Ministry of War.

28685

With reference to your letter 024340 of 10 Dec 45, it is agreed that it is most important that the workshops at BOLOGNA should start to repair Allied vehicles from the Infantry Division as soon as possible.

It will be necessary to form an Inefficient Vehicles Park in that neighbourhood to which vehicles beyond the echelon repair by the Divisional Workshops can be evacuated. It is understood that Lario has been suggested as a site for this park, and it is strongly recommended that you urge the formation of this park with all speed, so that, in particular, the vehicles from the Folgore Division which are beyond their repair, may be evacuated there. The idea of leaving these vehicles at Trento when the Folgore Workshops move is strongly deprecated.

It is agreed that 6th Repair Unit is a suitable name for the unit which must carry out repair to vehicles of Italian manufacture in the Bologna Command, and it is suggested that the workshop for repair of Allied vehicles should be called "Italian Base Workshop".
