Silk worm seed. Refer FARGO 836.

Following information has been supplied by United Kingdom Ministry of Supply:

1. Although it only amounts to one half or one third of Sicilian or Calabrian needs it is hoped that 10,000 ounces of seed from Turkey will be available shortly. Your opinion on this is requested considering amount of 9,000 ounces mentioned in FARGO 729.
2. Will Naples Territory be able to handle the storage situation adequately. It is understood that this calls for utmost care.
3. In the interim upon completion of purchase arrangements UKCC will be making provision for storing material in Turkey temporarily while awaiting receipt of your instructions for delivery.
4. A small amount of material is being retained by Ministry Of Supply in the Middle East to augment purchases from Turkey. Through Algiers they are also making inquiries as to the possibility of seed being supplied from Corsica.
5. Ram Silk in the amount of the next 250 short tons available in Italy and Sicily has been allocated to U.K. by CRMB.

Reply from U. K. is still awaited as to degree of filatures required but meantime your further comments on above are requested and confirmation that rehabilitation of industry is in progress.

Following is substance of reply from Krug to your S 3410 of 30 November.

Main turbine generator for floating power plant "C" can be changed to operate at 42-45 and 50 cycles, as well as 60 cycles, without delaying completion. It will require new governor, exciter set and steam driven house turbine generator set.

Further study being made as to possibilities of obtaining steam driven house set and locating on barge. BIW, rudders, and other structural changes can be made without delaying completion date.

Investigation of floating power plant "D" reveals that the present main turbine generator is satisfactory, but will require new governor and a separate exciter set for 42-45 cycle operation. It will also require house turbine generator under some conditions as above stated in place of frequency changer, now planned for 50-60 cycle operation.

DISTRIBUTION: Prompt decision necessary as to any changes, if completion dates are to be maintained. Also important to know transmission voltages.

J.A. Krug will not be in London until late January, but can meet *6.6.1* Col. Cieler in Algier late this month providing army transportation can be arranged.

To follow is personnel list.

SUB: ITALIAN WHEAT PRODUCTION.

Preliminary report has been received from Region 3, and it is understood Royal Navy is making independent investigation. But still required is comprehensive report on 1943 crop and future of industry, including exportable surplus with grades and amounts of each.

Did Region 3 estimate of 10,000 tons surplus from 1943 crop take into account requirements of Armed Forces.

Request that ACC coordinate all information and submit full report earliest possible to permit ANGERM reply being made to ANWAR on basis of our cable 7714 of 7th November. Consideration should be given to civilian requirements for domestic manufacture including needs of fishing industry and requirements of all Armed Forces be coordinated thru AFLR (Italian) Board.

Meanwhile the FRATTAMAZZIORE stock of 800 tons (reported in Regions 3 letter of 19th Nov) has been advised to US and UK AW available for immediate export since new crop now being warehoused.

Concerning letter reference #AMG/617/12 dated 1st December signed Gerry which instructs us to find personnel and transport for Capt. Davis staff. No AM or transport can be spared from AMG 5 Army until AMG 5 Army and Region 3 are completed to T/O. So far Region 3 is practically only source of supply of personnel and transport for AMG 5 Army. If demands made now for outside units and individuals Regional Administration and Operational Efficiency with 5 Army will suffer badly. Value of Region 4 assistance is up to present very limited as very few vehicles and drivers available. Requests that no further demand on Region 3 on AMG 5 Army for personnel and particularly transport be made until adequate reinforcements received in both.

***ADD FOR LOCAL RESOURCES ITALIAN BOARD.

SOAP MANUFACTURE :

Request you initiate full investigation into possibilities of soap manufacture in Sicily and mainland with potential production figures.

Report should be coordinated with AFHQ Local Resources (Italian) Board, and we understand some action has been taken in Region 3, but an overall program is necessary taking into account civilian requirements for the whole of Italy in addition to requirements of the armed forces.

Investigations should include the availability of fats and agents other than olive oil and consideration be given as to whether your crop of olive oil should be used for manufacture of soap or whether it can be exported to better advantage.

If it is decided to manufacture soap a special overall requisition will need to be submitted for caustic soda which is in very short supply.

Cutting pitprops started today with all available civilians. Number of axemen insufficient to complete program of 60,000 linear metres by end December. Quatriens Bureau has placed 1 mile company entirely at our disposal for extraction to road subject to approval by Giraud. This company would be ready to commence work in 2 weeks time by which time 15 to 20,000 linear metres should be ready for extraction to roadside. Quatriens Bureau has insufficient motor transport to complete program of bridge repair. Ref message 6 of 1st December requesting immediate dispatch 1 Battalion General Service Regiment US Engineers for these programs. Therefore no transport available for carriage of pit props to port. View of shortage of axemen and motor transport urgently recommend dispatch to Corsica of US Engineer Forestry Company. This unit also urgently needed to secure supplies of piles and bridge timbers for Army in Italy. Refer my memorandum to Col KOTTERWORTH 14th October paragraphs 8 and 9. Above recommendations strongly supported by Stronge provided 03 is satisfied that dispatch this company does not interfere with more urgent priorities, and Col WARD US Engineers AFHQ now on Corsica. Recommend advance party 2 officers and 20 to 30 axemen with fifteen 5-ton trucks and necessary drivers to commence in forests of Aspendale and Tuncu. If commence work by 20th December could deliver 36 to 40,000 metres to Porto Vecchio by end Dec. 500.

Of communications cited para 2 only your 1086 of 22nd November is known to HQ. However agree necessary proceed on basis 1086 pending reply to NAT 101 of 26th November which outlined proposal to combined Chiefs of Staff. As to your proposal recd para 3 B of HOLMES letter 27th November, your attention called to fact para 3 D gives ample authority to centralize advance of funds to Italian Government for payment Italian Armed Forces rather than payment at various points by ACC or AMG. However in view undesirable consequences of long delays in paying Italian Forces in active service as in 5th Army Area, every effort should be made to assure that Italian Treasury is adequately functioning in all areas where such forces must be paid. Otherwise may be necessary arrange advances to some units by nearest ACC or AMG facility.

PRECEDENCE: PRIORITY

Answer your 3-3399 of 1 December as follows. Administrative Memorandum number 69 of 18 October as amended by Administrative Memorandum number 75 of 8 November divided the Allied Military Government of Occupied Territory into 2 organizations. Our W 3308 of 24 October paragraph 2 states that Military Administration and Command Channels flow from HQ AMG to AFHQ. Therefore only AFHQ could order HQ AMG to release an officer under its command. All confidential reports on officers in Regions under command HQ AMG will be submitted by SCAO to RCAO to McSherry as Chief of Headquarters Allied Military Government (see paragraph 3 in the above quoted memorandum) to AFHQ.
