Q. 156

15 June 1946TO : 6 B.L.U. BOLOGNA1. Herewith text of letter received from War
Ministry :

"Bolzano Territorial Command pointed out to this Ministry that at least 12 Electric sewing machines, which belonged to the first-aid wing of the Military Chemical-Pharmaceutical Institute of Florence, have been necessarily transferred from MERANO to RIMINI and held at disposal of the Allied Authorities.

Since said machines are of great importance for the restarting of the works, we kindly beg your Mission to take the matter up so that these machines are returned to FLORENCE as soon as all or a certain number of them are no longer required by the Allied Forces".

2. Please investigate the possibility of obtaining the release of these 12 Electric-Sewing Machines, and report progress to this H.Q.

MILITARY PHARMACEUTICAL CHEMICAL INSTITUTE
MILANO DELIBERANT

Milano, 24 June 1946.

Ref. 1245.

TO : L. B. L. U.
Military Territorial Command MILANO.

SUBJECT : Military Pharmaceutical Chemical Institute of Florence at MILANO.

It is a well-known fact that when the war ended, the Germans (Army Group C) to retreat they moved to the north the in contact nearly equipped establishment of MILANO, i.e. the machinery, raw material, finished products, military material, scientific apparatus etc.

The removal of the establishment was made in haste and systems etc. Nothing was left behind, not even apparently useless objects in order to make it impossible for the remaining Allied troops to have use of it.

After the cessation of the hostilities, the establishment was taken at MILANO. The equipment was in running order because a considerable part of the raw material was missing.

After the conclusion of the establishment to the Italian Government on 20/4/46, the Ministry of War decided to remove the material and the machinery to Florence in order to enable the Florence Detachment to take up the work in full and to be the basis for which it was intended.

On the provide of received orders the following was ordered:

- 1) to secure an efficient guard service for the custody of the various stores of the Detachment.

The service is being done by a CO. B. Coy Milano, the 4 Coy Batt. Trento of 4 Alpine Regt. and by 2nd Lt. Guard.

However, the Finance Guard with special orders are duty night and day in the pavilion 10.10, which contains a considerable quantity of specially valuable and explosive material: the drugs.

the removal of the...
left behind, not even apparently useless objects in order to make it impossible for
the advancing Allied troops to use of it.

After the cessation of the hostilities, the establishment was found at
22000. The equipment was in ruins, other than a considerable part of the raw
materials was missing.

After the cessation of the hostilities, the establishment to the Italian Government on
20/1/46, the Ministry of War decided to remove the material and the machinery to
France in order to enable the French Detachment to take up its work in full and
to do the tasks for which it was intended.

On the basis of received orders the following was ordered:

1) to receive an efficient guard service for the custody of the various stores of
the Detachment.

This service is being done by a C.C. Army division, two 4 out batt, "Frontier
et 6 Alpine Regt. and by civil guards.

Moreover, the Finance guards with special orders are twenty night and day
in the pavilion 20.10, which contains a considerable quantity of specially selected
and expensive materials: the drugs.

The exit is guarded by Carabinieri and by a civil guard for the search
and control of the vehicles and the allowed to enter the establishment during work
hours with a special permit only. From 19.30 hrs. until the following morning only
Military personnel on guard duty and in possession of the passport have admission.

This system of mixed guards has given excellent results on account of the
continuous mutual control. The guard-service is performed during the night on
account of reflection.

2) to carry out a plan which would permit - in the shortest time and 4.000 mil-
lions - the removal of the establishment to France.

For this purpose - after the assignment by the Army Representative -
the orders were controlled, cleared and weighed.

The cases containing material of higher value were registered, secured
with a rope and placed. Finally they were numbered progressively so that each case

MILITARY PHARMACEUTICAL CHEMICAL INSSTITUTE
MIRANO Detachment

Mirano, 24 June 1946.

Ref. 1213.

TO : 4 D.L.U.
Military Territorial Command BOLZANO.

SUBJECT : Military Pharmaceutical Chemical Institute of Florence at MIRANO.

It is a well-known fact that when the war events compelled the Germans (Army Group C) to retreat they removed to the north the important newly equipped establishment of FLORENCE, i.e. the machinery, raw material, finished products, sanitary material, scientific apparatus etc.

The removal of the establishment was hasty and systematic. Nothing was left behind, not even apparently useless objects in order to make it impossible for the advancing Allied troops to make use of it.

After the cessation of the hostilities, the establishment was found at MIRANO. Its equipment was in running order whereas a considerable part of the raw material was missing.

After the consignment of the establishment to the Italian Government on 20/4/46, the Ministry of War decided to remove the material and the machinery to FLORENCE in order to enable the FLORENCE Detachment to take up its work in full and to do the tasks for which it was intended.

On the grounds of received orders the following was ordered:

- 1) to secure an efficient guard service for the custody of the various stores of the Detachment.

This service is being done by a G.S.M.R. Coy Bolzano, the 4 coy batt. "Trento" of 6 Alpine Regt. and by civil guards.

Moreover, two finance guards with special orders are on duty night and day in the pavilion No. 10, which contains a considerable quantity of specially delicate and expensive material; the drugs.

the removal of the establishment in order to make it impossible for the advancing Allied troops to make use of it.

After the cessation of the hostilities, the establishment was found at hand. Its equipment was in running order whereas a considerable part of the raw material was missing.

After the consignment of the establishment to the Italian Government on 20/4/46, the Ministry of War decided to remove the material and the machinery to Florence in order to enable the FLORENCE Detachment to take up its work in full and to do the tasks for which it was intended.

On the grounds of received orders the following was ordered:

- 1) to secure an efficient guard service for the custody of the various stores of the Detachment.

This service is being done by a CO.LR. Coy Milano, the 4 coy batt. "Trento" of 6 Alpine Regt. and by civil garrus.

Moreover, two finance guards with special orders are on duty night and day in the pavilion No. 10, which contains a considerable quantity of specially delicate and expensive material: the drugs.

The exit is guarded by Carabinieri and by a civil guard for the search and control of the workmen who are allowed to enter the establishment during work hours with a special permit only. From 19.00 hrs. until the following morning only military personnel on guard duty and in possession of the password have admittance.

This system of mixed guards has given excellent results in respect of the continuous rational control. The guard-service is rendered easier during the night on account of reflectors.

- 2) to carry out a plan which would permit - in the shortest time and with the minimum risk - the removal of the establishment to FLORENCE.

For this purpose - after the consignment by the Axis representative - the cases were controlled, closed and weighed.

The cases containing material of higher value were registered, secured with a rope and plumbed. Finally they were numbered progressively so that each case

...../

- 2 -

its contents and its gross weight corresponded with its number on the list. This list contained the way-bill and was sent to NURENBERG Detachment for the control of the cases upon arrival.

Finally, in order to avoid possible thefts of material during loading a particular control was established which has given excellent results.

The railway waggons were guarded by members of the 6 Alpine Regt. and by civil guards; in particular cases the escort was commanded by an officer or a non-commissioned officer.

All waggons - except one at the beginning and one at the head of the train which were destined for the guns and were material of small value - were closely guarded and bolted making the opening of them impossible.

The escort personnel - besides the load-receipt - had to sign a receipt stating how many waggons they had to escort, the number of cases each wagon contained, their gross weight and condition.

Although this system slowed down the loading it has proved very effectual and after the wagon had to be unloaded in order to clarify differences in the number on the cases and on the list of the escort personnel.

The removal began on 5 March and continued - with some interruptions - till 24 May cur.

Generally 7 waggons a day were loaded.

The following was removed: the material of the stores of MARLENCO, of the lippedrone and the machinery; charge for the removal can be made on the ground of the attached appendix.

There was no loss or removal of material during the journey as is shown by the receipt of cases unloaded sent by the Florence Detachment without any complaints.

Actually it concerns the finished products and the sanitary material; the removal will be finished after the completion of the inventory and the sub-division ordered by the Ministry of War. It will then be possible to prepare the

Although this system slowed down the loading it has proved very effectual and often the wagon had to be unloaded in order to clarify differences in the number on the cases and on the list of the escort personnel.

The removal began on 5 March and continued - with some interruptions - till 24 May curr.

Generally 7 wagons a day were loaded.

The following was removed: the material of the stores of MALLINGO, of the hippodrome and the machinery; charge for the removal can be made on the ground of the attached appendix.

There was no loss or removal of material during the journey as is shown by the receipt of cases unloaded sent by the Florence Detachment without any complaints.

Actually it concerns the finished products and the sanitary material: the removal will be finished after the completion of the inventory and the subdivision ordered by the Ministry of War. It will then be possible to prepare the final dispatch.

ISTITUTO CHIMICO FARMACEUTICO MILITARE
Distaccamento di MERANO

N° 1243 di prot.

Merano, 24 giugno 1946

AL COMANDO MILITARE TERRITORIALE
4° BLU

B O L Z A N O

OGGETTO: Istituto Chimico Farmaceutico Militare di Firenze in Merano.

Come è ben noto il trasferimento dei macchinari, materie prime, prodotti finiti, materiale sanitario, apparecchi scientifici, ecc. cioè di tutte l'imponente complessione dello stabilimento di Firenze, modernamente attrezzato, fu iniziato dai tedeschi (Gruppo d'esercito C), allorché gli eventi bellici imposero loro la ritirata al nord.

Lo smantellamento dello stabilimento fu minuzioso e sistematico e nulla fu tralasciato, nemmeno gli oggetti apparentemente inutili, per far sì che esse non potesse essere utilizzate dalle truppe alleate avanzanti.

La fine delle ostilità trovò lo stabilimento in piena attività a Merano con tutta la sua attrezzatura e la sua ricca dotazione depauperata in modo sensibile solo nel settore delle materie prime.

Avvenuta la consegna dello stabilimento all'amministrazione italiana il 20/I/46 il Ministero della Guerra stabilì che fosse effettuate le sgombrare su Firenze di tutto il materiale, macchinario, ecc. perché la sede di Firenze riprendesse la sua funzionalità in piena ed assolvesse i compiti, ai quali era chiamata.

In base alle direttive ricevute fu immediatamente provveduto a:

- 1) Assicurare un efficiente servizio di guardia per la custodia dei veri magazzini dello stabilimento.

Tale servizio è disimpegnato da un distaccamento della compagnia speciale CC.RR. di Bolzano, un distaccamento delle 4.ª compagnia Batt. "Trento" del 6° reggimento Alpini, da guardie civili.

Inoltre due guardie di finanza montane con speciali consegne, giorno e notte, di guardia fisse, al padiglione n. 10, nel quale sono rinchiusi notevoli quantità di sostanze particolarmente delicate e costose: gli stupefacenti.

Il cancello d'uscita è guardato dai carabinieri e da una guardia civile per la perquisizione ed il controllo del personale operaio, che per circolare nello stabilimento nelle ore di lavoro deve essere munito di apposita autorizzazione. Dalle ore 19 p.m. fino al mattino successive non è consentito circolare nello stabilimento che al solo personale militare di servizio in possesso della parola d'ordine.

Il sistema delle guardie miste ha dato ottimi risultati perché vi è costantemente un vicendevole controllo. Un potente sistema di illuminazione elettrica a mezzo di riflettori, durante la notte, rende più efficiente il servizio di guardia.

- 2 -

- 2) *attuare* ad attuare un piano di sgombero che consentisse, nel più breve tempo possibile e con le maggiori garanzie, lo smistamento per Firenze dell'intero complesso delle stabilimente.

A tal fine fu provveduto, dopo aver ricevute la consegna del rappresentante dell'A.R.A.R. (il che ha consentito la ricezione diretta del materiale) a sistemare convenientemente i colli, che vengono controllati, chiusi e pesati.

I colli contenenti sostanze di maggior valore vengono reggettati e assicurati con corde e piombati. Alla fine essi vengono numerati progressivamente ed elencati in modo che nell'elenco ad ogni numero corrisponda la qualità del collo (cassa e fusto e damigiane, ecc.), la natura della sostanza in esse contenuta, il suo peso lordo. Tale elenco, che costituisce la nota descrittiva di spedizione, viene inviata alla sede di Firenze per il controllo all'arrivo.

Al fine di evitare possibili evasioni di materiale all'uscita del magazzino e durante le operazioni di carico, è stato istituito un particolare controllo, che in pratica ha dato ottimi risultati.

Il servizio di scorta armata ai vagoni ferroviari viene assolto da alpini del 6° Regg. te Alpini e da guardie civili: in casi particolari la scorta viene comandata da un ufficiale e da un sette ufficiale.

I vagoni vengono regolarmente piombati ed imbullonati con bullone ribadito in modo da renderne impossibile l'apertura, ed eccezione di due, quello di testa e quello di coda destinati alle scorte e dove viene caricato materiale di scarso valore.

Il personale di scorta, oltre che essere munito della ricevuta di carico, deve firmare altrettanto ricevute per quanti sono i vagoni da scortare e per ogni vagone deve essere annotato il numero dei colli contenutevi, il loro peso lordo, e le condizioni di chiusura.

Il sistema se pure rallenta le operazioni di carico si è dimostrato efficacissimo e non è stato raro il caso di aver dovuto procedere alle scorte di un vagone già completo per divergenze sorte sul numero di colli tra il personale di scorta e quello destinato al carico.

La scorta ha avuto inizio il 5 marzo ed ha proseguito sal-

ogni numero corrisponde la qualità del cello (cassa e fusto e dani-
giene, ecc.), la natura della sostanza in esso contenuta, il suo peso
lerdo. Tale elenco, che costituisce la nota descrittiva di spedizione,

Al fine di evitare possibili evasioni di materiali all'us-
cita del magazzino e durante le operazioni di carico, è stato isti-
tuito un particolare controllo, che in pratica ha dato ottimi risul-
tati.

Il servizio di scorta armata ai vagoni ferroviari viene as-
soluta da alpini del 6° Regg. te Alpini e da guardie civili: in ogni
particolare la scorta viene comandata da un ufficiale e da un sotto

I vagoni vengono regolarmente piombati ed imbullonati con
bullone ribadite in modo da renderne impossibile l'apertura, ed esce-
zione di due, quello di testa e quello di coda destinati alle scorte
e dove viene caricato materiale di scorta valore.

Il personale di scorta, oltre che essere munito della rice-
vuta di carico, deve firmare altrettanto ricevute per quanti sono i
vagoni da scortare e per ogni vagone deve essere annotato il numero
dei vagoni contenuti, il loro peso lorde, e le condizioni, di chiusura.

Il sistema se pure rallenta le operazioni di carico si è
dimostrato efficacissimo e non è stato raro il caso di aver dovuto
precedere alle scorte di un vagone già completo per divergenze ser-
te sul numero dei vagoni tra il personale di scorta e quello destina-
to al carico.

Lo sgombero ha avuto inizio il 5 marzo ed ha proseguito sal-
vo alcune interruzioni, fino al 24 maggio c.a.

Giornalmente venivano caricati sette vagoni: 4261

Sono stati sgomberati: i materiali dei magazzini di Marlungo, dell'Ip-
pedrome e tutti i macchinari; la valutazione delle sgarbere effettuate
potrà essere fatta in base alle speeche allegato.

Non si è avuto a lamentare nessuna perdita ed asportazione
di materiale durante il viaggio come lo comprovano le ricevute di
scarico inviate dalla sede di Firenze senza alcun rilievo.

Attualmente si procede alla ricegnizione diretta dei predet-
ti finiti e del materiale sanitario: il lavoro di sgombero sarà ultima-
to dopo che, terminati gli inventari, ed effettuata la suddivisione

././.

- 3 -

ordinata dal Ministero della Guerra, sarà possibile allestire prima
e procedere alla spedizione dei materiali.

To : 4 BLU

Reference HQ MEIA letter Q 156 of 15 June 46.

In order to assist in tracing the sewing machines concerned, it is desirable that the following questions be answered, as possible, by 4 Comiliter.

- (i) Which unit transferred them from MERANO to RIMINI?
- (ii) To which unit were they transferred?
- (iii) Which Allied Authority hold them at their disposal?
- (iv) Any other applicable information, i.e. receipts held, by whom signed, etc.

It is pointed out, that the number of Allied units stationed at RIMINI is very few, and none are of the type which would require 12 Electrical sewing machines: unless some positive information other than that already offered is available, considerable time will necessarily elapse before enquires are completed, and a satisfactory result is most unlikely.

3 June 46

This HQ has been informed that the u/n quantities of chemical material previously the property of the Italian Army are now in possession of a certain " Soap Factory MARLENGO" at MERANO.

The director of this soap factory has in his possession a document signed by ADMS 217 Area stating that he may retain this Italian Army property.

In the meantime the Carabinieri have "blocked" this material until the position is clarified.

It would be appreciated if the circumstances could be explained to this HQ.

HQ 217 Area, CMF

A 1485

21 May 46

SUBJECT: Veneral Disease.

Lists "A" and "C"

1. Many attempts to reduce the incidence of VD among British troops have recently been made; but despite repeated warnings there has been a steady increase. In the incidence of this disease over the last nine months, rising from 63.64 per 1000 in Jul 1945 to 154 per 1000 in Mar 1946. Moreover, the actual number of cases has increased although the number of troops in CMF has been considerably reduced. This is particularly noticeable with gonorrhoea.

2. The present high incidence of VD is an indication of bad discipline and reflects adversely on unit administration. All officers commanding units, irrespective of the size of the unit, will once again bring to the notice of all ranks the necessity for reducing the figures of incidence of VD. The following points may reinforce the remarks of officer commanding units:-

- (a) Very large numbers of men are out of action as a result of VD thus tying up considerable numbers of other men in looking after them. The average number of men in one formation undergoing treatment is 200 and they require a further 60 to look after them, apart from the services of specialists and clerks for statistics etc. This means that over 260 men in that formation are away from work which others must do for them. This waste of manpower obviously slows the rate of release from the army.

last nine months, rising from 63.64 per 1000 in Jan 1949 to 134 per 1000 in Mar 1946. Moreover, the actual number of cases has increased although the number of troops in CAT has been considerably reduced. This is particularly noticeable with gonorrhea.

2. The present high incidence of VD is an indication of bad discipline and reflects adversely on unit administration. All officers commanding units, irrespective of the size of the unit, will once again bring to the notice of all ranks the necessity for reducing the figures of incidence of VD. The following points may reinforce the remarks of officer commanding units:--

- (a) Very large numbers of men are out of action as a result of VD thus tying up considerable numbers of other men in looking after them. The average number of men in one formation undergoing treatment is 200 and they require a further 60 to look after them, apart from the services of specialists and clerks for statistics etc. This means that over 260 men in that formation are away from work which others must do for them. This waste of manpower obviously slows the rate of release from the army.

- (b) Penicillin has not been in use long enough for it to be certain that it will cure gonorrhea. Men affected, though apparently cured, may have to pay a terrible price in after life. Moreover treatment of gonorrhea by penicillin may mask but not cure a case of syphilis contracted at the same time. For this reason surveillance for at least six months is essential to ensure that syphilis is not present.

3. Many cases of VD are contracted from association with undesirable, infected females at unit dances. Officers commanding units requiring help in keeping undesirable women away from unit dances should contact APH HQ 217 area. In many cases records are kept of these women and the CAT are only too glad to give information as what women should be refused admittance.

2..... Records

Extracts on WB
27 May 1944

- 2 -

4. Records of the monthly incidence of VD amongst all units, however small, in the area are kept by this HQ. These records are scrutinised regularly. Officers commanding units will be held personally responsible for ensuring that they take all possible measures to reduce the incidence of VD within their units. They will in particular ensure:-

- (a) That ET arrangements within the unit are adequate and easily understood.
- (b) That all men know the location of their ET room and all PA Centres in the town.
- (c) That all men know how to obtain condoms.

Handwritten notes:
 (a) The ET room is located in a building near the entrance to the camp.
 (b) The PA Centres are located in the town.
 (c) The condoms are available in the town.

To: 4 BLU

At the German colony at Merano there are 12 electric sewing machines belonging to the medical department of the "Istituto Chimico Farmaceutico Militare" of Florence and also some printing machines.

This material was transported from the Merano Branch of the Institute to the German colony by the British Authorities shortly before the Institute was turned over to the Italian Administration.

Request that BLU take action so that the material can be consigned to Lt Col Scotti, commander of the ICMF Det of Merano, from where it will be sent to the Institute in Florence.

Subject: Anti-Malarial Campaign 1946 - Supply of Mepacrine

Land Forces Sub Comm.
A.C. (M.I.A.)

ROME
1/2A/210

7 March 46

ALL B L U

It is notified for information that the Italian War Ministry, Medical Directorate, has instructed D.D.S. Territorial Commands that, during the forthcoming malarial season all Italian units, including BR-ITI and US-ITI, will draw mepacrine, or its equivalent, from the nearest Italian Military Hospital.

Under no circumstances will they draw supplies from British or American sources.

LIST

Headquarters
60 Sub Area
C.M.F.
Tel No: 3482
43/4

Jan 1946.

1. In view of the urgent necessity for economy in Medical manpower owing to shortage of doctors in the UK, the Cabinet have issued orders that the overall ceiling of RMC Officers in all Commands shall not exceed a ratio of two per thousand BRITISH troops on the strength.
2. This will necessitate drastic underposting of all Medical Units (except in operational formations) and of Pool and Regimental Medical Officers by the end of Jan 46.
3. In order to effect this, it will be necessary for all Regimental Medical Officers to be made available on a Pool or "Area" basis for such duties, as the DDS/ADM's concerned may decide.
4. A "ceiling" for each District/Area will be fixed by the Medical Directorate CHQ CMT, and Medical Officers therein will be detailed by the DDS/ADM's for such duties as he may consider necessary irrespective of the appointment to which they are actually posted within War Establishments.
5. Authority CHQ CMT Letter 3752/1-1 dated 30 Dec 1945.
