RESTRICTED.

Meeting TOSC/XI-KHQ/L. Transportation Officer, 5th Army - DANTON. Transportation Officer PBS refers. Following points agreed on:

1. 450 TPD FORLI/ CESENA to CREMONA NI given first priority.

2. AMG 5 Army to set up immediately large depot at MODENA so PBS and 5th Army trucks can backlift from FORLI/CESENA to MODENA.

3. ALCOM trucks then to lift solely from MODENA to CREMONA thereby increasing daily lift into MILAN/TURIN via rail from CREMONA.

4. All depots to operate on 24 hour basis. Request ALCOM to discontinue allocations to provinces from FORLI and transfer foods to MODENA depot where strict provincial allocation will be kept. With GENOA port now open for coastern, and good rail connections from there to MILAN/TURIN, it is suggested that matter of continuing to stock FORLI/CESENA be reviewed with view of reducing these stocks while building up stockpile at GENOA. Your comments on above will be appreciated.

subject is your 3117 dated 21. five cages to be erected in area south of RIMINI each cage approx 350 yds by 350 yds. no question of mass evacuation of civilians as suggested in your message in fact informed by your provincial commissioner less than 100 evacuated to date from whole area final total 10000. small areas now being occupied do not effect seriously food or labour situation in RIMINI. much deprecate your signal as likely causealarm which is entirely unjustified. nothing known of any radio broadcasts and notices in press and these have certainly not been done with my authority. I am having situation carefully watched and self and my staff have made frequent visits to scene. FAR from consternation Italians are carrying on with normal work and many are living within stones throw of cages. regional and provincial commissioners kept fully informed and agree contents this telegrint. you seem to forget air force still occupy portion CESENATICO and aerodrome just north of it.

Many questions arising in connection with re-Italianization of BOLZANO and parts of TRENTO Provinces which require decisions on highest level on account of possible international political repercussions at some future time. Would stress importance from outset of wise statesmanship in handling such problems examples of which are given below.

1. Languages in schools CIN during last few years German was compulsorily taught in all schools. Previously it is understood Italian was compulsory. It is urgently desired to reopen schools but decision first required on language question.

2. What disposition is to be made of German nationals not resident in the area before 1939. These fall into the following categories:

a. Former German army civilian employees not accorded prisoner of war status and possessing no permanent home in Italian territory.

b. Former German army civilian employees now settled down as residents in Italian territory.

c. Dependents of German military personnel now resident in Italian territory.

d. Wives of German military personnel, formerly Italian citizens, who have acquired German nationality since marriage and their children.

1. Following is an initial report requested your # 77694.

Information obtained from conferences with Central Economic Commission, CIMAL and its subcommittee for textiles and fibers as well as individual members of the subcommittee representing cotton, wool, hemp, jute, silk, and synthetic fibers industries.

2. COTTON. Less than 5% war damage. Machinery ready to operate at estimated 95% prewar (1938) capacity. No ginned cotton on hand or available locally. All processing materials available locally except lubricants and vegetable oils. 33000 tons of coal required per month. No coal on hand. 20% dyeing and finishing industry can use diesel oil in lieu of coal. No oil on hand.

3. WOOL. War damage insignificant. Machinery in good operating condition. Industry 95% intact. No virgin wool on hand or available in NORTHERN ITALY. 5000 tons shoddy on hand. All processing materials available locally except lubricants and oleins. 14000 tons of coal required per month. No coal on hand. 10% of industry can use diesel oil in lieu of coal. 6 months after repair materials are made available. 85% of machinery and facilities operational. Hemp available locally for full capacity of existing installations. Assessment program critical. Farmers refusing to release hemp. Only 150 tons available in warehouses. Processing materials generally available except small deficiencies in lubricants. 1750 tons of coal required per month. None on hand. Industry now operated 10% capacity and can continue for 20 days with present stocks of materials. Italian officials estimate 30000 tons of raw hemp will be available for export from 1945 crop.

5. JUTE. 35% of spindles and 27% of looms completely destroyed by war damage. 65% of total industry is intact. No jute on hand or available locally. Jute industries have converted to manufacture of hemp products. If jute is made available, reconversion no problem. Processing materials generally available except small deficiencies in lubricants. 800 tons of coal required per month. None on hand.

6. SILK. War damage estimate at 5%. Industry 95% intact. Sufficient cocoons produced locally for full operation of industry. 1945 crop will produce approximately 4000 tons dry cocoons subject to immediate supply of coal for drying cocoons. All processing materials available locally. 8000 tons of coal required per month for drying, spinning and twisting. Industry at standstill for want of coal.

7. SYNTHETIC FIBERS. War damage negligible. Machinery intact. No raw materials on hand or available locally. 15% of cellulose requirements can be produced locally 4 months after materials are made available for repair of cellulose industry. 33000 tons of coal are required per month. None on hand.

6. MANAGEMENT. Top echelon and all subordinate branches of management are generally available.

7. LABOR. Labor at present is being paid by management even while not working in order to retain their services.

10. Coal shortage extremely critical in NORTHERN ITALY. If it were available, lignite could be used for coal at a ratio of about 3 to 1.

11. The larger part of the industry is hydro-electrically powered. Power is available.

12. Transportation in general for all textile industries has been found to be in much better condition than anticipated. Rolling stocks of motor transportation are short, but management expects this situation to improve.

13. Above report is preliminary only and believed to be somewhat over optimistic as to volume and quick results obtainable. It has not been cleared with ALLIED COMMISSION or British. Survey and investigation continuing for purpose of completing report to you by 5 June. Urgent we have information requested para 1 our F 75061 this year.
