1. The task of ensuring that amn is not left uncharted in the mountains requires the active co-operation of all concerned.

2. In the present phase of ops care will be taken that dumps at gunsites are not allowed to exceed the minimum consistent with operational needs. When vacating positions which are not being taken over by relieving units any amn which cannot be ferried forward to new sites will be cleared under arrangements Hq Combat Group or HqRA as under :

ARROW	to 127 MHC
ACE and BELL	to Corps fwd depot at CASTEL DEL RIO
BOW	to 23 DMA (10 Ind Inf Div)

6961

3. In the event of any rapid move which prevents clearance to the above places amn will be collected centrally in gun areas in an accessible position near a road and this Hq notified of the SIX figure map reference of the dump and the quantity by types. Amn under these circumstances will be properly stacked and charges etc which are likely to detonate placed under available cover.

1. The following report from ORDNANCE AMM. on Bombs M 3 in. Mortar RM, of American manufacture, issued for training purposes, is forwarded to you for necessary action.

(a) It has been decided that although Bombs M 3 in. Mortar RM of American manufacture are not suitable for issue as operational stocks owing to their proving unsuitable for conversion to a long-range role, they may still be issued for training purposes as normal-range bombs, i.e., charged 6 x 72 grain MX, or 6 x 100 grain MC(Y).

(b) In consultation with HQ WTCF, it has been agreed that users should be warned on the following points :-

- (i) No attempt should be made to fire the bombs with a charge greater than that specified in para 1(a) above.
- (ii) The bombs should not be used for overhead fire.
- (iii) The failure of the tail-unit may result in blunts when firing charge 1 at very short ranges, while with charge 2 a large deviation from axis of line of flight may be experienced.

(c) The main distinguishing feature of American manufactured bombs is the fact that bombs and tail units are painted buff, as distinct from the normal copal-vernish finish of bombs of other countries of origin.

2. The above should be brought to the notice forthwith of all ranks concerned with the practice firing of 3" mortars.
