Subject is beet sugar production programme.

Confirming telephone conversation MACDONALD DEAR 8th /september allocation of petrol by PETROC will be sufficient for only 7 to 10 days beet hauling. This will mean that three fourths of beet crop will be wasted unless urgent measures are taken to secure balance of pol required approximating 840 barrels. PETROC VENEZIA states that it no longer has authority to release pol and that Italian Government has expanded its allocation. If beet sugar programme fails discontent among beet growers may be expected to have political consequences and will adversely affect prospects for 1946.

UNCLASSIFIED.

(This is GOM 218)

Use of troop pay dollars for payment of surplus purchased in ITALY.

Para 1. In order to pay CANAD one hundred ninety two thousand eight hundred fifty US dollars as per MOC 275 FEA requires specific auth from Italian Govt under the signature of the Italian Ministry Of The Treasury with statement that Italian Govt agrees to such charge.

FEA will then write a YF-Requisition making itself as procuring agency and will thereupon pay the CANAD but needs both auth to write a requisition and evidence that the Italian Govt has received the goods they wanted to purchase.

Para 2. In the future FEA here should be consulted by cable in advance of making firm arrangements for such Fld purchases unless the existence of emergency circumstances make such a course impractical. In the latter situation a port report on the nature of the emergency should be made. HILLERING.

"All enlisted personnel with adjusted service rating score of 35 and higher under computation of 12 May 1945, must now be under orders to report to replacement depots for shipment to the zone of interior. No exceptions permitted for reasons of military necessity. No exceptions can be made for reason that shipment of this personnel will make a unit or units inoperative or that commitments cannot be met, nor will the absence or unavailability of a replacement be a cause for temporary retention.

Volunteers under paragraph 12, readjustment regulation 1-1 as amended, may be excepted from the above mandatory shipping instructions provided they have signed new volunteer statements subsequent to 2 September 45."

Request this HQ be advised by cable name, grade, serial number, orgn, and assn of all enlisted personnel of this division on detached service with your HQ who fall in above category. Such personnel must report to their organizations without delay. Upon receipt of roster from the University Training Command transportation will be dispatched to FLORENCE by this HQ to return personnel to units. Continued interruptions to electricity supply together with low voltage and frequency are interfering with MESSINA refit programmes. Investigation shows that these are primarily due to extremely poor quality of coal allocated to CATANIA power station and that a total shut down in the near future is a possibility. It appears that Sicilian railways receive undue proportions of good coal available. Request that representative of Coal Division ALLIED COMMISSION visit SICILY immediately to investigate and arrange adjustment.

This is KNP 57.

Following requisition number 5-6-17-20/WT/AG/45. For artificial fertilizers
and animal feeding stuffs for British Zone AUSTRIA is forwarded.

(A) SERIAL	(B) COMMODITY	(C) METRIC TONNAGE	(D) REMARKS
1	Nitrogen-21% (sulphate of ammonia)	15700	N11
2	Phosphoric acid-15 (super phosphates)	27000	N11

4	Cattle cake	80000	KARNTEN only
5	Fishmeal (or equivalent)	200	KARNTEN only

2. Above are special requirements for period October-March for all British
Zone except where indicated in para 1 column (D). Requirements for animal feeding
stuffs for STEIERMARK are being assessed and will follow later.

3. Justification.

A. Land in AUSTRIA has proved very impoverished owing to lack of
fertilisation during war years. In view importance of ensuring maximum indigenous
production and reducing imports procurement and shipping of items requested is strongly

urged on principle that this year's fertilizers are next year's food.

B. Tonnages for fertilizer (series 1,2,3) are based on average consumption over passed few years and are required to maintain present level of production. Will provide application of 300^(300 weight ?) per acre of main crops excluding hay but allocation to subsidiary crops and market gardens will bring basic application down to about 2 and 1/2 hundred weight. Smaller application than quantities requested would be non economic.

C. Cattle cake demanded for milch cows only and for that percentage of total capable of giving yield in excess of that for which basic ration of fodder and roots adequate. Depredations of displaced persons and armed forces prior to entry of British forces has seriously reduced fodder supplies and without cattle cake winter milk production will fall sharply.

D. Fish meat (or equivalent) essential to secure economic use of available indigenous rough pig feed.

4. Local availabilities.

A. No sources of above discovered in AUSTRIA.
B. Possibility of supply from ITALY being examined but this unlikely in view of ITALY's current substantial import requirements.

C. No supplies available from theatre stocks.
