OGGETTO: munizioni italiane presso il 14° B.A.D.-

Italian Armed Forces Sub Commission

Al L'ARMY SUB COMMISSION H.Q. A.C.C.
ROMA

Si prende atto e si ringrazia.

Poichè si avvicina la stagione delle piogge questo Stato Maggiore preferisce ritirare le munizioni italiane non impiegate dal Corpo Italiano di Liberazione esistenti presso il 14° B.A.D., allo scopo di accantonarle in un deposito 681 locali attrezzati per assicurarne la conservazione.-

Ref para 6 of our AQ/94 of 4 Aug 44.

1. 14 B.A.D. has replied that doubtful ammunition so far held by the Italian sub-depot has been mainly broken packages, while the ammunition itself is quite serviceable.

2. 14 B.A.D. are arranging for these packages to be repaired as soon as possible.

3. Inspection and examination of actual unserviceable ammunition is carried out by the Inspecting Ordnance Officer's staff at 14 B.A.D. The I.O.O. is therefore responsible for the classification of such ammunition as to its serviceability or otherwise.

4. The above for your information.

1. Reference your letter AS/94 dated 23 July 44.

2. Your difficulty in "marrying-up" component parts of Italian ammunition from the stock statements rendered by this Depot is noted.

3. In future the following particulars will be shown in relation to each nature or type of ammunition:-

(a) Number of complete rounds, i.e. those packed as such, but not necessarily assembled.
(b) Number of complete rounds which can be formed by "marrying-up" component parts.
(c) Number of component parts which cannot be "married-up" to make complete rounds, because of deficiencies of certain components.

1. In your Stock States of Italian amn (on AFs G 3501) would it be possible to indicate the ~~GRAND~~ total of complete rounds of each type of amn ?

2. It is difficult at this HQ to "marry-up" the component parts when they are shown in your State.

3. For instance, referring to your AF G 3501 showing posn at 19 July, you show on page 2 : -

Complete rds 105/28 ..... 1,768.

The remainder of the page gives details of parts of 105/28 amn which it would appear could be "married-up", (with the assistance of the technical Italian offr i/c amn det) to give a further figure of complete rounds.

4. Would you please say if it is possible to give this additional infm or confirm that the process of "marrying-up" has been completed as far as possible in those rounds already reported as "complete."
