I5 agosto 46

AL IX COMANDO MILITARE TERRITORIALE

Riferimento conversazione telefonica del I3 agosto tra il Ten.Feigusch e il Colonnello Colli Lanzi.

Si prega voler notare che lo specchio settimanale relativo alle giagenze munizioni al deposito di TERLIZZI,quale fu richiesto nella mia lettera 64/80 del 7 giugno 46,non si richiede più oltre nella forma precedentemente stabilita.

In sostituzione del suddetto si è chiesto al Comandante del Deposito di Terlizzi di inoltrare i seguenti specchi:

(a)-settimanalmente come dal 6 agosto 46.
Uno specchio conforme al modulo allegato A;

(b)-ogni quattro settimane come dal 30 luglio 46
Uno specchio conforme al modulo allegato B.

Si prega voler notare inoltre che i suddetti specchi si riferiscono esclusivamente ai tipi di munizioni britannici e che, allo scopo di risparmiare tempo nella trasmissione,questi specchi dovrebbero essere trasmessi direttamente a questo Comando,inoltrandosi copia,se necessario,a codesto Comando.

In respect of Terlizzi Ammunition Depôt the following action has been taken:

1) - Vehicle for S.Ten. MACCHIORO : the S.M.E. by telegram 3519/Serv. dated 1 Aug has ordered to put at disposal of S.Ten. MACCHIORO a jeep actually held by the Commander of Terlizzi Transport Platoons. 21 Autoreparto will arrange for its replacement. Until the vehicle of 21 Autoreparto arrives, this HQ has put at disposal, w.e.f. to-day and as a temporary measure, a jeep belonging to 9 Autoreparto.

2) - Half a Section of those belonging to 21 Special Transport Coy. and destined for carrying ammunition has been put at disposal for carrying of ammunition within the Depot.(telegram No 3519/ Serv. of 1Aug of S.M.)

3) - Telephone connection is going to be brought into operation by Comando Genio.

4)- Fire service is already operational.

5) - In regard of rail-way waggons availability, S.M.E. by telegram No 03/14575 of 30 July 46 has been requested to allott 5 waggons daily.

6)- Spare parts and tyres : the Os.i.c. of Transport Sections make their requests to 21 Special Transport Coy. and avail themselves of services which can be afforded by 9 Repairs Unit.

7) - It has already been arranged for destining three additional under-officers to the Depot.

2585

8) - Ammunition Shelters: If it will be necessary on account of prolongation of ammunition move, it will be arranged in the best way for sheltering the ammunition.

For Services Office of S.M.: It is not considered necessary to replace the present consignee of the Ammunition Depot. He, also in the opinion expressed by HQ 9 B.L.U., can be relied on that he will carry out efficiently his special duties.

n° 3514 / 2/C

Terlizzi, li 26 luglio 1946

Promemoria di servizio.-

Come da accordi verbali presi con un Maggiore inglese del 9° B.L.U. di Bari, si precisa:

- Presso il Deposito oltre ad esservi delle munizioni per armi portatili, proietti per artiglierie, bombe per mortai e per lancia bombe, si trovano sistematiin lotti sulle diverse linee n° 268.471 bossoli con cariche per cannoni da 25 libbre e; circa 22.000 spolette del n° 22 B. Data la vasta estensione del Deposito non é possibile provvedere ad una accurata e stretta vigilanza, come del resto non é possibile garantire una perfetta sicurezza.

Perciò si propone: -

- Che detto materiale venga sistemato sulla linea "A" e cioé nello spazio esistente tra la fine del magazzino n° 1 (recinto chiuso) e l'inizio del magazzino n° 2. Posto che sarebbe controllato giorno e notte da una sentinella armata.

= Per potere effettuare questi lavori necessitano che siano messi a disposizione del deposito n° 6 autocarri da 3 tons. per un periodo di giorni lavorativi 30.= e n° 36 uomini di manovalanza.

TO : WAR MINISTRY

Reference your 15260/2818 of 2 March 1946 and further to this HQ Q.139 of 26 April 1946.

1. It is reported that bulk transfer of such ammunition as is available in 501 BAD to the Italian Army Depot at TERLIZZI has been completed.

The balance due will be released in due course probably from stocks now located in VENEZIA GIULIA.

2. The lack of POL in sufficient quantity is said to be holding up the distribution of this ammunition in accordance with your pre - arranged plan.

3. It will be agreed that the Army reserves of ammunition should reach the respective Depots with the minimum of delay in order that they may be stored under the best possible conditions and in the maximum security.

You are accordingly advised to

(a) reduce the holdings of the TERLIZZI Depot to a minimum as soon as possible.

(b) arrange for the safe custody of all ammunition in transit.

(c) insist on the best possible storage arrangements at the receiving Depots.

4. You are requested to furnish the information called for under paragraph 4 of Q.139 of 26 April 1946. 2573

SUBJECT: Training Ammunition

LAND FORCES SUB COM, A.C. (MMIA)

TO : MINISTRY OF WAR

Ref your 4/1706/Serv of 15 June 46.

1. It is very much regretted that, in spite of repeated requests from this Headquarters, we have not been able to obtain an increase over the 10,000 tons of ammunition allotted to the ITALIAN Army.

The BRITISH authorities are not prepared to make any further reduction in the ammunition reserves held for BRITISH forces, while they still have a possible operational role in defence of ITALIAN territory.

2. You may be confident however, that ammunition in the requisite quantities will be made available to the ITALIAN Army in either of the following circumstances:

(a) On the withdrawal of BRITISH troops from ITALY.

(b) On ITALIAN troops being required to take part in active operations,

Until, or unless either of these contingencies occur, I am afraid that you will have to be satisfied with the knowledge that the necessary ammunition reserves for the ITALIAN Army exist, though they are not at the moment under control of the ITALIAN Army.

3. In the meantime, as there will be insufficient ammunition available to complete formations to First and Second Line scales, and to provide all requirements for training, you are advised to release training ammunition to units at the full authorised scales, and at the expense of complete First and Second Line holdings, on the understanding that these holdings will be made up to full scale as and when the necessity arises.

4. You should however, take great care to see that only authorised scales of training ammunition are used, and that individual units or formations do not consider that they can use the whole of their First and Second Line holdings for training in the belief that they will be replenished in toto when an emergency occurs.

5. We finally recommend that you should dispose of your ammunition reserves in such a way that one or more Divisions can be made up to full scale with the minimum of delay. Subsequent Divisions being made up from BRITISH releases.

Report on the
Italian Ammunition Sub Depôt.

The following points arose during my visit to the Italian Ammunition Sub Depôt at Terlizzi on the 21 July 46, and cover the organisation and administration of the depôt and the arrangements for dispatch of amn by rail.

I. Organisation of Depôt.

(a) The Depot is commanded by S/Ten Macchioro Italo. I do not consider that conditions existing in the depot at present reflect on his organising ability and capacity to carry out his duties efficiently. He appears to have been handicapped mostly by circumstances outside his control.

(b) According to the C.C. the establishment of the depot is I Officer and 36 ORs.
The actual strength is I Officer and 30 ORs including 2 under Officers. The C.C. states that a further 3 under Officers are required to obtain maximum efficiency. In view of the size of the depot this seems a reasonable demand. The additional u/officers would count against present deficiencies in establishment.

(c) The arrangements for storage of ammunition presents a big problem at the moment.
13,000 tons of British ammunition were received during the period I June to 15 July. Resources for the handling of this amount of amn on reception appear to have been insufficient for the task, and reception was further complicated by lack of familiarity with British types of amn.
Considerable rearranging and restacking of amn is now necessary before the storage arrangements are satisfactory. The C.C. estimates this operation will take six weeks, and that provision of 6X3 tonners and 6 additional civilian laborours, each for 30 working days will be required.
The C.C. is preparing a work table and plan to be ready by 26 July for the revised amn layout, and I recommend

Considerable rearranging and restacking of 256 dumps now necessary before the storage arrangements are satisfactory. The C.C. estimates this operation will take six weeks, and that provision of 6X3 tonners and 6 additional 30 civilian laborours, each for 30 working days will be required.
The C.C. is preparing a work table and plan to be ready by 26 July for the revised amn layout, and I recommend that a priority is given to the provision of transport and labour facilities required for this purpose.

2. Administration.

(a) Transport.

There is no transport on the establishment of the depot, the area of which extends over 15 kilometres of road. A vehicle is required by the C.C. if he is to exercise effective supervision of the area.
A vehicle is also required for maintenance and internal administrative tasks within the depot.

Cont/

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

One vehicle of the 15 cwt type could meet both these requirements at a minimum.

(b) Intercommunication.

The depot has no telephone facilities. A telephone requires to be installed at the HT office.

(c) Fire Precautions.

Fire appliances were to be drawn from Bari the same day. Transport requirements and telephonic communications as mentioned above should be considered from this angle also.

(d) Amn Shelters.

Ammunition is at present deficient of sheltering. Adequate provision should be made from the sheltering of 501 B.A.D. now in course of transfer to the Italian Army.

3. Ammunition Dispatches.

(a) Ammunition dispatches to the Divisions is proceeding. Approx ~~3,000~~ 4,200 tons of amn have been dispatched since 1 July. As the loading capacity of the depot is 50 tons daily, increased availability of railway stock is required to expedite dispatches.

(b) The O.C. states that the availability of transport for lifting amn from Terlizzi to railhead may decrease on account of difficulty in obtaining petrol supplies, and owing to the deterioration of tyres on bad road surfaces and difficulty in repaires and replacements. HQ M.M.I.A. is asking the Ministry of War to authorise a daily quota of 80 galls of petrol to meet this ~~just~~ 2560 requirement.

Progress Report as at
11 July 46
(ref Q139 of 14 June)

1. Difficulty was encountered in obtaining the required number of railway trucks, owing to the movement of Polish troops.

However, ammunition from 501 B.A.D. was moved directly to Terlizzi Depot without slackening the rate hitherto achieved and it should be all clear by 13 July.

2. With the ammo at Terlizzi, progress after 13 July will depend on the availability of railway transport.

Of the 30 trucks authorised by S.M.E., 24 have left for their destination, including 13 wagons with 50% of Folgore Div's allotment and two wagons with 20% of Legnano Div's.

3. Terr HQ have been advised to ask S.M.E. for 5 2550 wagons every day, which is the number that can be dealt with. It is hoped to get a better allotment in this way than by asking the Railways for a large total number of wagons which they cannot supply.

4. Ammunition taken from 501 B.A.D. up to 9 July is shown

Ref:23471/9194

Subject : Hand-grenade primers.

Further to a check carried out of all hand-grenades on charge, the "Legnano" Infantry Division has noted that the following quantities of primers are missing:

-nº	1511	for	bombs	type	36
-nº	334	"	"	"	69
-"	47	"	"	"	75
-"	3113	"	"	"	77

The cause of the trouble is due to the fact that the hand-grenades were sent in boxes separate from those containing the primers, which, most likely, have been omitted or some of the cases of primers lost.

We inform your Mission of the above for any action you may taken for the purpose of completing the hand-grenades in question.

TO : G.H.Q.

Ref your 4109/Q1 dated 6 June 1946. — copy attached.

1. The War Ministry have agreed to assist with transport the concentration of ammunition earmarked for the Italian Army which it is desired to hand over in situ at the Terlizzi depot.

2. You are requested to authorise under the circumstances the issue of P.O.L. for this special task if sufficient can not be made available from the limited stocks at the War Ministry's disposal.

3. In the interests of economy you are requested to authorise the Depot Commander 501 RAD to restrict the double handling to small arms ammunition and grenades. It is suggested that details be left to the Depot Commander who will have the assistance of Major Aylward MMIA in his dealings with the War Ministry representative.

4. In order that the hand over of the Depot may not be retarded the War Ministry are prepared to take over the heavier ammunition (eg 25 pdr) in its present location and to arrange with ARAR for its removal after control has passed to ARAR.

Your Q 139 dated 3 June 1946.

1. It is for all practical purposes impossible for both the Italian War Ministry and ARAR to take over ammunition in situ at 501 DAD. As therefore ARAR have to take over more than 100,000, tons, and the War Ministry some 13,000 tons, only, the only practical course is for ARAR to take over in situ and for the ammunition earmarked for the Italian Army to be concentrated separately and then similarly taken over in situ.

2. The effect this concentration a transport lift of 200 tons daily is required for the period 1 to 15 Jul. This transport cannot be provided from British sources and the Italian Army must accordingly assist in this operation. Detailed arrangements for the provision of this lift will be arranged by DMT (M) in conjunction with your AMT.

3. No serviceable ammunition which would be of value to the Italian Army is being handed over to ARAR or otherwise disposed of.

4. Present releases plus ammunition which will become available on the withdrawal of British and Polish troops from ITALY, are adequate with few exceptions for

(a) First and Second line holdings for weapons issued subsequent to 1 Jun 46.

(b) Training expenditure until 31 Dec. 46.

(c) Reserve holdings of one month at contact and two months at quiet rates for the current Order of Battle of the Italian Army.

Q.139
3 June 1946

TO : G.H.Q.

1. It is pointed out that the transfer of ammunition to Italian Army Depots (Ord Directorate DOS/26/8(4) of 26 Apr 46 refers) would be facilitated if the War Ministry representative were enabled to take this over in situ and make up train loads in accordance with their own completed plan for distribution.

2. It appears however that the O.C. 501 B.A.D. is anxious to transfer the Italian Army consignment to an adjacent site and hand it over complete. This involves the move of a considerable tonnage from BITONTO to TERLIZZE for which inadequate transport is available.

The result would appear to be delay and some waste of effort. May the objections to the alternative suggested above be re-examined and instructions issued which will facilitate the transfer of this ammunition needed to build up the Italian Army Reserve stocks.

3. It is reported that A.R.A.R. are taking over a considerable quantity of ammunition in situ.

Confirmation is requested that no ammunition of calibres included in that released to Italian Army will be handed over to A.R.A.R.

It is pointed out that the quantities so far released can not be expected to provide adequate reserves for the Italian Army except for the limited period now envisaged. It is therefore desired to preserve from destruction ammunition which potentially may be of value to the Italian Government in the future.

Ref telephone conversation (LT.Col.Cortesa - Major Lembo) of 18 May 46.

1. Owing to food and other commodities having priority on the Italian State Railways, it is likely that railway wagons for the transport of ammunition will be very limited.

2. For this reason it is probable that storage space will be required for ammunition for the Italian Army between the time that it is released from 501 B.A.D. and the time when railway wagons are available.

3. GHQ therefore ordered 501 B.A.D. to survey a suitable place for the ammunition where it would be guarded by Italian personnel.

Rif. convers. telef. Ten Col. Cortese - Magg. Lembo del 18 Maggio 46.

1. Dovendo le Ferrovie dello Stato Italiane essere adibite, con assoluta precedenza, al trasporto di derrate alimentari, è probabile che il numero dei vagoni ferroviari per il trasporto delle munizioni si faccia molto limitato.
2. Per tale ragione non è improbabile che si renda necessario l'accantonamento delle munizioni destinate all'esercito Italiano durante il tempo che intercorre tra la distribuzione del munizionamento e la disponibilità dei vagoni ferroviari per il trasporto.
3. In conseguenza di ciò il GHQ ha ordinato al 501 B.A.D. di trovare un posto adatto per le munizioni e per la sorveglianza da parte del personale Italiano.

16 May 46.

To : Land Forces Sub Comm AC,
(M.M.I.A.).

Ref your signal Q 937 of 15 May 46.

1. Delay in forwarding this ammunition has been caused through the non-availability of 37 mm, in the first instance because it had not been inspected, and now because GHQ has issued a release order for this type of ammunition for British Forces.

2. Owing to 501 B.A.D. not being able to meet both demands, a reply is awaited from GHQ as to whether the British Forces or the CC.RR bns are to have priority.

3. Owing to the time factor, it has been found impracticable to suspend further the issue of .30 ammunition, and issues of this calibre only will commence w.e.f. 17 May 46.

4. Ammunition for the CC.RR bns at ROME, NAPLES and MILAN, and for the Central Training School at CESANO, will be transported by road in the lorries of the MANTOVA Division who were awaiting the collection of the large consignment of ammunition for the Italian Armed Forces and which is now temporarily not available (our 64/50 of 14 May 46 refers). The estimated date of departure of this convoy is 18 May 46.

5. Ammunition for the CC.RR bn, PALERMO, will be forwarded immediately railway space is available.

6. Rail bids to convey the 37 mm ammunition will be submitted when the quantity available for the CC.RR bns is made known by GHQ.

1. Reference your 15260/2818 of 2 Mar 46 and further to our Trg/42/1 of 28 Mar 46 (copy List "B"), release has now been obtained for approx. 10,000 tons ammunition from 501 B.A.D.

The discrepancy between this quantity and that originally estimated as available is due chiefly to the fact that mortar ammunition of any calibre is not at present to be issued.

2. Seperate instructions will follow regarding Mortar ammunition and any further Allied surplus ammunition which may later become available.

The quantity now released is estimated to cover your immediate requirements.

Bulk may be broken at 501 B.A.D. and your representative should be instructed as to details of initial distribution to Territorial Commands.

3. Details as to natures and quantities are being sought but should be obtained direct by your representative from 9 B.L.U. in conjunction with the Depot Commander.

4. You are required to arrange for rail move and for safe custody during transit and should report in due course:-

(a) Breakdown of loads arranged to each Territorial Command.

(b) completion of delivery to Unit or Depot concerned.

(c) Remaining deficiencies by types against your estimated requirements for period ending 31 Dec 1947.

Reference your 13209/URA 864 of 11 February 1946, and further to our Q.131 of 15 February 1946, above subject.

1. The Commanding General,MTOUSA, has issued instructions to all U.S.Army Commanders in Italy directing that all U.S.Army contracts authorizing civilian battlefield salvage be cancelled effective 28 Feb 1946 and that no further contracts will be negotiated with civilian firms. Also, insofar as the U.S.Army is concerned, battlefield salvage contracts in the future will be the responsibility of the Italian War Ministry through MMIA, or the Italian Ministry of Transportation.

2. This cancellation of contracts includes the civilian firms mentioned in your letter, as requested by you, and also all other civilian firms who might be in possession of contracts.

3. You are therefore at liberty to proceed under Italian law in any manner desired by you against any civilian firm conducting battlefield salvage not under contract with the responsible Ministry of the Italian Government.

4. Reports of salvage of Allied materials and ammunition, as specified in paragraph IX of your letter, will be made to MMIA, and you will thereafter be advised regarding disposition.

14 February, 1946.

To:- Ministry of War.

1. The following instructions concerning the disposal of ammunition of Italian origin are forwarded for information and necessary action:

(1) The location and quantities of all ammunition of Italian origin situated in Italy will be made known to the Italian Government or, in the case of the provinces of Udine and Venezia Giulia, to the Allied Military Government concerned.

(2) The Italian Government or the Allied Military Government will make immediate arrangements to take over the ammunition and will be totally responsible for its safe custody until its final disposal. The Italian Government or the Allied Military Government concerned will assume the responsibility, within a time limit to be set by mutual agreement with the competent Allied Military Commander, for safeguarding such ammunition.

(3) In the interest of Internal security the Italian Government or the Allied Military Government concerned will be instructed to concentrate for particular guarding all ammunition of 20 mm calibre and below including mines, grenades, etc. They will be further instructed to place special guards on ammunition of a dangerous nature until its disposal. Commanders will satisfy themselves, when handing over, that such arrangements are in fact in hand. Such handover will only be at their discretion having regard to any operational directives to the contrary and to the maintenance of internal security.

(4) The Italian Government, or Allied Military Government concerned, will make necessary arrangements, and be totally responsible for the disposal of all ammunition of Italian origin whether by destruction, dumping or breaking down into component parts for use in the civil rehabilitation of the country. Products resulting from the breaking down processes will not be employed in the production of further armaments except as permitted by the Allied authorities. The Italian Government when making disposal will have regard to the requirements of the future Italian armed forces.

Reference your Q/37/17 of 28 Jan 46 and Q/37/15 of 30 Jan 46.

"Reference your AFHQ/5067E/Q(CE S) dated 24 Jan 46.

1. The statement that "Supply of Arms and Ammunition now that hostilities have ceased is not considered to constitute maintenance" is not understood. A separate communication is being addressed to your H.Q. seeking clarification on this point. The reorganisation of the Italian Army and CC.RR, and the active steps being taken to give the CC.RR units priority in re-equipment inevitably demand the supply of small arms ammunition.

2. Reserves of certain natures of small arms ammunition are dangerously low and it has been necessary to approve manufacture under authority GHQ ESD/81/3 of the 23 January 46 of the following:

9 mm Pistol	8,000,000
7.65 mm	500,000
10.35 mm	1,400,000
6.35 mm	1,100,000

3. It was understood by the War Ministry and by this H.Q. that arms and ammunition of Italian manufacture located in dumps of C.E.M. in the north of Italy would be released, after identification, to the Italian Army, under the terms of the AFHQ Directive of the 2 October 45. These dumps, however, are under the control of H.Q. 2 District, and pursuant to the policy explained in your letter under reference, 2 District refuse to grant permission for Italian ammunition to be withdrawn by the Italian Army, thus seriously hampering the War Ministry in their task of re-equipping units of the CC.RR and further reducing stocks of available ammunition.

4. In accordance with the last sentence of paragraph 3 of your letter quoted above, the immediate release is requested of the following ammunition to the Italian Army:

Serial No.	Location	Calibre	Quantity.
1	SOLBIATE OLONA	9 mm	8,000 rounds
2	SOLBIATE OLONA	8 mm	500,000 rounds
3	LEON BEAUX Factory Milan	7.65 mm	9,000 rounds"

1. The above copy of Q.125 of 5 Feb 46 to AFHQ is forwarded for your information.

2. Every effort is being made to secure for the Italian Army, possession of Italian Arms and ammunition wherever located. Meanwhile, it is necessary to obtain a separate release from GHQ for such items as are allocated and demanded. Demands will be initiated by the BLU concerned at the request of the local Territorial Command, and after confirmation by the War Ministry, will be transmitted by this H.Q. to G.H.Q.

SUBJECT: Captured Enemy Weapons and Ammunition 4213/A

Lists A & B

Reference GRO 999/45 and this H.Q. letter 4213 A/Q dated 4 Oct 45.

1. Notification has been received from the War Office that considerable quantities of captured enemy weapons and ammunition are still being taken into the UK by troops returning on leave or release.

2. The letter referred to above ordered the instruction of snap searches of personnel returning to the UK, but the serious man-power shortage, especially among C&F, makes it impossible to impose a really effective check in this way nor is it possible to institute effective control at the ports of disembarkation. The problem is a serious one which is causing considerable concern, especially when viewed in conjunction with the recent outbreak of serious crime in the UK.

3. Units will publish the relevant portions of the above mentioned GRO for display on notice boards, stressing the fact that retention of such weapons and ammunition renders the holder liable for trial by Court Martial and calling for the immediate surrender of any held.

4. In addition, OC units will take such further steps as they consider practicable to prevent the unauthorised retention of weapons and ammunition.
