Subject : Equipment - Italian Engineers.

1. The Italian Engineer School at CIVITAVECCHIA has a set of F.B.S. but, at present, no propulsion units. Four 2 h.p. Petter engines are available but it is necessary for at least 4 propulsion units with flexible hose to be issued so that they can carry out training with powered F.B.S. rafts etc.

2. Can you please say if 4 units (complete with brackets) and flex hose: can be issued on transfer to the Italian Engineers from British sources?

Ref: 5/159/Serv
Date: 2/3/47

Subject:- Anti-tank and anti-man mines for
"Mantova" and "Folgore" Divisions.

In regard to the contemplated transfer of "Mantova" and "Folgore" Divisions, intended to occupy Veneto area, we point out the opportunity that such units be equipped with anti-tank and anti-man mines and also of entrenching equipment proper to construct defensive obstacles.

Please consider the possibility that a quota of the above mentioned materials be released on the spot, drawing it from the quantity stored at Allied Depots of Veneto and Venezia Giulia.

The General Attached
G. Liuzzi.

GRC 8 Branch.

Subject:- Defence Stores for Italian Army.

Representation has been made from the Italian War Ministry that they urgently require wiring stores (barbed wire and pickets) and would be glad to take over all quantities of these stores which are held by the Allies surplus to their own requirements.

Can you please inform me if such surplus stores are held and if so the approx. amount that would be available for transfer to the Italian Army.

As they would be required in the UDINE area the transfer could be arranged through the Agency of 5th Br. Liaison Unit, of this Mission, at UDINE.

Subject: Halley Bridge Materials.

9 11

Yam Force Sub Commission A.C.
(M.N.T.A.)
BY A/P
26 August 46.

To: Ministry of War

8

Ref your 59079/M/498 of 19 August 46.

1. Many of the items deficient appear to be timbers required for construction of the bridge but which, I think, are not part of the Halley Bridge set. It should be possible to get such items from the Engineers Stores Directorate of the Terr Command. It is not advisable to cannibalise another set to make good such items as are deficient with the Field Park Coy.
2. However the S.O.R.E.II is hoping to visit the Engineers of the Crossna Division on his tour North, starting on 3rd September, and will be glad to look into the details and see if he can obtain such items as are essential to carry out training in a bridging operation.

Subject: Bailey bridge materials for field company park.

The "Cremona" Infantry Div. HQ has informed us that the 2.A Company park under its command has all the material included in the scale of issue required for 80 feet of Bailey bridge with the exception of the items shown in the attached list.

Please examine the possibility of allocating the small amount of material required so as to complete Bailey bridge set handed over to the "Cremona" Division.

SUBJECT: Mine-detectors for CC.RR.

ALLIED FORCES SUB-COMM, AD. (ISIA)

SD/109/1

25 SEP 46

TO : GENERAL HEADQUARTERS (G(SD))

1. Considerable success has been achieved in the search for hidden arms by the use of a small number of GERMAN mine-detectors at present unofficially in possession of CC.RR. in N ITALY.
2. The necessity for early discovery of hidden arms is apparent. Arms are now being buried or walled up in buildings. No other method of detection is equally satisfactory.
3. It is requested that ALLIED pattern mine-detectors may be issued officially to CC.RR. for this purpose.
4. Scale required: three detectors per Legion, for twenty one Legions TOTAL sixty three detectors, complete, with spare batteries etc.
