Cotton textile exports from Italy.

Following is revised text of COM 399:

Para 1. Answer to paragraph 3 MOC 501 is affirmative since COM 370 authorises exports to eastern Hemisphere, except to Egypt, pending receipt of Italian export program.

Para 2. In response to paragraph 5 of MOC 505 fomittee has reviewed its recommendation number 3 transmitted in COM 370 and regrets Italian position. In view of sizeable contracts approved and negotiations pending with Dutch, French and UNRRA, committee believes good estimate of exports availability by countries, be devloped for 1st half of 1946. Furthermore informed cotton institute in Milan devloping export program for submission to Italian Government. Urgent that representative from Italian industry be sent here by Italian Government to wit with committee and discuss this program with committee members.

In view of these difficulties committee has informally devloped tentative framework for export program whichassumes Italians are willing to do their share in relieving world shortage and so be subject to approximately same restrictions in direction of exports as member countries. Member countries particularly United States and United Kingdom have disregarded pre-war trade pattern and hold down domestic consumption

Declassified E.O. 12356 Section 3.3/NND No. 785017

to provide deficit areas. For example, United States chipping almost 5 times as much as pre-war to far East which is not a desirable market and United Kingdom shipments to western Hemisphere less than 1% of pre-war.

Para 3. The following advice covering both cotton yarn and cloth while not a combined committee decision should be applied as far as possible in shipping program for 1st half of 1946:

(A) Proposed supplies to countries in the far East, including China should represent at least 50% of the total export program of these textiles. Committee realizes financial problems involved and will do all possible to facilitate negotiations with supply missions for these areas where need is greatest.

(B) Proposed supplies to areas which are now relatively well supplied should be held to a minimum in conformity with the policy of the member countries of the committee. Therefore, proposed exports of these textiles from Italy to the United States, Brazil, Canada, Mexico and Argentina should not exceed 3%, and all exports to the western hemisphere should not exceed 7% of Italys total export availability.

(C) In view of the relatively high level of supplies in Egypt, proposed Italian exports to this country should not exceed 2% of total exports of these textiles.

(D) Committee will make no recommendation on remaining 41% until the Italian export program is reviewed.

Para 4. Cotton broad woven goods export program should be given in square yars or meters, showing destinations by country and 1st and 2nd quarters separately. Combed and carded yarn

Para 6. MD to the combined textile committee covering all export contracts placed by month of delivery as well as actual exports of cotton bread woven goods and cotton yarn. They should include contracts and exports already made. Both reports should indicate country of destination. These reports are an essential part of the committees program for coordinating exports of cotton bread woven goods and cotton yarn in order to insure as equitable distribution as is possible.

Para 7. Re paragraph 6 MOC 505 your authorizations do exceed committees expectations, particularly for Palestine. However, you will have to authorize under COM 370 until committee has reviewed Italian Program for 1st half of 1946. In view of proposals in paragraph 2, please encourage and facilitate all transactions with UNRRA and with Dutch and French for far East.
