1. There is still much that can be done by Services to assist Train Guards and depleted Movement Staffs in their efforts to prevent pilferage of freight traffic.

2. The following irregularities in loading are prevalent at the moment :-

- (a) Wagons are accepted and loaded which are already damaged and unfit to hold stores. Movements personnel are not numerous enough to check every wagon before it is placed for loading.
- (b) Wagon vents and doors are not properly closed.
- (c) Sealing and securing of wagons is carried out either imperfectly or not at all.

3. The checking of wagons in transit by Train Guards, the investigation of pilferage and establishment of "black spots" where thefts are usually prevalent, are all made more difficult as a result.

4. Services are asked to give closer attention to loadings in their installations and at railheads. Shortage of Area Seals and Shackles wagon sealing should be reported to this Section.
