1. In reading the very interesting minutes of the meeting of the Legal Sub-Commission and RLOs held at Naples 1 May 1944, and particularly par. 2c thereof, it is observed that frequent reference is made to "Legal Liaison Officers". It is believed that the use of this term to describe officers acting in a supervisory capacity in "King's Italy" is, and for some time has been, quite general.

2. In a broad sense, of course, all officers of the Commission operating in Italy and Sicily outside of "AMG Territory" are liaison officers. However, since the activation of a division of this branch to perform one particular kind of liaison it has been deemed desirable to restrict the use of the word as far as possible to officers of the Liaison Division, thus obviating certain misunderstandings which will otherwise occur. It is for this reason that the matter has been mentioned at two Regional Commissioners Conferences and in Executive Memorandum 26, this Headquarters, as amended 1 March 1944, par. 6 of which provides that:

"Only those officers whose appointments as liaison officers have been published in official orders of this Headquarters will be authorized to act in a liaison capacity."

3. For the reasons indicated it would be greatly appreciated if your sub-commission would sympathetically consider the possibility of substituting for the term "legal liaison officer" the words "legal inspector", "court advisor", or other similar term which might be

MEMORANDUM

TO : ALL CONCERNED

1. Effective on a date to be announced, probably in the near future, the Allied Military Government will turn over to the Italian Government certain portions of the territory now occupied by the Allied Forces. At that time Allied Military Government will cease and the Italian administration will assume full responsibility for civil government in such territory.

This will involve the withdrawal of a part of the Allied Military Government personnel from the territory. The balance will continue as representatives of the Allied Control Commission.

This memorandum is to outline certain general principles which will guide A.C.C. personnel in the territories administered by the Italian Government.

Present Status - Co-Belligerency

2. Effective September 3, 1943 the Italian Government concluded an Armistice with the Governments of the United States and Great Britain acting in the interests of the United Nations. Subsequently the Italian Government signed an instrument of surrender governing the relations between the United Nations and Italy, which instrument contained various provisions designed to protect the interests of the Allies and to promote the war effort, and called for the appointment of a Control Commission to enforce and implement those provisions.

3. Following the declaration of war on Germany, Italy was accorded the status of co-belligerent. According to the tripartite statement of 13 October 1943 announcing this new status,

"The relationship of co-belligerency between the Government of Italy and the United Nations' Governments cannot of itself affect the terms (of the Instrument of Surrender) recently signed, which retain their full force and can only be adjusted by agreement between the Allied

This memorandum is to outline certain general principles which will guide A.C.C. personnel in the territories administered by the Italian Government.

Present Status - Co-Belligerency

2. Effective September 3, 1943 the Italian Government concluded an Armistice with the Governments of the United States and Great Britain acting in the interests of the United Nations. Subsequently the Italian Government signed an instrument of surrender governing the relations between the United Nations and Italy, which instrument contained various provisions designed to protect the interests of the Allies and to promote the war effort, and called for the appointment of a Control Commission to enforce and implement those provisions.

3. Following the declaration of war on Germany, Italy was accorded the status of co-belligerent. According to the tripartite statement of 13 October 1943 announcing this new status,

"The relationship of co-belligerency between the Government of Italy and the United Nations' Governments cannot of itself affect the terms (of the Instrument of Surrender) recently signed, which retain their full force and can only be adjusted by agreement between the Allied Governments in the light of the assistance which the Italian Government may be able to afford to the United Nations' cause."

The situation of a co-belligerent does not mean that Italy is recognized as one of the United Nations or is admitted as an ally. It means that the Italian Government is fighting the same enemy and in this respect has the support of the United Nations.

General Functions Allied Control Commission

4. The general functions of the Allied Control Commission, as laid down in the directive of the Combined Chiefs of Staff, are as follows:

- (a) To enforce and execute the instrument of surrender under the orders and general directives of the Allied Commander-in-Chief.
- (b) To insure that the conduct of the Italian Government conforms to the requirements of an Allied Base of Operations, especially transportation and communications.
- (c) To be the organ through which the policy of the United Nations towards the Italian Government is conducted and the relations between the United Nations and the Italian Government are handled.

R E S T R I C T E D

Organization of the Allied Control Commission

5. The Allied Commander-in-Chief will be ex officio President of the Commission. The General Officer Commanding-in-Chief, Allied Central Mediterranean Forces, will be acting President. The acting senior officer of the Commission will be Chief Commissioner who will serve as Deputy President of the Commission.

6. The Commission will be divided into five Sections: Economic, Administrative, Military, Political, and Communications. Sections will be in charge of Vice Presidents or Directors and, in each case, will comprise one or more Subcommissions. The tentative organization of the Commission into its various Sections and Subcommissions is set forth in Appendix A hereto.

7. Each Section or Subcommission will maintain a headquarters staff. Some will also have representatives in the field. The existing regional organizations will be continued initially to correspond to such regional authority as may be set up by the Italian Government, or otherwise as administrative convenience may dictate.

8. A.C.C. personnel in the field will be known as Control Commissioners with designation of their particular specialist category where appropriate. For example, Control Commissioner (Legal), Control Commissioner (Public Health). The Chief Control Officer in the Region will be known as the Regional Control Commissioner (RCC).

Functions and General Duties of A.C.C. Officers in the Field

9. Particulars as to the nature of the duties of A.C.C. field officers will be specified by the Subcommissions to which they are assigned. However, the following guides are applicable to all:

- (a) The primary function of A.C.C. officers in the field will be to give assistance and guidance to and to supervise the local Italian officials and to convey such instructions to them as may be authorized either in specific instances or generally under this and further directives.
- (b) Each A.C.C. officer will also carefully observe the operation of the Italian Government in the area or administrative field of his responsibility in order to determine whether the terms of the surrender are being vigorously and effectively enforced. The results of such observations will be the subject of periodic or special reports to higher headquarters.
- (c) A.C.C. field personnel will have no command or direct

with designation of their particular specialist category where appropriate. For example, Control Commissioner (Legal), Control Commissioner (Public Health). The Chief Control Officer in the Region will be known as the Regional Control Commissioner (RCC).

Functions and General Duties of A.C.C. Officers in the Field

9. Particulars as to the nature of the duties of A.C.C. field officers will be specified by the Subcommissions to which they are assigned. However, the following guides are applicable to all:

- (a) The primary function of A.C.C. officers in the field will be to give assistance and guidance to and to supervise the local Italian officials and to convey such instructions to them as may be authorized either in specific instances or generally under this and further directives.
- (b) Each A.C.C. officer will also carefully observe the operation of the Italian Government in the area or administrative field of his responsibility in order to determine whether the terms of the surrender are being vigorously and effectively enforced. The results of such observations will be the subject of periodic or special reports to higher headquarters.
- (c) A.C.C. field personnel will have no power to command or direct Italian officials in connection with the performance of their duties. In this respect their powers and duties are to be contrasted with those of officers of AMG.
- (d) Particularly during the transition stage and until the authority of the Italian Government is fully established and the administrative machine is functioning smoothly, the Italian officials will probably require considerable advice, information and assistance from A.C.C. officers. It is entirely proper in this way to support the authority of the Italian officials. Care should be taken, however, not to interfere directly or to give the appearance of interfering directly in or with the local administration except in real emergency.
- (e) A.C.C. personnel must also take great care to avoid becoming involved in political disputes or conflicts. A.C.C. officers will deal only with the officials selected by the Italian Government. The competency of these officials and the quality of their administration will be the responsibility of the Italian Government. However, when officials behave in a manner likely to prejudice the position of the Allied Forces by violation of the terms of surrender or otherwise, A.C.C. personnel will take any action that may be authorized and promptly submit a report with recommendations to higher headquarters.

- 2 -
R E S T R I C T E D

R E S T R I C T E D

(f) Close coordination will be necessary between A.C.C. and tactical and administrative forces in the area. Certain committees have already been established (i.e. Local Resources Boards). Information as to these committees and other inter-service agencies will be communicated to field personnel where necessary. It is essential in order that confusion be avoided that the channels of communication with the Italian authorities remain as few and as simple as possible.

10. The disposition of A.C.C. personnel and their operations will be communicated by Regional Commissioners or by A.C.C. HQ. The following general rules will, however, apply:

(a) Generally there will be no A.C.C. field officers in the communes or in a position comparable to that of the C.A.O. or C.A.P.O. under AMG. General administration will, therefore, be subject to A.C.C. control at the provincial level. Such local inspection as may be required will be worked out from A.C.C. regional or provincial HQ.

(b) In the transition stage and until the Italian administration is functioning satisfactorily A.C.C. personnel will, subject to subparagraph (a) above, be disposed on a basis approaching that of AMG. An effort will be made to reduce numbers as quickly as conditions permit.

Regional Organization

11. It is understood that the Italian Government intends to appoint Italian Regional Commissioners in certain areas to function until the Italian Government can effectively communicate with and maintain control of the provinces. In other areas to be turned over, the Italian Government may communicate directly with the provincial officials. In either case, A.C.C. will initially appoint a Regional Control Commissioner. In regions in which there is an Italian Regional Commissioner the R.C.C. will, under directives of A.C.C. headquarters, establish control at the regional level and work with his Italian counterpart. In regions where there is no Italian commissioner the R.C.C. will serve as channel for communication with A.C.C. personnel in the field and as a regional representative of A.C.C. HQ.

Attitude toward Italian Officials

- (b) In the transition stage and until the Italian administration is functioning satisfactorily A.C.C. personnel will, subject to subparagraph (a) above, be disposed on a basis approaching that of AMG. An effort will be made to reduce numbers as quickly as conditions permit.

Regional Organization

11. It is understood that the Italian Government intends to appoint Italian Regional Commissioners in certain areas to function until the Italian Government can effectively communicate with and maintain control of the provinces. In other areas to be turned over, the Italian Government may communicate directly with the provincial officials. In either case, A.C.C. will initially appoint a Regional Control Commissioner. In regions in which there is an Italian Regional Commissioner the R.C.C. will, under directives of A.C.C. headquarters, establish control at the regional level and work with his Italian counterpart. In regions where there is no Italian commissioner the R.C.C. will serve as channel for communication with A.C.C. personnel in the field and as a regional representative of A.C.C. HQ.

Attitude toward Italian Officials

12. The members of the Commission, whether acting officially or otherwise, should maintain a correct attitude toward members of the Italian Government, neither autocratic on the one hand nor familiar on the other.

It must be emphasized that the Allied Control Commission occupies a position in relation to the Italian Government which is quite different from that of Allied Military Government. The Commission advises and supervises; it does not govern. This fundamental difference must be thoroughly understood by all officers who will adjust accordingly their attitude toward Italian officials and agencies, allowing them to develop their functions without undue interference.

If basic differences arise between officers of this Commission and the corresponding representatives of the Italian Government, the matter at issue will be submitted to the Chief Commissioner for adjustment with the Head of the Italian Government.

1. At the request of Combined Chiefs of Staff it was agreed that a strictly limited number of Civilian Representatives from U.S. and U.K. be admitted for specific work in connection with the development and export of sulphur, hemp, silk and citrus products.
2. In this relation, extracts of correspondence at "A" attached will keep you posted on the position at date and indicate the conditions under which these Civilian Representatives will operate.
3. It is particularly necessary that all correspondence and reports from Representatives be forwarded through official channels, with sufficient copies here for forwarding both to Washington and London.
4. In the case of Mr. Seymour it would appear that he has been reporting direct to the Ministry of Food and copies of such reports are not available here. Were copies retained by HQ ACC or LAG when located at Palermo?

It is requested that you will correct this position and forward copies of reports already made for our records.

5. It will be seen from LAG 87 that the admission of a citrus expert from U.S. has been agreed to and it is essential that all information obtained and Reports made by Mr. Seymour be available to the U.S. Representative on his arrival. It applies equally of course to other products that U.S. and U.K. Reps will co-ordinate all their work under the respective Sub-Commission.
6. It is also noted from a Ministry of Food letter to Mr. Seymour dated 31 Dec that shipments -- presumably of citrus fruit -- were made on the 'Durban Castle' and 'Dominion Monarch' but no advice of either of these shipments was made here.

7. Sicilian Exports. It is understood that Industry and Commerce Sub-Commission (Rear Detachment) will shortly be moving to the mainland. When this happens, what arrangements have been made to coordinate exports from SICILY? As you know, the major part of our export program is and will be from there, and it is felt essential that a senior officer should be responsible on the spot to coordinate this work, and moreover one that has had experience of the problem up to date.

16 Dec 43. Cable from C.C.S., TAM 102

Entry of civilians into NATOURA.

British Ministry of Supply has urgently requested that your permission be sought for entry of 3 civilian buyers into ITALY and SICILY, acting as representatives of the British Government, for purchase of Sulphur, Silk and Hemp, pointing out that last 2 particularly are in short supply and are needed predominantly for service requirements. US Economic Agencies agreeable provided US civilian commodity experts, representing US Government, be allowed into area in same number at the same time as the British for the purpose of expediting our purchase and export of those strategic materials which have been specifically requested by WFB and CRMB and in which the US has an interest. All such individuals will be subject to your control.

Your comments or approval will be appreciated as to (1) the WGS proposal on 3 British civilians, and (2) proposal for an equal number of US civilians. Early reply requested as we are informed immediate presence Hemp experts required if 1943 crop is to be saved.

21 Dec 43. Reply from C of S, AFHQ

2775

This is NAT 112 citing CCAC.

Subject is entry civilians into NATOURA referring to TAM 109 December 16th.

No objection to civilian representatives, providing numbers do NOT become excessive, being attached to appropriate sub-commissions of Allied Control Commission with view to facilitating export arrangements.

The use of the word "buyer" is however misleading since NO prices have yet been settled. Therefore presence of civilian representatives can at present have little or NO influence on price settlement.

Assuming British requirements for items cited are urgent and allotment of Italian supplies have been made by combined boards to Great Britain there would therefore be NO objection to three civilians being attached on temporary duty to Allied Control Commission.

Question of United States civilians should also depend upon United States requirement for particular commodities. For commodities which are likely to be required in reasonable amounts by United States and for which an allotment has been made by combined boards there would equally be NO objection to American civilians on same basis.

Suggest however that number of persons to be sent forward from either nationalities be kept to absolute minimum owing to accommodation and transport difficulties.

28 Dec 43. Troopers Cable 52644 F5 received, requesting that funds be made available to Civilian Representatives.

16 Jan 44. AFHQ Cable to CGS, further to MAT 112

This is LAC 87.

Subject is admission of civilian representatives from US and UK attached for special duty with Allied Control Commission.

To avoid misunderstanding and ensure fullest coordination request you please advise all concerned that representatives will NOT operate independently as buyers but as expert advisers to assist in developing production and facilitating exports of hemp, sulphur, silk and citrus products. US and UK representatives will collaborate jointly and work with the respective ACC subcommission. All business will be conducted within the export and price policy of the Allied Control Commission. 2744

Because of the abnormal trading conditions which now operate and the necessity to check inflationary trends, ACC must continue to fix buying prices of goods exported without relation to selling prices in US and UK.

Payment for goods exported is now made by ACC in AM lire provided through AFHQ and it is necessary that the same disbursing and accounting procedure continue. This will answer TROOPERS 52644 F5 of 28 Dec and the question of making funds available to civilian representatives will not arise.

Cables and correspondence to and from representatives will be forwarded through normal ACC channels via AFHQ.

Every assistance and cooperation will be given by ACC but we feel it desirable that all concerned should understand the conditions here and the necessity for following ACC procedure.

New Subject: Site CAL 96. Ministry of Food Citrus representative is now working in SICHY and it is agreed that US expert be admitted to collaborate and develop US interests in export of citrus products.

16 Jan 44. ACWAR Cable to AFHQ, CAL 125

Regarding buyers who are civilians, policy is, as to plans and price, that they come under your detailed superintendence and control. Purchases will NOT be made for account of or by any agency other than AFPA, AMFA, ACC or AMI as case may be who will continue to make these transactions. Civilian buyers do NOT represent any UK or US agency but are AMFA, AFPA, ACC or AMI personnel as you direct. Responsibility for their activities continues to rest with you.

Therefore, use of lire will be controlled as formerly and separate accounts will NOT be set up for civilians.

AG 400-1 (Italian) GDS-AGM

15 December 1943 *4*

SUBJECT: Availability of Supplies for Italian Army

TO : Acting Deputy President, Allied Control Commission

1. The Combined Chiefs of Staff have recently authorized as an interim policy the shipment of food stocks from the United States for maintenance of the Italian Army. An announced policy and procedure for implementing such a policy is still a matter of *discussion in* Washington according to the latest information received from that source. Previous communications with the Combined Chiefs of Staff have indicated on their part a desire for pertinent information in connection with the strength and availability of supplies within the Italian Army to assist them in arriving at a decision on which to announce a policy. In order that we may be in a position to furnish such information, it is requested that steps be taken by your headquarters to furnish the following information with the least practicable delay:

(a) The plans or policies being considered by the Italian High Command as to: 2723

(1) A fixed maximum strength for the Italian Army

(2) The rate of demobilization if the present strength exceeds the planned fixed strength.

(b) The considered use by the Italian High Command of the Italian Army in excess of that strength earmarked for operational service, L of C duties, static guard, and internal security purposes under command of Allied Forces.

(c) What food stocks are available under Italian control for use in maintaining the Italian Army?

(1) Determine the amount on hand, in warehouse, depots or dumps.

(2) What are their plans of substituting their Army: Do they expect complete maintenance of food stocks from Allied sources or do their plans provide for obtaining part of their maintenance from local sources or stocks on hand?

(3) If the latter, what are the sources or stocks and how long or in what part will they maintain their Army?

28

AG 400-1 (Italia) GDS-AGM, dtd 15 December 1943 (Don't)

(d) We have requisitioned for immediate delivery an initial thirty days of food supplies for 500,000 men. Requisition is based on an operational ration scale for 100,000 men, who will be supplied through Allied Forces supply agencies (that is, base sections, Fifth and Eighth Armies) and a nonoperational ration scale for 400,000 men. When these supplies arrive for the 400,000 estimated to be non-operational, what are your recommendations as to:

- (1) Manner of distribution to the 400,000 Italian troops under Italian command.
- (2) Should we issue, say, ten, twenty, or thirty days of this supply to designated Italian military agencies for further distribution by them throughout their Armies?
- (3) Is their organization sufficiently well in hand to understand such a distribution?
- (4) Would their control of foodstuffs be of such positive nature as to preclude quantities reaching the black market or being dissipated to ~~other~~ sources?
- (5) Can we depend on their organization to safeguard and distribute properly stocks placed under their control?

(e) What facilities are under their control- such as warehouses, transportation, etc. for maintaining their own supply system?

(f) Arrangements have been made to stockpile in Italy certain clothing and shoes for emergency use should conditions require. This amounts, at present to the following:

- (1) Approximately 250,000 suits of reconditioned British battledress, dyed green. Arrangements have been made for shipment of this clothing to "Heel" ports, Naples and Bari.
- (2) In addition, approximately 100,000 pair of reconditioned British Boots are being shipped from the Middle East.
- (3) Request has been submitted to the Combined Chiefs of Staff for shipment from the United States of overcoats, blankets, underwear, and headgear of a non-stand type - outer garments to be dyed green to supplement the stockpile referred to above.

AG 400-1 (Italian) GDS-AGM, dtd 15 December 1943 (cont'd)

(g) Your recommendations as to storage and distribution of these supplies are likewise desired. (As in the case of rations, Italian forces under command of Allied Forces will receive clothing through Allied military channels, while the balance for Italian forces would be through Italian supply agencies.

2. It is considered that the above information, when received in this headquarters, will serve as a basis upon which to make further recommendations to the Combined Chiefs of Staff as to the current problems before they make decisions and announce policies which, through lack of this information, may not be to our advantage.

3. A copy of this letter is being furnished AFHQ Advanced Administrative Echelon, and discussion with that headquarters is suggested.

COMANDO FF.AA. DELIA CAMPANIA
Stato Maggiore-Ufficio Ordinamento

No 380/Ord. Di Prot.

Napoli, 8 dicembre 1943

SUBJECT: Pay for personnel employed by Allied Units in Zone of Operations.

Minister of War--- Lecce
HQ Italian Army--- P.M. 151

Near the 5th Army, as the Ministry know, there are several of our labor and (burial) units.

They are, on the whole, used in the immediate zone of operations so much so, that they have undergone a loss of human and animal life.

The personnel of these troops, now receive a daily wage of 5 lire - a scale that is totally inadequate, be it, with relation to the high cost of living or with relation to the pay received by the Allies and the same Dapino unit.

It appears then that many units in question made up of disbanded soldiers were receiving from the Allies higher pay even before they were organized. The cut in pay has, as a result, lowered the morale of the troops causing many of them to leave their units and causing justified alarm in the Allied Commands.

I deem a just indemnity for the troops mentioned above would be the following:

Corporal- soldier	20 lire	5
Sergeant	25 "	22
Sergeant Major	30 "	25
W/O	35 "	35

I beseech this Ministry to examine this question urgently, a question which is close to the heart even of the Command of the Anglo-American 5th Army.

Fifty tons of paper are needed to print Tax Rolls, Notification Forms and ~~many~~ sundry printed forms for the collection of Taxes in the provinces of Bari - Brindisi - Lecce - Taranto - Foggia & Matera Potenza which all belong to the Tax Compartment whose head office is at Bari.

Out of the above quantity ten tons are required for Bari.

May I ask that the "Printing and Stationery Directorate" be instructed to release this paper of which there is an urgent need and which it has been impossible to obtain otherwise as the entire supply of paper has been requisitioned. The printing ought to be done within this month in order not to delay the collection of taxes.

The paper ready for use requisitioned in the Foggia Paper Mill amount to 1200 tons.

I shall feel obliged if I will be informed of what can be done.

1. Movements No. 2 District have been asked to estimate amount of grain traffic that can be handled by rail from FOGGIA and MATERA to BARI, BRINDISI, and TARANTO.
2. The Italian authorities will provide trucks (military & civil) for such parts of the wheat that it may be necessary to move by road.
3. The supply of grain from FOGGIA etc. to APULIA seems economically desirable, to save shipping flour or wheat into Apulian Ports, and in any case some supplies will be necessary to replace amounts of civilian stocks that are being used by the Italian Army, and to provide for the feeding of refugees who are coming into Apulia now from combat zones (Apulia is scheduled to receive 20000 altogether).
4. Will you please issue a directive stating what total amount of wheat will be released to Apulia and arrangements will then be set in hand immediately to arrange transportation.
