SUBJECT: MMIA LO - Reports.

TO : Commanding General, Land Forces Sub Com A.C. (MMIA).

1. In compliance with your letter 6/51 subject as above of 4 June 1948 and supplement thereto dated 21 June 1948, submit the following:

a "G" Points

- (1) No Italian units are performing functions other than that for which they are designed.
- (2) Training - No change from previous report.
- (3) Territorial Office Headquarters functioning.
- (4) Cagliari Distributing Depot and Storage Depot to move soon. All others are in position.
- (5) No information of any Italians endeavoring to obtain any "I" information on any other nation.

b "A" Points. With three recent trips of the cruiser Garibaldi we have been able to clear the backlog on leave personnel from mainland and send all leave personnel from Sardinia to Mainland. So with the 200 places on the Abbazia and Campidoglio each month, unless some unforeseen condition arises, we should be able to handle the transportation of leave personnel satisfactorily. However, we will have by the end of July approx 800 Italian Air Force callups to transport, which I am of the opinion we can sandwich in by using various Italian ships.

c "Q" Points

(1) TPT. If our request to you is approved to transfer the mechanics and Assistant mechanics from 5 Efficient Vehicle Park to 14 Repair Unit our auto repair situation will be in better condition.

(2) Rations - No change from previous report. Note that 56 tons of dehydrated vegetables were shipped to Sardinia on the Abbazia middle of June and to comply with instructions to retain only

60 days reserve on the island we shipped 20 tons of same to mainland on Joseph G. Cannon last week. However, in computing the amount to be sent on the Cannon figures were taken from ST/12 report as at 20 June and the 36 tons mentioned above were not at that time included.

(3) Clothing and Equipment.

(a) Just received a detailed report on clothing for callups which has been greatly delayed. They report some clothing unserviceable, and some needing cleaning and repairs. Stating that this clothing was issued to callups and later withdrawn from callups when rejected, in Hospital, went AMM, etc. It is the usual Italian excuse, but as of the opinion there has been some "faggling", in other words an interchange of clothing with other military. We have been short shirts, shoes and drawers on the island. By 20 July when we receive the inventory, which I directed to include all clothing to be returned by recalls, we should know our exact status on these three items and will requisition accordingly. Until you receive our requisition, unless already in the process of being shipped, it will not be necessary to honor our previous requisition.

(b) Clothing Depot at Macomer to be consolidated with Cagliari Depot.

(c) In my inspection to Oshiri Clothing Repair Depot the officer in charge stated they rebuilt a daily average of 10 pairs of shoes per day. The Commissary Section advises no their output is 70 pairs per month.

(4) Accommodation and Camps
No change.

Herewith extract from a report of tour made by
Lt. Col. Lester R. Albert in Sardinia, during the period
26 - 30 June, in case this information has not reached you
direct -

"Accompanied by Lieut. German, Agriculture Section A.C.
Rome, made a two day inspection trip of agriculture conditions on
the island and inspected military installations at Nuoro. Went
North on the Eastern road and returned by the Central road. Report
as follows:-

1. Grain. The greatest grain producing area is in the
Southern part of the island, South of the range of mountains. There
have not been any grasshoppers in this area. The dry weather has taken
some toll but estimates the crop as 80% (upwards) of normal, the heads
were good length and in most cases well developed kernels. In the
Provinces of Nuoro and Sassari where less grain is grown, the grass-
hoppers and drought have done more destruction, but still there is con-
siderable amount of grain produced there this year. We interviewed
many farmers and their first reply is that there is nothing and U.S.
would have to feed them. But upon further investigation we found their
statements greatly exaggerated. As of the opinion that May, being a
cool month, and although dry, the coolness aided the growing of grain.

2. Forage and Pasture. As of the opinion that the
drought and grasshoppers have taken a great toll in both. Very little
hay was produced and farmers are not selling any to the Army due to
the shortage. In spite of the poor pasture, cattle are in very good
condition for grassers and this time of year. The sheep are mostly
millers and of a very poor quality and are not in very good condition.
Contrary to reports of stock dying from starvation could find no such
cases when further questioning, the reports were unfounded.

3. Fruits, Nuts and Grapes. Fruit crop is normal

Contrary to reports of stock dying from starvation could find no such cases when further questioning, the reports were unfounded.

3. Fruits, Nuts and Grapes. Fruit crop is normal production this year. The grapes and nuts look healthy and produce a normal crop. 297

4. Grasshoppers. In various trips up the island have observed the great number of grasshoppers, more plentiful in the vicinity of Macomer and farther North. In early May we authorized the loan of 2000 salvage Army tents to the High Commissioner to combat them in the crawling stage, in all my travels throughout the island the past 2 months only saw four civilians destroying grasshoppers. In certain areas when in the crawling stage, millions could have been collected and destroyed with a little effort. We authorized the transfer of 150 tons, with authority to draw 300 tons more if required, of sulphur chloride from Army depots on sale to the High Commissioner's Office, only 50 tons were collected."

on the Eastern road and returned by the central road. Report as follows:

(1) Grain. The greatest grain producing area is in the Southern part of the island, South of the range of mountains. There have not been any grasshoppers in this area. The dry weather has taken some toll but estimate the crop as 80% (upwards) of normal, the heads were good length and in most cases well developed kernels. In the Provinces of Nuoro and Sassari where less grain is grown, the grasshoppers and drought have done more destruction, but still there is considerable amount of grain produced there this year. We interviewed many farmers and their first reply is that there is nothing and U.S. would have to feed them. But upon further investigation we found their statements greatly exaggerated. Am of the opinion that May, being a cool month, and although dry, the coolness aided the growing of grain.

(2) Forage and Pasture. Am of the opinion that the drought and grasshoppers have taken a great toll in both. Very little hay was produced and farmers are not selling any to the Army due to the shortage. In spite of the poor pasture, cattle are in very good condition for grassers and this time of year. The sheep are mostly milkers and of a very poor quality and are not in very good condition. Contrary to reports of stock dying from starvation could find no such cases when further questioning, the reports were unfounded.

(3) Fruits, Nuts and Grapes. Fruit crop is normal production this year. The grapes and nuts look healthy and promise a normal crop.

(4) Grasshoppers. In various trips up the island have observed the great number of grasshoppers, more plentiful in the vicinity of Macomer and farther North. In early May we authorized the loan of 2000 salvage Army tents to the High Commissioner to combat them in the crawling stage, in all my travels throughout the island the past 2 months only saw four civilians destroying grasshoppers. In certain areas when in the crawling stage millions could have been collected and destroyed with a little effort. We authorized the transfer of 150 tons, with authority to draw 300 tons more if required, of sulphur chloride from Army Depots on sale to the High Commissioner's Office, only 50 tons were collected.

b Inspected 5th Company, 40th Regt at Nuoro, satisfactory except kitchen dirty and many flies (See S & T Report).

SUBJECT: Weekly Liaison Log No. 65. 10 June - 16 June 1945.

TO : Commanding General, Land Forces Sub Com A.C. (MMLA).

1. Sunday, 10 June

a. Col De Giudici, Deputy Chief of Staff GMB, called re absorbing all 380 recalls and recruits now waiting shipment to replace military to be discharged. (See our signal Y 481 of 10 June). The discharged personnel to be placed on civilian rations while waiting shipment.

b. Routine office work and $\frac{1}{2}$ day off.

2. Monday, 11 June

a. Conferred with Major Sama, CC.BR., re replacement of Capt Palomba, who is to be discharged, by Maresciallo Sagua.

b. Had a lengthy conference with General Maccario, Commanding General Italian Forces Sardinia, Gen Scalabrino, of Territorial Office Sardinia and their staff officers in regard to the grave situation of MT repair on the island, as pointed out in par 6c of our Liaison Log No. 64 dated 10 June 45. Gen Scalabrino stated that there was a great scarcity of qualified personnel, tools, machinery, spare parts and auto supplies due to the "stripping" on the island to equip the 1st Mobile Park for the mainland and that most mechanics come from Northern Italy and some had been discharged. He also stated the War Ministry would not permit them to pay civilian mechanics a sufficient wage to entice them to work for the Army, and there were essential items of supplies and machinery on the mainland they require to do their work here. I advised him to comb the island for all available qualified personnel (military and civilian) and properly organize the 14 Repair

Declassified E.O. 12356 Section 3.3/NND No. 785020

Shop as a repair unit. Also advised him before making any requests for tools, machinery and supplies to be returned from mainland, to determine that same was not available here. Suggested that the machine shop facilities at the Nuovo Artillery Depot be used to the maximum along with the skilled civilians now working there. It must be born in mind that these vehicles are old and are put in efficient state with used parts that soon give away. The auto parks here have been picked over and the best vehicles and best parts have already been removed and it is difficult to secure parts from vehicles without the proper tools and qualified personnel, without destroying the part required. General Macario agreed with me the situation was grave and he would take immediate steps to improve same.

c Capt De Stefano conferred with No. 5 Efficient Vehicle Park re vehicles allotted under the new T/E (W/E).

3. Tuesday, 12 June

(See par 8a below).

c Major Martin conferred with Commissary Chief, inspected 59 Inf Regt Mess and Cagliari Distributing Depot.

4. Wednesday, 13 June

Declassified E.O. 12356 Section 3.3/NND No. 785020

A tentative list of personnel was agreed upon if this cruiser arrives.

b Major Martin inspected Bulk Depot records and Cagliari Engineer Depot.

c Capt De Stefano conferred with High Commissioner re Sea Shore Hospital which had been requisitioned by the Allies.

6. Friday, 15 June

a Conferred with Capt Costa, Commissary Italian Air Force, re your authorization (See your Q 355 of 14 June) of extra rations for callups for Air Force. Authorized them a maximum of 4000 additional rations (400 personnel for 10 days). (See par 3b above).

d Major Martin inspected spoiled food at Iglesias, which was left there after the depot was closed not being practicable to move.

e Capt De Stefano conferred with Auto Directorate, CMS, re vehicle report.

7. Saturday, 16 June

a Conferred with Col De Giudici, Deputy Chief of Staff CMS, re movement of military personnel to mainland. He stated the Italian Navy had advised him that the Italian corvette Urania to arrive in Cagliari today and the Italian ship Monzabano to arrive 17 June. There may be a possibility of sending 80 military on the former and 100 on the latter ship. Advised Col De Giudici of what military personnel to send if either or both ships arrive.

Declassified E.O. 12356 Section 3.3/NND No. 785020

(See our signal Y 477 of 8 June).

d. Captain De Stefano conferred with Italian Customs Officials re smuggled U. S. tobacco and cigarettes, which are at parts scattered over the island. Arrangements are being made to bring same to Cagliari and then MOHA will be advised as to quantity and condition.

e. Sgt Gentile returned from Naples by air.

6. Friday, 8 June

a. Inspected and checked barrack stores waiting shipment at Cagliari (See our letter subject Shipment of Barrack Stores to Mainland dated 8 June).

b. Conferred with General Scalabrino and Col De Madiel, Deputy Chief of Staff, CMA, re status of military personnel to be shipped to the mainland and the use of the Abbasia and Campideaglio for same (See our signal Y 476 dated 7 June).

c. Being of the opinion that the 14th Repair Shop at Abbasanta was not producing results sent Major Martin there to check. He found it to be a repair shop in name only, of the 50 military personnel and 70 civilians, there was only 1 soldier and 1 civilian actually mechanics at Abbasanta and 2 soldiers and 3 civilians at Cagliari (The Detachment of 14 Repair Shop at Cagliari is accomplishing more than at Abbasanta). The balance of the unit are mechanics' helpers, welders, tailors, carpenters, blacksmiths and ordinary soldiers doing guard duty at dumps throughout the island. There are 18 soldiers and 21 civilians actually engaged in repairing vehicles, the rest are doing administrative, general and guard duties. Three officers, including Commanding Officer 14 Repair Shop, the chief mechanic and 6 other military to be released this month without any replacements in sight. The C.O. was advised by Ministry of War not to hire any more civilians, unless he can hire mechanics don't see why he should. The C.O. gives following reasons for not being able to produce the necessary output: (1) Lack of skilled personnel, most were sent to mainland. (2) Lack of tool machinery, 1st Mobile Park

Declassified E.O. 12356 Section 3.3/NND No. 785020

took all of it to mainland. (3) Lack of spare parts, the best of these have been stripped from the vehicles and does not have qualified personnel to remove them or tools for same (see par 3 of our signal Y 480 of 9 June). (4) Lack of consumer material; such as zinc, copper, lead, etc which is not available in civilian markets. (5) Lack of repair kits and materials for fixing tires and tubes. (6) Lack of proper hand tools, most were sent to mainland with 1st Mobile Park. There are still 10 vehicles, all of old vintage, at Abbasanta to be repaired to complete the 100 to be turned over to the High Commissioner, and now they do not have the parts, tools or personnel to repair same. Major Martellacci, C.O. 1st Mobile Park, advised me the middle of May that the last vehicle for High Commissioner was in the workshop and would be repaired before his unit left for mainland. As of the opinion that the last 3 or 4 weeks that the 1st Mobile Park was at Abbasanta, they did very little repair work in addition to preparing their own unit for shipment. The 36 men left behind by Captain Varengo were never within the authorized strength that is why I requested we have authority to ration them (see par 1 of our Y 480 of 9 June). Am taking immediate steps to remedy the above as far as within the availability of the island.

d. Captain De Stefano conferred Auto Directorate CMS re vehicles assigned 5th Efficient Vehicle Park also conferred again with Italian Customs Officials re smuggled U.S. tobacco and cigarettes.

7. Saturday, 9 June

a. Captain Sprague and Capt MacBride, UNRRA, called regarding interchanging of medical items to save UNRRA's shipping to Sardinia from mainland and our shipping same items to mainland from Sardinia. Told them it was a matter for "higher level" to decide and as MIA Rome had a list of items we expect to ship to mainland in July (see our letter to MIA subject Status of Equipment to be Shipped to Mainland dated 21 May 48), suggested they recommend to their office at Rome to contact MIA Rome concerning the above.

b. Conferred with Col De Giddici, Deputy Chief of Staff CMS, re latest information of shipping military to mainland. Invite your attention to your A 1112 of 8 June authorizing the shipment of 200 military from mainland to Sardinia and with the number that are continually arriving on various other ships and we only authorized to send 200 in return, the number waiting here to be shipped to the mainland will always be large (see our letter subject Military Personnel to be Shipped to Mainland dated 9 June).

(2) Abbasanta Engineer, Auto Repair Park (also used car depot at Paulilatino where there are approx 600 vehicles could be made efficient). (3) Macomer Food, Clothing, Barrack Stores and Artillery Depots. (4) The preparation for movement of stores of all of these depots with the possible exception of the Auto Repair Park has slowed up considerable since VE Day. There is an immense amount of clothing at Macomer and more is arriving from various Calabria Division units. They lack sufficient personnel to cope with the situation also insufficient trucks to move stocks. Sufficient railroad cars are not being supplied. All these discrepancies have been brought to the attention of CMS for immediate correction. When it is determined by MMIA just what stocks you require from the list of stocks I will bring to Rome, recommend that the Calabria Div be utilized fully to prepare stocks for shipment. (5) Went to requisitioned villa at Badde Salighe for the night. Detailed report of Major Martin's and my inspection will follow in the S & T Report and the report I bring to Rome next week.

b Captain De Stefano again conferred with High Commissioner re breakdown imported coal between civilians and military. Also checked loading of cruiser Garibaldi.

He also requested that a reserve be held by the Navy for emergency ships. I disapproved and recommended to NMIA that no issue be made to same without authorization by NMIA (See our letter to you subject Surplus Rations Held by Italian Navy dated 16 May 1945).

(3) Confirming issue of Italian and German food first and having all such spoiled condemned and removed from the accounts (4) Excessive stock of Italian biscuits to be greatly reduced, although most of it is made from Allied flour (5) Distributing Depots have been opening cans especially dehydrated vegetables and reweighing for issue, thereby consuming a great amount of time and exposing the food to unsanitary conditions. Strongly suggested this policy be discontinued and if they desire to salvage the tins to have the recipient return the empty cans to the Distributing Depots (6) Suggested the packing and crating of clothing at Macomer Depot be speeded up. There is an immense amount of Italian clothing there but they are very slow in preparing for shipment (See our report re Status of Italian equipment to follow).

Transport Co, re use of MT assigned to the 14 Territorial Adm Transport Co, 38 of the 112 are inefficient. They claim that when repairs are made from used parts they soon break, and recommend that a small stock of most commonly used parts be placed at Cagliari repair unit to avoid loss of time in taking vehicles to Abbasanta. Approved. They also claim considerable time is lost at the repair units to dismantle the part and suggest some of the parts be dismantled beforehand. Approved. Advised them to contact the Commissary Office and supply them transportation where most required in order to speed up the transport of goods to Cagliari and expedite the closing of the surplus depots.

c. Major Martin (1) picked up lists of stores at Macomer Clothing Depot (2) Conferred with Commanding Officer 1st Heavy Workshop at Abbasanta re turning in excess Italian vehicles (3) Returned to Cagliari by motor.

d. Captain De Stefano conferred with Istituto Nazionale per il Commercio Estero re imports and exports to Sardinia. We, as ALCON 10, are required to verify imports and exports according to this organization, yet it will be very difficult for us to have a man at the port to check same because of limited personnel. I advised them to have Mr. Thomas, British Ministry of War Transport at Cagliari, to submit a statement as to what was loaded on the ship and we would sign papers upon his certificate. This may or may not be satisfactory.

I told him unless they came within an authorized category no Allied ration would be supplied to them and furthermore if they were unauthorized military they should be considered excess and shipped to the Mainland. No Allied rations to be issued to them after 15 May. (2) He stated an article appeared in L'Unione Sarda, published at Cagliari 18 May opposed to sending Sards to the mainland and as a result of such agitation callups are going AWOL. 125 deserted yesterday from total 650 coming by rail from Sassari and Oristano to Cagliari. He also stated the actual strength was approx 4500 not including rations drawn for personnel on ships in emergency. I requested they give me more correct information as to number days rations on hand and strength and I would contact MMFA if they desired to have the Navy hold a stock of food here and what amount. 1. WEEKLY LIAISON LOG No. 52 for WEEK ENDING 5 May 1945.

- a. Sunday 29 April Office routine and one half day off.
- b. Monday 30 April Conferred with Mr. Aldisio, High Commissioner of Sicily, General Berardi, General Branca, C.G., CORR Sicily, Mr. Modica, Inspector General of Police, Colonel Popodachina and Lt. Col. Patti, at the offices of the High Commissioner. This conference covered the same ground as the one between General Berardi and myself on Saturday and which I commented upon in my report No. 51. It was suggested by Mr. Modica and concurred in by General Berardi that the allocation of munitions for police work on the island be left to the discretion of General Berardi, instead of having to go through Ministry of War Channels as that practise consumes considerable time. It was further pointed out that the present allocation of P.O.L. for police work was insufficient and General Berardi suggested that he be permitted to allot any quantity of these items not required by the Army, to the police and CORR. Mr. Aldisio, also recommended that some other battalion be sent to Sicily to replace the Montegrano Alpini Battalion. He points out that the hordes of these troops are mainly in Northern Italy and inasmuch as they are mainly of the older classes and their homes are being freed, they will for the most part begin to demand their release from the Army. Certain parts of the island are practically overrun by armed gangs of brigands and in view of the reduction of the police force, suppression and control of them will be practically an impossibility. It was therefore, suggested that the total number of troops leaving the island be reduced to 2000. I explained that, for the most part their problems were not the direct concern of MILA, but that I would make a report of what transpired at this meeting and also that I would present the matter personally, as I planned to visit Rome this week. General Berardi stated that he planned to visit Rome and take the matter up with the proper authorities there, but as I was the only Allied authority on the island to whom he could go, he desired that I know about what was taking place. It was also pointed out that a plan was being formulated to send out into the island small detachments of police totaling 1000 men, that they would ferret out the leaders of the mobs and that barracks stores were needed for their use. I explained that I could not allocate Military stores to the CORR, but that I would approach headquarters on the matter.

Li. Adam, my interpreter and translator, has requested a transfer to a unit in Northern Italy as that is where his home is located. Pending action on his request I talked with Lt. Colonel Patti reference

offices of the High Commissioner. This conference covered the same ground as the one between General Berardi and myself on Saturday and which I commented upon in my report No. 51. Mr. Aldisio, also recommended that some other battalion be sent to Sicily to replace the Montegrano Alpini Battalion. He points out that the houses of these troops are mainly in Northern Italy and inasmuch as they are mainly of the older classes and their homes are being freed, they will for the most part begin to demand their release from the Army. Certain parts of the island are practically overrun by armed gangs of brigands and in view of the reduction of the police force, suppression and control of them will be practically an impossibility. It was therefore suggested that the total number of troops leaving the island be reduced to 2000. I explained that, for the most part their problems were not the direct concern of SMIA, but that I would make a report of what transpired at this meeting and also that I would present the matter personally, as I planned to visit Rome this week. General Berardi stated that he planned to visit Rome and take the matter up with the proper authorities there, but as I was the only Allied authority on the island to whom he could go, he desired that I know about what was taking place. Colonel Patti reference the most qualified interpreter available. I asked to interview a number of interpreters who I believe qualified.

Lt. Colonel Marcellino, O.C. Statistical Department of Territorial Headquarters called at the office and we went over the call-up figures. According to report rendered to General Berardi by Colonel Marcellino his figures exceeded mine by one hundred seventy seven men. I pointed out to the Colonel, that by switching his figures from the ones rendered by the Districts to the number of men leaving Messina he had picked up the difference but by doing so he was counting some men twice. He finally agreed upon the correct call-up figures and the Colonel said he would render a corrected report to General Berardi. As of yesterday the total recalls come to 17,005, but the call-up will continue through tomorrow.

C. Tuesday 1 May. Conferred with Lt. (sg) Resiste, Supply Officer of U.S. Naval Operating Base concerning issue of rations to the Italian Navy. The Lieutenant has a copy of our Administrative Instruction No. 12 and I called his attention to paragraph 12 thereof. I further

c. (continued).....explained that it would not be necessary for him to issue rations to Italian ships calling at his base because the Army has a ration depot in Palermo and the Italians should draw their rations from me. He stated that in the future he would not issue any rations to Italian ships. An Italian submarine 'Cognit' is attached to the base for training purposes and it has a complement of 70-75 officers and men. These men all eat in the U.S. Navy General Mess and draw all supplies from the Navy. It was explained that for a shore based crew the gallery aboard the sub is inadequate for them, that no repayment or charges is incurred against the Italian Government by the crew eating in the General Mess. A survey of the records show that several hundred of dollars worth of clothing, office supplies, general stores and medical supplies are issued to the Italian Navy every month, at the base.

Lt. Colonel Bellito, Acting Commander of Palermo Legion CORN and Major Cordaro, Commissary Officer, called at the office. They had received orders from their headquarters to transfer 1400 men to the mainland. They submitted a large indent for clothing and equipment which they had been instructed to draw from Military Stores. Informed them that I had no authority to issue them anything, that the stock was not available and that their indent would have to be screened and materially reduced, even if I had authority to make the issue. I suggested that he signal his headquarters, informing them of the equipment he needs and request that it be made available to them at a certain place on the mainland to be issued to his troops upon their arrival there.

Conferred with Lt. Colonel Morton, Liaison Officer Alcon Sicily regarding Motor Transportation now in the hands of I.M.F. At the present time no officer is in Sicily authorized to handle this matter and Colonel Morton will not assume the authority. I pointed out that all ambulances, tractors and motorcycles which would serve a definite military purpose rather than a civilian one should be returned to the Military. Colonel Morton was inclined to agree with me on this and stated that if he was given authority to act, that he would go along with me one hundred percent. At the present time he is waiting for a Major Downer to come to Sicily to take over the transport matter.

29 April 1945

1. WEEKLY LIAISON LOG NO. 51 for WEEK ENDING 28 APRIL 1945.

a. Sunday 22 April. Conferred with Lt. Hittinger and Lt. White of MOS regarding withdrawal of 6th I.S. Regt. troops from guard duties at the Naval Base and substitution of the 2nd Battalion of the 5th I.S. Regiment. Lt. White stated that he preferred to keep the 6th Regiment because they had been on the detail for a long time. I explained to him that that was the main reason the Italian Military had designated the 5th Regiment for the job, that the 6th Regiment had not been doing any training and it was decided to take them off the job so they could do so. I explained to the officers that AFHQ had ordered the transfer of two Battalions to the 3rd District, and the designation of the units had been left up to Territorial Headquarters Palermo. I further explained that the Military had desires to withdraw the 6th Regt. from the Navy since January, but because of the internal disturbances at that time it was never done.

Half day off.

b. Monday 23 April. Conferred with Lt. Col. Patti, Deputy Chief of Staff regarding exchange of the 2nd Bn., 5th I.S. Regt., for the 6th Regt. doing guard duty at U.S. Naval Operating Base. The 2nd Battalion is not up to authorized strength and I explained that the Navy is now using approximately 300 guards and are constantly creating new posts, therefore, it is imperative that the Battalion be brought up to strength immediately. It was decided to strengthen the Battalion from units in the 5th Regiment and to do so before the guard is changed. Officer strength of the Battalion is up to TO/EE.

A report had reached me that Military Transport was being used to haul furniture, etc. for civilians. I took this up with Col. Patti and he explained that furniture and personal possessions were sometimes hauled in Military Transport, but that it was limited to property of Military personnel when changing station and then only if the transport was otherwise traveling empty and in the proper direction.

We also discussed a complaint made to me by the Communications Section of U.S. Naval Operating Base, that the Italian Military were placing many long distance telephone calls to Naples, Rome, Messina, Catania and other parts of the island over their lines. It was requested that I see if the practice could not be discontinued or at least materially reduced.

that the 6th Regiment had not been doing any training and it was decided to take them off the job so they could do so. I further explained that the Military had desired to withdraw the 6th Regt. from the Navy since January, but because of the internal disturbances at that time it was never done.

Half day off.

b. Monday 23 April. Conferred with Lt. Col. Patti, Deputy Chief of Staff regarding exchange of the 2nd Bn., 5th I.S. Regt., for the 6th Regt. doing guard duty at U.S. Naval Operating Base. It was requested that I see if the practice could not be discontinued or at least materially reduced. Col. Patti and I discussed the matter with Colonel Griglio, Chief of Staff, and it was decided that all such calls over Navy lines would be stopped, except in emergency and in such an event express authority of the Chief of Staff must be obtained before the call is placed. Otherwise, Italian 3051 would be used.

c. Tuesday 24 April. Conferred with Lt. Comdr. Murphy, Intelligence Officer of U.S. Naval Operating Base, concerning matter of general interest between our two offices.

Conferred with Lt. Comdr. Rickey, Communications Officer of U.S. Naval Operating Base regarding our signals. Commander Rickey explained that our signals were not creating the load that he had anticipated they would when he first agreed to handle our traffic, but that our weekly stock state was creating a problem due to their great length. He asked if the signals could not just as well be sent by Aero-grams through Navy channels and 24 hours service was assured. I explained to him the importance of the stock states going straight signals. He finally agreed that wherever the load on his communications became too heavy to handle the lengthy stock state, it could be sent Aero-gram and I would be immediately notified that such action was taken.

g. Saturday 28 April. Lt. Snider inspected the Headquarters Company of Territorial Headquarters and the San Antonio Military Bakery. (See SAT Report No. 42)

I conferred with General Perardi and Lt. Col. Patti at Territorial Headquarters enroute matters of general interest. The General is much concerned about losing the Montegrupo Alpini Battalion. He points out that the homes of these troops are in Northern Italy and inasmuch as they are mainly of the older classes and their homes are being freed they will for the most part demand their release from the Army.

Declassified E.O. 12356 Section 3.3/NND No. 785020**CONFIDENTIAL**

I.O. Sicily Weekly Ln. Log No. 51

g. (continued) He further explained that 2,700 C.C.R.R. are being withdrawn from Sicily. In view of the continued threat from the Brigades forming the island he is much concerned that the island will be left with an insufficient number of police to cope with them. A conference is planned for Monday morning between General Berardi, The High Commissioner of Sicily and the General Commanding the C.C.R.R. in Sicily to discuss internal security and the suppression of the brigades. General Berardi asked me to attend and I told him I would gladly do so.

We also discussed the Call-Up. The General stated that 17,000 re-calls had, as of the 27th., been sent to Reggio, but I explained that my figures, as of the 27th., showed only 16,225 as having been accepted. Col. Marcellino C.C. Statistics was called in and it was learned that he had based his figures on re-calls crossing the Straits to Reggio which meant that he was counting some men twice. The General told Col. Marcellino to get his figures straight with me and render to him another report.

I also discussed with the General Headquarters letter 35/61/X dated the 25 April, subject Supply of Personnel for RTG, ICF Casano. A signal had just been received by the General from The War Ministry ordering the acceptance of 1000 Volunteers in this category. Five Hundred during the period 14 - 20 May and five hundred during the period 21 - 27 May. The General stated that the Volunteers are available and we will meet with no difficulty in obtaining the 1000 men.

We also discussed the gun towing tractor now in the possession of the 16th. and 22nd. I.S. Bns. These tractors are not mentioned in the New W/E for Motor Transport. The guns and caissons are stored and not used. The General desires that the tractors be retained in the Units as they are now of considerable use and eventually they may be used again for towing the guns. My 21/1 dated 10 April, refers.
