1. GENERAL. The S.M.R.E. and Ufficio Servizi appeared competent and instructed. A total of 375 vehicles of all types and conditions of efficiency have been recovered by this Cmd, and this Admin Tpt Coy is up to strength in load carriers. There remain approximately 100 new vehicles in the Bellaria dump, which the cmd had been unable to recover, since their authority for such recovery was only valid when the dump was controlled by 1 District. Told them to contact Capt. THURUPP who could obtain 2 District authority for their release.

2. Cwing to the large number of Military Districts within the command, I consider they have a good case for increasing the W.E. of cars on the Admin Tpt Coy to 15.

3. A large number of vehicles are required for collecting wood for the winter, and the command asked if more P.O.L. could be allocated for this duty. I told them to submit the full facts and figures to Capt THURUPP who would then contact ST MIA if an additional allocation appeared necessary. In future allocations they require a higher proportion of Diesel to Petrol - 50% of each.

4. Discovered that No 5 E.V.P. had not in fact been formed - it appears that the Ufficio Ordineamento at the Ministry of War failed to provide any C.Rs, and only the officer exists. Got Lt. Col. MORANI to send a telegram to the Ministry of War on the spot to rectify this, and arranged a suitable site for the unit at EURIO.

5. Instructed the Territorial Command that all vehicles produced surplus to WE/TC of their Tpt units would now go into No 5 E.V.P.

6. Only a limited quality (about 20) of ABs 412 received from the Min of War, and no 406's or Work Tickets. The task system was not, therefore, properly in operation, although it did appear that an effort was being made to carry it out without all the necessary documents.

7. No 6 C.T.A. One of the best ITI-III Tpt units I encountered. Had moved into new premises 2 days previously, but were already setting down well. Vehicles held on the date of inspection were :

<u>M/C</u>	<u>P/V</u>	<u>L/C</u>	<u>Trailers</u>
13	11	59	3
			3646

3. A large number of vehicles are required for collecting wood for the winter, and the command asked if more P.C.D. could be allocated for this duty. I told them to submit the full facts and figures to Capt THURPP who would then contact ST MIA if an additional allocation appeared necessary. In future allocations they require a higher proportion of Diesel to Petrol - 50% of each.
4. Discovered that No 5 E.V.P. had not in fact been formed - it appears that the Ufficio Ordinamento at the Ministry of War failed to provide any O.Rs, and only the officer exists. Got Lt. Col. MORANI to send a telegram to the Ministry of War on the spot to rectify this, and arranged a suitable site for the unit at BURIC.
5. Instructed the Territorial Command that all vehicles produced surplus to WE/TO of their Tpt units would now go into No 5 E.V.P.
6. Only a limited quality (about 20) of ABs 412 received from the Min of War, and no 406's or Work Tickets. The task system was not, therefore, properly in operation, although it did appear that an effort was being made to carry it out without all the necessary documents.

			<u>3646</u>

- O.C. and officers appeared keen and efficient. Up to strength in men, but deficient of 1 officer.
8. No. 62 Ambulance Car Section. Bad. The unit is virtually commanded by the Medical Directorate instead of by the vehicles and men live in the local military hospital, on whom they are dependent for clothing, food and all necessities, the C.C. has an office with the Medical Directorate at least half a mile away, and the unit's petrol store is in the basement of a building used for housing medical supplies, approximately $\frac{3}{4}$ of a mile away from the other elements.
 9. Arranged with the Territorial Command that the unit should be collected together and moved as soon as possible to a new site adjacent to the Tpt Coy. The unit was deficient of 11 men.
