UNCLASSIFIED.

Coal requirements Venezia Giulia and Udine.

This is LAC 1 3 6 5 Reference CAL 1523. UNRRA has not agreed to allocation of coal for Venezia Giulia and Udine from allocations already made for Italy. Present allocation not sufficient to do so, as it is only sufficient for minimum needs of italian economy. Situation further aggrovated by shortfalls during recent months.

2.January requirements were met by loans from fea subject to repayment in kind. February requirements partly met by allocation 2 UK military cargoes totalling 14000 tons, also loan fea coal used.

3. UK military prepared to allocate 1 cargo March but us military not yet advised of any expected March arrivals.

4. Most important that allocations be made to cover Venezia Giulia-Udine requirements to meet needs for those areas during April, May and June as well as cover repayment of commitments for January, February and March.

5. Request you stress to combined coal committee necessity for allocation of coal for Venezia Giulia and Udine. First shipment for arrival early April.

6. Should additional allocation still be considered impracticable because combined coal committee must include Venezia Giulia and Udine, which areas remain a military responsibility for supplies, as an integral part of Italy, it will be necessary to reduce the overall allocation to UNRRA Italy for period January-June 1946 and so provide for total requirements for Venezia Giulia and Udine for period January-June 1946 under LAC Airgram 140 dated 28 December 1945 to be imported on military account.

FOR SLAC SECRETARIAT AFH. FHCEG

MAR 5 1946
UNCLASSIFIED

Ref.No.: 1565

This is MOC 528.

Subject is export of Cotton Textiles.

1. Para 2 of COM 370 and para 5 of MOC 505 refer.

2. Italian Government are preparing statement of total remaining cotton manufacturing capacity after allowing for the estimated home needs plus export commitments already made.

3. The statement will indicate broad construction types and should reach the Textile Committee early in March.

4. However it is considered by American and British Embassies, .LCOM and Italian Government that the preparation of a cotton textile export programme such as the Committee has requested, would be facilitated greatly if the Textile Committee would provide a list of known world requirement of yarn and cloth.

5. .LCOM recently received a list of minimum requirements of Near Eastern countries for cotton yarn only. As a result many of these stated needs have now been contracted for in Italy.

6. It is probable that this method would be equally successful when applied to world requirements.

(MAJH).

Declassified E.O. 12356 Section 3.3/NND No. 785017

negotiations with supply Missions for these Areas where need is greatest.

(B) Exports to Areas which are now relatively well supplied should be held to a minimum in conformity with the policy of the member countries of the Committee. There for, experts, of these textiles from Italy to the United States , Brazil, Canadan, Mexico and Argentina should not exceed three percent ,and all to the Western Hemisphere should not exceed seven percent of Italys total export availability .

(C)In view of the relatively high level of supplies in Egypt , Italian experts to this should not exceed two percent of total exports of these textiles.

(D)Committee will make no recommendation on remaining 4l present until the next Italian export program is reviewed .

4.Cotton broad woven goods export program should be given in square or metters, showing destinations by country and first and second separately.Combed and carded yarn fabrics should be shown separately, with as many specific types of c construction as possible., at least cotton duck and cotton gauze.Report total production availability procured on Jacquard and Dobby Looms.

5.Cotton yarn production and export availability for first 6 months should be in metric tons with weving and knitting yarns separately, giving country destinations wherever possible, and at least continents.

6. Monthly reports should be submitted to the combined textile covering all expert contracts placed by month of delivery as well as exports of cotton broad woven goods and cotton yarn.Both reports should indicate country of destination .These reports are an essential of the Committee program for coordinating exports of cotton broad woven goods and cotton yarn in order to insure as equitable distribution as is possible.

Declassified E.O. 12356 Section 3.3/NND No. 785017

PAT 218.

1. following receipt of your CLEAR TAP 175 SLA immediately informed MVT that they wished to sponsor Italian Governments bid for additional tonnage lift phosphate ROCK during 1946.

2. SLA has now been informed by MVT that Italian Government did not put in firm bid for movement of phosphates in time to secure allocation of UMA tonnage during February AMB that with the termination of umas activities on 2nd March theere will no longer be a pool to which the Italians can apply for extra tonnage.

3. Proposals have however been made for the setting up in the near future on an Italian shipping board composed of employement of vesel as long as there is a shortage of tonnage for meeting the requirements of the Italian UNRRA and Italian Government programmes.

4. MVT. Suggest that as and when the board is set up the Italian Government should take through the board to ensure that their own tonnage amount of which is to be increased during the next dew months is used to lift phosphates. If chartering of additional tonnage one the marked proved necessary this would also be done with the boards authority.

4634

5. Please repeat to MVT and VSA representatives NAPLES.

MOC AIRGRAM 147: 25 February 1946

TO : Combined Civil Affairs Committee
(for Combined Liberated Areas Committee)
3C-866 Pentagon Building
WASHINGTON, D. C. (15 copies)

SUBJECT : Supply of Phosphate Rock to Italy.

1. Because of the world shortage of primary foodstuffs it is important that each country should feed itself to the greatest extent possible. Italy, lacking foreign exchange with which to pay for imported foodstuffs, has a particular reason for maximizing its harvests of such primaries as bread-grains.

2. After centuries of cultivation the Italian soil produces a greatly reduced harvest unless the soil is adequately fertilized. It is estimated, to quote the most important example, that between a wheat harvest that has received no fertilizer in the preceding growing season and a wheat harvest that has received an optimum amount of fertilizer, the difference will be about a million tons of wheat.

3. The most important fertilizer needed is superphosphate, of which a normal year's requirement for the whole of Italy is about 1,700,000 tons. To manufacture this quantity of superphosphate Italy has to import about 1,000,000 tons of phosphate rock annually, normally from Tunisia.

4622

4. After 1941 the supply of phosphate rock from North Africa to Italy was interrupted and since that time only about 150,000 tons have been brought in to Italy under Allies auspices.

5. In 1945 the Italian Government tried to reach an agreement with the French Government which would

2. After centuries of cultivation the Italian soil produces a greatly reduced harvest unless the soil is adequately fertilized. It is estimated, to quote the most important example, that between a wheat harvest that has received no fertilizer in the preceding growing season and a wheat harvest that has received an optimum amount of fertilizer, the difference will be about a million tons of wheat.

3. The most important fertilizer needed is superphosphate, of which a normal year's requirement for the whole of Italy is about 1,700,000 tons. To manufacture this quantity of superphosphate Italy has to import about 1,000,000 tons of phosphate rock annually, normally from Tunisia.

4622

4. After 1941 the supply of phosphate rock from North Africa to Italy was interrupted and since that time only about 150,000 tons have been brought in to Italy under Allies auspices.

5. In 1945 the Italian Government tried to reach an agreement with the French Government which would re-start the movement of phosphate rock from Tunisia to Italy but conditions in both countries made it impossible to do more than arrange a limited barter agreement to exchange 100,000 tons of phosphate rock for Italian pyrites. Shipping difficulties were such that by the end of 1945 only 11,185 tons had been loaded.

6. In December 1945 the French had informed the Italian Government of their willingness to supply a more normal quantity of rock, but difficulties were anticipated in obtaining the shipping required to transport it from Tunisia to Italy.

(MAI #) 5/12/46 26/2/46

Declassified E.O. 12356 Section 3.3/NND No. 785017

7. Allied Commission therefore prepared a paper to demonstrate the importance of getting as much superphosphates as possible under the 1946 Italian wheat harvest and arranged for presentation of the case to the United Maritime Authority in London. (see Appendix "A" - Paper entitled "The Supply of Phosphate Rock to Italy" dated 20 December 1945.).

8. On 22 January 1946 the Italian Prime Minister addressed a letter to the Chief Commissioner, Allied Commission drawing his attention to the shipping difficulties and asking for Allied Commission's assistance. (See Appendix "B")

9. Agreement was reached between the French and Italian representatives on 2 February 1946 for a supply of 500,000 tons of phosphate rock in the year 1946 (See Appendix "C" for translation of the agreement.).

10. In order to make it clear to the United Maritime Authority that this was a firm agreement which would not be nullified by any subsequent failure to arrange satisfactory terms of payment with the French, the Italian Government gave an undertaking to Allied Commission that they would, in any event, finance the purchase of this rock by some means (See Appendix "D").

11. On 9 February 1946 Allied Commission cabled London asking the Secretariat of the Committee on Supplies to Liberated Areas to impress on the United Maritime Authority the importance to Italy of adequate supplies of phosphate rock to ensure sympathetic consideration of the Italian Government's request for additional shipping (for copy of cable, see Appendix "E").

12. Finally the Chief Commissioner, Allied Commission wrote to the Italian Prime Minister on 14 February explaining that, while Allied Commission had done and would do all it could to help Italy get the additional shipping she needed for this purpose, the responsibility for obtaining it now rests primarily with the Italian Government itself, which he urged to take prompt steps in the matter. (For copy of letter, see Appendix "F".)

United Maritime Authority in London. (see Appendix "A" - Paper entitled "The Supply of Phosphate Rock to Italy" dated 20 December 1945.).

8. On 22 January 1946 the Italian Prime Minister addressed a letter to the Chief Commissioner, Allied Commission drawing his attention to the shipping difficulties and asking for Allied Commission's assistance. (See Appendix "B")

(For copy of letter, see Appendix "F".)

13. The United Maritime Authority office in Naples has informed Allied Commission verbally that there is reason for hoping that the Italian Government will succeed in obtaining sufficient shipping throughout 1946 to enable the 500,000 tons of phosphate rock that has been contracted for to be delivered to Italy by the end of 1946.

APPENDIX "A" (continued)

THE SUPPLY OF PHOSPHATE ROCK TO ITALY

PART I : THE PROBLEM

The salient facts in the problem of meeting current needs of phosphate rock can be simply stated :

1. Negotiations with France for the supply of phosphate rock from North Africa for the 1945/46 growing season have resulted in an agreement to ship 100,000 tons only, an inadequate quantity when contrasted with the 500,000 tons allocated by the Combined Raw Materials Board, the 700,000 tons estimated current capacity of the fertilizer factories and the 1,000,000 tons of rock required to meet the normal need of the soil. (See Part II - The Need).

2. No more shipments are planned because France and Italy cannot agree on a method of payment.

3. In present conditions the Italian fertiliser factories can process 50,000 tons of phosphate rock per month. Therefore the total quantity that can be processed and applied in the 1945/46 growing season is 4 months capacity (February through May 1946) or 200,000 tons.

4. Italy has an immediate need of 200,000 tons out of the balance of the allocation by the Combined Raw Materials Board.

5. 200,000 tons of phosphate rock would cost the equivalent of approximately $ 3,400,000.

6. By a controlled use of this 200,000 tons of phosphate rock which would insure that it was used for maximizing the 1946 wheat harvest alone Italy could :

(See Part II - The Need).

2. No more shipments are planned because France and Italy cannot agree on a method of payment.

3. In present conditions the Italian fertiliser factories can process 50,000 tons of phosphate rock per month. Therefore the total quantity that can be processed and applied in the 1945/46 growing season is 4 months capacity (February through May 1946) or 200,000 tons.

4. Italy has an immediate need of 200,000 tons out of the balance of the allocation by the Combined Raw Materials Board.

5. 200,000 tons of phosphate rock would cost the equivalent of approximately $ 3,400,000.

6. By a controlled use of this 200,000 tons of phosphate rock which would insure that it was used for maximizing the 1946 wheat harvest alone Italy could :

   a. Reduce by up to 800,000 tons her demand on world stocks of wheat in the year 1946/47.

   b. Avoid the expenditure of up to $ 80,000,000 from Italy's own resources of foreign currency in the year 1946/47. (See Part IV - The Cost and the Gain).

Declassified E.O. 12356 Section 3.3/NND No. 785017

439

APPENDIX "A" (continued)

The problem can be stated as follows :

1. To demonstrate the urgency of the need for additional phosphate rock.(See Part II).

2. To review the negotiations between France and Italy to date. (See Part III).

3. To demonstrate the cost and the possible gain involved. (See Part IV).

4. To suggest a means of financing the supply of phosphate rock that will be acceptable to France and to Italy and to insure the conclusion of an appropriate agreement between the two countries at once. (See Part V).

Declassified E.O. 12356 Section 3.3/NND No. 785017

APPENDIX "A" (continued)

PART II : THE NEED

In Italy, where, after centuries of cultivation, normal crop production is dependent on the use of adequate quantities of chemical fertilisers, superphosphate is vitally necessary.

Superphosphate is made by acidulating natural rock phosphate; a process which is carried out in plants scattered throughout Italy. One ton of Tunisian rock phosphate (58% of P_2O_5 content) provides 1.6 tons of superphosphate.

Italy has no deposits of phosphate rock and, in past years, her requirements have been met by importing large quantities from French North Africa (Tunisia).

During the period 1938 through 1941, the average yearly consumption of superphosphate by the whole of Italy, was 1,688,155 metric tons, entailing a yearly import of approximately 1,000,000 tons of phosphate rock.

However, even this large consumption does not represent the true requirements of the land today for during the period 1942 to the autumn of 1944 when Italy was cut off from phosphate rock supplies, and food production was merely depleting its reserves, the soil became progressively impoverished.

From October 1944 to June 1945 there was some improvement of strictly limited extent when it was possible to import approximately 100,000 tons of phosphate rock, which produced about 167,000 tons of superphosphate representing less than one tenth of normal requirements.

It was estimated that wheat production during the 1944/45 season was short by 360,000 tons due to the lack of fertilizer (costing the Allies $ 36,000,000 for replacement from abroad), and production of other cereals was reduced proportionately. The planting of beans, which are a major item in the Italian diet, has been far below normal since 1943 because of the need for superphosphates. Since the

Declassified E.O. 12356 Section 3.3/NND No. 785017

In Italy, where, after centuries of cultivation, normal crop production is dependent on the use of adequate quantities of chemical fertilisers, superphosphate is vitally necessary.

Superphosphate is made by acidulating natural rock phosphate; a process which is carried out in plants scattered throughout Italy. One ton of Tunisian rock phosphate (58% of P_2O_5 content) provides 1.6 tons of superphosphate.

Italy has no deposits of phosphate rock and, in past years, her requirements have been met by importing large quantities from French North Africa (Tunisia).

During the period 1938 through 1941, the average yearly consumption of superphosphate by the whole of Italy, was 1,688,155 metric tons, entailing a yearly import of approximately 1,000,000 tons of phosphate rock.

However, even this large consumption does not represent the true requirements of the land today for during the period 1942 to the autumn of 1944 when Italy was cut off from phosphate rock supplies, and food production was merely depleting its reserves, the soil became progressively impoverished.

From October 1944 to June 1945 there was some improvement of strictly limited extent when it was possible to import approximately 100,000 tons of phosphate rock, which produced about 167,000 tons of superphosphate representing less than one tenth of normal requirements.

It was estimated that wheat production during the 1944/45 season was short by 360,000 tons due to the lack of fertilizer (costing the Allies $ 36,000,000 for replacement from abroad), and production of other cereals was reduced proportionately. The planting of beans, which are a major item in the Italian diet, has been far below normal since 1943 because of the need for superphosphates. Since the drought cut domestic production to almost nothing, heavy imports of beans must be planned to supply one of the normally large-producing countries. As the shortage affects all crops, extra food imports will continue to be necessary until normal imports of rock phosphate are effected and converted into basic foodstuffs and forage crops.

Declassified E.O. 12356 Section 3.3/NND No. 785017

438

APPENDIX "A" (continued)

It has been estimated that for the 1945/46 planting season any quantity up to 1,800,000 metric tons of superphosphates would produce a corresponding increase in domestic crop production and its contribution to the Italian larder. The optimum requirement, in other words, is 1,800,000 metric tons, for the manufacture of which over 1,120,000 tons of natural phosphate rock would be required.

In June 1945, having regard to the limitations imposed by reduced chemical plant capacity on the production of superphosphate, the Allied Commission for Italy reported to the Combined Raw Materials Board that Italy's minimum requirements for the year July 1945 through June 1946 were estimated to be 700,000 tons of phosphate rock. Thereupon, the Combined Raw Materials Board made an allocation of 500,000 tons to be supplied by French North Africa (Tunisia) to Italy.

Declassified E.O. 12356 Section 3.3/NND No. 785017

APPENDIX "A" (continued)

PART III : THE NEGOTIATIONS

At the beginning of July 1945, negotiations were commenced between Italy and France with a view to assuring for Italy the delivery of this allocation of 500,000 tons of phosphate rock.

Meanwhile, France had expressed her desire to acquire certain Italian products, the chief being 100,000 tons of pyrites for which an allocation was made by the Combined Boards.

It was perhaps inevitable that, during the negotiations, the supply of French phosphates to Italy should have become directly related to and dependant on the sale to France of Italian pyrites plus certain other commodities including bergamot oil, mercury, etc. Unfortunately for Italy, the quantity of phosphates to be supplied by France came to be governed by the value of commodities which Italy could supply immediately in exchange.

It was not until October 1945 that an agreement was reached between the two countries. It provided for the shipment of 100,000 tons of phosphate rock from North Africa to Italy over the period November 1945 through February 1946.

Declassified E.O. 12356 Section 3.3/NND No. 785013

acquire certain Italian products, the chief being 100,000 tons of pyrites for which an allocation was made by the Combined Boards.

Declassified E.O. 12356 Section 3.3/NND No. 785013

437

APPENDIX "A" (continued)

PART IV : THE COST AND THE GAIN

1. The cost of importing 200,000 tons of phosphate rock. The average cost of phosphate rock f.o.b. Sfax is 1,038 lire (£ 10.38) per ton. Present freight costs for delivery to Italian ports is 2 l. 6s. 6d. (£ 5.30) per ton. Allowing for port charges the cost of phosphate rock landed in Italy is therefore estimated at the equivalent of £ 17 per ton.

The total cost of financing the supply of 200,000 tons of rock (out of the balance of CMHB allocation) would therefore be the equivalent of £ 3,400,000.

2. The possible gain to Italy if 200,000 tons of phosphate rock is supplied. Since 200,000 tons is less than 40 % of the optimum requirement of phosphate rock, consideration must be given to the best use to which this quantity can be put. An uncontrolled distribution would, it is true, result in a greatly increased contribution by Italian agriculture to the Italian larder with the 1946 harvest. There is, however, one foodstuff, namely wheat, of which Italy does not produce enough to satisfy her needs on present ration scales, even with optimum supplies of superphosphate, and every ton of wheat short-produced in the harvest must be replaced by costly imports of wheat from overseas. Therefore, the gain to Italy from the provision of this 200,000 tons of phosphate rock, in terms of foreign exchange, will be almost entirely determined by the success with which the Government enforces the direction of an optimum part of this quantity towards maximising the wheat harvest in 1946.

What gain the Government might achieve by a controlled distribution with this objective can be estimated only by considering a number of theoretical factors. The step-by-step arguments which lead to the conclusion reached on this point in this paper are therefore set out in full below.

a. (1) 1 ton of Tunisian phosphate rock (58% of P2O5 content) will make 1.6 tons of superphosphate. (Industry & Utilities S/C).

4616

(2) 1 ton of superphosphate applied to the Italian wheat fields in 1945/46 would result in the production of 2 to 3 additional tons

Declassified E.O. 12356 Section 3.3/NND No. 785017

The total cost of financing the supply of 200,000 tons of rock (out of the balance of CCAB allocation) would therefore be the equivalent of £ 5,400,000.

2. The possible gain to Italy if 200,000 tons of phosphate rock is supplied. Since 200,000 tons is less than 40 % of the optimum requirement of phosphate rock, consideration must be given to the best use to which this quantity can be put. An uncontrolled distribution would, it is true, result in a greatly increased contribution by Italian agriculture to the Italian larder with the 1946 harvest. There is, however, one foodstuff, namely wheat, of which Italy does not produce enough to satisfy her needs on present ration scales, even with optimum supplies of superphosphate, and every ton of wheat short-produced in the harvest must be replaced by costly imports of wheat from overseas. Therefore, the gain to Italy from the provision of this 200,000 tons of phosphate rock, in terms of foreign exchange, will be almost entirely determined by the success with which the Government enforces the direction of an optimum part of this quantity towards maximizing the wheat harvest in 1946.

What gain the Government might achieve by a controlled distribution with this objective can be estimated only by considering a number of theoretical factors. The step-by-step arguments which lead to the conclusion reached on this point in this paper are therefore set out in full below.

a. (1) 1 ton of Tunisian phosphate rock (58% of P205 content) will make 1.6 tons of superphosphate. (Industry & Utilities S/C).

4616

(2) 1 ton of superphosphate applied to the Italian wheat fields in 1945/46 would result in the production of 2½ to 3½ additional tons of wheat in the 1946 harvest. (Food & Agriculture S/C).

(3) Therefore, 1 ton of phosphate rock rock imported and applied to the wheat fields as superphosphate in the growing season 1945/46 would result in the production of at least four additional tons of wheat in the 1946 harvest.

Declassified E.O. 12356 Section 3.3/NND No. 785017

APPENDIX "A" (continued)

b. (1) An average wheat harvest, given full application of fertilizer, would yield 6,500,000 tons in 1946 (Food & Agriculture S/C). If only 10% of the normal requirement of fertilizer is applied, the wheat harvest will be reduced by between 15% and 20% (Food & Agriculture S/C) i.e., by at least 1,000,000 tons.

(2) Therefore, every ton of phosphate rock up to a maximum of 200,000 tons, imported and applied to the wheat fields as superphosphate in the growing season 1945/46, would result in the production of at least four additional tons of wheat in the 1946 harvest.

c. (1) A normal wheat harvest in 1946 (6,500,000 tons) would not be sufficient to meet the total Italian domestic need on present ration scales. (Food & Agriculture S/C).

(2) Therefore, for every ton of wheat by which the 1946 harvest falls short of normal one additional ton must be imported from abroad in the year between the 1946 and 1947 harvests.

(3) At current prices imported wheat costs $ 100 per ton landed in Italy.

(4) Therefore, by importing 200,000 tons of phosphate rock and applying it as superphosphate to the wheat fields only in the growing season 1945/46 imports of wheat in the year between the 1946 and 1947 harvests could be reduced by 800,000 tons and the expenditure of foreign currency avoided to an amount of $ 80,000,000 in that year.

d. (1) World stocks of wheat are low due to the war in Europe and to the poor harvests in 1945 in many wheat exporting countries.

(2) An avoidable import requirement of 800,000 tons of wheat into Italy would be an avoidable drain on world stocks in the year 1946/47.

Declassified E.O. 12356 Section 3.3/NND No. 785013

tilizer is applied, the wheat harvest will be reduced by between 15% and 20% (Food & Agriculture S/C) i.e., by at least 1,000,000 tons.

(2) Therefore, every ton of phosphate rock up to a maximum of 250,000 tons, imported and applied to the wheat fields as superphosphate in the growing season 1945/46, would result in the production of at least four additional tons of wheat in the 1946 harvest.

c. (1) A normal wheat harvest in 1946 (6,000,000 tons) would not be sufficient to meet the total Italian domestic need on present ration scales. (Food & Agriculture S/C).

(2) Therefore, for every ton of wheat by which the 1946 harvest falls short of normal one additional ton must be imported from abroad in the year between the 1946 and 1947 harvests.

(3) At current prices imported wheat costs $ 100 per ton landed in Italy.

(4) Therefore, by importing 200,000 tons of phosphate rock and applying it as superphosphate to the wheat fields only in the growing season 1945/46 imports of wheat in the year between the 1946 and 1947 harvests could be reduced by 800,000 tons and the expenditure of foreign currency avoided to an amount of $ 80,000,000 in that year.

d. (1) World stocks of wheat are low due to the war in Europe and to the poor harvests in 1945 in many wheat exporting countries.

(2) An avoidable import requirement of 800,000 tons of wheat into Italy would be an avoidable drain on world stocks in the year 1946/47.

(3) Therefore, failure to import phosphate rock and to apply it to the Italian wheatfields as superphosphate in the growing season 1945/46 would result in Italy making avoidable demands on world stocks of wheat in the year between the 1946 and 1947 harvests.

Declassified E.O. 12356 Section 3.3/NND No. 785017

APPENDIX "A" (continued)

e. (1) The UNRRA program of supplies to Italy will not continue beyond the end of 1946 and present plans are that UNRRA will not finance the import of wheat after the 1946 harvest.

(2) Therefore UNRRA funds will not be available to finance the importation of wheat to replace any quantity by which the 1946 wheat harvest falls short of normal.

(3) No other gratuitous aid (of major importance) is expected to be available to Italy after the UNRRA operation finishes.

(4) Therefore Italy must itself finance, from its own resources of foreign exchange the importation of wheat to replace any quantity by which the 1946 harvest falls short of normal.

f. Therefore, in theory, by importing 200,000 tons of phosphate rock and applying it as superphosphate to the wheat fields only, in the growing season 1945/46, Italy could :

(1) Reduce by 800,000 tons her demand on the world stocks of wheat in the year 1946/47.

(2) Avoid the expenditure of up to $ 80,000,000 from her own resources of foreign currency in that year.

Declassified E.O. 12356 Section 3.3/NND No. 785017

APPENDIX "A" (continued)

PART V : PAYMENT

At first sight, the problem of financing the supply of phosphate rock from French North Africa to Italy may appear to be in the nature of negotiating a normal trade agreement, but the foregoing examination shows that there is at least one aspect of the problem of international importance over and above the interests of France and Italy.

The party which stands to gain most from the conclusion of an agreement to supply the phosphate rock is Italy, as has been clearly demonstrated, and the question the Italian Government has to answer - is it to Italy's advantage to find the means of financing now a $ 3,500,000 purchase which could be the means of saving up to $ 80,000,000 expenditure of Italian foreign currency holdings a year from now ? - can only be answered in the affirmative.

Italy can, of course, offer to pay France in goods or services. That, however, was the basis of the negotiations which dragged on from July through October 1945, and resulted in the agreement to ship only 100,000 tons. There is no practical basis for hope that further negotiations on this basis, for an exchange of Italian goods and services for French phosphate rock, could possibly be successfully concluded before it is too late to get the resultant superphosphate under the 1946 crop.

It is the same factor of pressing urgency at this late date that appears to make it undesirable that Italy should now endeavour to negotiate with France on the basis of France supplying the rock on credit terms covering a part or the whole of the purchase price. Such negotiations necessarily conducted through diplomatic channels, would by their very nature be so prolonged that even a successful conclusion would in all probability be reached too late to affect the 1946 harvest.

It appears clear that, because of the time factor, France should now be asked to sell the 200,000 tons of rock on a "cash on the barrelhead" basis.

Italy's present resources of unblocked foreign currencies are very limited but are sufficient to cover an offer to France of $ 3,500,000 in "good" currency.

Declassified E.O. 12356 Section 3.3/NND No. 785017

of international importance over and above the interests of France and Italy.

The party which stands to gain most from the conclusion of an agreement to supply the phosphate rock is Italy, as has been clearly demonstrated, and the question the Italian Government has to answer - is it to Italy's advantage to find the means of financing now a $ 3,500,000 purchase which could be the means of saving up to $ 80,000,000 expenditure of Italian foreign currency holdings a year from now ? - can only be answered in the affirmative.

Italy can, of course, offer to pay France in goods or services. There is no practical basis for hope that further negotiations on this basis, for an exchange of Italian goods and services for French phosphate rock, could possibly be successfully concluded before it is too late to get the resultant superphosphate under the 1946 crop.

It is the same factor of pressing urgency at this late date that appears to make it undesirable that Italy should now endeavour to negotiate with France on the basis of France supplying the rock on credit terms covering a part or the whole of the purchase price. Such negotiations necessarily conducted through diplomatic channels, would by their very nature be so prolonged that even a successful conclusion would in all probability be reached too late to affect the 1946 harvest.

It appears clear that, because of the time factor, France should now be asked to sell the 200,000 tons of rock on a "cash on the barrelhead" basis.

Italy's present resources of unblocked foreign currencies are very limited but are sufficient to cover an offer to France of $ 3,500,000 in "good" currency.

Alternatively, there seems little doubt that, on the basis of the kind of review made in this paper, a case could be made out to justify UNRRA financing the purchase. The UNRRA supply program for Italy will be limited to a fixed sum of money. If Italy should request UNRRA to include in its program the financing of this purchase of phosphate rock and UNRRA agrees, she would have to accept a corresponding cutback elsewhere in the program.

APPENDIX "B"

Translation

The President of the Council of Ministers

56340/1260.22/19.8 Rome, 22 January 1946

Dear Admiral,

For a long time, the A.C., realizing the importance of phosphate supplies, tried to receive Italian requests with the greatest comprehension.

During the period October 1944-February 1945, while transports from North Africa were used for war operations, 100,000 tons of mineral were imported; such an amount was considerable inferior to the requirements, but it represented the maximum of shipping that could be put at our disposition at that time.

However, the supplies for the 1945-46 campaign have been considerably reduced in spite of the change in general conditions.

In the agreements made in spring between the Italian Government and the Allied Governments, the following allocation was made to Italy for July 1945-June 1946 campaign:

700,000 tons of phosphate of which 500,000 were to be supplied certainly and rapidly; 200,000 to be supplied according to the production possibilities of the Italian plants.

Of this amount, only 9,000 (nine thousand) tons have arrived till now.

The position of phosphate imports from North Africa is at present as follows:

a. From the commercial and monetary point of view, the agreement with the French Government, reached after long negotiations, include a compensation on the temporary basis of 100,000 tons Italian pyrite against 80,000 tons phosphates only, a final settlement according to the arbitral decisions of the Combined Boards excepted. More negotiations are taking place; the Italian side, to obtain a larger amount of phosphate, agreed to other requests for compensations in essential oils and essences, amounting to 77 million lire, while the possibility of exporting raw silk of which 250,000 kg. have been asked by the French side is being examined. Long ago, the State Department sent a memorandum on such a

Of this amount, only 9,000 (nine thousand) tons have arrived till now.

The position of phosphate imports from North Africa is at present as follows:

a. From the commercial and monetary point of view, the agreement with the French Government, reached after long negotiations, include a compensation on the temporary basis of 100,000 tons Italian pyrite against 80,000 tons phosphates only, a final settlement according to the arbitral decisions of the Combined Boards excepted. More negotiations are taking place; the Italian side, to obtain a larger amount of phosphate, agreed to other requests for compensations in essential oils and essences, amounting to 77 million lire, while the possibility of exporting raw silk of which 250,000 kg. have been asked by the French side is being examined. Long ago, the State Department sent a memorandum on such a matter to the Allied Commission to bring the negotiations to a speedy end.

4614

Declassified E.O. 12356 Section 3.3/NND No. 785017

b. From the point of view of transport, the shipping made available till now is completely inadequate. It would be necessary for allied nations to put at the disposition of Italy a number of ships assuring regular and timely supplies of such minerals; to this end, the possibility of using means belonging to the Navy might be studied.

On the other hand, for the present moment, the Italian Government doesn't see the possibility of taking advantage of import currents other than the one from North Africa. The negotiations which are taking place with the authorities of North America gave no positive results, for it is impossible to obtain the necessary shipping, and negotiations with UNRRA have just begun, and the hoped for concrete result won't materialize in time.

Therefore, in the present conditions, the fertilizer to be distributed to Italian farmers is so inadequate considering the requirements, that the next crop is seriously compromised. To this we must add that the transforming of the raw mineral into fertilizer would give work to the Montecatini plants and to other Italian plants which are at present at a standstill because of the lack of raw material, thus causing unemployment and the ensuing inconveniences.

I thought it well to bring this matter to your attention in all its particulars, trusting in your support with the Allied authorities in charge, whether Allied or French, so that all the obstacles to a speedy and regular supplying of such a mineral may be removed.

Believe me,

Sincerely yours,

/s/ Alcide De Gasperi

APPENDIX "C"

AGREEMENT No. 3 to the Contract of Phosphate F.C.B.
No. 54 of 17 May, 1945

Between the undersigned:

LE COMPTOIR DES PHOSPHATES DE L'AFRIQUE DU NORD, represented by monsieur LE CORNEC, President-managing director general, on one side and

LA SOCIETA' ITALIANA PER IL COMMERCIO ESTERO ANONIMA (S.I.C.E.A.) Via Marche 1 - Roma, in substitution of Istituto Commercio Estero (I.C.E.) Rome, for the purchase of phosphate rock for Italy, represented by signor Salvatore LICCIARDI, on the other side

it has been agreed as follows:

Article 1.

The contract no. 54 of 17 May 1945 provides that in the case that the franc should undergo variations greater than 5% in relation to the Pound Sterling equal to 200 Frs. (two hundred francs), the COMPTOIR should have the right to revise its prices.

The 63,500 (sixty three thousand five hundred) tons which were object of this contract have been delivered.

Article 2.

The agreement No. 1 to the above mentioned contract provided that an additional tonnage of 50,000 tons (fifty thousand) to be delivered on account of year 1945, should be sold at the same conditions. On the basis of this contract 11,165 tons (eleven thousand hundred and eighty five) have been loaded before the "stabilization" of the franc. This 11,165 tons represents a total sum of Frs. 4,984,399 (four million nine hundred eighty four thousand three hundred ninety nine) which have been charged to the account of S.I.C.E.A. and have not yet been paid for in Paris.

4613

Article 3.

On 30 October, 1945, the COMPTOIR DES PHOSPHATES entered into an agreement No. 2 with S.I.C.E.A. for deliveries from

Between the undersigned:

LE COMPTOIR DES PHOSPHATES DE L'AFRIQUE DU NORD, represented by monsieur LE CORNEC, President-managing director general, on one side and

LA SOCIETA' ITALIANA PER IL COMMERCIO ESTERO ANONIMA (S.I.C.E.A.) Via Marche 1 - Rome, in substitution of Istituto Commercio Estero (I.C.E.) Rome, for the purchase of phosphate rock for Italy, represented by signor Salvatore LICCIARDI, on the other side

it has been agreed as follows:

Article 1.

The contract no. 54 of 17 May 1945 provides that in the case that the franc should undergo variations greater than 5% in relation to the Pound Sterling equal to 200 Frs. (two hundred francs), the COMPTOIR should have the right to revise its prices.

The 63,500 (sixty three thousand five hundred) tons which were object of this contract have been delivered.

Article 2.

The agreement No. 1 to the above mentioned contract provided that an additional tonnage of 50,000 tons (fifty thousand) to be delivered on account of year 1945, should be sold at the same conditions. On the basis of this contract 11,185 tons (eleven thousand hundred and eighty five) have been loaded before the "stabilization" of the franc. This 11,195 tons represents a total sum of Frs. 4,984,399 (four million nine hundred eighty four thousand three hundred ninety nine) which have been charged to the account of S.I.C.E.A. and have not yet been paid for in Paris.

4613

Article 3.

On 30 October, 1945, the COMPTOIR DES PHOSPHATES entered into an agreement No. 2 with S.I.C.E.A. for deliveries from 1 January 1946, until 28 February, of an additional tonnage of 50,000 tons (fifty thousand) of which 10,000 (ten thousand) were to be loaded in December 1945 in anticipation.

The prices in this agreement have been established in U.S.A. dollars on the basis of:

quality	65/68%	$12.08
"	63/65%	$10.08
"	58/63%	$ 8.98

Declassified E.O. 12356 Section 3.3/NND No. 785017

In the letter dated 29 December, 1945, S.I.C.E.A. informed the COMPTOIR DES PHOSPHATES that the additional agreement No.2 had been duly signed and the COMPTOIR loaded the ships "CHERCA" and "SFINGE" respectively on 3 and 9 January.

The total amounts of the invoices sent to S.I.C.E.A. are the following:

SS "CHERCA" 7,806.01 tons at $12.06 = $94,296.82 (ninety four thousand two hundred ninety six dollars and sixty two cents) - expenses in port Frs. 159,107.70 (hundred fifty nine thousand, seven hundred seven Frs. seventy centimes).

SS "SFINGE" 7,096,37 tons at $9.98 = $83,725.45 (sixty three thousand seven hundred twenty five dollars and forty five cents).

These invoices have not yet been paid in Paris.

Article 4.

In consequence of the stabilization of the 26 December 1945, it has been decided:

a. to establish prices for all loadings after 1 January 1946, both for the tonnages included in the above mentioned agreements and for the new quantities contracted for subject of further contracts at the following prices f.o.b.:

65/68%	$9.00
63/65%	$7.50
58/63%	$6.30

The buyers are empowered to pay the accounts in French francs at the rate of exchange in Paris on the day of payment.

b. as to annex to Contract No. 54 of 17 May, 1945, the rates of the agency will be, after 1 January, 1946, £ 15.00 (fifteen pounds sterling) instead of 3,000 (three thousand) francs, and the demurrage £ 0.0.4 (four pence) instead of Frs. 3 (three) by ton of gross tonnage by day or fraction of day pro rata.

Declassified E.O. 12356 Section 3.3/NND No. 785017

...ly signed and the COMPTOIR loaded the ships "CHERON" and "SFINGE" respectively on 5 and 9 January.

The total amounts of the invoices sent to S.I.C.E.A. are the following:

SS "CHERON" 7,805.01 tons at $12.08 = $94,296.62 (ninety four thousand two hundred ninety six dollars and sixty two cents) - expenses in port Frs. 159,107.70 (hundred fifty nine thousand, seven hundred seven Frs. seventy centimes).

SS "SFINGE" 7,096,37 tons at $8.96 = $63,725.45 (sixty three thousand seven hundred twenty five dollars and forty five cents).

These invoices have not yet been paid in Paris.

Article 4.

In consequence of the stabilization of the 26 December 1945, it has been decided:

a. to establish prices for all loadings after 1 January 1946, both for the tonnages included in the above mentioned agreements and for the new quantities contracted for subject of further contracts at the following prices f.o.b.:

65/68% $9.00
63/65% $7.50
58/63% $6.30

The buyers are empowered to pay the accounts in French francs at the rate of exchange in Paris on the day of payment.

b. as to annex to Contract No. 54 of 17 May, 1945, the rates of the agency will be, after 1 January, 1946, £ 15.00 (fifteen pounds sterling) instead of 3,000 (three thousand) francs, and the demurrage £ 0.0.4d (four pence) instead of Frs. 3 (three) by ton of gross tonnage by day or fraction of day pro rata.

Article 5.

The COMPTOIR reserves the right to modify its prices at any time with two months notice: the Buyers reserve the right to cancel the quantities still to be delivered after the end of the two month period, in the case that a new agreement on prices has not been reached in the two month period, and the Buyers were not willing to accept the new prices settled by the COMPTOIR.

Declassified E.O. 12356 Section 3.3/NND No. 785017

Declassified E.O. 12356 Section 3.3/NND No. 785017

Article 6.

The COMPTOIR declares that it is willing to adjust the invoices relating to the ships "CHERCA" & "SFINGE" to the conditions settled in Article 4.

Consequently the amounts to be paid are the following:

SS "CHERCA" $70,254.09 (seventy thousand two hundred fifty four dollars and nine cents) instead of $34,236.62 expenses in port Frs. 163,305.20 (hundred sixty three thousand three hundred and three frs. twenty centimes) instead of Frs. 159,107.70.

SS "SFINGE" $44,707.13 (forty four thousand seven hundred and seven dollars, thirteen cents) instead of $63,725.45.

Article 7.

The quantities to be delivered for 1946 shall include 88,000 tons (eighty eight thousand tons) of the quantities already contracted for and not yet delivered, with an additional tonnage which shall bring up the entire sales for the year to about 500,000 (five hundred thousand) tons.

The quantities to be shipped initially shall be those not yet loaded: that is, 88,000 (eighty eight thousand) tons.

Of these 88,000 tons 54,000 (fifty four thousand) tons shall be taken on the choice of the COMPTOIR of 58/63% or 63/65% quality, and 34,000 (thirty four thousand) in 65/68% quality.

After these quantities have been shipped the other loadings shall be in lots in the following proportions:

50% in 58/63% or 63/65% at the choice of the sellers
50% in 65/68%.

The COMPTOIR stipulates that every month 10,000 (ten thousand) tons shall be shipped from Tunis, quality Kouba-Djerda.

The deliveries shall be made with the greatest monthly regularity possible. The Sellers declare to the Buyers that only exceptionally will it be possible to reach a monthly delivery of 60,000 (sixty thousand) tons.

4612

Article 8.

On receipt of the invoices or occasional debits for advance

Subsequently the amounts to be paid are the following:

SS "CHERCA" $70,254.09 (seventy thousand two hundred fifty four dollars and nine cents) instead of $94,296.82 expenses in port Frs. 163,303.20 (hundred sixty three thousand three hundred and three frs. twenty centimes) instead of Frs. 159,107.70.

SS "SFINGE" $44,707.13 (forty four thousand seven hundred and seven dollars, thirteen cents) instead of $63,725.45.

Article 7.

The quantities to be delivered for 1946 shall include 88,000 tons (eighty eight thousand tons) of the quantities already contracted for and not yet delivered, with an additional tonnage which shall bring up the entire sales for the year to about 500,000 (five hundred thousand) tons.

The quantities to be shipped initially shall be those not yet loaded: that is, 88,000 (eighty eight thousand) tons.

Of these 88,000 tons 54,000 (fifty four thousand) tons shall be taken on the choice of the COMPTOIR of 58/63% or 63/65% quality, and 34,000 (thirty four thousand) in 65/68% quality.

After these quantities have been shipped the other loadings shall be in lots in the following proportions:

50% in 58/63% or 63/65% at the choice of the sellers
50% in 65/68%.

The COMPTOIR stipulates that every month 10,000 (ten thousand) tons shall be shipped from Tunis, quality Kouba-Djerda.

The deliveries shall be made with the greatest monthly regularity possible. The Sellers declare to the Buyers that only exceptionally will it be possible to reach a monthly delivery of 60,000 (sixty thousand) tons.

4612

Article 8.

On receipt of the invoices or occasional debits for advance payments, S.I.C.E.A. shall (according to the agreement on Franco-Italian payments, that is, through the Italian Exchange Office) pay through the debit of the account in francs of the Exchange Office at the Banque de France in Paris, the amount in francs of the invoices of the COMPTOIR. For this purpose the Italian Ex-

Declassified E.O. 12356 Section 3.3/NND No. 785017

change Office shall ask the Banque de France to transfer the equivalent sum to the credit of the COMPTOIR des PHOSPHATES de l'Afrique du Nord at the COMPAGNIE ALGERIENNE DE CREDIT ET DE BANQUE, 50 rue d'Anjou in Paris. S.I.C.E.A. shall ask the Italian Exchange Office to order this transfer by telegram and S.I.C.E.A. shall inform the COMPTOIR by the same means.

The COMPTOIR des PHOSPHATES de l'Afrique du Nord states that it shall be, with great regret, obliged to suspend the loadings if it shall not be regularly credited in Paris in the amounts which are due to it. Particularly the settling of the invoices detailed in articles 4 and 8 here above, as well as the amounts to be requested for the deliveries in January and February, must be settled at the latest by 1 March, 1946.

Article 9.

In the case that the goods come under any form of duty, taxes, customs from the French Government or the Governments of Algeria or Tunis, the price of the goods shall be raised by the same amount.

However, the COMPTOIR des PHOSPHATES shall inform S.I.C.E.A. by cable, stating the amount of the aforesaid additional charges.

In the case that S.I.C.E.A. would not agree to accept these additional expenses it must inform the COMPTOIR by cable within two weeks, stating the quantity which it has already accepted and wishes to be loaded.

For the goods already loaded, having been accepted the Buyers will pay the supplementary charges.

It is finally stated that for all the goods which are loaded on ships which are in the port of loading or are being loaded at the time of introduction of these new charges the Buyers shall bear these new charges excepting the case in which the contract has been cancelled by S.I.C.E.A. as indicated here above.

Article 10.

The execution of this contract shall depend upon the agreement of the competent authorities in the two countries.

It is in no other way derogated to the clauses and conditions of deal No. 84.

Declassified E.O. 12356 Section 3.3/NND No. 785013

MINISTERO DEL COMMERCIO CON L'ESTERO
(Ministry for Foreign Trade)

Rome, 2 February 1946

SUBJECT: Purchase of Tunisian phosphate rock.

To : Allied Commission
Commerce Sub-Commission

1. Referring to the conversation you had with Comm. Di Nola, concerning the above indicated subject, information is given that the contract for purchasing 500,000 tons of phosphate rock will be signed today between COMPTOIR des PHOSPHATES, on behalf of the sellers and S.I.C.E.A. on behalf of the buyers.

2. This contract provides for the delivery in 1946 of 88,000 tons, which are still to be delivered on the quantities previously negotiated but not yet delivered, plus a further quantity sufficient to bring the total to 500,000 tons, subject of today's contract.

3. It is also added that the Italian Government expects soon to reach an agreement with the French Government whereby it will be possible to provide for the payment of phosphate rock by exchange with part of the goods which Italy will be able to supply to France.

4. In the case, which is considered improbable, that the agreement under discussion cannot be concluded, the Italian Government will provide in a different way to put at the disposal of Italian buyers the means of foreign payment necessary to pay for the imported phosphate rock.

4611

5. An urgent request is addressed to AC to apply to the Allied Governments for the provision of the necessary ships, for the importation of phosphate rock.

6. It is furthermore added [illegible]

APPENDIX "F"

Ref: AC/5201/2/Commerce 14 February 1946

My dear Mr. Prime Minister:

I have studied your letter of 22 January on the subject of shipments of phosphate rock from North Africa to Italy.

As you are aware, the previous agreement between the French and your Government was not concluded until the first week in November, after protracted negotiations. Had the agreement been concluded some months earlier, shipping was available in the Mediterranean but those vessels have now been returned to Great Britain and other countries. It is regrettable that this shipping could not have been used, because supplies of phosphate rock were thereby lost to Italy which, converted to superphosphate, would have improved the 1946 harvest and thereby lessened Italy's need to draw on the world's already short food supplies.

The new agreement between the Societa Italiana per il Commercio Estero and Le Comptoir des Phosphates de l'Afrique du Nord, you will agree, changes the situation as outlined in your letter. In view of the great importance to the Italian economy of an adequate supply of fertilizers, I am pleased to note that the new contract is for 500,000 tons of rock to be delivered in 1946.

Allied Commission will do all in its power to help you to obtain the shipping required to carry this quantity of rock to the Italian ports where it is needed. I must remind you, however, that the responsibility for obtaining this shipping now rests primarily with the Italian Ministries concerned, which should present the Government's case, through your Ministry of Marine, to the United Maritime Authority.

I am informed that two ships are already assigned to the phosphate rock movement, the "SFINGE" (7,200 tons) and the "CHERCA" (7,800 tons). With an additional 15,000 tons of shipping (including two ships of 3/4000 tons to carry 10,000 tons a month from Tunis where larger ships cannot anchor), there would be a sufficient capacity available to deliver to Italian ports in 1946 the total tonnage agreed on in the new contract at the rate of 45,000 tons of rock per month. This calculation is based on the assumption that 30,000 tons of shipping remains continuously and exclusively in this service for the remainder of 1946.

4610

I would urge, therefore, that the interested Ministries,

Declassified E.O. 12356 Section 3.3/NND No. 785017

As you are aware, the previous agreement between the French and your Government was not concluded until the first week in November, after protracted negotiations. Had the agreement been concluded some months earlier, shipping was available in the Mediterranean but those vessels have now been returned to Great Britain and other countries. It is regrettable that this shipping could not have been used, because supplies of phosphate rock were thereby lost to Italy which, converted to superphosphate, would have improved the 1946 harvest and thereby lessened Italy's need to draw on the world's already short food supplies.

The new agreement between the Societa Italiana per il Commercio Estero and Le Comptoir des Phosphates de l'Afrique du Nord, you will agree, changes the situation as outlined in your letter. In view of the great importance to the Italian economy of an adequate supply of fertilizers, I am pleased to note that the new contract is for 500,000 tons of rock to be delivered in 1946.

Allied Commission will do all in its power to help you to obtain the shipping required to carry this quantity of rock to the Italian ports where it is needed. I must remind you, however, that the responsibility for obtaining this shipping now rests primarily with the Italian Ministries concerned, which should present the Government's case, through your Ministry of Marine, to the United Maritime Authority.

I am informed that two ships are already assigned to the phosphate rock movement, the "SFINGE" (7,200 tons) and the "CHERCA" (7,800 tons). With an additional 15,000 tons of shipping (including two ships of 3/4000 tons to carry 10,000 tons a month from Tunis where larger ships cannot anchor), there would be a sufficient capacity available to deliver to Italian ports in 1946 the total tonnage agreed on in the new contract at the rate of 45,000 tons of rock per month. This calculation is based on the assumption that 30,000 tons of shipping remains continuously and exclusively in this service for the remainder of 1946.

4610

I would urge, therefore, that the interested Ministries, through the Ministry of Marine, should acquaint the United Maritime Authority at once with the importance of these supplies to Italy and ask the Authority to ensure that not only the two ships presently assigned but also the additional ships of the total tonnage I have indicated above, are kept continuously on this haul with the object of delivering the balance of the 500,000 tons by the end of the current year.

Declassified E.O. 12356 Section 3.3/NND No. 785017

A cable has been sent to London asking that the urgency of your need shall be made clear to the United Maritime Authority there. The application by your Ministry of Marine for this shipping will thereby be assured of sympathetic consideration.

Yours very truly,

/s/ M. S. LUSH
Brigadier,
Acting Chief Commissioner

Dott. Alcide DE GASPERI
President of the Council of Ministers
Italian Government

UNCLASSIFIED:

This is CCM 396. Refer MCC 496 MD 426, CCM 364, 369, 380 (Italo-Spanish trade agreement).

1. See CCM 380 for Goatskins approval .

2. CFB advises that all 1945-46 pack of canned fish excluding anchovies from Iberian Peninsula has been allocated to United Kingdom Government for distribution in United Kingdom and other European Countries which have received allocations from Spain and Portugal. The total prospective purchase was 3300 tons against which only 1250 tons are now expected to be delivered. Since Italy has already received fish allocations against 1945/46 requirements submitted through UNRRA and CLAC, CFB cannot agree to further diminution of Iberian supply since no replacement is available for Countries to which this supply has been allocated. However should the 300 tons accumulated purchase be tunafish there would be no objection to the transaction. Should the transaction cover canned fish from the 1946/47 pack the CFB should be promptly advised so that this Italian request can be considered 4598 -- allocation of such pack is made .

3. CFB has no objection 1 ton vitamin A oil.

[illegible] requirement for 4600 t.

This is CAL 1523. Coal requirements

1. Apparently CAL 1517 not understood by you. Combined coal committee was requested to make an allocation for VENEZIA GIULIA and UDINE on basis combined military responsibility. Combined coal committee stated that no additional coal could be allocated for any areas in ITALY and that supply for VENEZIA GIULIA and UDINE would have to come out of allocations already MDE for ITALY (see para 3 coal 1517). Therefore, in CAL 1517 para 1 you were requested to consult Allied Commission and other inter agencies and agree a readjustment of these allocations so as to provide allocation for VENEZIA GIULIA and UDINE. This does not mean participation by UNRRA in these areas. Once the allocations are readjusted to provide for these areas, responsibility for supply will 0 in the combined military.
2. Para 2 CAL 1517 stated that after readjustment of exsting allocations, shipment of 2 months supply would be authorized. Since you have not determined these as yet, your call forward as stated in para 3 LAC 1360 cannot be recognized hilldring.

OUTGOING MESSAGE
HEADQUARTERS ALLIED COMMISSION

FROM : HQ ALCOM 9 February 1946

TO : AGWAR FOR CCS FOR CCAC FOR CLAC WAROF (LONDON)
FOR SLAC SECRETARIAT AFHQ FHGEG

FEB 15 1946

Ref.No. : 1038 UNCLASSIFIED

This is MOC 511.

Subject is Cotton Textile exports.

1. COM 370 refers.

2. In accordance with paragrahs 2 and 3 of COM 370, Italian Government has been asked:
(A) to prepare programme for first half 1946. See MOC 505.
(B) To send monthly reports on actual exports.

3. Italian Government claim that decision of Committee in refusing to permit exports to Western Hemisphere and Egypt is :
(A) Prejudicial to future trade by depriving Italy of traditional markets,
(B) Certain to limit Italys industrial development by preventing her recovery of foreign currency with which to pay for raw cotton.

4. Italy has three methods of obtaining raw cotton:
(A) From UNRRA
(B) On credit which is almost exclusively American
(C) Retention of percentage of temporarily imported cotton.

5. Regarding credit, Italian firms have already been granted import licenses for 9,000 tons raw cotton on credit from US with many more offers pending. It will be difficult if not impossible for Italian firms to pay for such cotton if the South American markets are denied to them.

4577

Declassified E.O. 12356 Section 3.3/NND No. 785017

This is MOC 511.

Subject is Cotton Textile exports.

1. COM 370 refers.

2. In accordance with paragrahs 2 and 3 of COM 370, Italian Government has been asked:
(A) to prepare programme for first half 1946. See MOC 505.

4577

S.R.H. 16/2/46

(MAJ 41)

Declassified E.O. 12356 Section 3.3/NND No. 785017

6. Regarding temporary imports, Italian concerns have firm offers:

(A) For 4,000 tons US cotton from which 646 tons cloth would be reexported to US.

(B) 1,800 tons Egyptian cotton against reexport 390 tons cotton cloth to Egypt.

Committees decision deprives Italy of the important balances of raw cotton.

7. During nine years, 1927 through 1929, 1932 through 1934, and 1937 through 1939, 14.5% of total cotton cloth exports went to Egypt and 24.5% to South Africa.

8. ALCOM support Italy Government protest and consider that even if US is barred to Italian exporters, the South American and Egyptian markets are necessary to Italian industrial revival, as well as to building up of Italys foreign exchange position so that subsidized supply programs will not have to go on for ever.

9. Decision of Textile Committee is moreover directly contrary to the general policy of Allies on revival and expansion of world trade and employment, which ALCOM and Embassies have been trying to interpret to Italian Government.

FEB 13 1946

Ref.No.: 1039

UNCLASSIFIED

This is TAF 175.

Subject is Phosphate Rock for Italy.

1. PAT 203 refers.

2. Contract signed 5th February between Comptoir des Phosphates de L'Afrique Du Nord and SICEA (Societa Italiana per il Commercio Estero Anonima , which has replaced Istituto Commercio Estero as Italian Government agent for the purchase of phosphate rock)for the supply of 5 hundred thousand tons rock in 1946. This tonnage includes 88 thousand tons balance of old contract undelivered at 1st January 1946.

3. Italian Government hopeful of concluding commercial agreement with France in near future wh ich would provide inter alia for payment for phosphate rock supplied under above contract. Meanwhile, Government has given written assurance to Allied Commission that in the event, considered by Government as improbable, that commercial agreement with France is not concluded it will provide in some other way for the paymen t by the buyers for phosphate rock supplied under this contract.

4. SICEA strongly desires deliver Italy by end of March 58,850 tons balance of old contract still undelivered.

5. Ships presently assigned this trade are Sfinge 7,200 tons and Cherca 7,800 tons. ACCOM supports SICEA request assignment of additional 15,000 tons of shipping (including two ships of 3/4,000 tons to load 10,000 tons rock per month at Tunis where larger ships cannot anchor. With this additional shipping it will probably be possible to complete desired deliveries by end March and if 30,000 tons of shipping is continuously engaged exclusively in this service rest of 1946 can deliver balance of contracted supply in the year on basis of expected three trips every two months.

TO AGWAR WASHINGTON INFO WAR OF LONDON - ALCOM ROME FOR CCS FOR CCAC FOR CIVIL AFFAIRS,

UNCLASSIFIED.

THIS IS L&C 136c.

Reference L&C airgram 139 and 140 and CAL 1517 dated 4 February 46.

Consultation with Allied Commission confirms that UNRRA is not prepared to continue making allocations to Venezia Giulia and Udine and that UNRRA will not be receiving sufficient coal to meet even essential commitments in Italian Government portion of Italy. UNRRA Italian Mission is informing UNRRA Washington of this position.

2. You will now have seen MAT 991 and MAT 992 the provisions of which would seem to preclude participation by UNRRA in these areas.

3. In view of the foregoing HELPUOGOUR requirements under L&C airgram 139 and 140 be reconsidered by you and approved. Meanwhile we are calling forward 2 months (2) supply as per para 2 CAL 1517.

Consultation with Allied Commission confirms that UNRRA is not prepared to continue making allocations to Venezia Giulia and Udine and that UNRRA will not be receiving sufficient coal to meet even essential commitments in Italian Government portion of Italy. UNRRA Italian Mission is informing UNRRA Washington of this position.

2. You will now have seen MAT 991 and MAT 992 the provisions of which would seem to preclude participation by UNRRA in these areas.

3. In view of the foregoing HEPUOGOUR requirements under L&C airgram 139 and 140 be reconsidered by you and approved. Meanwhile we are calling forward 2 months (2) supply as per para 2 CAL 1517.

TO : AGWAR FOR CCS FOR CCAC FOR CLAC RPTD WAROF (LONDON) FOR SLAO SECRETARIAT RPTD AFHQ FHGEG

Ref.No. : 931 UNCLASSIFIED

This is MOC 505.

Subject is Exports of Cotton Textiles against Import of Raw Cotton.

1. COM 370 refers.

2. In addition to Sweden (MOC 501) and Switzerland (MOC 502) temporary imports of cotton are being arranged at an increasing rate.

3. Following have been approved under authority COM 370.

A Quantity in tons to be imported	B Country of origin	C Weight in tons of yarn to be exported	D Weight in tons of cloth to be exported	E Destination
1. 1247	US and Brazil	720		Denmark
2. 1080	Egypt		252	France
3. 1500	Egypt	300	300	Iraq
4. 1350	Egypt	300	200	Lebanon
5. 3500	Brazil		1250	Nigeria
6. 5165	Egypt and US	2850		Norway
7. 9000	Egypt	4554	457	Palestine
8. 3250	Egypt	700	500	Syria
9. 1550	Egypt	300	250	Transjordan
10. 1000	Egypt	500		United Kingdom

4. In addition, under same headings, the following have been proposed by Italian Government but approval has been refused:

1. 4600	US	650	United States
2. 115	Brazil	35	Brazil

Ref.No. : 931 UNCLASSIFIED

This is MOC 505.

Subject is Exports of Cotton Textiles against Import of Raw Cotton.

1. COM 370 refers.

2. In addition to Sweden (MOC 501) and Switzerland (MOC 502) temporary imports of cotton are being arranged at an increasing rate.

3. Following have been approved under authority COM 370.

A Quantity in tons to be imported	B Country of origin	C Weight in tons of yarn to be exported	D Weight in tons of cloth to be exported	E Destination
1. 1247	US and Brazil	720		Denmark
2. 1080	Egypt		252	France
3. 1500	Egypt	900	300	Iraq
4. 1350	Egypt	300	200	Lebanon
5. 3500	Brazil		1250	Nigeria
6. 5165	Egypt and US	2850		Norway
7. 9000	Egypt	4554	457	Palestine
8. 3250	Egypt	700	500	Syria
9. 1550	Egypt	360	250	Transjordan
10. 1000	Egypt	500		United Kingdom

4. In addition, under same headings, the following have been proposed by Italian Government but approval has been refused:

1. 4000	US		650	United States
2. 115	Brazil		35	Brazil
3. 150	US or Brazil		67	Argentine
4. 165	Egypt		83	Egypt

5. Replying to your request for program for first half 4647 this year, Italian Government state that the preparation of such a programme is almost impossible since it depends on offers from abroad which can not be forecast.

6. It is thought above exports may be in excess of your expectation. Please advise immediately whether it is desirable to continue approving unrestricted exports to countries in para 3 above.

TO : AGWAR FOR CCS FOR CCAC FOR CLAC WARCOF (LONDON) FOR SLAC SECRETARIAT AFHQ FHCEG

FEB 8 1946

RESTRICTED

Ref.No. : 930

This is MCC 504.

Subject is status of accounting for YB Program.

1. Refer COM 366.

2. Allied supply accounting agency is preparing accounting return on October arrivals of YB cargoes. Return will consist of schedules by commodity. Each schedule will show by ships

(A) Port of discharge
(B) Bill of lading weight
(C) Out turn report weight
(D) Receiving report weight and
(E) Diversions of YB cargoes to Venezia Giulia.

3. Report is complete in draft and only awaits result of investigation on two cargoes.

4. Refer COM 366. It is assumed that billing for all YB arrivals will be carried out in Washington and will not be a responsibility of Allied Supply Accounting Agency or AICOM. Can this be confirmed?

This is com 376. Olive oil transaction.

1. Italian proposals for imports of refined seed oil from United States against exports of olive oil to United States have been discussed since last November through Diplomatic channels and Italian Government has been repeatedly advised that importations of this nature would be treated over and above any other requirements would be discussed only on a 1 to 1 basis and submitted to soya beans oil at this time. Do not understand therefore request moc 44lon a 1 to 3 basis.
2. Not with standing the fact that the fat supply of the country does not increase, in making 1 to 1 exchange Ital Government will enjoy the benefit of price differential in Foreign exchange between olive oil and soya beans oil in United States.
3. Should 1 to 1 fat exchange basis be accepted procedures will be devised to expedite transaction through private trade channels.

Refer MCC 415. Food requirements for interim Army and Carabinieri.

1. CLAC (S) requesting allocations for following foodstuffs in M/T: dried vegetables 2160 and S 870. Amounts arrived at by deducting from stated 6 months requirements quantities procured from US. Surplus stock available in the theater (Refer COM 224) PAA TWT. Against MCC 426 CLAC (S) has requested allocation 3000 tons canned fish which Italy expects to procure from Spain under italo/spanish agreement. Can you use the fish when procured to cover those italian army requirements not satisfied out of United States Army surplus query no additional allocation will be requested of combined food board unless advised by you to the contrary.

3. Pepper not RGL nor is it available ex United States. Suggest Italian Government do direct procurement on this I. Therefore no action by CLAC (S) is required. Italian Government is free to buy wherever it wants to or to instruct the italian technical delegation to purchase in bond here for trans /shipment to Italy.

5. No request was made for allocation of flour because of previous Y T flour purchases. UNRRA here has been advised that 19500 M T of Y T purchased 4 has been diverted from civilian supply program to cover MCC 415 requirements. UNRRA'S responsibility for civilian feeding required that they make appropriate adjustment in their program to offset this reduction.

6. Due to termination of procurement in United States by Department of State (FEA) under Y T requisitions of February 1 (Refer COM 368), Italian Government should make dorect purchase against allocations if and when received for S and pulses.

7. Italian technical Delegation here being advised of contents of this cabe.

TO: AGWAR WASHINGTON FOR CCS FOR CCAC,INFO: CABINET OFFICES WHITEHALL LONDON FOR BCS, USFA FOR USACA ,DMRS,ALCOM ROME,ACABRIT VIENNA,BTA FOR ACA LIAISON.

UNCLASSIFIED:

This is Mat 985.Passage through Italy of civil supplies for Austria.
Civil supplies for both British and US Zones Austria ete at present discherged in Italian Ports and carried from Port to Austria over Italian State railways.Hence Italy bears cost of labour,Warehousing and Transportation.

Provision of civil supplies for UK and US Zones of Austria is still Military responsibility,and presumably therefore these supplies could be classed as quote: Supplies of United Nations ":which are allowed free transit Italy under terms armistice with Italy.This is view USFA and ACABRIT.

This HQ suggests however that it is inequitable for civil supplies of Austria to be charge on Italian people and that Italy has justifiable claim against Austria for cost of labour,Warehousing and Transport.Acabrits suggestion to War Officer that services concerned are rendered directly to occupying forces and only indirectly to Austrian people is not concurred by this HQ which considers that Austria should re imburse Italy for her share of transportcosts just as she will eventually be called upon to reimburse US and UK for their share of such costs.

Alternative solutions would appear to be :

(A) For these costs to be treated as normal intergovernmental debt and for Austrian Government to set up schilling credit in respect of such costs in favour of Italy,such credit to be used by Italy in procuring supplies in Austria.Negotiations between Italian and Austria Governments for resumption of trade opened Vienna January 4th.

(B)For Italian Government to record these costs with view to eventual charge against Austrian Government when Austria eventually pays occupation costs to US and UK Governments.these Governments would presumably reimburse Italy for handling and transportation costs in question.

We are examining which solution in para 4 to recommend.As question has already been referred by Acabrit to CCAC and by Fsied and Resmin to State Department and Foreign Office respectively,request your comments on alternative solutions at para 4.

Pending receipt of your instructions matter is not being discussed with Italian and Austrian Governments.

4914

Question will also arise over French request for use of Trieste for import of civil supplies for French Zone of Vienna.We have informed Allied Council Vienna that granting of such request will be contingent on French falling into line with whatever arrangement is made for adjustement of transport costs of supplies for US and UK Zones. as however,France is not a party to Italian.
Corrections read,request your ruling.Release of Trieste for import for civil Armistice, matter appears ultimately a subject for negotiation between French ,Austrian and Italian Governments.
