Understand from Major RIDDELL likely to be available 40,000 tons of coal for domestic gas in October. It is evident from investigation this will be essential due to possible shortage of electricity now being used for domestic purposes. If coal is to be available for this purpose it is essential that Public Works Sub-Commission decide now which gas works are to operate and how much coal will be necessary for heating up purposes as this will take on an average 6 weeks. It is essential gas works be ready when gas coal arrives.

Your 3820 16 August.

1. We consider this matter is not one upon which guidance of ECO should be sought at any rate in the first instance but rather the view of HMG.

ECO will be informed by the British member of general contents of your telegram and HMG viewpoint.

2. Accordingly we have consulted U KINGDOM representative on ECO and the U KINGDOM view is that proposed exchange is in principle one to be facilitated.

You should however make it clear to the Italian Government that any bidsfor coal from ECO or other sources will have to be accompanied by a statement showing the amount expected to be received from Polish sources.

3. We are repeating your cipher to British Army Staff WASHINGTON with copy of this reply.

ALLIED COMMISSION FOR AUSTRIA, RUSSIAN AND FOR PRESS AND THE BASE SECTION

[illegible].

This is CAC 377.

Wheat requirements estimates.

1. After sending CAC 47 we have received the revised estimates of production and collection of rice, barley and corn and agree to them on a tentative basis.

2. With regard to estimates of wheat collection, 2 approaches have been used by AC. Under the first method, applied in [illegible] 1219 and worked out in detail in AC Agriculture Sub-Commission report of June 15 1945, transmitted to us by the UNITED STATES EMBASSY as report 106, wheat collections are estimated as the difference between estimated production and 1942-43 actual retentions. Under the second method (AMB 473) for estimate wheat collections at 90% of the difference between production and legal retentions. We must question the soundness of the second method under which you estimate actual farm retentions of wheat at little over 2 million tons or as the smallest since 1936, and about 70% of last year. For this reason we consider the first method forecasting actual collections as the only realistic one. We doubt whether collections of wheat will exceed 900,000 tons.

3. Collections by August 15th should represent at least 50% of total. The Embassy informs us that as of the end of July wheat collections were 220,000 tons.

Declassified E.O. 12356 Section 3.3/NND No. 785017

(1873 sent'd)

On these bases we ask you to reappraise the situation to the end of revising import plans presented in MAC 873 at the earliest possible date, because a timely, well documented presentation to the supply authorities is of utmost importance. Information available here indicates that European and SOUTH AFRICA import requirements will exceed earlier expectations so that it might be difficult already to increase shipments to ITALY in the first 6 months of 1946.

4. Are bags available for the handling of bulk wheat as indicated in MAC 873? MILLIKEN.

UNCLASSIFIED.

Complete inventories of civilian type captured enemy materials have been sent to AFHQ 20 August. It is requested that the release of this material to ANC/AC be authorized as per AFHQ letter AG 386.3/163103-0 dated 22 June 45. and subsequent cables FX 22782 dated 14 July and FX 27157 dated 23 July. Importance of this material to civilian population particularly of any cloth or material from which clothing can be made, cannot be stressed too highly in view of the lack of clothing in ITALY and the lack of fuel for heating. It is expected also that the turning of this material quickly on the civilian market by ALLIED COMMISSION may assist in breaking the high prices which make clothing almost impossible for the ordinary worker to buy. (This is MAT 883) Albanian-Lira exchange rate.

Italian Ministry of Treasury wishes exchange Albanian Franc currency for Italians returning from ALBANIA at rate 6.25 lire per Albanian franc, with limit of 800 Albanian francs per person.

TAM 532 does not provide lire cross rate for Albanian franc. TAM 577 approves rate of 150 Albanians francs per pound or 37.1747 per dollar for Allied military accounting purposes only. However, we are informed Albanian authorities on 16 June announced rate of 25 Albanian francs per dollar which would give cross rate of 1 franc equals 4 lire.

Please advise what reply should be given to Italian authorities respecting rate proposed paragraph 1 above.

SEPTEMBER. Serious deficiencies in certain areas in ITALY do not permit vessels to be allotted to you in immediate future. Assuming Italian wheat programme arrives on schedule, this HQ will lend you 12000 tons for September by diverting ITALY vessels to you in last half September. Details will be signalled on receipt of further shipping information.

OCTOBER and NOVEMBER. ITALY wheat for these months will be FEA procurement and is not yet called forward. Meanwhile you have 47957 tons from CAL 1165 and 52730 tons from LFM 936/WEK 30 available to you. Do not therefore see necessity for continuing loan in October and November. Suggest you therefore call forward over USFET L of C sufficient of these allotments to meet your needs for these 2 months. Would stress that shipments CC called forward will reach you just as early as any tonnages that may be shipped to ITALY and diverted to you.
