During my tour in the North of Italy I found some doubt as to the control and employment of the above mentioned unit. At present it is located in MILAN.

It is recommended that this unit work to a programme of inspections arranged by you and that it should receive your strongest support to improve the standard of vehicle maintenance in the Italian Army. Reports should be submitted to you so that you are kept informed of the standards of maintenance of the units they visit.

It is understood that they require approximately 3000 litres of petrol and 3000 litres Derv per month for their vehicles which would be allocated by you.

It is understood that they have been allocated no petrol or Derv for February. [redacted] See Folio 153

May we please be informed shortly of the programme arranged for them which could include some of the Infantry Divisions sited in the North: it is understood that the Legnano Division has recently been inspected by them.

1. Ref your ST/1602 of 18 Feb 46 to SMRE, copy to this BLU.

2. It is understood from III Terr Comd that the 3,000 litres of MT Petrol and 3,000 litres Derv mentioned in your letter are a special allocation made by SMRE for the CARs at COMO and BRESCIA and not for UMI.

3. An allocation of 1,500 litres of Petrol has been made by SMRE for UMI for Feb. This amount is entirely inadequate to allow for efficient operation by UMI, but it is hoped that the 4,500 litres of MT Petrol, asked for, for Mar will be authorised.

What is the position now? Does this for CAPs? Does this bear any relation to Folio 161? — No.

Ref your queries of Q 206 dated 22 Feb 46.

(a) Territorial Commands will, w.e.f. next month include Inf Divs and Mob Pns CC.RE. in POL demands.

(b) The assistance given by MMIA is really duplicating action of Ministry of War at any source where the weight of MMIA can help in backing Ministry of War's application.
This branch takes up POL matters with:-

(a) Combined Pet Committee
(b) Industries and Utilities Sub Commission AC
(c) Ministry of Industry and Commerce
(d) C.I.P. (transfering of stocks to areas where shortages exist, etc.).

War Ministry have been allotted 80% of petrol demanded for March and over 100% on Derv and Kero.
Ministry of War demands for April and May not yet known but on the assumption that they will be similar to March, then percentages will be as above.

(c) Allotments to Army, Navy and Air Force for March are as follows in barrels:-

	MT Petrol	Derv	100 Octane	Fuel Oil
ARMY	30,610	7,000	-	-
NAVY	12,945	13,138	-	210,000

War Ministry have been allotted 80% of petrol demanded for March and over 100% on Derv and Kero.
Ministry of War demands for April and May not yet known but on the assumption that they will be similar to March, then perventages will be as above.

NAVY	12,945	18,138	-	210,000
AIR FORCE	2,597	1,444	7,669	-
	46,052	26,582	7,669	210,000

Demands by Navy and Air Force are only available for March and it appears that Navy receive their full quota and Air Force have been cut on Petrol by 27% and on Derv by 25% whilst Army cuts on Petrol and Derv are 25% and 12% respectively.

Approximates costs for March in the three main POL items are as follows in dollars:-

	Petrol	Derv	Spec Fuel	Total Dollars
ARMY	95,350	14,320	-	109,670
NAVY	30,625	31,370	203,700	265,695
AIR FORCE	7,110	3,310	-	10,420

(d) C.I.P. will continue as the distributing agency.

(e) Derv at PUGLIA dumps. I understand from Maj. PETERSON (Combined Pet Committee) that he has had a conference with Col. PIGSLEY some time ago and the agreed decision was that PUGLIA fuels would be handed over for civilian use and that Italian Army would receive financial credit and not credit in kind.

(f) Unable to let you have civilian requirements but Industries Sub Comm AC will supply if we request in writing.

(g) Pound sterling was mentioned because there is the possibility of the Italian Government receiving credit from British on a troop pay basis as has already been done with American troop pay.

1. (a) Territorial HQs are responsible for submitting monthly P.O.L. demand to Ministry of War (actually S.M.R.E.).
(b) Ministry of War consolidate demands and ascertain from
(c) Ministry of Finance if the cash necessary for purchase of P.O.L. will be made available.
(d) Copy of Ministry of War consolidated demand is passed to M.M.I.A. for information.
(e) When Ministry of War demand is approved by Ministry of Finance, Ministry of War pass the demand to
(f) Ministry of Industry and Commerce, Liquid and Fuels Division, who consolidate demands for the whole of Italian requirements.
Ministry of Industry are in a position to allot P.O.L. received by the Italian Government as they decide adequate. At the same time, should surpluses be available, they also decide allocation.

2. (a) The Fuel Dept, Petroleum Division of Industries and Utilities Sub-Commission AC in conjunction with Combined Petroleum Committee has been responsible for passing on the 'slate' of Italian Govt requirements together with amounts stated for the Allied Armed Forces and UNRRA in Italy.

(b) The 'slates' for Italy have been completed for March, April and May of 1946.
(c) Combined Petroleum Committee is in the process of closing down and also the Fuel Dept Petroleum Division of Industries and Utilities Sub Commission AC is to close down in the near future and hand over to UNRRA.
(d) This will not entail change in personnel as UNRRA personnel taking over this commitment are already working in Industries and Utilities Sub Commission AC.
(e) When UNRRA take over, they will act as forwarding agency for 'slating' purposes for the Allies and Italian Government.

3. (a) 'Slate' programmes are subdivided into the following and in priorities as listed.

(i) Allied Forces P.O.L. requirements
(ii) UNRRA P.O.L. requirements

(b) The last mentioned is subdivided into

(iv) Civilian requirements
(v) Civil Aviation requirements
(vi) Vatican requirements
(vii) Italian Armed Forces requirements

The Italian Government has to find cash for (iv) and (vii) above as Vatican and Civil Aviation are wealthy concerns they have no difficulty in obtaining P.O.L.

(c) In view of the fact that civilian requirements and Armed Forces requirements have to be paid by the Government it is obvious that a weak exchequer is going to impose first cuts on the Armed Forces as P.O.L. allotted to them will not bring in cash as is the case with civilian users.

...../2

Declassified E.O. 12065 Section 3-402/NNRG No. 785020

Therefore it is suggested that closer liaison should exist between the Ministry of War, the Ministry of Navy and the Ministry of Air when demands are submitted to the Ministry of Finance as it is felt that three Ministers of the Cabinet should be able to ensure that the Italian Armed Forces get a square deal.

4. C.I.P. are the Government distributors of P.O.L. in Italy and any question of shortages in various localities should be referred by Ministry of War to CIP (MMIA also takes up such questions with CIP to give the necessary weight to Ministry of War requests).

5. As a matter of interest, the Navy's requirements in special grade Fuel (excluding other Navy POL requirements) costs 70% of the total Armed Forces expenditure on POL.

Should financial restrictions be placed on the Armed Forces as a whole, it would appear that Navy's use of this special Fuel, which is very expensive, should be curtailed in order that the Army and Air Force should suffer loss by any financial cuts that may be necessary.

6. The future position of POL stocks for Italy look brighter as more stocks from U.S. are expected to come in (previous shortages have been due to labour troubles in America, strikes of tanker crews, dockers, etc).

The balance of stocks due to the Italian Govt as at 31 Dec 1945 amounting to 287,000 barrels Petrol, 111,000 barrels of Kero and 300,000 barrels of Derv are due in soon in addition to normal monthly 'slate' requirements.

7. It is apparent that the future prime factor in obtaining POL is the ability to pay in either dollars or pounds sterling as the supply of POL products is available.

8. The above information is submitted as the result of a Conference at Combined Petroleum Committee between Major PETERSON and Lt.Col. MILCOX on 21 Feb 1946.

1. It would appear that in the past, little consideration has been given to the requirements of Repair Workshops. Obviously their requirements will vary month by month according to the number of vehicles under repair and also their oil requirements cannot be based on the percentage allowed for normal vehicle running.

2. It is suggested that Territorial Commands should show in their demands the special requirements of Repair Workshops located within their Command and on receiving their allotment sub allot to Repair Wkshops more in accordance with the actual needs.
If you agree with the contents of the attached letter will you please take up this matter with Territorial Commands.

Date:- 13 FEB 46

1. The question of allocation of P.O.L. to the various Territorial Command Workshops requires the immediate attention of the Italian War Office. Due to lack of appreciation of normal Workshop Commitments, this allocation is insufficient and in several instances has been the cause of loss of time and disruption of the repair and recovery programmes.

2. From an examination of the allocations made by No. 6 and No. 7 Territorial Commands, it is apparent that allocations to Workshops are being based on the normal requirements of Transport Units and do not take into account the specialised requirements of a Workshop.

3. This matter has been taken up with the Territorial Commands concerned but it is now felt that a War Office Directive on the subject to all Territorial Commands is required. To assist with this, the following points noticed in the various allocations that require immediate correction are detailed below.

(a) The petrol allocation to Workshops is at present being scaled on a basis of Unit Transport held and very little attention is being paid to the more important demands of the Workshop i.e. Engine, Vehicle Testing, Recovery, Generating Charging Sets etc.

(b) Engine Oil is being issued on a fixed percentage of the petrol issue, which from a Workshop point of view is totally inadequate and normally this issue will not cover a small percentage of the demand. This was particularly noticeable in the case of No. 7 Repair Unit where 82 repaired vehicles, each requiring approx 12 Kilograms i.e. a total of approx 1000 Kilograms, had to be sent into the Vehicle Park with 'used' engine oil, the allocation to this Unit being only 392 Kilograms for all purposes.

4. Both No. 6 and 7 Territorial Commands P.O.L. allocations have been examined and apart from some slight discrepancies, the issues to Units other than Workshops appear to be economical and it is felt that to meet the Workshop demands, an increase should be made in the CIP total allocation to these Commands, in the case of petrol this increase is approximately 10% but in the case of Engine Oil and C.600, it is as much as 50%.

It is also considered that to avoid confusion Workshops should be treated separately from Commands and their final P.O.L. allocation should be fixed by the War Office.

5. The need for the above is even more apparent in the case of the Italian Base Workshop (CARE) where due to the size of its commitments the total demand would be extremely heavy and can only be handled by the War Office.

1. Confirming telephone conversation Capt. D'ALO' - Capt.CAREY it is understood from 3 HQ that the above unit has recently experienced difficulty in obtaining sufficient P.O.L. to operate efficiently, but that instructions have now been issued by you to No 3 Territorial Command to make available for them 3,000 litres MT Petrol and 3,000 litres Derv, and to include this Unit in their future monthly requirements to the S.M.R.E.

2. As the importance of this unit to the general standard of vehicle maintenance in the Italian Army is considerable, it is thought that it should be assured of regular and adequate supplies of P.O.L. and, in view of the distances it has to cover, it is suggested that No 3 Territorial Command be advised to issue a high percentage of coupons in its P.O.L. allocation.

15 Feb 46.

1. I have been approached by Maj Mannielli, OC Unit Maintenance Inspectorate, regarding an allotment of POL required for his unit.
It appears that since the 15 Nov 45, before which date he obtained POL from British sources, he has experienced great difficulty in obtaining petrol. Always has he operated entirely and most unsatisfactorily on a loan basis from the Territorial Comd in which his unit happens to be.

2. In order to obtain a special allotment of POL, Maj Mannielli went to SMRE and saw Col Mcrain and Col Alcia. He was promised a special allotment and Capt Calo added an amount of 5000 litres of petrol on to III Terr Comd allocation for Feb, as the UMI Inspectorate is operating from MILAN this month. The POL allotment for Feb has been received by this Comd but does not include any amount for UMI. Contact with SMRE by phone and signal by this Officer in an endeavour to obtain this POL has resulted in dismal failure.

3. Owing to the lack of POL this unit is almost entirely immobilised except for small local inspections. To operate efficiently a quantity of 2120 galls of petrol per month is required. This is based on the fact that UMI consists of 4 sections of 2 vehs, and 1 veh for the OC, and that the area to be covered includes all Italy and Sicily. Already it has been noticed by Formation Comds that the standard of maintenance is decreasing, solely because the Inspectorate has been unable to carry out regular inspection of units. One Division has voluntarily given petrol to Maj Mannielli out of their own allocation to enable him to inspect their vehicles.

4. It is considered essential that this unit, whose role is of such importance to the Italian Army, should be given preferential treatment and assured of regular and adequate supplies of POL.
It would appear that the only satisfactory solution would be to allocate a quantity of coupons to this unit thus enabling them to draw at any CIP.

5. May this matter please be investigated, and if possible, could arrangements be made to satisfy Maj Mannielli's POL requirements for this month.

To : MMIA Dated 24 Jan 1946

Subject : Transferment of POL to CIF by the Italian Army.

Pro-memoria for Captain CARY

1 With letter ST/10 dated 23 March 1944 (see appendix 1) L.F.S.C. disposed that the Italian Army had to hand over, every month, (prior payment) to CIF about 3000 barrels of Gazolio for civilian use to be drawned from the Italian Military Depots in Puglia.

The CIF, on the base of the a/m agreement, gave to this Ministry as an advance, the sum of two millions.

2 Later, the POL Section of AFHQ disposed :

(a) with letter PET/19/10 dated 5 Sept 1944 sent to CIF Rome (see appendix 2) that it was required that no further payment was to be made to this Ministry for the quantities of POL that should be drawned in future.

(b) with letter 30/B/19 dated 22 March 45(see appendix 3) that it was requested that this Ministry had to refund to CIF the a/m sum of two millions, becouse the quantities of Gazollio drawned by CIF from the Italian Military Depots would credit the Italian Army.

In fact the a/m quantities, are monthly credit to the Italian Army and ~~deducted~~ added from the amounts drawned from CIF.

3 For that reason:

The Italian Military Administration pays the drawned quantities on the base of the price used for the Italian Army, and in future,

6470

Declassified E.O. 12065 Section 3-402/NNDC No. 785020

to be drawned from the Italian Military Depots in Puglia.

The CIP, on the base of the a/m agreement, gave to this Ministry as an advance, the sum of two millions.

2 Later, the POL Section of AFHQ disposed :

(a) with letter PEE/19/10 dated 5 Sept 1944 sent to CIP Rome (see appendix 2) that it wes required that no further payment was to be made to this Ministry for the quantities of POL that should be drawned in future.

(b) with letter 30/B/19 dated 22 March 45(see appendix 3) that it was requested that this Ministry had to refund to CIP the a/m sum of two millions, becouse the quantities of Gazolio drawned by CIP from the Italian Military Depots would credit the Italian Army.

In fact the a/m quantities, are monthly credit to the Italian Army and detracted from the amounts drawned from CIP.

3 For that reason:

The Italian Military Administration pays the drawned quantities on the base of the price used for the Italian Army, and in future, when the real price of the goods will be settled, they will effect further payment for the same quantities of POL in order to complete the payed amount.

CIP, on the contrary, has drawned, and pretend to pursue to draw POL from the Italian Military Depot, without to effect any payment to the Italian Army.

4 It is evident the prejudice that the Italian Military Administration is enduring, considering the charges they had when they refurnished the Depots and that they have now for the running and maintenance of the said Depots.

6470

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

5 In order to avoid damages to the physical and chemical characteristics of Gazolio now existing in Puglia (about 27.000 Bbls) we suggest :

to issue to each Territorial Command an amount of Gazolio agreeing with the requirements of three months.

during the a/m three months the refurnishment of POL would not be effected by CIP.

the transport of said POL would be effected by railway on the base of the agreements for railway trafic.

the Gazolio would be considered really available only when already arrived in the Territorial Commands.

or:

to make the Gazolio drawn by CIP on condition that CIP would undertake to give to the Italian Army the same amount in other Italian Areas, at the price to be settled, considering only the expences of transport and general sort.

6 We submit this question to that LFSC asking to let us know the decisions about the already effected transferment and of those which will be effected in future.

OGGETTO: cessione di c. e l. al CIP da parte dei depositi militari italiani.

PROMEMORIA PER IL CAPITANO CARY

LAND FORCES SUB COMMISSION A.C. (MMIA)

ROMA

I°) - Con il foglio ST/10 in data 23 marzo 1944, (allegato 1) codesta L.F. S.C. disponeva che l'Esercito Italiano versasse mensilmente a pagamento al Comitato Italiano Petroli, per uso civile, circa tremila barrels al mese di gasolio da prelevarsi dai Depositi Militari Italiani della Puglie.

Il predetto Comitato, in base alla convenzione stabilita con il foglio sopra citato, versava a questo Ministero - a titolo di anticipo - per il carburante prelevato, la somma di due milioni.

II°) - Successivamente, invece, la Sezione Petroli dell'A.F.H.Q. disponeva:

a)- con il foglio PET/19/10 in data 5 settembre 1944, diretto al C.I.P. di Roma (allegato 2), la sospensione di ogni pagamento a questo Ministero per gli ulteriori quantitativi di carburante che sarebbero stati prelevati;

b)- con il foglio 30/B/19 in data 22 marzo 1945 (allegato 3) il rimborso da parte di questo Ministero al Comitato Italiano Petroli dei due milioni di lire di qui sopra, in quanto, i quantitativi di gasolio prelevati dal C.I.F. stesso presso i Depositi Militari Italiani sarebbero stati accreditati all'Esercito Italiano.

Detti quantitativi, infatti, vengono accreditati mensilmente allo Esercito e detratti dai quantitativi prelevati presso il C.I.P.

III°) - In tal modo:

- l'Amministrazione Militare Italiana paga i quantitativi prelevati in base al prezzo di cessione praticato per l'Esercito Italiano, ed in seguito, allorchè verrà definito il costo effettivo della merce, dovrà certamente effettuare per gli stessi quantitativi di C. e I. successivi pagamenti a completamento dell'importo già erogato;

././.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

- il C.I.P. invece, ha prelevato e intenderebbe continuare a prelevare dai Depositi Militari Italiani ulteriori quantitativi di C. e L. senza effettuare alcun pagamento all'Esercito Italiano.

IV°) - Per quanto sopra è evidente il danno che ne deriva all'Amministrazione Militare che a suo tempo ha sopportato delle spese per approvvigionamento del C.e L. di cui trattasi e tutt'ora sopporta altre spese per la gestione e conservazione dei propri depositi.

V°) - Ad evitare che a distanza di tempo possano modificarsi le caratteristiche fisico-chimiche del gasolio esistente in Puglia (circa 27.000 barrels), si suggerisce l'opportunità:

- di far distribuire a tutti i Comandi Militari Italiani un quantitativo di gasolio corrispondente al fabbisogno di tre mesi.

In detti tre mesi il rifornimento di tale carburante non verrebbe effettuato dal CIP.

Il trasporto avverrebbe a mezzo ferrovia in base alle disponibilità del traffico febroviario.

Il gasolio verrebbe considerato effettivamente disponibile solo allorchè trasportato nella sede dei Comandi Militari;

- Oppure di far ritirare tale gasolio dal C.I.P., a condizione, però, che il C.I.P. stesso si impegni di cedere all'Esercito Italiano uguali quantitativi su altre zone d'Italia ed al prezzo da convenirsi, tenuto conto delle sole spese di trasporto e di carattere generale.

VI°) - Si rappresenta tutta la questione a codesta L.F.S.C., con preghiera di voler comunicare le decisioni in merito alle cessioni effettuate in precedenza ed a quelle che verranno disposte in avvenire.-

1. It has been suggested by the Combined Petroleum Committee (AFHQ) that the 27,500 barrels of gasoil belonging to the Italian Army, at present stored in Italian dumps in Puglia; should be handed over by you to C.I.P. Bari. In return, the Italian Army would get a credit on paper from C.I.P. for an equivalent amount of gasoil which will become available later.

2. This H.Q., after consultation with a representative from the Combined Petroleum Committee, have decided to recommend that this suggestion is carried out.

3. Advantages of this scheme will include:

(a) Elimination of loss by deterioration.

(b) Saving of Transport in distribution.

(c) Receipt of high-grade Allied submarine service gasoil in place of low quality gasoil held at present.

4. Please let us know your views on this matter.

Subject : Drawing of P.O.L. with coupons.

In accordance with instructions contained in Part I,Para d) of your circular No. 60/2220/Serv.dtd 20 Oct 45,this HQ,towards the end of November,asked the CIP for a very small quanity of coupons for the drawing of POL during the month of December,from other CIP Depots.

The said CIP however,has not complied with our request,giving its reasons as difficulties in accounting.

It therefore happens that the vehicles which have left towards the end of November,for detached duty on long journeys have had to carry with them spare POL,thereby frustrating the purpose of the above mentioned instruction.

In order to eliminate such a great difficulty, we beg the M of War to deem it advisable to intervene with the CIP,in order that procedure in force may be more fully observed.

ufficio Servizi - Sez. Auto - R O M A

In conformita alle disposizioni contenute al capo I lettera d) della Circolare 6C/2220/Serv. data 20/10 c.a. di codesto Ministero, questo Comando ha chiesto al C.I.P. di Roma, verso la fine dello scorso novembre un quantitative minimo in cedole per prelevamento carburanti e lubrificanti durante il mese di dicembre presso altri Depositi C.I.P.

Il predetto Ente non ha, pero' , aderito alla richiesta adducendo a giustificazione regioni di indole contabile.

Ne deriva che automezzi partiti in servizio isolato per viaggi di lungo percorso verso la fine di novembre hanno dovuto portare la scorta di carburanti e lubrificanti, frustrando in tal modo gli scopi della sopracitata disposizione.

Per ovviare un cosi grande inconveniente, si prega codesto Ministero di riconoscere l'opportunita' di intervenire presso il C.I.P. per una maggiore osservanza della norme in vigore.

Reference your 022 of 18 Oct 45.

1. The question of allotments of POL to Italian Forces has been examined. Two main factors influenced the reductions.

(a) The necessity for universal economy in the use of POL - GRO 1015/45 refers.

(b) The static conditions now current and increase in rail facilities should allow for reduction in allotments.

2. It should also be mentioned that when responsibility passes to the Italian Government for the Italian Army, their requirements will have to be met from available supplies in the Italian National programme.

3. It is requested that the new allocations are given a fair trial and if found unsatisfactory, will you please submit a case supported by statistics, including average petrol consumption and mileages covered by different classes of vehicles.

2. Nothing has yet permeated through Brit. staff channels cancelling the entitlement of Rly Engr units to draw from Allied stocks, but I have given instructions that they are not to draw from Petrol Points after 31 Oct and that all work tickets must be called in and destroyed.

It was suggested to the Ministry of War that centralised payment should be made by them in respect of all formations, including Territorial Commands, but they were most anxious to avoid such centralisation, and we agreed that, provided the Combat Divisions were no longer obliged to pay in cash, the existing system might be retained in respect of the Territorial Commands.

Ref telephone conversation (D[illegible], "F" BLU - Capt Simpson) of 25 Oct 45, the following summarises the result of conversations between Capt Simpson, Maggiore Fanuica and Capitano Villari of ETC, IGF, Cesano, and Major Peterson of AFHQ Fet Sec.

1. In view of the difficulties involved in drawing the balance of the October allocation of POL amounting to 543 barrels before the end of the month, Major Peterson agreed that any balance remaining might be drawn in the following month from CCP Rome.

2. Capitano Villari pointed out that the main difficulty in the way of forming a reserve of POL at Cesano was shortage of barrels which was such as to make daily drawing of POL necessary. Major Peterson suggested that 1,000 barrels might be obtainable on loan from the Italian Air Force and Capitano Villari agreed to contact the Air Force. (In this connection two road tankers were to-day authorised for issue to Comando Piceno Div.)

3. Major Peterson, discussing the request for a supplementary allotment (forwarded to this office under cover of your ST/h/1b dated 22 Oct) pointed out that if difficulty was going to be experienced in drawing the balance of the original October allotment obviously a supplementary allotment for October was unnecessary. If a supplementary allotment for November should eventually become necessary he would consider the request but he pointed out that up to date an average of 47 barrels per day had been used in October, while an average of 60 barrels per day remained to be drawn between then and the end of November. Maggiore Fanuica and Capitano Villari agreed but requested that a supplementary allocation of 24 barrels per day be granted for the month of Oct. Major Peterson agreed to make this available. (This supplementary allocation must be drawn before the end of the month.)

4. Major Peterson also pointed out the necessity for making the fullest possible use of rail transport in view of the acute shortage of POL available.

1. It is pointed out that the Nov allotment to Bologna Territorial Command has dropped by almost 1/4 from the preceding allotment. This being so, they can scarcely be expected to meet the extra needs of two Rly Engr Bns, particularly as these units hold British vehs on a fairly liberal scale and are reported to cover considerable mileages.

2; Should a supplementary allotment be made for the Rly Engrs, I suggest that the CIP Depot from which each Rly Engr Bn should draw is specified.

TO :- HQ RAAC (att G-3 Br)

Ref your 9/304/G-3(Br) of 20 Oct 45.

1. The monthly allocation of P.O.L. is based on vehicle holdings originally at 1, 3½, and 6 U.S. galls per day for motor cycles, cars, and load-carriers respectively. This has now been decreased by AFHQ Pet Sec for the month of November to a basis of ½, 2½, and 4½ U.S. galls per day.

2. It is regretted therefore that no increase in the allotment can be made for the month of November but in view of your request no decrease has been made.

3. In order that the vehicles of the battalion should not remain immobilised a supplementary allocation of 4 barrels benzine has been made for the month of October.

Ammunition Lift - GENOA.

#02#

1. ST LO GENOA reported on 19 Oct that Genoa Territorial Comd have used 80% of their monthly POL allotment in the first 18 days of the month because of large lift of ammunition from Forts in GENOA town to dumps outside.

2. This ammunition is of Italian and German origin and Ord Offr 2 Dist has classified it is dangerous as three explosions have occurred recently.

3. It is understood from ST LO GENOA that authority to use vehicles for move of ammunition was given by

Territorial HQ	to	Territorial Adm Coy vehs
ST LO GENOA	"	3 G.T. Coy vehs
2 District	"	vehs under British control.

4. In view of the grave petrol shortage I instructed ST LO to stop this ammunition lift by Italian vehicles.

5. ST LO states that there is still approx 5,000 tons to be moved.

6. Will you please say if you agree with action taken in para 4. above as I am unaware of any instructions having gone out from NAIA for the use of Italian vehicles for this ammunition clearance.

1. Allocations were formerly based on the following factors per type of vehicle:-

Motorcycles	1 US gallon per vehicle.
Cars	3½ " " "
Lorries	6 " " "

The above factors also represent a reduction over the original factors used, which were, 1, 3 and 8 respectively. Past allocations have always left Territorial Commands very short, and it now appears that the factor is to be further reduced to ½, 2½ and 4½. In addition, demands submitted by 2 District have been very considerably cut - comparative figures are given in the attached appendix. May a Staff ruling please be given as to whether these reductions are to be accepted by MMIA.

2. With reference to para 2 of Pet Sec's letter, this branch, together with the Ministry of War, prepares detailed statements of POL requirements stating exactly where these quantities are to be made available. If AFHQ Pet Sec are to reduce the quantities, it is considered that they should also state where the reductions are to be made, and notify CIP accordingly, as was done in the past.

3. Finally, it is considered that if AFHQ Pet Sec are to reduce quantities bid for on behalf of the Combat Divisions by 2 District that all bids, allocations, and questions arising therefrom should be dealt with directly between 2 District and AFHQ Pet Sec for as long as these Divisions are operating under British Command.

Land Forces Sub Commission A.C.
(M. M. I. A.) ROME.
G/22
18 October, 1945.

To:-

A.F.H.Q. (For G(Maint)).

1. P.O.L. supplies to ITI-ITI and Combat Groups are made available from C.I.E. depots by A.F.H.Q. Pet. Sec. R.A.A.C. in accordance with 'bids' submitted monthly by this H.Q.

2. In the case of Combat Divisions, bids are obtained from 2 District and passed to A.F.H.Q. Pet. Sec. R.A.A.C; in the case of ITI-ITI troops, bids are prepared by this H.Q. in conjunction with the Italian War Ministry, on the basis of the number of vehicles authorised to operate in the various units concerned.

3. The amounts allocated by A.F.H.Q. Pet. Sec. were originally based on 1, 3 and 8 U.S. gallons per Motorcycle, Car and Load-Carrier per day. These factors were subsequently reduced by Pet. Sec. to 1, 3½ and 6 respectively, and, on these figures, it was possible for ITI-ITI units to operate if strict supervision and economy were exercised. This basis of allocation also approximated to the bids submitted by 2 District in respect of the Combat Divisions.

4. A.F.H.Q. Pet. Sec. R.A.A.C. now advise that the basis of assessment is to be reduced to ½, 2½ and 4½ U.S. gallons per day for Motorcycles, cars and Load-carriers respectively, with effect from 1 Nov 45. This represents a substantial reduction, not only in respect of units operating directly under Italian Command, but also within the Combat Divisions, which are still under the operational command of 2 District. It is not known to what extent further economies can be practised by the Combat Groups, since they have not yet completed a full month on their reduced allocations, but it can definitely be stated that the operations of the ITI-ITI component of the Italian Army will be seriously curtailed. A comparative table (Appendix 'A') is attached hereto showing the amounts of MT 80 and A.C.O. allocated for OCTOBER, and the amounts demanded and allocated for November.

5. It is requested that the basis of assessment for ITI-ITI Units be restored to 1, 3½ and 6 U.S. gallons per Motorcycle, Car and Load-carrier per diem, with effect from 1 November 45, and that the balance due as a result of this may be allocated at once.
