1. A new type of railway wagon fastener is now available to replace 5mm wire.
2. This fastener consists of a "U" shackle and pin.
3. The process of sealing wagons is effected by screwing home the pin through the unthreaded eye of the shackle into the threaded eye, and subsequently bending over the protruding portion of the pin by means of a heavy hammer or similar instrument.
4. Unsealing is effected by the use of a cropper. The pin should be cut as closely as possible to the inner side of the threaded eye of the shackle.
5. The "U" shackle will be retained for further use.
