18 Summary of local resources and work in hand	Footnotes
<p>This part of the Province engaged chiefly on agriculture the only other work in progress is that of clearing debris, repairing roads, houses and mills.</p>	<p><u>Item 6</u> - There are 14 hospitals (760 beds) in the Province, but only 1 in the devastated area. This is not operating at present, owing to rebuilding operations.</p>
	<p><u>Item 8</u> - There is only 1 ambulance in the Province and that is constantly out of order.</p>
	<p><u>Item 11</u> - About 12,000 pairs of shoes or boots and a quantity of woollen garments are urgently required and are included in the figures given.</p>
	<p><u>Item 12</u> - The bridges in this area were all demolished during the battle and the temporary ones, since erected, have been destroyed by recent flooding. At the moment it is impossible to reach Communes south of the Liri except the route 6, Sparanise and Ausonia. Also Communes North of route 6 are inaccessible as the bridges are down at Atina and Belmonte Castello. Sant'Elia Fiumerapido is inaccessible during bad weather.</p>
	<p><u>Item 13</u> - The whole area was heavily mined and little clearing has been done.</p>
	<p><u>Item 14</u> - Wood and charcoal is supplied from the remainder of the Province but it is estimated that 70,000 litres of Kerosine (i.c. 3 litres per family) is required each month.</p>
	<p><u>Item 15</u> - There is no water in the houses but Communes are supplied by fountains and wells. Electricity and gas is non-existent throughout the area;</p>
	<p><u>Item 17</u> - There are 16 small trucks (3 - 12 quintals) operating in the area and the Central Pool is wholly engaged in transporting food supplies to the warehouses of the Province. The shortage of transport is acute and liable to become serious because of lack of spare parts and tyres.</p>

Summary of local resources and work in hand

Footnotes

This part of the Province is engaged chiefly on agriculture and the only other work in progress is that of clearing debris, repairing roads, houses and mills.

- Item 6 - There are 14 hospitals (760 beds) in the Province, but only 1 in the devastated area. This is not operating at present, owing to rebuilding operations.
- Item 8 - There is only 1 ambulance in the Province and that is constantly out of order.
- Item 11 - About 12,000 pairs of shoes or boots and a quantity of woollen garments are urgently required and are included in the figures given.
- Item 12 - The bridges in this area were all demolished during the battle and the temporary ones, since erected, have been destroyed by recent flooding. At the moment it is impossible to reach Communes south of the Liri except the route 6, Sparanise and Ausonia. Also Communes North of route 6 are inaccessible as the bridges are down at Atina and Belmonte Castello. Sant'Elia Fiumerapido is inaccessible during bad weather.
- Item 13 - The whole area was heavily mined and little clearing has been done.
- Item 14 - Wood and charcoal is supplied from the remainder of the Province but it is estimated that 70,000 litres of Kerosine (i.c. 3 litres per family) is required each month.
- Item 15 - There is no water in the houses but Communes are supplied by fountains and wells. Electricity and gas is non-existent throughout the area;
- Item 17 - There are 16 small trucks (3 - 12 quintals) operating in the area and the Central Pool is wholly engaged in transporting food supplies to the warehouses of the Province. The shortage of transport is acute and liable to become serious because of lack of spare parts and tyres.
