Ref. your DF/3.32/2/CA of 15 November 1945.

1. I understand that in each month the Commissions make a certain number of proposed suspensions,and also deal with a certain number of objections to proposed suspensions previously made. Although, of course, every effort is made to deal with objections as soon as possible after they are submitted, it does not follow that for any one monthly period the number of proposed suspensions will exactly equal the number of objections dealt with plus suspensions without objection.

2. If, however, it is desidered that the monthly returns should show this balance, it is agreed that the number of hearings not yet completed can be adjusted. This last figure will then indicate the number of cases of proposed objections made in that month which have not been dealt with at the end of that month.

3. The figures in this H.Q.'s copy of the September return are accordingly being altered as suggested in para 2 of your quoted letter.

1 It is proposed to reduce the line 'Hearings not yet completed' on your returns for the period ending September, to such figure as will bring the total objections plus suspensions because no objections have been lodged to the same figure as suspensions proposed.

2 This will mean reducing the 48 Immediate to 22 and 160 Routine cases to 132.

3 Will you please let me have your comments of this proposal.

1. The figures, supplied by Provinces, from which the Regional Epuration return for the month of September was compiled have been careful checked and it has been ascertained that the discrepancies between total number of proposed suspensions and total of objections raised and cases where no objection was raised occurred only in Genoa Province.

2. The explanation given is that there has been a lag in recording the results of proposed suspension. The return submitted by Genoa province for the month of August shows a considerably larger number of proposed suspensions than objections plus cases where no objection was raised. On this respect therefore the return as previously submitted is as correct as the figures supplied by the Italian sources allow.

3. There appears to have been some misunderstanding as to the fact that "Suspensions ordered" and "suspensions ordered by Commission" should be identical and a revised return is attached amended accordingly.

4. Copies of your DF/3-32/2/CA of 30 August 45 together with a letter from Lt.Col.Elder (then Regional Legal Officer) were sent to all provinces for necessary action, but the matters raised therein and in para 3 and 4 of your letter of 29 October 45 will be further taken up.

1 Returned herewith is one copy of your report for the period ending 30 Sep 45. This has been marked.

2 When a registration has been prepared the man either objects or does not object. If he objects, his objection will be included under the heading of objection (line G). If he does not object he will be included in Line D. It follows, therefore, that Line A should equal the sum of Lines C and D. The latter carefully should answer Line A.

Line H is, for convenience in finding the total suspensions, repeated in Line E. As this is a mere repetition the two figures should be identical.

3 It is noted that 1,300 routine denazi have been investigated while 64 immediate have not been dealt with and 1,700 deferred denazi have been investigated while 824 routine have not been finished.

4 With regard to hearings, similar remarks apply. 130 routine cases have been dealt with while 49 immediate have not been heard and 180 deferred have been heard while 115 routine have not been finished.

5 These points are exactly similar to those to which attention was drawn in this office IE/3.32/2/CA of 30 Aug 45. Will you please have the report corrected and re-submitted as quickly as possible.

SUBJECT : Epuration

TO : RC LIGURIA Region

Receipt is acknowledged of your statistical return under CO 35.

1 Commissions appear to have ignored the priorities. For instance nearly 2.000 "Routine" and "Deferred" Schede have been investigated while over 300 "Immediate" ones have not been dealt with. Similarly nearly 270 "Routine" and "Deferred" Hearings have been completed while only 3 "Immediate" cases have been completed. Will you please give instructions that ALL work in connection with the deferred category will cease until the higher categories are completed. Work on "immediate" cases will be given first priority and no "immediate" case will be permitted to stand over to allow of a "routine" case being dealt with. This will apply both to the examination of schede and to the hearing of objections.

2 There seems to be some misunderstanding as to the completion of the form. When a suspension is proposed, two things only can happen: either the man objects or he does not. If he objects, his case should appear in one of the lines under "objections"; if he does not, it should, except for a few cases in which time has not expired, appear under the head of "no objection lodged". The "total objections" plus "no objections" should therefore approximately equal the suspensions proposed. The differences in the three columns are 10 - 47 - 39. These figures may be correct but they seem disproportionately large.

3 The two lines "Objections - suspensions ordered" and "Suspensions - by order" MUST be the same. The latter is only a repetition of the former in order conveniently to arrive at the total suspensions.

4 Will you please have enquiry made as to the point raised in paras 2 and 3 and submit a revised return after the necessary adjustments have been made.
