NOTES: →

to

1. . Cds found on ICG's own installations, units lines, etc., will NOT be included.
2. There is some difficulty in distinguishing between VPs (Vulnerable Points) and Static. In general a VP is an installation like a telephone exchange, or bridge, or power station which might be sabotaged, while a static installation can be taken as a pot depot or dump O&M stores where the danger is more from thieves than from saboteurs.
