Subject : Adm Reports.

Rear Hq 13 Corps
1055/C
10 Jun 44

1. In the present phase of operations the need for prompt and accurate adm reports is even greater than usual.
2. The narrow and rapidly lengthening L of O is constantly congested, and tpt is very hard worked; thus to ensure adequate stocks forward of essential commodities it is vital that only actual requirements are moved forward. The length of time taken to move stocks into forward dumps from the rear is such as to necessitate the earliest information and may make it impossible to retrieve a mistake based on a wrong demand.
3. As sig channels frequently are disrupted and constantly over-loaded, the following system for transmitting information backwards will be put into effect immediately :
 - (a) Normal telephone reports will be made in all cases when possible.
 - (b) In the absence of telephone communication reports will be made as follows :
 PWG to Rear Corps Hq - Reports from
 - (i) CHAS Hq (logs and CL)
 - (ii) PAs (asm) will be dispatched by AMR, detailed by SF Rear Corps Hq.
 Divn and RA to Rear Corps Hq - All R, AMR
 Rear Corps to Rear Army Hq - Consolidated report by Corps G Liaison Ofcr.
 - (c) It is essential that reports reach this Hq by 2300 hrs daily, by telephone or AM. Because of the time lost in enciphering and deciphering W/T will NOT be used.
 - (d) Confirmation - By immediate signal must be made in all cases.
4. Careful comparison of figures reported day by day must be made before transmission. In this way discrepancies will be noted and an explanation given, thus obviating delay caused by requests for explanations.
 Promptness is of paramount importance; in the absence of reports of actual figures from lower lines, estimates must be made in the light of current events, and if necessary adjustments made in subsequent returns.
