Palermo, 6 Feb 46

All Territorial HQ.s

Ref 60/3200/M/Serv. dated 15 Dec 46.

1. The quantity of POL to be kept as reserve stock near the Petrol Points of Transport COYs, must as soon as possible be completed, and successively enlarged up to the following scale :

Kg.	25.000	Petrol
"	25.000	Diesel Oil
	5%	Lub.

This HQ., in order to hasten the completion of the reserve, has given the order , separately, to

- (a) assign a supplement of a quantity of P.O.L. to each Territorial HQ.;
(b) assign to each Territorial HQ the quantity of P.O.L. due for the month of Feb to the CC.RR. Mobile Battalions; the Battalions, following accords taken with CC.RR. HQs will not draw this P.O.L., as they have sufficient reserve from the quantity drawn in the month of January.

- (c) assign the necessary containers.

This order will be given, separately, to Infantry Divisions. With the increase of the POL reserve, and since it is neither opportune, nor safe to keep said reserve in drums, it will be necessary to use to the maximum capacity the small Petrol Pts which already are in use, and for which General Directorate of Artillery and Motorization has already requested a report, with his 29500/D.M. dated 19 Dec 45.

Reference to the above, we request that a concrete proposal be forwarded as soon as possible, and that necessary action be taken forthwith.

2. While POL reserve stock are being constituted at Administrative Transport Coys of Territorial HQ., we request that every unit possessing vehicles start making a depot, beginning this month and following the same instructions; this depot will be the equivalent of one full tank and two uncel, for each vehicle on charge. These depots must be considered as the normal administrative charge of each unit, and must not be touched. In the case that for exceptional reasons, and by order of the Territorial HQ. those depots should be partially used, they must be, as soon as possible, brought back to full capacity. Territorial HQs are requested to circulate all details, to keep the situation of said depots up to date, and to make, whenever necessary, inspections.
