ALLIED CONTROL COMMISSION  
Army Sub Commission  
A.P.O. 509, U.S. Army

14 August 1944

SUBJECT: Reinforcement Personnel for Remount Depots.

TO : Commanding General, Italian Forces in Sardinia.

1. Pending instructions which you will in due course receive from SHAK, you are notified that the following reinforcements are required for Remount depots on the mainland:

|                          |         |
|--------------------------|---------|
| Required by 25 August    | 80 men  |
| Required by 10 September | 220 men |
| Total                    | 300     |

2. Personnel should if possible be suitable for remount depot duties and possess some previous experience; if this is however impossible, untrained men may be selected.

3. Please take action at once to alert the above personnel in view of the fact that the first group are required by 25 August.

MILITARY HEADQUARTERS OF SARDINIA (XIII A.C.)  
Operations Office

File No. 7908/a/Ord.

APO 50, 10 Aug 44

SUBJECT: Handing Over of Animals to Farmers.

TO : Veterinary and Remount Directorate.  
 : Major Outtierres, Cav.  
 : Inspector Agricultural Department.  
 INFO : High Commissioner for Sardinia.  
 : Colonel Simmons' Office.  
 : Hq Cavalry Sqd. Group of Sardinia.

Inclosures for Vet & Remount Directorate only: 27 requests are being held by this headquarters.

In accordance with request by Colonel Simmons, representative in Sardinia of MMIA, in agreement with the High Commissioner regarding the handing over of animals to farmers, I direct as follows:

1. A commission composed of the below listed men, will supervise the handing over of animals to the farmers:

|                                                    |           |
|----------------------------------------------------|-----------|
| Lieut Colonel Lixi, Vet.                           | President |
| Major Outtierres, Cav.                             | Member    |
| Representative of the<br>Agricultural Inspectorate | Member    |

2. Said commission will meet 15 August 1944 at the Cavalry Sqd. Group quarters at Cristano and will proceed to hand out animals at once.

3. The representative of the Agricultural Inspectorate will express for each case his opinion concerning the necessity and merit of each request.

4. In handing over the animals, preference will be given to requests submitted by farmers which are now being held by various Hq on the island.

5. Upon handing over the animals, the recipient must sign a statement similar to that attached.

This Headquarters' copy will be kept in the files of the Veterinary's Office.

6. The Veterinary & Remount Office will be entrusted with the execution of the aforesaid orders, and will also inform the applicant as to the date and place transaction is to be made.

7. This Headquarters in further orders will see to it that requests from farmers now in possession of the various units throughout the island are sent to Cristano, and it will also advise Garrison Headquarters as to the date transfer will commence.

8. The number of animals to be handed over will remain fixed as follows:

|        |     |
|--------|-----|
| Horses | 320 |
| Mules  | 136 |

- DALL'ALTO

- RUMAS

- CRISTIANO

Allegati solo per l'uff. Ippico e Vet. e n° 27 secondo dis-  
centi presso questo comando.

In armonia e quanto stabilito dal Colonnello SIMONE  
rappresentante della S.M.I. in carica d'accordo con l'Al-  
to Commissariato in merito alla concessione del quadrupedi agli  
agricoltori, dispenzo:

1° - Alla concessione del quadrupedi agli agricoltori sovrintenderà  
una commissione così composta:

- Mag. Col. Vet. LICI

- Mag. Cavall. CRISTIANO

- Mag. Agr. dell'Ispett. dell'Agricoltura - Membre

- Presidente

- Membre

2° - Detta Commissione si riunirà il G. 13 corr. in Oritano presso  
gli accomandanti del Gr. 1008. Javalleggeri e procederà con-  
sultare alla concessione.

3° - Il rappresentante dell'Ispettorato dell'Agricoltura esprimerà  
il suo parere sul proprio parere sulle necessità e sui requisi-  
ti di varietà del richiedente.

4° - Nella concessione dovrà darsi precedenza alle domande degli agri-  
coltori già pervenute e tuttora in sospeso presso i vari  
uffici dell'isola.

5° - All'atto della ricezione del quadrupede il richiedente dovrà  
firmare una dichiarazione analoga a quella allegata.

L'esemplare per questo comando sarà tenuto negli archivi del-  
l'ufficio Ippico.

6° - L'uff. Ippico e Vet. resta incaricato dell'attuazione delle pro-  
cedenti disposizioni, nonché di comunicare ai richiedenti, il  
giorno e la località in cui sarà effettuata la concessione.

2. Ref my Progress Report (4) of 6 July 1944, having discovered further information, a second inspection of the Italian Army Remount Depot (Centro Rifornimento Quadrupedi) was made on 7 August 1944.

The position there is:

|                       |            |                                        |                       |
|-----------------------|------------|----------------------------------------|-----------------------|
| Foals                 | 1          | } Inspected 3 July 1944                |                       |
| Yearlings             | 2          |                                        |                       |
| Two year olds         | 7          |                                        |                       |
| Three year olds       | 272        |                                        |                       |
| Four year olds        | 141        |                                        |                       |
| Five year olds        | 2          |                                        |                       |
| Brood mares           | 85         | Dispersed to farmers for breeding.     |                       |
| "Cavalli di Servizio" | 57         | Used for running depot, mostly unsound | } Inspected 3 July 44 |
| Mules                 | 23         | Too young or overage                   |                       |
|                       | <u>590</u> |                                        |                       |

The animals that had not been declared at the first inspection were the 143 4 and 5 year olds. Thirty of these animals were in the stables for breaking in. The remainder are running at grass. All these animals are in excellent condition, constituting the best group of horses yet seen in Sardinia.

3. A further 19 animals out of those rejected and assembled for disposal have had to be destroyed. The disposal to farmers is scheduled to commence on 15 August 1944.

4. V/Sgt Webb, RAVC, is remaining in charge of the 40 accepted saddle horses and fifteen mules (one more mule has been rejected owing to losing an eye in transit).

7 August 1944

SUBJECT: Inspection of Italian Army Remount Depot (Centro Rifornimento Quadrupedi) Bonorva

TO : Colonel F. L. Simmons

1. The Depot was visited today by Lieut. M. R. McCrea, R.A.V.C. accompanied by Captain J. Abbott, R.A.V.C.

2. The O.C., Lieut. Col. Mazzini was requested to give details of the staff of the Depot and the number of animals present. On the production of my authority and my stating that at least 570 animals should be present, he supplied the following details:

No. of Animals

|                    |         |                                                       |
|--------------------|---------|-------------------------------------------------------|

3. At the previous inspection on 3 July 1944 by Major Egerton R.I.R.F. and Lieut. McCrea the O.C. gave the figure of 260 young animals at the Depot. The animals that he had not declared were the 4 and 5 year olds ---143 animals. I asked him twice for the reason of this discrepancy. His answers were (a), that at the time these animals were away at outlying parts of the Depot (b), that he did not think that the inspection was official.

4. The four and five year old animals were then inspected. 30 of these horses were in the stables for breaking in. This work is being done by the Depot Staff and the 30 soldiers from the Sardinian Cavalry Squadron who had evidently been sent to Bonorva for this purpose.

Two groups were then visited at grass---mares and geldings. All these 143 animals are in excellent condition, constituting the best group of horses yet seen in Sardinia.

5. The O.C. stated that last year no animals were issued from the Depot. Previously the animals were sent unbroken to the various Cavalry regiments at four years old. The Carabinieri on the island have in the past required approximately 15 four year old horses a year.

This year 12 animals were broken and shipped to the mainland with two young horses for an Italian Army Equitation school.

31 July 44

REPORT OF CONFERENCE 31 JULY 44

Present:- Major P.M.M. Egerton  
Lieutenant McCrea  
Colonel Capello  
Major Cremonesi

1. Colonel Capello was asked whether more forage had been issued than existing number of animals.

He replied that each unit draws for the actual number of animals on the strength of the unit. Nominal roll of animals in each unit is kept, ages recorded, deaths recorded, and registers correctly kept from day to day. If a unit outdraws rations, the officer commanding has to pay cash at the end of each month to the Amministrazione Militare. This system prevents rations being drawn in excess.

2. A comparison was made between the numbers of animals reported by the Italian Administration to have been fed for the week 17-23 July 44 and the number of animals checked by Lieut McCrea during his tour of inspection. It was found that according to the Italian report the following animals were fed:-

|        |      |                     |
|--------|------|---------------------|
| Horses | 1363 | } All at 2/3 scale. |
| Mules  | 155  |                     |
| Total  | 1518 |                     |

According to Lieut McCrea's records, the following exist:-

|                                    |      |
|------------------------------------|------|
| Horses (including those awaiting   | 970  |
| Seen disposal to farmers)          | 1050 |
| Horses with various small units    | 109  |
| Horses with A.A. units             | 107  |
| Mules awaiting disposal to farmers | 156  |
| Total                              | 1392 |
|                                    | 176  |

There is a difference therefore of 96 rations. This was 729 explained by Colonel Capello as follows:-  
Issues to small units are made to cover a period (sometimes two weeks, sometimes

*Handwritten note:*  
729 rations

a month's rations are drawn in bulk). Therefore the weekly return of animals foraged varies considerably from week to week, according to whether these units have drawn or not.

3. The amounts of forage on hand in stores was next considered. According to the Italian return, the following accountable amounts were reputed to be in stores on 23 July:-

|        |          |          |
|--------|----------|----------|
| Barley | 6,258.35 | Quintals |
| Straw  | 6,778.66 | Quintals |

Colonel Capello states that there is considerable difference between the amounts reputed to arrive at the port and the actual amounts weighed at depots (due to broken sacks and wastage during handling). In actual fact the following amounts are on hand as at 23 July:-

|        |          |          |
|--------|----------|----------|
| Barley | 5,024.24 | Quintals |
| Straw  | 5,165.47 | Quintals |

4. The present figure of animals to be fed and the future figure were discussed. Colonel Capello stated that in the past all animals had been fed at 2/3 scale, owing to the difficulty of discriminating between the status of animals in small units. Most of the horses are used as draught horses.

Present basis of feeding is:-

|                                      |               |     |
|--------------------------------------|---------------|-----|
| Horses awaiting shipment             | 40 full scale |     |
| Mules awaiting shipment              | 16 full scale |     |
| Horses in possession of Italian Army | 860 2/3 scale |     |
| Horses awaiting disposal at Oristano | 320 2/3 scale | 304 |
| Mules awaiting disposal at Oristano  | 136 2/3 scale | 132 |
| Total                                | 1372          | 476 |

#### FUTURE

Further basis of feeding will be:-

|                                      |      |              |
|--------------------------------------|------|--------------|
| Horses in possession of Italian Army | 860  | full scale ? |
| CCRR horses (if ration approved)     | 513  | full scale ? |
| Total                                | 1373 |              |

It will therefore be seen that no increase in the number of animals to be rationed is envisaged in the future. CCRR horses do as much work, if not more, than Army horses.

5. The question of the Bonorva Remount Centre was discussed. Colonel Capello stated that all animals there were fed off the land and the centre produces sufficient forage for them. Animals are sent to units for training when they are 4 years old and taken into service after one year's training. The process is gradual - No big increase is visualized annually.

There are however about 570 young horses there.

6. Colonel Capello stated that the farmers who are allotted animals from Oristano will find no difficulty in feeding them off their own local resources. 728

*Ann. F. Capello*

23 July 1944

SUBJECT: Progress Report (5)

TO : D.D. V & E.S., Headquarters A.A.I., C.H.F.

1. Your h2/v & R refers.

2. As mentioned in para 2 of my report of 8 July, the inspection and classification of the animal situation in Sardinia has now been completed.

3. The situation is:

|                                                          | Horses | Mules |
|----------------------------------------------------------|--------|-------|
| a. Available for shipment                                | 50     | 16    |
| b. Assembling for disposition to farmers                 | 320    | 136   |
| c. Destroyed during inspection                           | 22     | 1     |
| d. Sound animals remaining with Italian Army in Sardinia | 650    | --    |

In addition to the 650 horses, a further 50-100 widely dispersed animals belonging to various subsidiary organizations are rationed from Army warehouses.

4. Of the 650 horses, 70% are in good condition and under 10 years old. The remainder are sound but still show signs of emaciation.

5. Many cases of Equine Piroplasmosis were encountered. It is widespread and owing to the lack of veterinary attention further losses may be expected.

6. A Stallion Depot has been visited, under the control of the Ministry of Agriculture. 50 stallions were inspected, a further 80 are at outstations. The breeds present are English Thoroughbred, Arab, Sardinian and crosses. The animals are in excellent condition and well managed.

SUBJECT: Progress Report (4)

TO : D.D.V. and R.S.  
H.Q., A.A.I., C.M.F.

1. Your 42/Vetr refers
2. The saddle horses referred to in paragraph 4 of my report of 27 June 1944, have now been reduced to 37. The remainder have been rejected as unsuitable as they have made no progress after a month's controlled rationing.
3. An Italian Remount depot and barn has been visited. The stock consists of approximately 250 horses, chiefly 3 and 4 year old Sardinian ponies. The depot is under the control of the Ministry of Agriculture, though run by military personnel.
4. All the rejected mules and saddle horses are being assembled prior to classification:- (a) destruction (b) disposal to farmers.
5. The Divisions using draught horses will be visited this week and the horses classified:- (a) suitable for retention by the Italian Army (b) suitable for disposal to farmers (c) destruction.
6. When this work is completed the animal situation in Sardinia will be as follows:-

Mules

- (a) Remaining with Italian Army - nil

Saddle Horses

- (a) Remaining with the Italian Army 120 \*  
(b) Remaining with the Carabinieri 582  
(c) Remaining for American Rest Camp 12 \* (rejects)

Draught Horses

- (a) Remaining with the Italian Army Number 700 \*  
(under 15 years old and suitable for active service) be ascertained

\* These animals will be rationed from Allied sources.

File: Veterinary

Visit to Centro Riforma Quadrupedi, Bonorva.

3 July 44.

(Major Egerton and Lieut. McCree)

The centre is about 15 miles East of Bonorva, along a very bad road leading into the foothills, the surrounding country being very wild and desolate.

The centre itself consists of modern stables, numerous menages and paddocks, a well set-up clinic and administrative offices, Carabinieri stables (not visited), cinema, Church and dwelling quarters. The whole is situated in attractive parkland.

Approximately 7 Officers, including the Offr. Comdg. and a Veterinary Captain are on the establishment. The grooms are a good type of old Cavalry soldier.

The stables were first inspected; they contained chiefly sick horses and old horses used for work around the estate and military lands, about 36 animals in all. There were one or two mares who had foaled and were awaiting return to units when fit. No stallions were seen.

O.C. stated that about 15 old mules were in possession and were used for drawing carts, carrying charcoal, and other work around the estate and surrounding land. About 4 of these were encountered.

Forage is obtained from the surrounding country, which is rich in corn and maize.

Three separate groups of young Sardinian ponies were inspected; these groups were all about 1 or 2 miles distance from the central stables. The ponies were out to grass in large open areas enclosed by stone walls.

A total of 200 horses were seen, these include those at the stables. O.C. stated that about 250-260 animals were in possession, chiefly between the ages of 2 and 3. In our opinion most of the animals appeared older, but a thorough inspection was not made.

The name of the Offr. Comdg. is Ten. Col. HAZZINI, Pietro. He has been in charge for about 15 months.

33 soldiers

3. At the previous inspection on 3 July 1944 by Major Egerton R.I.R.F. and Lieut. McGree the O.C. gave the figure of 260 young animals at the Depot. The animals that he had not declared were the 4 and 5 year olds ---143 animals. I asked him twice for the reason of this discrepancy. His answers were (a), that at the time these animals were away at outlying parts of the Depot (b), that he did not think that the inspection was official.

4. The four and five year old animals were then inspected. 30 of these horses were in the stables for breaking in. This work is being done by the Depot Staff and the 30 soldiers from the Sardinian Cavalry Squadron who had evidently been sent to Bonorva for this purpose.

Two groups were then visited at grass---mares and geldings. All these 143 animals are in excellent condition, constituting the best group of horses yet seen in Sardinia.

5. The O.C. stated that last year no animals were issued from the Depot. Previously the animals were sent unbroken to the various Cavalry regiments at four years old. The Carabinieri on the island have in the past required approximately 15 four year old horses a year.

This year 12 animals were broken and shipped to the mainland with two young horses for an Italian Army Equestrian school.

Lieut., R.A.V.C.

MILITARY HEADQUARTERS OF SARDINIA (XIII A.C.)  
 Chief of Staff Services Office

No. 17859/Serv

APO 50, 5 June 44

SUBJECT: Weekly Report of Forage and Animals.

TO : Allied Headquarters - G-4 Office.

As per verbal request by Captain Stancoil of your headquarters, we forward in duplicate, the weekly report of forage and animals for the period 29 May to 4 June 44.

The complete ration (5 kg barley - 6 kg straw for horses and 3.5 kg for the mules) needed for 1,897 animals, will be distributed next week. The forage warehouses were informed on 3 June 1944, as soon as Captain Stancoil notified us of the quantities.

Chief of Staff  
 /t/ (Lieut Col Mario Capello)  
 /s/ Capello

DETACHMENT  
6742nd QM REMOUNT STATION

G-3

3 June 1944

SUBJECT: Plan for using Detachment in the Care and Feeding of Horses and Mules.

TO : Colonel FLOYD L. SIMMONS, O-100037, ASC/ACC.

1. Personnel will be divided into two sections, one to handle the horses and the other to handle the mules. The port will be divided into two areas, one for horses and the other for mules.

2. Each section will be responsible for everything pertaining to animals in their area, such as: feeding, watering, grooming, exercising, practice of preventative veterinary, medicine, stable policing, etc. The section leader will keep the Stable Sergeant informed as to the number of animals on hand, their classification and condition.

3. Any animals noticed to need medical treatment will be brought to the attention of the veterinary detachment.

4. The current forage scale set up by higher headquarters will be followed, but may be changed for individual cases by order of the Veterinary Officer.

ROBERT I. WILDER  
2nd Lt., Cavalry.

680

(2)

## Military animals in Sardinia (Cont'd)

9. Request that Major Crimonesi, Italian Veterinarian, be assigned to St. Bartolomeo for the period in which the animals awaiting shipment are there.

10. Recommend that the Italian Command of Sardinia furnish information showing the distribution of the 1081 (?) draft horses and the 120 (?) riding horses. (The purpose of this is to provide a means of checking the issue and consumption of forage and grain)

11. Request that the management group be furnished one 3/4 ton weapons carrier for the transportation of personnel. It is also desired to retain the one jeep which is now at our disposition for the purpose of making the inspection trips over the island etc. It is contemplated that the 8 Enlisted Men will be quartered and messed with C Battery, 74th AAA, which is in the proximity of St Bartolomeo.

12. Request that sufficient number of Italian personnel be assigned to care for the animals awaiting shipment. These men should have previous experience with animals. (Suggested number would be 215 EM and 6 Officers.)

13. Colonel Simmons will be contacted for procurement of all items of equipment and material necessary in the operation of this project.

14. Constant checks will be made on all storage places where forage which has been turned over to the Italian Army is maintained. These inspections will determine whether proper care in the safeguarding and issue of the grain is being maintained.

15. Request that Col. Cappelo of the Italian military command of Sardinia be called on to furnish G-4 Section of AGS a weekly report of grain and forage. This report to be rendered each Tuesday and will contain the following information.

1. Number of animals fed.
  - a. horses
  - b. mules
2. Amount of forage and grain fed.
3. Amount of forage and grain remaining on hand.

FRANK B STANCIL  
Capt., GMD

\* THRU REC

31 May 1944

SUBJECT: Distribution, care, and feeding of the military animals in Sardinia.

TO : Colonel Simmons.

1. The following plan is outlined to provide information to those concerned as to the proposed mission or objectives concerning the handling of all military animals on the island of Sardinia. This plan is general in nature and does not list all specific items to be accomplished. The plan may be changed from time to time with the permission of the proper authority.

2. All mules in the hands of the Italian military authorities and suitable for military service, presumably 612 animals, are to be assembled at St. Bartolomeo.

3. 225 riding horses suitable for military service and under 15 years of age are to be assembled at St. Bartolomeo.

4. All animals which are deemed unsuitable for the military service and over 14 years old are to be assembled at the cavalry barracks, Oristano. Those animals which are now in infirmaries and are not in condition to withstand the trip to Oristano will remain at their present location until such time as their condition has improved.

5. All animals which are not to be shipped by the Allies will be removed from St. Bartolomeo at once. The following exceptions may be made if so desired.

- (1) Those animals which are used for riding purposes by the Italian Military Command of Sardinia.
- (2) Those draft horses which are necessary for the maintenance of the post.

6. When all animals which are unsuitable or too old for the military service are assembled at Oristano, the Italian Military Command will be requested to dispose of them or issue them to the farmers. It is suggested that these animals be disposed of by 15 June 1944. Until such time as this is accomplished these animals will be fed a 2/3 ration. Supervision of this will be maintained by inspection visits to Oristano 2 or 3 times weekly.

7. The feeding and care of all those animals at St. Bartolomeo which are for Allied use will be supervised by Allied personnel (1 officer, 8 enlisted men) this supervision to be close and constant at all times.

8. Request that all stables and corrals at St. Bartolomeo be made available to Allies for use with the animals mentioned above.

HQ. ALLIED GARRISON SARDINIA  
G-4 Section

28 April, 1944

Memo to Col Simmons:

With reference to personnel needed to handle the requisitioning, supervision, care and feeding of the remainder of the horses and mules on the Island, the following are my ideas on the subject:

(a) AGS is at present unable to furnish the necessary personnel, particularly enlisted men. An adequate organization to supervise the Italians and to see that Allied interests are taken care of.

(b) I believe the animals to be shipped out should be concentrated at three places:

S. Bartolomeo (principally those awaiting shipment)

Oristano (where we have what is left of the 400 horses already requisitioned)

A third place (Capt Spong recommended vicinity of Nuoro or a place farther up the line from Oristano).

(c) Based upon (b) I believe the minimum requirements are as follows:

An Officer in Charge assisted by an NCO and one Pvt. Officer to be experienced in animal management, etc.

A Veterinary Officer assisted by an NCO and one Pvt, the latter two being veterinary technicians.

At each of the concentrations, one NCO and one Pvt, familiar with animal management.

(d) I believe when the forage comes in it should be turned over to the Italians and distributed by them under the supervision of the above non-veterinary personnel.

(OVFC)

659

2. The above requirements total up as follows:
- 1 Officer in Charge
  - 1 Veterinary officer
  - 4 NCO's with animal management experience
  - 1 NCO with vet. technical qualifications
  - 4 Pvts with animal management experience.

G-3

3 June 1944

SUBJECT: Plan for using Detachment in the Care and Feeding of Horses and Mules.

TO : Colonel FLOYD L. SIMMONS, G-100037, ASC/ACC.

1. Personnel will be divided into two sections, one to handle the horses and the other to handle the mules. The post will be divided into two areas, one for horses and the other for mules.
2. Each section will be responsible for everything pertaining to animals in their area, such as; feeding, watering, grooming, exercising, practice of preventative veterinary, medicine, stable policing, etc. The section leader will keep the Stable Sergeant informed as to the number of animals on hand, their classification and condition.
3. Any animals noticed to need medical treatment will be brought to the attention of the veterinary detachment.
4. The current forage scale set up by higher headquarters will be followed, but may be changed for individual cases by order of the Veterinary Officer.

653

11 May 1944

SUBJECT: Distribution, care, and feeding of the military animals in Sardinia.

TO ; Colonel Simmons.

1. The following plan is outlined to provide information to those concerned as to the proposed mission or objectives concerning the handling of all military animals on the island of Sardinia. This plan is general in nature and does not list all specific items to be accomplished. The plan may be changed from time to time with the permission of the proper authority.

2. All mules in the hands of the Italian military authorities and suitable for military service, presumably 612 animals, are to be assembled at St. Bartolomeo.

3. 285 riding horses suitable for military service and under 15 years of age are to be assembled at St. Bartolomeo.

4. All animals which are deemed unsuitable for the military service and over 14 years old are to be assembled at the cavalry barracks, Oristano. Those animals which are now in infirmaries and are not in condition to withstand the trip to Oristano will remain at their present location until such time as their condition has improved.

5. All animals which are not to be shipped by the Allies will be removed from St. Bartolomeo at once. The following exceptions may be made if so desired.

- (1) Those animals which are used for riding purposes by the Italian Military Command of Sardinia.
- (2) Those draft horses which are necessary for the maintenance of the post.

6. When all animals which are unsuitable or too old for the military service are assembled at Oristano, the Italian Military Command will be requested to dispose of them or issue them to the farmers. It is suggested that these animals be disposed of by 15 June 1944. Until such time as this is accomplished these animals will be fed a 2/3 ration. Supervision of this will be maintained by inspection visits to Oristano 2 or 3 times weekly.

7. The feeding and care of all those animals at St. Bartolomeo which are for Allied use will be supervised by Allied personnel (1 officer, 8 enlisted men) this supervision to be close and constant at all times.

8. Request that all stables and corrals at St. Bartolomeo be made available to Allies for use with the animals mentioned above.

652

(2)

## Military animals in Sardinia (Cont'd)

9. Request that Major Crimonesi, Italian Veterinarian, be assigned to St. Bartolomeo for the period in which the animals awaiting shipment are there.

10. Recommend that the Italian Command of Sardinia furnish information showing the distribution of the 1081 (?) draft horses and the 120 (?) riding horses. (The purpose of this is to provide a means of checking the issue and consumption of forage and grain)

11. Request that the management group be furnished one 3/4 ton weapons carrier for the transportation of personnel. It is also desired to retain the one jeep which is now at our disposition for the purpose of making the inspection trips over the island etc. It is contemplated that the 8 Enlisted Men will be quartered and messed with C B battery, 74th AAA, which is in the proximity of St Bartolomeo.

12. Request that sufficient number of Italian personnel be assigned to care for the animals awaiting shipment. These men should have previous experience with animals. (Suggested number would be 215 EM and 6 Officers.)

13. Colonel Simmons will be contacted for procurement of all items of equipment and material necessary in the operation of this project.

14. Constant checks will be made on all storage places where forage which has been turned over to the Italian Army is maintained. These inspections will determine whether proper care in the safeguarding and issue of the grain is being maintained.

15. Request that Col. Cappello of the Italian military command of Sardinia be called on to furnish G-4 Section of AGS a weekly report of grain and forage. This report to be rendered each Tuesday and will contain the following information.

1. Number of animals fed.
  - a. horses
  - b. mules
2. Amount of forage and grain fed.
3. Amount of forage and grain remaining on hand.

DETACHMENT  
6742ND QM REMOUNT

1 June 1944.

SUBJECT: Report on Animals, in Sardinia.

TO : Commanding Officer, 6742nd QM Remount Depot,  
APO 782, P.B.S. (Thru: Colonel FLOYD L. SIMMONS,  
O-10037).

1. The Allied Garrison of Sardinia has ordered all mules fit for military duty (estimated to be 612) and 285 riding horses be assembled at Cagliari. This is being done and will be completed within a few days.
2. What animals I have seen, 138 horses and 177 mules, will run about 1/3 good, 1/3 fair, and 1/3 poor.
3. Have been advised by AGS that no shipping can be had for at least a month.
4. My detachment is supervising the care and feeding of the animals. There is plenty of forage and we have sufficient Italian personnel.
5. I will report to you 9 June 1944 and give you a complete picture of the animal situation in Sardinia.

ROBERT I. MILLER  
2nd Lieut., Cav.

1st Inf.

FROM: SARDINIA DETACHMENT, ARMY SUB COMMISSION, ACC, APO 509, 1 June 1944  
TO : CO 6742nd QM Remount Depot, APO 782 (Thru: C.O., P.B.S.)

1. Forwarded.
2. Lieutenant Miller and his detachment are installed in quarters preparatory to receiving and supervising the care of animals listed in basic communication.

## MEMORANDUM

SUBJECT: Inspection of Mules

TO : Col Simmons

On 18 March 1944 at 1:00 P.M. I went to the St. Bartholemew Barracks in company with Capt. Spong and Lt Miller of the Veterinary Corp to inspect the mules that the Italian Command had put at the Allies disposal for the next lift of ~~44~~ mules to the mainland.

Four hundred and fifty-four (454) mules were inspected. One hundred eleven (111) were so emaciated that they were discarded as useless. Twenty-nine (29) were in the Infirmary. Out of the remaining three hundred and fourteen (314) mules, Capt. Spong selected only forty-eight as acceptable for immediate use on the mainland. He stated that with proper feeding for two to three months the majority of the two hundred and sixty-six (266) might be ready for service.

19 February 1944.

SUBJECT) Report on the condition of the mules requisitioned from the Italian Army for shipment to P.B.S.

TO : Commanding General A.G.S.

ATTN: Colonel's Simmons and Harding.

1. This report is based on a recent inspection trip to the indicated places where mules have been requisitioned from the Italian Army for the use by the American Army and the mules are awaiting shipment at places indicated. Of the total of 420 mules that have been requisitioned and are awaiting shipment 15 have died and 15 have been placed in animal hospitals because they are too weak and are unable to stand. Fully 50 per cent of the mules mentioned above are too weak to ship, because they are so weak the shipment would probably kill them.

2. The mules located at Iglesias, 30 in number are in very poor condition and fully 50 percent are unsatisfactory for shipment. They are being fed one pound of beans (fava) and two pounds of a mixture of wheat and oat straw daily. (The daily ration for a 1000 # mule should be 10 pounds grain and 12 to 14 pounds of hay.) These animals weigh from 700 pounds to 1000 pounds each.

3. The 60 mules located at San Gavin Monreale were getting one pound of Caruba Bean and about two pounds of a mixture of wheat and oat straw. This was not adequate and measures have been taken to feed these animals grain from the King Victor Emanuel Farm. This step was taken to prevent the animals from becoming weaker and weaker from the lack of feed.

4. Of the 105 mules awaiting shipment at Oristano with the cavalry group No. two have died and the remainder are in very poor condition. They are fed about three pounds of "Crusto", Wheat Bran daily. They also pasture them but the pasture is not adequate.

5. The mules at Nuoro, with the 22nd Inf. Regiment are in very poor condition and are getting about three pounds of "Crusto" Wheat Bran and a small amount of straw, less than two pounds daily. The majority of these mules died a week ago. The latest information received.

6. One hundred and forty mules were requisitioned from the 40th Artillery Regiment at Sassari. One hundred thirty five mules actually were consigned for shipment. Eight of these are in the animal hospital at Alghero and eleven have died. Practically all of these mules are too weak for shipment. The animals have not had any hay or straw in twenty five days, they were being fed about three pounds of "Crusto" Wheat Bran, in a dry lot up to four days ago. Since that time they have not been fed anything, but are driven about three miles out of town to a very poor pasture each day.

7. In addition to these mules they have 200 horses which are gradually starving to death. According to reports they are dying in their stalls at the rate of ten a day.

8. There is a total of 540 mules located at Bartolomeo, Cagliari which have been fed ten pounds of barley and twelve to forty pounds of mixture of wheat and oat straw since late December. These mules were in very poor condition when received but with few exceptions have shown considerable improvement with satisfactory feed.

HEADQUARTERS  
ALLIED GARRISON OF SARDINIA  
APO 534

REMARKS: There are 200 mules and 30 horses with the 205 Division Ho. Iglesias in very poor condition. The Post Veterinarian reports they have very little feed on hand and have been unable to requisition more feed. They are getting one of "Kova" beans a day and a little straw. He suggested that the American Army could use these mules they should be requisitioned, and taken away before they starve to death.

According to reports from the commanding Officers of the different units they have very little feed on hand and are unable to procure more.

Arthur A. Miller

MILITARY INTENDENZA OF SARDINIA (LIII C. A.  
Veterinary and Horse Direction

No. 1142/vet.

A.F.O. 50, 10 February 1944

SUBJECT: Veterinary Report for the month of January

TO THE MINISTRY OF WAR  
Direction of the Service of Horses and Horses Surgery.

- a) STRENGTH OF THE ANIMALS: Collectively the total number is 6029 (3913 horses and 2116 mules). The total includes 650 animals (of which 625 are horses and 25 mules). These belong to the Animal Supply Center of Bonorva, also are included 558 horses of the Carabinieri Legion.
- b) CLIMATIC CONDITIONS: Variable. Temperature cold.
- c) VETERINARY SERVICE: It is fulfilled at the Units by the officers as prescribed by the Table of Organization. These officers give services to the nearby Units which are unfurnished.
- Only in urgent cases, in very distant places, the service of civil veterinaries is used.
- Due to the decentralization of the units, the service is especially difficult due to the deficiency of transportation.
- d) SANITARY CONDITIONS: Good in general.
- e) CONTAGIOUS DISEASES: Mange (scab) psoroptica and lymphangitis cryptococcica. A case of lymphangitis cryptococcica and 86 cases of mange psoroptica has been discovered. The case of lymphangitis occurred the 29 January at the 33rd Medical Section of Paulilatino, and those of Mange among the animals of the 113rd Gruppo 40th Artillery Regiment at Sassari, of the Special Train Depot at S. Bartolomeo, of the CCXVII Gruppo Skoda at Nuxis, of the CCXI Gruppo Skoda at Sennori, of the Special Pack Train Unit at the Depot of the 45th Infantry Regiment at Iglesias, and of the Horse-drawn Gruppo of the 7th Artillery Regiment at Monti.

In order to prevent any possibility of diffusion among the Unit, and in order to have them in an isolate place, these animals, as they were discovered sick, were sent to the 12th Infirmary for Animals, at Frazione di Abbasanta and Iglesias, and to the Infirmary of the Depot of the 16th Artillery Regiment at Cagliari. Because of a light case and because of the possibility of keeping them very well isolated, only the six animals belonging to the two Gruppi Skoda were left in care of the Units themselves.

The horse afflicted with lymphangitis has not been submitted to treatments prescribed by the annex No. 16-98 and 99, for lack of medicine (malleina). In all cases the diagnosis is made from time to time at the Bacteriological Laboratory of Sassari.

At the units, from where the sick animals come, the stables the government equipment and the harness have been disinfected with solution of cleoline and solution of "La Place".

The unaffected animals have been submitted to a prophylactic washing, and in some cases to shearing.

The cause of the infection is due to a relapsing form of the disease. Speaking of the lymphangitis, the infection is due to a late showing of the disease already in incubation. The unit to which the horse belongs came from the Island

which are unaffiliated.  
Only in urgent cases, in very distant places, the service of civil veterinaries is used.

Due to the decentralization of the units, the service is especially difficult due to the deficiency of transportation.

d) SANITARY CONDITIONS: Good in general.

e) CONTAGIOUS DISEASES: Mange (scab) psoroption and lymphangitis cryptococcica.

A case of lymphangitis cryptococcica and 86 cases of mange psoroptica has been discovered. The case of lymphangitis occurred the 29 January at the 33rd Medical Section of Paulilatino, and those of Mange among the animals of the IIIrd Gruppo 40th Artillery Regiment at Sassari, of the Special Train Depot at S. Bartolomeo, of the CCKVII Gruppo Skoda at Nuxis, of the CCKI Gruppo Skoda at Sennori, of the Special Pack Train Unit at the Depot of the 45th Infantry Regiment at Iglesias, and of the Horse-drawn Gruppo of the 7th Artillery Regiment at Monti.

In order to prevent any possibility of diffusion among the Unit, and in order to have them in an isolate place, these animals, as they were discovered sick, were sent to the 12th Infirmary for Animals, at Frassione di Abbasanta and Iglesias, and to the Infirmary of the Depot of the 16th Artillery Regiment at Cagliari. Because of a light case and because of the possibility of keeping them very well isolated, only the six animals belonging to the two Gruppi Skoda were left in care of the Units themselves.

The horse afflicted with Lymphangitis has not been submitted to treatments prescribed by the annex No. 16-98 and 99, for lack of medicine (malleina). In all cases the diagnosis is made from time to time at the Bacteriological Laboratory of Sassari.

At the units, from where the sick animals come, the stables the government equipment and the harness have been disinfected with solution of cleoline and solution of "Le Flace".

The unaffected animals have been submitted to a prophylactic washing, and in some cases to sheering.

The cause of the infection is due to a relapsing form of the disease. Speaking of the Lymphangitis, the infection is due to a late showing of the disease already in incubation. The unit to which the horse belongs came into the Island about 10 months ago.

In order to discover the disease in its initial stages a prescribed weekly examination is conducted, with the exception of decentralized units and isolated animals, which can be examined only from time to time.

f) STABLES: All animals are sheltered. The majority of them in convenient stables; the rest are provided with improvised shelters or in private as the occasion permitted. Periodical sanitary measures had been taken.

g) FEEDING. RATIONS. Due to the complete lack of some elements of the ration and the deficiency of others, the feeding has been irregular for some months. Until now the animals have received a continuous reduced ration of concentrates. This reduction occurs even when the rations are fixed by the Quartermaster, in which case at the time of distribution they are modified according to the elements of ration at the disposal of the warehouse and very often the concentrates are substituted only with the bran.

At the units an accurate supervision is maintained to prevent the personnel from stealing part of the ration (fave and carob-bean), which are very appetizing especially in this period of grave crisis of food supply for the troops. This is a favorable condition which contributes to the general good condition and maintenance of the animals. The Veterinary Officers do their utmost to see that the rules of feeding are carried out literally.

*F. de M...*

h) WORK AND CARE. At present has been reduced according to the feeding. The animals are used for the normal functioning of the units and they are alternated with equal turns of rest. The care is carried out by all units and particularly by the Horse Units, because of a greater number of personnel and of the care of the Commanding Officers.

i) CONDITIONS OF NUTRITION. Although they can be considered very satisfactory in relation with the persisting deficiency of the ration, still the situation is very alarming for the future, because it is impossible to supply a remedy with only local facilities available.

Also the use of pastures has been a help in some zones, but in others the help was very limited due to the poorness of the soil and the cold weather. The animals which suffered most due to the above situation, are those of large size and particularly those belonging to the 40th Artillery Regiment at Sassari, of the CCXI and CCVII Gruppo Skoda at Sennori and at Nuxis, and of the 7th Artillery Regiment at Monti.

Although the nutrition conditions are the same as above, still among the animals of the different units are discovered cases of rapid deterioration especially among those animals which previously suffered of gastro-enteric and above all of piroplamosi (of which cases the great number is among those of the 40th Artillery). Among those of the CCXI Gruppo Skoda, and of the 7th Artillery Regiment the conditions are of less organic resistance.

It is evident that those elements, for which there is no hope of improvement, instead of waiting for the complete loss, would be, from time to time, eliminated by selling them to slaughter houses; in so doing at least the meat will be utilized. In case the horses are found to be consumable, it is of great advantage, considering the shortage of meat, to be used for the feeding of troops. We also propose the disposal of those elements which are from time to time declared not serviceable.

Also the Intendenza has become alarmed at this situation since last October, and in order to economize the food supply for the animals, the Intendenza ordered the elimination of about a thousand from the less efficient, and to give to the farmers a certain number of horses always to be taken out of the less efficiency according to the last order of which we include a copy. This transfer is continued and accomplished also according to the last circular No. 333 of 22 January issued by your Ministry.

At present the ration is as follows:

Kg. 1500 of bran and 2500 of straw for those that remain. This ration is insufficient, aggravated at this time by the bad weather conditions, which do not permit for many consecutive days the use of the pastures.

From the above we can conclude that the situation is very critical, and if we do not receive from the Allied a contribution to the preservation of our precious quantity of horses, will find irremovable obstacles.

1) SHORING. In good order at every unit. The units are regularly furnished according to the rules established and controlled by this office.

2) LOSSES. The total is 24 of which 45 caused by death, 12 by slaughtering and 27 by butchering.

of artillery). Among those of the CCII Gruppo Skoda, and of the 7th Artillery Regiment the conditions are of less organic resistance. It is evident that those elements, for which there is no hope of improvement, instead of waiting for the complete loss, would be, from time to time, eliminated by selling them to slaughter houses; in so doing at least the meat will be utilized. SERVIZIO VETERINARIO: è disimpegnato presso i reparti dagli Ufficiali previsti dall'organico, detti Ufficiali provvedono anche al servizio presso i reparti, più o meno vicini, che ne sono approvvisti. Solo nei casi urgenti, nelle località molto distanti, si ricorre all'opera dei veterinari civili.

Per i molteplici frazionamenti dei reparti, il servizio è alquanto disage-

a) STAFF SANITARIO: nel complesso buono.

1) *Mullus barbatus*: zona psorittica e linfangite criptococcica.

Si sono verificati un caso di linfangite criptococcica e 25 casi di rotta purulenta. -- Quello di linfangite il 29 Gennaio u.s. presso la 33<sup>a</sup> Sezione di Sanità di Paulistino, e quelli di rotta tra i quadrupedi del VII<sup>o</sup> Gruppo 40<sup>o</sup> Reggimento Artiglieria in Sassari, del Deposito Carreggio Speciale di S. Bartolomea, del CCVII<sup>o</sup> Gruppo Skoda a Nuxis, del CCXI<sup>o</sup> Gruppo Skoda in Sassari, del Reparto Speciale Salmierie presso il Deposito 45<sup>o</sup> Reggimento Fanteria ad Iglesias, e del Gruppo Ippotrainato del 7<sup>o</sup> Reggimento Artiglieria in Monti. --

Per togliere ogni possibilità di diffusione presso il reparto e per ricoverarli in apposito locale d'isolamento, questi quadrupedi <sup>di mano in</sup> mano che venivano riscontrati ammalati, erano avviati alla 125. Infermeria Quadrupedi, Frazione di Abbasanta ed Iglesias ed, a quella del Deposito 16° Reggimento Artiglieria in Cagliari. Solo i cani appartenenti a ciascuno dei due Gruppi Skoda, per essere colpiti da forma lieve e per la possibilità di tenerli bene isolati, sono stati ricoverati in casa presso i reparti stessi.

11.11.11

Il cavallo affetto da linfangite non è stato sottoposto al malleinamento diagnostico prescritto dal fascicolo n° 16 - 98 a 99, per mancanza di malleina.-

In tutti i casi gli accertamenti delle malattie vengono compiuti di volta in volta presso il Laboratorio Batteriologico di Sassari.-

Presso i reparti di prevenzione dei quadrupedi malati sono state praticate le dovute disinfezioni dei locali, degli oggetti di governo e delle baracche con soluzioni di clorina e soluzioni di "LIA PLAC".-

I quadrupedi umani sono stati sottoposti a lavaggi profilattici, e, secondo i casi, anche alla tosatura.-

La causa dell'infezione deve ritenersi dovuta ad una forma recidivante della malattia, e per la linfangite, ed un tardivo palesarsi del male già in incubazione. Il reparto cui appartiene il cavallo è giunto all'isola da circa 10 mesi.-

Allo scopo di sorprendere sin dall'inizio l'insorgere di qualsiasi malattia a carattere diffusivo, vengono compiute presso i reparti le prescritte visite settimanali, ed eccezione dei reparti molto frazionati e con quadrupedi isolati, nei quali non possono effettuarsi che saltuariamente.-

f)- RICOVERI: tutti i quadrupedi al riparo. La maggior parte di essi in scuderie e tettoie convenienti; per i rimanenti si è provveduto con ricoveri di fortuna e con locali privati adattati alla circostanza, previe le dovute misure igieniche periodicamente si ricorre alla loro bonifica.-

g)- ALIMENTAZIONE - RAZIONAMENTO: l'alimentazione da molti mesi è irregolare, causa la mancanza assoluta di alcuni generi e la deficienza di altri, per la scarsa produzione dell'isola e per i mancati arrivi dal Continente.- Sinora i quadrupedi hanno consumato un quantitativo sempre rifatto di concentrati. Anche quando dalla Direzione di Commissariato vengono fissate le razioni, queste, al momento della distribuzione, subiscono le bonifiche e secondo delle disponibilità dei generi nei Magazzini; molto spesso succede che i concentrati vengono sostituiti totalmente dalla sola crusca.-

onde i casi, anche alla tosse.

La causa dell'infezione deve ritenersi dovuta ad una forma recidivamente della malattia, e per la linfangite, ed un tardivo palesarsi del male già in incubazione. Il reparto cui appartiene il cavallo è giunto all'isola da circa 10 mesi.

Allo scopo di sorprendere sin dall'inizio l'insorgere di qualsiasi malattia a carattere diffusivo, vengono compiute presso i reparti le prescritte visite settimanali, ad eccezione dei reparti molto frazionati e con quadrupedi isolati, nei quali non possono effettuarsi che saltuariamente.

f)- RICOVERI: tutti i quadrupedi al riparo. La maggior parte di essi in scuderie e tettoie convenienti; per i rimanenti si è provveduto con ricoveri di fortuna e con locali privati adattati alla circostanza, previe le dovute misure igieniche periodicamente si ricorre alla loro bonifica.

g)- ALIMENTAZIONE - RAZIONAMENTO: l'alimentazione da molti mesi è irregolare, causa la mancanza assoluta di alcuni generi e la deficienza di altri, per la scarsa produzione dell'Isola e per i mercati privi dal Continente. Siccome i quadrupedi hanno consumato un quantitativo sempre rifatto di concentrati. Anche quando dalla Direzione di Commissariato vengono fissate le razioni, queste, al momento della distribuzione, subiscono le bonifiche a secondo delle disponibilità dei generi nei Magazzini; molto spesso succede che i concentrati vengono sostituiti totalmente dalla sola crusca.

Presso i reparti viene esercitata un'accurata sorveglianza per impedire che il personale di governo sottragga parte della razione (fave e carrube), generi appetitibili specie in questo periodo di grave crisi alimentare anche per la truppa. Altra causa questa favorevole che influisce sul mantenimento delle buone concizioni generali dei quadrupedi.

Gli Ufficiali veterinari, dal canto loro, si assicurano che le norme circa l'alimentazione siano rispettate.

./././././././.

b)- LAVORO - GOVERNO: Attualmente è sensibilmente ridotto in rapporto alla alimentazione: i quadrupedi sono impiegati nelle operazioni relative al normale funzionamento dei reparti e sono alternati con adeguati turni di riposo. Il governo viene curato in tutti i reparti ed in particolare presso quelli di armi e cavallo, per la maggior capacità del personale e la passione dei Comandanti.-

1)- STATO DI NUTRIZIONE: per quanto si possa considerare soddisfacente in relazione alla persistente deficiente razione che viene somministrata, pur tuttavia la situazione è da ritenersi preoccupante per l'avvenire, perchè non si vede la possibilità di poter rimediare con le sole disponibilità locali.-

Anche l'utilizzazione dei fascelli, unica risorsa, è riuscita finora vantaggiosa solo per alcune zone; per altre invece è dato risultati limitati a causa della povertà del terreno e dell'inclemente e rigidità del tempo.- I quadrupedi che maggiormente hanno risentito di questa situazione, sono quelli di grossa taglia ed in particolar modo quelli del 40° Reggimento Artiglieria in Sassari, e del CCXI° e CCVII° Gruppo Skoda a Sennori ed a Nuvis, e nel 7° Reggimento Artiglieria a Monti.-

Per quanto le condizioni di nutrizione siano quelle sopra accennate, purtuttavia tra i quadrupedi dei diversi reparti si manifestano casi di rapido deperimento specie in quei soggetti che, per aver sofferto pregresso malattie gastro-enterite e soprattutto pirosplamosi (il numero piuttosto elevato al 40° Artiglieria) al CCXI° Gruppo Skoda, ed al 7° Regg. Artiglieria sono in condizioni di minorata resistenza organica.-

E' evidente che questi elementi, per i quali non si ha alcuna speranza di miglioramento, anzichè attendere la loro inevitabile perdita, vengono di volta in volta eliminati mediante la vendita ai macelli ciò per poter almeno utilizzare le carni, se riconosciute alibili, per l'alimentazione della truppa cui riescono gradite, è con vantaggio in considerazione delle difficoltà dell'approvvigionamento carneo.

Si sono pure procurati e riforniti quei soggetti riscontrati di volta in

perchè non si vede la possibilità di poter rimediare con le sole disponi-

bilità locali.-

Anche l'utilizzazione dei pascoli, unica risorsa, è riuscita finora vantaggiosa solo per alcune zone; per altre invece è dato risultati limitati a causa della povertà del terreno e dell'inclemenza e rigidità del tempo.- I quadrupedi che maggiormente hanno risentito di questa situazione, sono quelli di grossa taglia ed in particolar modo quelli del 40° Reggimento Artiglieria in Sassari, e del CCXI° e CCVII° Gruppo Skoda a Sennori ed a Nuoris, e nel 7° Reggimento Artiglieria a Monti.-

Per quanto le condizioni di nutrizione siano quelle sopra accennate, purtuttavia tra i quadrupedi dei diversi reparti si manifestano casi di rapido deperimento specie in quei soggetti che, per aver sofferto pregresso malattie gastro-enterite e soprattutto pirosplamoni (il numero piuttosto elevato al 40° Artiglieria) al CCXI° Gruppo Skoda, ed al 7° Regg. Artiglieria sono in condizioni di minorata resistenza organica.-

E' evidente che questi elementi, per i quali non si ha alcuna speranza di miglioramento, anzichè attendere la loro inevitabile perdita, vengono di volta in volta eliminati mediante la vendita ai macelli ciò per poter almeno utilizzare le carni, se riconosciute alibili, per l'alimentazione della truppa cui riescono gradite, è con vantaggio in considerazione delle difficoltà dell'approvvigionamento carneo.

Si sono pure proposti a riforma quei soggetti risentiti di volta in volta inabili al servizio.

Di questa situazione alimentare si preoccupa fin nell'Ottobre s.a. anche il Comando Intendenza, che, allo scopo di economizzare <sup>898</sup>vettoveglia-mento a favore dei quadrupedi da conservare ai reparti, provvede ad eliminare per riforma circa un migliaio tra i meno efficienti -o i più logori, ed accedendo in temporanea concessione agli agricoltori un certo numero di cavalli da traini sempre dai meno efficienti come risulta dal bando di cui si allega copia.-

./././././.

Tale cessione viene ora continuata e completata anche in attesa-  
na e quanto disposto da codesto Ministero col dispaccio n° 333 del 22  
Gennaio u.s.-

Attualmente la razione è la seguente:

- Kg. 1.500 di eruca e 2.500 di paglia per i rimanenti.

Razione del tutto insufficiente, aggravata in questo periodo dalle  
impervie condizioni stagionali che non permettono a volte per molti gior-  
ni consecutivi, neppure l'utilizzazione dei pascoli.-

Da quanto sopra si può dedurre che la situazione è assai critica, e  
se da parte degli Alleati non sarà dato un contributo alimentare, i ne-  
stri sforzi per la conservazione del prezioso patrimonio equino, troveran-  
no ostacoli insormontabili.

1)-VERBAICURA: in ordine presso tutti i reparti. I rifornimenti ai reparti  
sono effettuati normalmente secondo le norme stabilite e controllati da  
questa Direzione.-

2)-PERDITE: assommano complessivamente a 84 di cui n° 45 per morte, n° 12  
per abbattimento, n° 27 per macellazione.-

INTENDENZA MILITARE DELLA SARDEGNA (XIIIC. A.)

- Direzione di Ippica e Veterinaria -

NO 1344 di prot. Vet.

P.M. 50, 11 13 febbraio 1944

OGGETTO: Quadrupedi.-

AL MINISTERO DELLA GUERRA

- Direzione del Servizio di Ippica e Veterinaria -

P.M. 197

Come già segnalato colla relazione veterinaria dello scorso mese, le condizioni generali dei quadrupedi si sono maggior mente aggravate, causa l'imperverare del 10 corr. della pessima stagione.

Il freddo, la pioggia, e la neve non hanno consentito per molti giorni che i quadrupedi potessero usufruire del pascolo, sia pure povero, né si è potuto rimediare coll'aumento della razione già di per sé così ridotta e insufficiente, causa la segnalata mancanza di generi.

Questo stato di cose ha determinato e determina numerose perdite, specialmente fra i soggetti più deperiti e di grossa taglia.

Di conseguenza l'Ec. il Comandante, su proposta del Direttore di Ippica e Veterinaria, ha autorizzato che si proceda senz'altro all'abbattimento di tutti i quadrupedi, per i quali è da ritenersi inevitabile la perdita utilizzando le carni se riconosciute alibili.

A tutt'oggi, le perdite segnalate dai reparti dipendenti sono considerevoli, ammontando a 147 dal 1° febbraio.

Non si ha nessuna possibilità di porre rimedio a una tale grave e pessima situazione, che è stata anche segnalata all'autorità alleata, per affrettare l'invio di generi, allo scopo di poter fronteggiare al più presto questa periclosa critica.

Come già segnalato colla relazione veterinaria dello scorso mese, le condizioni generali dei quadrupedi si sono maggiormente aggravate, causa l'imperverare del 10 corr. della pessima stagione.

Il freddo, la pioggia, e la neve non hanno consentito per molti giorni che i quadrupedi potessero usufruire del pascolo, sia pure povero, né si è potuto rimediare coll'aumento della razione già di per sé così ridotta e insufficiente, causa la segnalata mancanza di generi.

Questo stato di cose ha determinato e determina numerose perdite, specialmente fra i soggetti più deperiti e di grossa taglia.

Di conseguenza l'Uec. il Comandante, su proposta del Direttore di Ippica e Veterinaria, ha autorizzato che si proceda senz'altro all'abbattimento di tutti i quadrupedi, dei quali è da ritenersi inevitabile la perdita utilizzando le carni se riconosciute alibili.

A tutt'oggi, le perdite segnalate dai reparti dipendenti sono considerevoli, ammontando a 147 dal 1° febbraio.

INTENDENZA MILITARE SARDEGNA

- Ufficio S.M. -

N° 3938 /SM. di prot.

P.M.50, 14 II febbraio 1944

OGGETTO: Quadrupedi denutriti.

ALLO STATO MAGGIORE M. ESERCITO

- Ufficio Servizi - Sez. Veterinaria -

P.M. 151

(rif.f. 7/6 serv. del 5 gennaio 1944)

La condizione degli equini dislocati nell'Isola, per quanto ancora non possa essere considerata pessima, è certamente preoccupante a causa delle gravi difficoltà alimentari.

La Direzione di Ippica e Veterinaria di questa Intendenza, non ritenendo possibile costituire speciali centri di raccolta per menzogne di locali adatti, ha provveduto a ricoverare nelle Infermerie Quadrupedi, fornite di buoni locali e di ufficiali esperti e appassionati, i quadrupedi dei diversi reparti riscontenti bisognosissimi di speciali cure.

Presso i reparti stessi sono stati costituiti nuclei di quadrupedi che vengono particolarmente curati ed assistiti.

Si è cercato di eliminare qualsiasi causa di strappazzo con una più razionale utilizzazione del lavoro e, quando possibile, sono stati assegnati automezzi per integrare il lavoro eseguito dai quadrupedi.

Onde potenziare la scarsa produzione di foraggi, parecchi reparti hanno provveduto alla semina di piante foraggere.

I pasoli sono stati sfruttati al massimo, ma lo sfavorevole andamento della stagione potrà in parte frustrare gli sforzi che sono stati fatti

La condizione degli equini dialeotti nell'Isola, per quanto ancora non possa essere considerata pessima, è certamente preoccupante a causa delle gravi difficoltà alimentari.

La Direzione di Ippica e Veterinaria di questa Intendenza, non ritenendo possibile costituire speciali centri di raccolta per mancanze di locali adatti, ha provveduto a ricoverare nelle Infermerie Quadrupedi, fornite di buoni locali e di ufficiali esperti e appassionati, i quadrupedi dei diversi reparti ricoverati bisognevoli di speciali cure.

Presso i reparti stessi sono stati costituiti nuclei di quadrupedi che vengono particolarmente curati ed assistiti.

Si è cercato di eliminare qualsiasi causa di strappo con una più razionale utilizzazione del lavoro e, quando possibile, sono stati assegnati autoveicoli per integrare il lavoro eseguito dai quadrupedi.

Onde potenziare la scarsa produzione di foraggi, parecchi reparti hanno provveduto alla semina di piante foraggere.

I pascoli sono stati sfruttati al massimo, ma lo sfavorevole andamento della stagione potrà in parte frustrare gli sforzi che sono stati fatti in tal senso.

Nonostante la diminuzione dei quadrupedi militari dislocati nell'Isola (invio in continente, riforma dei soggetti che non danno affidamento di rapido miglioramento) la situazione permane grave e ritengo, pertanto, indispensabile l'invio da parte Alleata di un sufficiente quantitativo di mangime.

L'INTENDENTE
