and assignment of technical and professional personnel for regional and other assignments, subject to approval by the R.C.A.O. or other responsible executive concerned.
3. The direction and reorganization, through the R.C.A.O.s concerned, of existing medical care (including maternal and child hygiene), public welfare and hospital facilities utilizing approved national, regional and communal agencies that are now functioning or that may be re-established on a satisfactory functional basis.
4. The coordination and direction through R.C.A.O.s as indicated, of all supplementary and other service plans and activities proposed or to be undertaken by official and unofficial agencies in public health, welfare and related fields.
5. Upon request from R.C.A.O.s to provide special consultant services in public health, public welfare and related fields.
6. To coordinate all matters pertaining to medical supply problems including:
 - (a) The preparation of medical supply lists for the guidance of R. C. A.O.s.
 - (b) The approval of all requests for medical supplies by R.C.A.O.s.
 - (c) The development of procedures for the procurement and distribution of essential medical supplies, including the location and disposal of existing stores, control of distribution and the effort to be made to provide local production and

1. The development of technical and administrative procedures and policies, including regulations, for the guidance of all regional groups in the administration of Public Health and related services. Public Health Sub-Commission personnel will assume a consultant or emergency supervisory relationship as required with regional Public Health and Welfare agencies working for the maintenance of the most effective service at all times.
2. The training and assignment of technical and professional personnel for regional and other assignments, subject to approval by the S.C.A.O. or other responsible executive concerned.
3. The direction and reorganization, through the S.C.A.O. concerned, of existing medical care (including maternal and child hygiene), Public Welfare and Hospital facilities utilizing approved national, regional and communal agencies that are now functioning or that may be re-established on a satisfactory functional basis.
4. The coordination and direction through S.C.A.O. as indicated, of all supplementary and other service plans and activities proposed or to be undertaken by official and unofficial agencies in Public Health, Welfare and related fields.
5. Upon request from S.C.A.O. to provide special consultant services in Public Health, Public Welfare and related fields.
