1. Ref. Para 1 (a). It is presumed that what is meant is that Units should know what items of cleaning material for arms, which are shown in their Special and Normal Equipment Lists, they are entitled to draw. In the case of 68 Inf. Regt., it is confirmed that they hold all items of cleaning material for all arms and that they know, not only the scales laid down for drawing the above mentioned items, but are also in possession of illustrated parts lists which show the parts. It is suggested that if the A.I.A. had contacted B.O.W.O. when carrying out the inspection the matter could have been settled on the spot, as receipts for all items are held in Regtl. H.Q. Office.
2. Ref. Para 3. All Rifles No. 4 (T) were sent together with snipers to Workshops when Unit was stationed in the line. It is not understood why the point was not raised then, as the idea of sending them to Workshops was to ensure that they were correct, and to ensure that snipers knew how to zero them.
3. Ref. Para 2(a). All Bren Guns issued to 68 Inf. Regt. were inspected by R.E.M.E. Armourers before this unit left training area for the line. As they were passed as alright then, it is not understood why the point arises now. It is suggested that the Holdalls Bren may have been changed around by the Battalions after the above mentioned inspection.

Technical Order No. 15

Recently during firing exercises it has been found that barrels have exploded.

The explosion has been found due to being dirty, i.e. mud and dirt etc, this is due to NEGLIGENCE.

Directions for care of small arms are laid down in the Manual of Military Training for Small Arms VOL. 1 No. 3 1942.

It is therefore necessary before firing exercise is carried out that all Small Arms are inspected very thoroughly by Officers and W.C.O's.

Dirt and corrosion is the cause of barrel explosion therefore it is essential that rifles are cleaned daily and inspected at least once a week.

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation $f(x) = \sum_{n=0}^{\infty} \frac{f_n(x)}{n!}$, where $f_n(x)$ are the functions defined by the recurrence relation $f_n(x) = \frac{1}{n!} \frac{d^n}{dx^n} f(x)$. It is shown that the function $f(x)$ is analytic in the domain $|x| < 1$ and that it satisfies the differential equation $f'(x) = f(x)$.

GENERAL REPORT ON THE SMALL ARMS AND MACHINE GUNS OF THE LEMANO GRUPPO.

The inspection of Small Arms has now been completed, and reports sent to all concerned.

The general condition of the weapons was "POOR", due mainly to lack of maintenance. The actual figures are:--

RIFLES No. 4.	Examined 2350	B.L.R. 646	= 27%
Carbine Thompson.	" 1010	" 456	= 45%
Guns M/e Bren.	" 313	" 31	= 10%

The reason for the variation in the percentage of B.L.R. of these weapons may be explained as follows:--

- (a) Rifles No. 4. A reliable, useful weapon but lacking the fire power of the Bren.
- (b) Carbine Thompson. A very much disliked weapon. Unreliable, bulky and necessitating the carrying of large quantities of loaded magazines.
- (c) Guns M/e Bren. This Gun is extremely popular in the Gruppo, and was reasonably well maintained.

It would therefore appear that the Small Arms in this Gruppo are maintained according to their popularity.

1. The possible causes given in the AIA's Adv Report on above have been thoroughly investigated with the following results:-

(a) Supply of Cleaning Material

All Coy & Regt have been adequately supplied with this material and equipment.

(b) Trg Instruction in Care & Maintenance

A copy of Trg Major's (68 Inf Regt) comments are attached and from this it will be seen that the fault lies entirely with the Regt personnel who before and since the termination of hostilities in ITALY appear to have completely disregarded the care and maintenance of SA and have made no attempt to maintain the necessary high standard of maintenance by weekly Unit Inspection of SA in Regt.

2. The AIA's inspection is still proceeding but so far very little improvement has been noted and it is urged that firm and immediate action should be taken to ensure that there is an immediate improvement in the maintenance.

1. An investigation has been made by this office into the causes
from the Regt's point of view, of the high B.L.R. percentage of
Small Arms within the Gruppo, and it has been confirmed that
Cleaning materials as detailed within the Report, have always been
available for issue and that all demands from Units have been

1. A complete inspection of all LEGHANO Gruppo Small Arms by an AIA is now in progress and it will be seen from his advanced report (attached) that the results of this inspection are most alarming and serious in that up to now 20% of Rifles and 50% of Thompson Machine Carbines inspected have been found IIR due to improper care and maintenance.
2. The apparent causes of this extremely poor care and maintenance are detailed in the AIA's report but as this is from the "Regts point of view" this advanced copy is being circulated for action by all concerned so that the true position can be verified before his final report is submitted to DMS AFHQ.

COPY.REPORT ON SMITH & WESSON .38-IN PISTOL REVOLVERS

No recently received an issue to the Regt of 284 of the above type revolvers, these were all brand new in the cases as they had left the manufacturing factory at Springfield, Mass. (according to the packing notes).

On inspecting them prior to individual issue, every one, without exception was found to have thick rust on some part of the body, the majority round the metal work of the pistol grip frame, and many also at the muzzle end of the barrel.

It was found, that in 3 revolvers, the main springs were broken due to the action of the rust, and owing to the non-availability of spares, these had to be rendered fit and replaced (Serial Nos quoted below). It is feared that many more cases of this kind will occur after little use, due to the main springs being affected and left weak through the action of the rust.

Each weapon was packed, slightly piled and loosely wrapped in waxed paper, in a cardboard carton, but the absence of mineral jelly, or grease, obviously renders them unfit for an overseas journey, or long storage.

SEE 87

The Leemann Group has the following deficiencies on establishment:-

PIATS	37
2" Mortars	48

These have been indented for many times in the past but AFHQ ruled that availabilities did not permit of issue in the Group's former areas, but deficiencies should be made good from Army sources when the Group moved forward.

May the necessary releases now please be made. It is considered by the Group that in its present situation the issue of PIATS is of less importance than of 2" Mortars.

1. In their demand for controlled stores dated 5 Mar. 45 submitted by your "Servizio" is one bren barrel required for 68 Regt.
2. ADCS, British Increment, Fifth Army confirms that he holds ample reserves of bren barrels and is prepared to meet your requirements of this item from his resources.
3. It is suggested that you demand and hold a small reserve of bren barrels to cover future commitments.

13 Mar 45

To:- DADOS

AQ/4/77

On my recent visit to AFHQ I discussed with Q(AE) the position of controlled stores including the deficiencies of PIATS.

The AFHQ ruling (given to me verbally) was that a general shortage existed in the Theatre and that the allotment of PIATS to all units has been reduced accordingly. As a result the final entitlement of the Legnano Gruppe would be 126 until supplies in the Theatre were built up, when full scale would be issued.

In view of the fact that the AFHQ ruling is only verbal, *it* is suggested that the deficiency against WE continue to be shown in the Weekly Progress Report and also that one final demand be made for the outstanding balance.

Amourers Tools for the Servicing and
Repair of Ball Arm and Machine Gun.

1. Contrary to correct procedure, units continue to demand tools required for the servicing and repair of ball arm and machine guns by indenting for boxes, tools, amourers, filled or bags, amourers, in, filled.
2. The entitlement of a unit to the tools in question, as shown on the unit's A.M.C. 1098 or Equipment List, is stated in terms of 3006 boxes, tools, amourers (i.e. an empty box) or 3016 bags, amourers (i.e. an empty bag) together with certain tools of VADs Sections B2, C1, C2 or 2, specified in column, and varying in accordance with the organization of the unit and the weapons with which it is equipped.
3. (a) Units (except as in para. 4 below) will not demand boxes, tools, amourers, filled or bags, amourers, in, filled.
- (b) Unit requirements of the tools in question, whether required as initial equipment or for maintenance, will be demanded by itemized list, in accordance with the unit's A.M.C. 1098 or Equipment List. A separate list will be submitted for each VADs Section.
- (c) Insets for tools required as initial equipment will be clearly marked to this effect, and will state the No. of the relevant A.M.C. 1098 or Equipment List and the authority under which the unit is forming or demanding.
- (d) Insets for tools required for maintenance will state clearly the No. of the unit's A.M.C. 1098 or Equipment List, and the entitlement, holding and deficiency of each item demanded.

An exception to the foregoing is in respect of VADs Sections where the entitlement may be shown as "Kits of hand tools, amourers." Where required as initial equipment, entitlement so expressed will be satisfied by the issue of bags, amourers, in, filled. Para. 3 (c) above applies. Where tools are required for maintenance, amourers will demand the individual items. Para. 3 (d) above applies.

3. A.M.C. 0.5. of VADs Sections will carefully check all insets for amourers tools. In case of doubt they will arrange with A.M.C. 1.5. for a check by an A.M.C.

4. (a) Amourers tools are in general short supply.

(b) Units will ensure that their insets are in accordance with the foregoing.

to it, and varying in accordance with the organization of the unit and the weapons with which it is equipped.

3. (c) Units (except as in para. 4 below) will not demand boxes, tools, ammunition, filled or empty, ammunition, etc., filled.

(b) Unit requirements of the tools in question, whether required as initial equipment or for maintenance, will be denoted by itemized list, in accordance with the unit's A.F.C. 1098 or equipment list. A separate list will be submitted for each VOA Section.

(c) Items for tools required as initial equipment will be clearly entered to this effect, and will state the No. of the relevant A.F.C. 1098 or equipment list and the authority under which the unit is forming or demanding.

(d) Items for tools required for maintenance will state clearly the No. of the unit's A.F.C. 1098 or equipment list, and the entitlement, holding and deficiency of each item demanded.

4. An exception to the foregoing is in respect of "fill" containers where the entitlement may be shown as "fill of hard tools, ammunition." Where required as initial equipment, entitlement will be satisfied by the issue of bags, ammunition, etc., filled. Para. 3 (c) above applies. Where tools are required for maintenance, containers will contain the individual items. Para. 3 (d) above applies.

5. A.F.C. 1098 of formations will carefully check all items for ammunition tools. In case of doubt they will arrange with A.F.C. 1098 for a check by an A.F.C.

6. (a) Ammunition Tools are in general short supply.

(b) Units will ensure that they submit initial equipment list in accordance with the entitlement. They should submit items forthwith, in accordance with para. 3 above, for any deficiencies, unless an issued item has already been submitted.

(c) Any tools held surplus to entitlement will be returned to formations forthwith.
