5. The functions of said Division will be as follows:

- a. The Division will keep the appropriate sub-commission informed of any changes in advice given by Requisition Division as to expected arrivals at ports.

SUBJECT : Price Fixing of Local Produce.

FILE No. : P4/383.6(P)

1. Your attention is directed to attached ACC letter ES/41 of 27 June.
2. Pending further instructions from ACC, the following Directive is issued as a guidance on Regional Policy in respect of price fixing for local produce.
3. Price control should only be made applicable to certain limited groups of important commodities. In general no attempt should be made to limit prices on luxury or semi-luxury goods. Cases of profiteering at the expense of troops should be dealt with in conjunction with the local Military Commander.
4. Price control should be carried out through Italian Provincial or Communal channels and notices fixing prices should be issued over the signature of the Prefect or Sindaco "with approval of the Allied Military Government."
5. Price levels will vary from Province to Province and such variations can be accepted. In general, price levels in Lazio are bound to be covered by the prices in the city of Rome. (List attached).
6. The guiding policy must be to strike a fair balance between allowing Rome to buy its vegetables, fruit, etc. in the surrounding country, and ensuring that sufficient supplies are left for the small towns in the Provinces. As a general guide, local maximum prices could be Rome maximum prices less assessed cost of transport.
7. Price lists fixed locally will be reported to this Headquarters.

SUBJECT: Price Controls

TO: Regional Commissioners
Regions I, II, III, IV, V, VI, VII, VIII, IX & Rome Region.

1. It is desired to centralize all major decisions on price controls in ACC within this headquarters, while delegating local price control problems to be solved by the regional offices within the framework of broader decisions made here.

2. Accordingly, no decision relating to the fixing of prices or establishment or modification of price controls shall be made without prior authorization from the Economic Section of this headquarters.

3. As a general rule of policy, price control decisions relating to products which are susceptible to interregional trade will be made by the Economic Section and the Italian Government. As regards products which cannot be traded interregionally (which consist, for the most part, of highly perishable products), controls will, in general, be operated locally or regionally, in accordance with the terms of general directives established jointly by ACC and the Italian Government.

4. It is also the policy of this headquarters (a) to extend control over prices and distribution of necessities in order to reduce the cost of living, but (b) to abolish, at least for the present, such controls as exist merely on paper and are not now capable of being enforced.

5. You are requested to submit to this headquarters, for consideration by the Economic Section, a statement showing what price controls in your region are now in effect on a local basis, how effectively each of these is being enforced, and which ones should, in your opinion, be maintained. In regard to these controls which you believe should be maintained, your statement should include information as to the prices which are now in effect, the basis on which they have been fixed, and as to the methods by which they are being or can be enforced.

SUBJECT: Local Purchases and Contracts.

TO : Distribution below.

1. Cases are still occurring where ACC/AMG are entering into financial transaction on behalf of Italian Ministries, Governmental Institutions or other Italian agencies which could equally well be handled by such Ministries, Institutions or agencies themselves. It must be remembered that it is our policy as far as possible to restore the normal course of trade and to encourage normal trading relations between the Italians themselves. This policy is further dictated by the lack of ACC/AMG personnel to handle and account for such transactions. For this reason it should only be in exceptional circumstances that ACC/AMG themselves make local purchases for resale in Italy or incur expenditure in performing services which could equally well be paid for by the Italian Government or other Italian agency. This does not of course mean that ACC/AMG should not cooperate by making available the necessary supplies etc.

2. The principle is best illustrated by two examples. If large quantities of pamphlets are printed for an Italian Ministry, the printers' invoices being paid by ACC who supply the paper free to the printers, a great deal of unnecessary work is created. In such a case the procedure should be for all invoices to be settled direct by the Italian Ministry or agency and should it be necessary for ACC/AMG to supply any commodity, in this case paper, in order that the contract may be carried out, such commodity should be sold to the Italian Ministry or agency by the Economics and Supply Division of the Region in which the contract is being carried out. Similarly, if salt is sent from a salt mine to an Italian State Monopoly warehouse, ACC should not purchase and resell but the financial transaction should be one between the State Monopoly and the Salt Mine.
