Subject:- Fire Points in Central Storehouse.

To: Comando Scuole
Centrali militari. ✓

12, B.L.U. for the Italian
Central military Schools.

Ref : ORD/2/128

Phone: Rome 66319

January 24th 1946

1. Since you are in possession of Fire Fighting Equipment, I suggest that you make several Fire Points in your Central Storehouse, and the Accommodation Storehouse next to DADOS Stores.

2. Owing to the large stocks of Clothing in the Central Storehouse the risk of fire is very great. Therefore I advise you to erect four temporary Fire Points with buckets of water and sand or earth, Stirrup Pumps, and Shovels. These should be established at once, and will suffice until the Italian Fire Services can charge the Fire Extinguishers; refer you para 3 of letter AQ/40/5/823 of 4th January 1946.

for the
ITALIAN CENTRAL MILITARY SCHOOLS
(Tel: Rome 66349)

Ref: AQ/40/5/823

4 Jan. 45

To: H.Q.
Comando Scuola Centrali Militari.

1. With further reference to your letter 041/2537/air dated 17 Nov. 45, the following equipment has now been received :-

Pumps, fire, hand.	-	150
Extinguishers fire, 2-gallon	-	24
Foam with charge	-	-
Extinguishers, fire, 30 to 34	-	-
gallon inloor, with charge	-	4
Buckets, fire	-	500

2. Please arrange to collect this from the Italian Storehouse forthwith.

3. Contact should be made immediately with the Italian Fire Service in Rome (telephone 474555) for a member of the fire service to come to CASSANO to fill the extinguishers. It is particularly stressed that this work should only be undertaken by a person who knows how to fill these extinguishers.

4. Enclosed please find a copy of the fire report made in August last. The recommendations will now have to be modified in view of the changes which have taken place at Cassano.

5. Please forward to this H.Q. for information, a copy of all fire Orders, when issued.

SPECIAL FIRE INSPECTION REPORT.

UNIT VISITED: Italian Military Camp,
CESANO. R.A.A.C. Area.

To: A.D.A.F.S.,
A.F.H.Q.

GENERAL.

Situated at CESANO, approx 20 miles North of NOIN, this Camp occupies an Area of approx 150/200 acres in open country, and serves as a training establishment for the Italian Army. A British increment is attached, in an advisory capacity, but the Camp is essentially Italian, and at present, no general Fire Precautions have been carried out.

This Camp comprises, in effect, a small community which previously consisted of a series of factory buildings and domestic buildings (occupied by the workers) and separated by open ground. The factory was engaged upon the manufacture of chemicals, and all buildings, generally speaking, are of normal Italian type. Construction, composed principally of concrete, stone and brick, and from a constructional point of view, present no great fire risk. Some of these buildings are not at present being used by the Italian Army and in these, certain items of factory equipment are stored. Access to these buildings was not possible at the time of inspection.

Of the factory shops taken over, some are being used as mechanics schools, driving school, engineers' shops, etc., and likewise from an occupational standpoint no special risk is involved.

The domestic buildings, consist of blocks of flats and similar buildings, and are constructed similarly to the above, being well dispersed and presenting no immediate fire risk. These buildings are being utilised as Offices, Villages, Schools, etc., and occupation is normal.

No meet military needs small tented areas are to be found on the site, and in addition, various other brick buildings are used as D.I.D., Ordnance Stores, etc.

A Unit Petrol Point, satisfactorily situated in relation to the Camp, has been constructed, and a small ammunition stores is also contained. In this instance, ammunition is stored in three separate huts, each bunded with earth to its total height, well dispersed and guarded 24 hrs continuously.

FIRE RISK:

From an overall survey, it is considered that the fire risk is low, considering the construction and disposal of buildings, satisfactory siting of Petrol Point and Ammunition Stores and general layout of the Camp. There are, however, many precautions to be taken, and normal fire prevention measures to be carried out.

Area of approx 150/200 acres in open country, and serves as a training establishment for the Italian Army. A British increment is attached, in an advisory capacity, but the Camp is essentially Italian, and at present, no general fire precautions have been carried out.

This Camp comprises, in effect, a small community which previously consisted of a series of factory buildings and domestic buildings (occupied by the workers) and separated by open ground. The factory was engaged upon the manufacture of chemicals, and all buildings, generally speaking, are of normal Italian type. Construction, composed principally of concrete, stone and brick, and from a constructional point of view, present no great fire risk. Some of these buildings are not at present being used by the Italian Army and in these, certain items of factory equipment are stored. Access to these buildings was not possible at the time of inspection.

Of the factory shops taken over, some are being used as mechanics schools, driving school, engineers' shops, etc., and likewise from an occupational standpoint no special risk is involved.

The domestic buildings, consist of blocks of flats and similar buildings, and are constructed similarly to the above, being well dispersed and presenting no immediate fire risk. These buildings are being utilised as Offices, Bilets, Schools, etc., and occupation is normal.

No meet military needs small tented areas are to be found on the site, and in addition, various other brick buildings are used as D.I.D., Ordnance Stores, etc.

A Unit Petrol Point, satisfactorily situated in relation to the Camp, has been constructed, and a small ammunition stores is also contained. In this instance, ammunition is stored in three separate huts, each bonded with earth to its total height, well dispersed and guarded 24 hrs continuously.

FIRE RISK:

From an overall survey, it is considered that the fire risk is low, considering the construction and disposal of buildings, satisfactory siting of Petrol Point and Ammunition Stores and general layout of the Camp. There are, however, many precautions to be taken, and normal fire prevention measures to be carried out.

WATER SUPPLIES AND EQUIPMENT:

Water supplies in the Area are lacking, and a domestic supply is the only source of supply in the Camp, in some parts water has to be obtained from Water Points set up, and conveyed by transport. Fire equipment is non-existent, except in the buildings occupied by the British Liaison Unit, who have carried out all normal fire precautions in their Area. The Petrol Point is covered by containers of sand only, and the tented area and stores are also deficient of any type of fire fighting appliances. No means of raising the alarm on the possible outbreak of fire exist, and telephonic communication is the only link that could be resorted to, other than runners.

RECOMMENDATIONS:

To bring the Fire Prevention arrangements up to British Army standards, the following recommendations and suggestions are made :-

- (a) Fire Orders compiled in Italian, should be posted in all buildings, stores, schools, etc., and suitable Fire Notices installed at specific risks, i.e.

- 2 -

RECOMMENDATIONS (Contd).

- petrol point, Ammunition Stores, Ordnance Stores.
- (b) Fire Points and apparatus to be placed in all billets, offices, stores, etc., and equipment at Petrol Point and Stores Sheds.
- (c) A method of raising a Fire Alarm to be adapted
- (d) Improvement of water supplies for First Aid Fire Fighting purposes.
- (e) The employment of trained fire fighting personnel on permanent duty.

It is considered that a section of the Italian Civil Fire Brigade could satisfactorily carry out these suggestions if stationed in the Camp, for the following reasons :

- (i) Telephonic communication could be effected with a fire station from the majority of buildings, and so meet the need for a fire alarm, and immediate assistance.
- (ii) Water carrying appliances of the Fire Brigade would go a long way to meet the need for First Aid Water supplies.
- (iii) Personnel of the Fire Brigade could supervise the installation and maintenance of fire fighting equipment, and carry out fire prevention measures, which so far have been neglected, i.e. clearance of grass and combustible litter from tented areas, correct ~~stock~~ stacking of stores, and general fire consciousness.

A provisional estimate of First Aid Fire Fighting equipment is as follows :-

Pumps, fire, hand	-	150 (for general fire points)
Extinguishers, fire foam 2-gallon, with charges.	-	24 (for Cookhouses and AT yards)
Extinguishers, fire foam 50/34 gallon with charges	-	2 (for Petrol Point)
Extinguishers, fire soda acid 50/34 gall. with charges.	-	4 (for Ordnance Stores supplies)
Buckets, fire (or improvised containers).	-	500

This report is based on the requirements of a normal British Army Camp of the same capacity, and when recommendations made have been carried out, the Camp will not present an overall fire risk of high proportion.

R.T. BELL, W.O.I.
Fire Superintendent, 1578
615 (first class) Fire Brigade.

could determine why the following reasons:

- (i) Telephonic communication could be effected with a fire station from the majority of buildings, and so meet the need for a fire alarm, and immediate assistance.
- (ii) Water carrying appliances of the Fire Brigade would go a long way to meet the need for first aid water supplies.
- (iii) Personnel of the Fire Brigade could supervise the installation and maintenance of fire fighting equipment, and carry out fire prevention measures, which so far have been neglected, i.e. clearance of grass and combustible litter from tented areas, correct risk stacking of stores, and general fire consciousness.

A provisional estimate of first aid fire fighting equipment is as follows:-

Pumps, fire, hand	-	150 (for general fire points)
Extinguishers, fire foam 2-gallon, with charges.	-	20 (for Coalhouses and MF yards)
Extinguishers, fire foam 50/34 gallon with charges	-	2 (for petrol point)
Extinguishers, fire soda acid 50/34 gall. with charges.	-	4 (for Ordnance Stores supplies)
Buckets, fire (or improvised containers).	-	500

This report is based on the requirements of a normal British Army camp of the same capacity, and when recommendations made have been carried out, the camp will not present an overall fire risk of high proportion.

R.T. HALL, W.O.I.
Fire Superintendent, 1573
615 (first class) Fire Brigade.

ALL' F. BLU.

P.M. 92 CESANO

CESANO

Il Reparto, in data 25/6/945, con buono n. 695 prelevava, unitamente ad altro materiale alleato di armamento, n. 82 cinghie per fucile (AA I657 slings rifle web). Il prelevamento avveniva nel magazzino e transito di Cesano. Durante il prelevamento veniva distribuita erroneamente anche una serie di baionette con relative buffetterie.

Il giorno seguente il prelevamento, veniva dato l'ordine di ritirare le baionette e le cinghie relative: l'ordine ~~rimaneva~~ proveniente dal magazzino inglese veniva eseguito. Si restituiva quanto richiesto ed erroneamente anche le cinghie per fucili che tuttavia rimanevano in carico e trascritte sul buono di prelevamento. Nessun documento di versamento veniva rilasciato al Reparto che attualmente è sprovvisto di dette cinghie.

Dovendo il Reparto stabilire con esattezza il carico del materiale esistente, si prega codesto Comando riferire se sia possibile, o ritirare le cinghie per fucili che certamente risulteranno giacenti al magazzino del materiale alleato, o inviand un buono di versamento per regolare la posizione di detto materiale.

Capt Shortlase

'F' BRITISH LIAISON & TRAINING UNIT
R.T.C., I.C.F.
20 October 45

2/108

To: ALL OFFICERS.

It is the Commanders wish that the practice of officers giving cigarettes to their batmen shall cease.

This practice causes hardship in that, the non-smoking officers' batmen are considerably better off than the others, and as cigarettes can be sold at a high price in the black market, it could make a considerable difference in the income between one batman and another.

It should be borne in mind that they get an Italian free issue of 49 cigarettes per week.

Any spare cigarettes there may be will be shared out equally between all Italians who work for the British officers;

i.e. Cooks
Batmen
Mess servants
Mechanics
Drivers

i.e. the whole increment.

This will be organized centrally. It may be that certain individual Italians may get less cigarettes - but in future all will get the same and that is the fairest way.

Copy for information to:

H.Q., Home Despatch Command.
H.Q., Land Forces (C.M.A.G. (21A))

1. In view of the decrease in the number of personnel, both Officers and N.C.O.s, in the L.C.M. or T.L., due to release and M.A.T., and the extreme possibility that the L.C.M. will be unable to fill vacancies as they arise, some re-organisation of the present administrative organisation is essential.

RECOMMENDATIONS

1. The L.C.M. will meet at the first possible opportunity, with the object of deciding how best to utilize the available staff to ensure:
- (i) that correspondence and filing is maintained efficiently.
- (ii) that every member of the staff gets his proper share of free time and recreation facilities.

It is suggested that the present distinction between the Training Office and the Administrative Office should be abolished, although the present filing system may still have to be maintained, although the present application of regulations might well be dispensed with. It is also suggested that the present allocation of officers to the clerical staff should be considered, with a view to reducing the staff wasted in working from one office to another. That correspondence should be kept to the absolute minimum and as brief as possible. (In an established organization verbal directives are very often all that are necessary).

2/102

1. In view of the decrease in the number of personnel, both Officers and C.M., in the G.I. & M., due to retiree and H.M., and the extreme expediency that Higher Authority will be unable to fill vacancies resulting hence, some reorganization of the present Administrative organization is essential.

REMARKS:

G.I. & M., Major and Staff Captain will meet at the first possible opportunity, with the object of deciding how best to utilize the available staff to ensure:

- (a) That correspondence and filing is maintained efficiently.
- (b) That every member of the staff gets his proper share of free time and necessary facilities.

It is suggested that the present distinction between the Training Office and the Administrative Office should be abolished, although a separate filing system may still have to be maintained, although the present duplication of registering might well be dispensed with. It is also suggested that the present allocation of officers to the clerical staff should be considered, with a view to reducing the staff wanted in training from one officer to another.

That correspondence should be kept to the absolute minimum and as brief as possible. (In an established organization verbal directives are very often all that are necessary).

That a review of the returns and periodical reports should be made, so that higher authority may be approached with a view to cancelling those that have now become redundant.

PROPOSALS AND RECOMMENDATIONS.

Major M.L. Chance R.M. will be entirely responsible for the re-organization of the Administrative set-up in Bangalore and Madras. He will consider all the points raised in the preceding paragraph and will endeavour to ensure that there is no duplication. He will consider whether there is any necessity to maintain separate R.M., R.M. and Schools' Offices and whether greater efficiency, with limited personnel available, will not be maintained by a combined office.

Major Chance has complete authority to take such steps as he thinks fit to maintain the two main objectives, i.e. efficiency and adequate freedom to the staff.

All correspondence on Administrative matters, as opposed to Technical Training matters, will be issued over the signature of Major Chance, although G.I. & M., S.O.S.S. and the acting G.I. & M. will continue to deal with matters relating strictly to training.

October 8th 1945.

Reference your 07/3564/S/Comm di Prot, dated 8th October 1945.

1. Although a reply to my letter of 26th Sept 1945 marked URGENT, was requested by telephone from this office on 2nd October '45, your answer dated 8th October has only just arrived.
2. The information you give is not a correct answer to my letter.
3. Para 6 of your letter states you have 2000 soldiers, belonging to this Centre, away on leave, or in hospital, etc, who need 8000 blankets (4 per man). But I assume they remained at one time at this Centre, when they were issued with 4000 blankets, (2 per man Summer Scale) Therefore 4000 blankets should have been handed in to the respective clothing stores of the Regiments, before the men left for leave or hospital. If they were allowed to take them away then they should bring them back, and on arrival here, should only be issued with 2 blankets per man.
4. Para 1 of your letter includes a figure 2000 Comfort Blankets (I take it you mean Cotton Comforters) for your information one of these Comforters represents 2 British Blankets.
5. You have really asked for 6000 more blankets than necessary.

For your information the necessary provision has already been made for ~~these~~ blankets, some of which have already arrived and the remainder are expected shortly.

Ufficio Serv.--Sez. Comm/to

N° 01/3564/S/comm.di prot. Cesanodi Roma-P.M.92 li, 8/10/45
OGGETTO: Esistenza coperte.=

AL "F" BRITISH LIAISON & TRAINING UNIT RTC ICF SEDE

In riferimento al foglio ORD/2/98 del 26/9/45 si comunica:

1) l'esistenza di coperte alla data del 30 Settembre c.a. presso i reparti dipendenti era la seguente;

- coperte alleate(di vario tipo)	n° 19219
- coperte conforter	" 2000
- coperte casermaggio piccole italiane	" 1632
- coperte campo italiane	" 3465

n° 26316

2) dal 1°ottobre ad oggi i milizari trasferiti a reparti ITI-ITI hanno portato al seguito n° 1100 coperte; pertanto l'esistenza attuale é di n° 26216;

3) la forza attualmente presente al Centro é di circa 13000 uomini e quindi presentemente vi sono in distribuzione in media due coperte per uomo, considerato che una coperta conforter equivale a due normali;

4) in questi giorni sono state ritirate dal Deposito V.E. di Roma n° 8'000 coperte da campo italiane (non comprese nei quantitativi sopra segnalati) che, date le impellenti necessità, il Ministero della Guerra ha concesso a titolo di prestito e che occorrerà restituire non appena pervenuta quelle alleate già richieste a codesto Ufficio;

5) per l'avvenuto abbassamento di temperatura ed in considerazione che molti militari si trovano attendati od in locali privi di infissi, si rende necessaria che quanto prima tutti i militari del Centro abbiano in distribuzione, come prescritto, n° 4 coperte ognuno;

In riferimento al foglio (MB/2/30 del 20/3/4) di cui sopra

1) l'esistenza di coperte alla data del 30 Settembre c.a. presso i reparti dipendenti era la seguente:

- coperte alleate (di vario tipo)	n° 19219
- coperte conforter	" 2000
- coperte casermaggio piccole italiane	" 1632
- coperte campo italiane	" 3465

2) dal 1° ottobre ad oggi i milizari trasferiti a reparti ITI-ITI hanno portato al seguito n° 1100 coperte; pertanto l'esistenza attuale è di n° 25216;

3) la forza attualmente presente al Centro è di circa 13000 uomini e quindi presentemente vi sono in distribuzione in media due coperte per uomo, considerato che una coperta conforter equivale a due normali;

4) in questi giorni sono state ritirate dal Deposito V.E. di Roma n° 8'000 coperte da campo italiane (non comprese nei quantitativi sopra segnalati) che, date le impellenti necessità, il Ministero della Guerra ha concesso a titolo di prestito e che occorrerà restituire non appena pervenute quelle alleate già richieste a codesto Ufficio;

5) per l'avvenuto abbassamento di temperatura ed in considerazione che molti militari si trovano attendati od in locali privi di infissi, si rende necessaria che quanto prima tutti i militari del Centro abbiano in distribuzione, come prescritto, n° 4 coperte ognuno;

6) per sopperire alle suddette necessità occorrono pertanto i seguenti quantitativi di coperte:

- n° 26'000 per dare la terza e quarta coperte a tutti i militari attualmente in sede;
- n° 8'000 per dare quattro coperte a circa 2'000 militari in forza a questo Centro ma attualmente assenti (licenza, ospedale, ecc.);
- n° 12'000 per dare quattro coperte ai militari di cui si prevede prossimo l'arrivo (circa 3'000) +
<u>n° 46'000</u> in totale.

Per quanto sopra segnalato, pregasi compiacersi sollecitare l'invio a questo Centro del suddetto quantitativo di coperte. =

Ref: AQ/8/227

16 Sept. 45.

To: All Officers.

'F' B.L. & T.U.

H.Q., RTC ICF.

1. The basis of all discipline is the most strict attention by all ranks, and in particular by officers, to Standing Orders.
2. The Carabinieri and Regimental Police have the duty, which is by no means an easy one, of ensuring the execution of, and strict compliance with, orders relating to the control of traffic.
3. I most earnestly request all officers to make it a point of honour to comply instantly with any directions or instructions given by Military Policemen on duty. Such matters as halting at Posti di Blocco, showing Work Tickets and adhering to speed limits, must never be neglected.
4. Further, I rely on all officers of whatever nationality, to exercise their authority when infringements of traffic regulations occur in their presence.
5. We are endeavouring to rebuild the Italian Army. Let us, by our example and strong sense of discipline, set a standard to all the soldiers whom we have the honour to command or be associated with.

Maj Cole
CONFIDENTIAL.

'F' British Liaison & Training Unit
R.T.C., I.C.F.

30 August 45.

To: All Officers,
'F' E.L. & T.U.

1. The Commander has noticed a tendency for officers to substitute a colleague in the role of Duty Officer without reference to the D.A.A. & Q.M.G. It is pointed out that while there is no objection to this practice, the DAA & QMG will, at all times, be notified of the substitution.

2. From the 31st August to the 10th September 1945, inclusive, the Duty Officer of the day will be present in the office of the D.A.A. & Q.M.G. every morning between 07.00 and 08.30 hours. The Commander feels that telephonic communication to this Centre from Northern Italy will be easiest during the above mentioned hours. The above inclusive dates correspond with the Commander's tour of the Gruppi.

September 12th 1945.

Will you please arrange for storeman collecting stores tomorrow (Thursday) to call at RAAC. Here, DADME (Capt Sorrel) will give him a BLR certificate for 5 Outer Covers and 5 Inner tubes for a Jeep.

Copy of BLR will be taken with attached indent to ADOS who will approve indent and tyres with tubes can then be collected.

There will be no difficulty as provisional arrangements have already been made by DAA & QMG.

1. Reference report by 615 (First Class) Fire Brigade (Ref: 157/111/20) dated 1 August 45 on visit to this Centre.

2. The above quoted report advises that a section of the Italian Civil Fire Brigade should be stationed at this Camp in order to implement the suggestions made in the report. May arrangements please be made for the posting of a section of the Italian Civil Fire Brigade to this Centre at the earliest possible opportunity.

3. The report also recommends that additional Fire Fighting Equipment should be held by this Centre, i.e. :-

Pumps, Fire, Hand Extinguishers,	150 (For general Fire Points)
Fire Foam 2 gallon, with charges.	24 (For cookhouses and M.T.Yards)
Extinguishers, Fire Foam 30/34 gal. with charges.	2 (For Petrol Point)
Extinguishers, Fire Soda Acid 30/34 gal. with charges.	4 (For Ordnance Stores supplies)
Buckets, Fire (or improvised containers.	500

May authority please be granted for this equipment to be drawn through Ordnance channels.

SPECIAL FIRE INSPECTION REPORT.

To: A.D.A.F.S.
A.F.H.S.

UNIT VISITED: Italian Military Camp,
CESANO. R.A.4.C. AREA

GENERAL

Situated at CESANO, approx 20 miles north of ROME, this Camp occupies an Area of approx 150/200 acres in open country, and serves as a training establishment for the Italian Army. A British inoement is attached, in an advisory capacity, but the Camp is essentially Italian, and at present, no general Fire Precautions have been carried out.

This Camp comprises, in effect, a small community which previously consisted of a series of factory buildings and domestic buildings (occupied by the workers) and separated by open ground. The factory was engaged upon the manufacture of chemicals and all buildings, generally speaking, are of normal Italian type. Construction, composed principally of concrete, stone and brick, and from a constructional point of view, present no great fire risk. Some of these buildings are not at present being used by the Italian Army, and in these certain items of factory equipment are stored. Access to these buildings was not possible at the time of inspection.

Of the factory shops taken over, some are being used as mechanics schools, driving school, engineers' shops etc., and likewise from an occupational standpoint no special risk is involved.

The domestic dwellings, consist of blocks of flats and similar buildings and are constructed similarly to the above, being well dispersed, and presenting no immediate fire risk. These buildings are being utilised as offices, billets, schools, etc., and occupation is normal.

To meet military needs, small tented areas are to be found on the site, and in addition various other brick buildings are used as D.I.D., Ordnance stores, etc.

A unit Petrol Point, satisfactorily situated in relation to the Camp, has been constructed and a small ammunition stores is also contained. In this instance, ammunition is stored in three separate huts, each bunded with earth to its total height, well dispersed and guarded 24 hrs continuously.

FIRE RISK.

From an overall survey, it is considered that the fire risk is normal, considering the construction and disposal of buildings, satisfactory siting of Petrol Point and Ammunition stores and general layout of the Camp.

manufacture of chemicals and all buildings, generally speaking, are of normal Italian type. Construction, composed principally of concrete, stone and brick, and from a constructional point of view, present no great fire risk. Some of these buildings are not at present being used by the Italian Army, and in these certain items of factory equipment are stored. Access to these buildings was not possible at the time of inspection.

Of the factory shops taken over, some are being used as mechanics schools, driving school, engineers' shops etc., and likewise from an occupational standpoint no special risk is involved.

The domestic dwellings, consist of blocks of flats and similar buildings and are constructed similarly to the above, being well dispersed, and presenting no immediate fire risk. These buildings are being utilised as offices, billets, schools, etc., and occupation is normal.

To meet military needs, small tented areas are to be found on the site, and in addition various other brick buildings are used as D.I.D., Ordnance stores, etc.

A unit Petrol Point, satisfactorily situated in relation to the Camp, has been constructed and a small ammunition stores is also contained. In this instance, ammunition is stored in three separate huts, each bunded with earth to its total height, well dispersed and guarded 24 hrs continuously.

FIRE RISK.

From an overall survey, it is considered that the fire risk is normal, considering the construction and disposal of buildings, satisfactory siting of Petrol Point and Ammunition stores and general lay-out of the Camp. There are, however, many precautions to be taken, and normal fire prevention measures to be carried out.

WATER SUPPLIES AND EQUIPMENT.

Water supplies in the area are lacking, and a domestic supply is the only source of supply in the Camp, in some parts, water has to be obtained from water points set up, and conveyed by transport. Fire equipment is non-existent, except in the buildings occupied by the British Liaison Unit, who have carried out all normal fire precautions in their area. The Petrol Point is covered by containers of sand only, and the tented area and stores are also deficient of any fire fighting equipment. No means of raising the alarm on the possible outbreak of fire exist, and telephonic communication is the only link that could be resorted to, other than runners.

RECOMMENDATIONS.

To bring the Fire Preventive arrangements up to British Army standards, the following recommendations and suggestions are made:

- (a) Fire Orders compiled in Italian, should be posted in all buildings, stores, schools, etc., and suitable fire fighting equipment placed at specific risks, i.e. petrol point, Ammunition stor

- (b) Fire Points and apparatus to be placed in all billets, offices, stores, etc. and equipment at Petrol Point and stores sheds.
- (c) A method of raising a Fire Alarm to be adopted.
- (d) Improvement of Water supplies for First Aid Fire Fighting purposes.
- (e) The employment of trained fire fighting personnel on permanent duty.

It is considered that a section of the Italian Civil Fire Brigade could satisfactorily carry out these suggestions if stationed in the Camp, for the following reasons:

- (i) Telephonic communication could be effected with a fire station from the majority of buildings, and so meet the need for a Fire Alarm, and immediate assistance.
- (ii) Water carrying appliances of the Fire Brigade would go a long way to meet the need for First Aid Water supplies.
- (iii) Personnel of the Fire Brigade could supervise the installation and maintenance of Fire Fighting equipment, and carry out Fire Preventive measures, which so far have been neglected, i.e. clearance of grass and combustible litter from tented areas, correct stacking of stores, and general "fire consciousness".

A provisional estimate of First Aid Fire Fighting Equipment is as follows :-

Pumps, Fire, Hand Extinguishers, Fire Foam 2 gallon, with charges	} 150 (for General Fire Points) 24 (for cookhouses and LT yards)
Extinguishers, fire foam 30/34 gallon, with charges.	2 (for Petrol Point)
Extinguishers, fire soda acid 30/34 gall. with charges.	4 (for Ordnance Stores supplies)
Buckets, fire (or improvised containers).	500

This report is based on the requirements of a normal British Army Camp of the same capacity, and when recommendations made have been carried out, the Camp will not present an overall fire risk of high proportion.

R.T. BELL. WO.I

To: All Officers
(P) D.L. & D.U.

Appended, for your information, are particulars of the various forms of punishment in use in the Italian army.

ARRESTS.

Arrests may be imposed on Officers and Warrant Officers. There are two degrees - Close Arrest (A.R.) and Simple Arrest (A.S.)

Defaulters punished with Simple Arrest must remain indoors during the time they are not on duty.

Defaulters under close arrest lose their Field Allowances and Special Ration Allowances which they normally obtain. Defaulters under simple arrest lose only half of these allowances.

PUNISHMENT ROOM.

This form of punishment can be awarded to Sergeant Majors and Sergeants, and there are two degrees - Close Punishment Room and Simple Punishment Room, (CR or SS).

These defaulters are subject to the same restrictions of liberty as those under Close or Simple Arrest and the same deduction of Field and Special Ration allowances.

PUNISHMENT PRISON.

This punishment is awarded to Corporals and Other Ranks and is distinguished by "Simple Punishment Prison" (C.P.S.) and "Close Punishment Prison" (C.P.R.).

Soldiers so punished must remain confined to the prison during the night and during the time they are not on duty.

They are also subject to the same loss of allowances etc. as for the other

DAA & QMG, "F" BL & TU.

July 26th 1945.

Reference Stock Return dated 25th July 1945, Shed No 3.

Item Flanellina, Flanellette - Stock reported
NIL.

1. This is inaccurate. Several bales were transferred from Transit Shed to Shed 3 only recently.
2. It was only two days ago I pointed out the existence of 10 gallons of Oil MHB in Shed 3, not reported as being in stock.
3. Stock reports are useless unless accurate. May I suggest that a much stricter supervision is required by the Officer ^{1/c} Central Storehouse. Time and again I have pointed out errors ¹⁵²⁸ which have been apparent to me after merely a casual look in the sheds, and which might well have been rectified had the officer concerned been a little more active in his duties.
4. I hope you will appreciate that I am bound to make criticisms of this nature while my office remains the liaison whereby this centre receives Ordnance Stores. In this instance by showing a NIL stock of flanellette it would seem perfectly justifiable to make a considerable demand for the Centre, while in actual fact there is enough here to last several months.

Ref. enclosed MEMORANDUM on TERMINATION of LOCAL CONTRACTS - following is an extract from AFHQ letter DOS/46/5 of 16 Jun:-

2. In view of the changed situation O.O.'s will keep their contractual commitments under review in the light of stocks and of future requirements. In the case of any contracts for stores, etc. which are in excess of requirements, steps will be taken to terminate on the general lines indicated in the War Office memorandum and in consultation with Financial Adviser.

3. The clause giving the War Department power to terminate contracts, as necessary, will be included in all future transactions."

4 Brev for Dader

Appendix to 3756/2 (Maint)
Dated 4 Jun 45

Cts/Fisc/3980(D.C.1).

MEMORANDUM ON TERMINATION OF LOCAL CONTRACTS (OTHER THAN FOR
FORNS SERVICES).

Note: This memorandum applies to the termination or curtailment of locally placed contracts (except those for Forns Services but including those for Forns Stores) due to changes in requirements arising out of developments in the war situation (e.g. and of European hostilities). It is not intended to convey any authority for termination of a contract where the service or supply is to continue.

1. When instructions are issued for the closing down or curtailment of services or the reduction of stock holdings which involve current local contracts, all relevant existing contracts, and all orders actually placed under running contracts, should be carefully reviewed.
2. Where it is clear that services or deliveries beyond a certain date or quantity will not be required, and that steps must therefore be taken to terminate prematurely current contracts or orders, the procedure will be as follows:-
 3. Local Contracts containing a Break Clause. If the local contract contains a Break Clause, notice of termination will be given as provided in the clause. The position of the contract will be ascertained and further directions will (in the light of any specific instructions issued by G.O.) be given to the contractor as required by the clause. Claims will be dealt with and settled locally except that any claim will be referred to the War Office before settlement with a recommendation supported by Command Secretary or F.S.

if (i) it exceeds £2,500

or (ii) the claim or any portion of it is made under any "hardship" provision included in the break clause used in the contract. Any claim for continuing overhead expenses will be regarded as a "hardship" claim for this purpose.

or (iii) any question of debt or principle is involved unless the Command Secretary or Financial Adviser authorises local settlement.

ment of services or the requirement of a Break Clause. If the local contract contains a Break Clause, notice of termination will be given as provided in the clause. The position of the contract will be ascertained and further directions will (in the light of any specific instructions issued by A.O.) be given to the contractor as required by the clause. Claims will be dealt with and settled locally except that any claim will be referred to the War Office before settlement with a recommendation supported by Command Secretary or P.A.

2. Where it is clear that services or deliveries beyond a certain date or quantity will not be required, and that steps must therefore be taken to terminate prematurely current contracts or orders, the procedure will be as follows:-

3. Local Contracts containing a Break Clause. If the local contract contains a Break Clause, notice of termination will be given as provided in the clause. The position of the contract will be ascertained and further directions will (in the light of any specific instructions issued by A.O.) be given to the contractor as required by the clause. Claims will be dealt with and settled locally except that any claim will be referred to the War Office before settlement with a recommendation supported by Command Secretary or P.A.

- if (i) it exceeds £2,500
- or (ii) the claim or any portion of it is made under any "hardship" provision included in the Break clause used in the contract. Any claim for continuing overhead expenses will be regarded as a "hardship" claim for this purpose.
- or (iii) any question of debt or principle is involved unless the Command Secretary or Financial adviser authorises local settlement.

1515

This paragraph applies to all contracts (except those for Works Services) containing a Break Clause which were placed locally.

4. Running contracts placed locally which are no longer required should be terminated by due notice under the termination clause. If the Running Contract is of a type under which the Department is bound to order only such quantities or services as may be required, but contains no termination clause, the contractor should be informed that owing to the change in the military situation no further requirements are likely to arise under the contract; such contracts will then lapse automatically.

No question of compensation for quantities undelivered or services not performed should normally arise in these cases. If such claims do arise they should be referred to the War Office.

If a Running Contract which it is desired to terminate was placed by War Office or Ministry of Supply the matter should be reported to the Department concerned for action.

- 2 -

4. (Contd)

It should be possible to terminate any gas, water and electricity agreements that need terminating without going outside their terms. Either the requisite few hours notice under the Company's standard terms or the notice laid down in the larger agreements should be given. In Eastern, Northern, Western and Southern Command, proposals to terminate any of these agreements made at the War Office should be reported to the Command Secretary instead of to the War Office.

5. Where the local contract contains no Break Clause or provision for early termination and cannot be dealt with by allowing it to lapse as in paragraph 4 or where it is desired to cancel or amend a firm order already given under a local running contract, the contractor should at once be informed of the position and invited to fall in with the Department's wishes. Subsequent action will be as follows:-

(a) If the contractor agrees to curtail deliveries or discontinues the service as required by the Department without payment in respect of quantities not delivered or services not rendered, action may be taken locally to amend the contract (or order under a running contract) accordingly. Such cases in Commands at Home should then be reported to the War Office.

(b) On the other hand, if the contractor indicates that he intends to ask for compensation in respect of deliveries or services not required he should be asked to state at once the estimated probable amount of such claim, an indication of the heads under which the claim will be made e.g. labour and materials on unfinished goods, materials purchased and not used etc. and (for stores or supplies) the position as regards degree of completion of the remaining quantities.

(c) In Home Commands cases under (b) will be reported as soon as possible to the War Office (D.I.C.) with a recommendation as to whether contractor should be instructed to cease work at once, to complete production of certain quantities or to a certain stage, or to complete the whole contract. (Such reference will not of course be necessary before arranging to stop any supply or service where definite War Office instructions to do so, irrespective of stage of completion, have already been issued).

Factors in making this recommendation will be e.g. the stage reached in the manufacture of the articles not required, the probable value of contractor's reasonable claim for labour and materials, etc. as compared with the contract price, the feasibility of accepting delivery for storage, the possibility of future use and whether the articles

- 2 -

4. (Contd)

It should be possible to terminate any gas, water and electricity agreements that need terminating without going outside their terms. Either the requisite few hours notice under the Company's standard terms or the notice laid down in the larger agreements should be given. In Eastern, Northern, Western and Southern Command, proposals to terminate any of these agreements made at the War Office should be reported to the Command Secretary instead of to the War Office.

5. Where the local contract contains no Break Clause or provision for early termination and cannot be dealt with by allowing it to lapse as in paragraph 4 or where it is desired to cancel or amend a firm order already given under a local running contract, the contractor should at once be informed of the position and invited to fall in with the Department's wishes. Subsequent action will be as follows:-

(a) If the contractor agrees to curtail deliveries or discontinues the service as required by the Department without payment in respect of quantities not delivered or services not rendered, action may be taken locally to amend the contract (or order under a running contract) accordingly. Such cases in Commands at Home should then be reported to the War Office.

(b) On the other hand, if the contractor indicates that he intends to ask for compensation in respect of deliveries or services not required he should be asked to state at once the estimated probable amount of such claim, an indication of the heads under which the claim will be made e.g. labour and materials on unfinished goods, materials purchased and not used etc. and (for stores or supplies) the position as regards degree of completion of the remaining quantities.

(c) In Home Commands cases under (b) will be reported as soon as possible to the War Office (D.I.O.) with a recommendation as to whether contractor should be instructed to cease work at once, to complete production of certain quantities or to a certain stage, or to complete the whole contract. (Such reference will not of course be necessary before arranging to stop any supply or service where definite War Office instructions to do so, irrespective of stage of completion, have already been issued).

Factors in making this recommendation will be e.g. the stage reached in the manufacture of the articles not required, the probable value of contractor's reasonable claim for labour and materials, etc. as compared with the contract price, the feasibility of accepting delivery for storage, the possibility of future use and whether the articles

(a) If the contractor agrees to curtail deliveries or discontinues the service as required by the Department without payment in respect of quantities not delivered or services not rendered, action may be taken locally to amend the contract (or order under a running contract) accordingly. Such cases in Commands at Home should then be reported to the War Office.

(b) On the other hand, if the contractor indicates that he intends to ask for compensation in respect of deliveries or services not required he should be asked to state at once the estimated probable amount of such claim, an indication of the heads under which the claim will be made e.g. labour and materials on unfinished goods, materials purchased and not used etc. and (for stores or supplies) the position as regards degree of completion of the remaining quantities.

(c) In Home Commands cases under (b) will be reported as soon as possible to the War Office (D.A.C.) with a recommendation as to whether contractor should be instructed to cease work at once, to complete production of certain quantities or to a certain stage, or to complete the whole contract. (Such reference will not of course be necessary before arranging to stop any supply or service where definite War Office instructions to do so, irrespective of stage of completion, have already been issued).

Factors in making this recommendation will be e.g. the stage reached in the manufacture of the articles not required, the probable value of contractor's reasonable claim for labour and materials, etc. as compared with the contract price, the feasibility of accepting delivery for storage, the possibility of future use and whether the articles would command a good market if they eventually became surplus, and the availability of alternative work.

In Commands abroad (unless specific instructions have been received from the War Office) decision on these considerations will be taken locally with the concurrence of the Command Secretary or Financial Adviser.

(d) When the decision under (b) and (c) above is to break the contract, the contractor will be pressed to submit early his final claim for compensation in respect of articles not delivered or services not rendered. Such claims will be examined locally and dealt with as follows:

(i) where the compensation payment does not exceed £500 settlement will be made locally with the agreement of Command Secretary or Financial Adviser but questions of principle and doubtful cases should be referred to the War Office unless the Command Secretary or Financial Adviser authorises local settlement.

- 3 -

5. (d) (ii) In other cases a recommendation supported by Command Secretary or Financial Advisor will be forwarded with the relevant documents to the War Office for decision.

Claims for loss of profit on the cancelled portions of contracts should be discouraged.

6. Termination of contracts or orders and subsequent terms of settlement may leave contractor in possession of controlled materials allotted to him for the contract. In such cases, unless specific instructions have been received from War Office or from a Control to the contrary, contractor should be informed that he must obtain the agreement of the controlling authority to the retention of such materials. At the same time the controlling authority should be informed of the termination and of the approximate amount of unused controlled materials in contractor's hands. Where materials have been issued to contractor by the Department either free or on payment instructions will be issued locally to contractor as to the disposal of any unused portion of such materials.

7. All terminations of contract at home, whether they are to be reported to War Office under the foregoing paragraphs or not, if they are likely to involve a reduction in contractor's labour of 1,000 hands in all or 50 hands in any one firm, will be reported to the War Office (D.A.C.) as soon as a decision to terminate is reached, with an estimate of the labour involved.

8. If it is desired to break or terminate a contract for e.g. stores, supplies or services placed by War Office or Ministry of Supply the facts will be reported for action to the Department which placed the contract, both for contracts which include and do not include a Break Clause. Special instructions have however been issued by Ministry of Supply to Demanding Officers in respect of the operation of the break clause in certain Running Contracts placed by that Department.

9. If it is desired to break or terminate a contract placed by a Command Secretary he should be informed and all subsequent action will be taken either by him or in accordance with his directions.

10. In no case should notice of termination or break be given until a firm decision has been reached that this course must be taken. ~~Provision~~

At the same time the controlling authority should be informed of the termination and of the approximate amount of unused controlled materials in contractors hands. Where materials have been issued to contractor by the Department either free or on payment instructions will be issued locally to contractor as to the disposal of any unused portion of such materials.

7. All terminations of contract at home, whether they are to be reported to War Office under the foregoing paragraphs or not, if they are likely to involve a reduction in contractor's labour of 1,000 hands in all or 50 hands in any one firm, will be reported to the War Office (D.A.C.) as soon as a decision to terminate is reached, with an estimate of the labour involved.

8. If it is desired to break or terminate a contract for e.g. stores, supplies or services placed by War Office or Ministry of Supply the facts will be reported for action to the Department which placed the contract, both for contracts which include and do not include a Break Clause. Special instructions have however been issued by Ministry of Supply to Demanding Officers in respect of the operation of the break clause in certain Running Contracts placed by that Department.

9. If it is desired to break or terminate a contract placed by a Command Secretary he should be informed and all subsequent action will be taken either by him or in accordance with his directions.

10. In no case should notice of termination or break be given until a firm decision has been reached that this course must be taken. Where such notice has been given the contract cannot be re-instituted. Where there is doubt the matter should be reported to the War Office before action is taken.

SUBJECT: Use of W.D. Transport - Civilians.

SUBJECT: Use of WD Transport - Civilians.

1. GRC 345/45 specifically forbids the conveyance of Civilians in WD Transport except in certain clearly defined circumstances. This prohibition includes the use of WD Transport to convey civilian partners to dances.

2. I am prepared to admit relaxation of this order subject to strict control.

3. In the case of units Commanded by an Officer not below rank of Major, Commanding Officers may permit the conveyance of civilian lady partners on condition that :-

(a) Permission is only given for specific dances properly organized under unit arrangements.

(b) Authority must be signed by the Commanding Officer personally and must specify vehicles to be used, numbers of civilians to be carried, and precise route by which travel is authorized. Such an authority must be in possession of each driver.

(c) All civilians carried must sign a certificate absolving the WD from any claim that might result if an accident should occur.

4. In the case of units Commanded by officers below the rank of Major, application will be made to this Headquarters giving particulars as specified in para.3 (a) and (b) and certificates as in 3 (c) must be obtained.

5. In the case of a unit where the Commanding Officer is a Major or of higher rank, a return will be forwarded to this Headquarters on Saturday of each week giving the following information in respect of each journey, in respect of any one vehicle during the previous 7 days.

1512

- (a) Date.
- (b) Purpose for which transport was authorized.
- (c) Number of Civilians carried.
- (d) Time of journey.
- (e) Total Mileage.

6. Any abuse of this concession will result in its immediate withdrawal.

Report overleaf.....

H E R O I C

TO:-

The Officer Commanding
230 Troop Coy.

Sir,

Ref. to attached instructions I have to report that I visited the place where the accident took place and found that the road at that point is bad with a broken surface stretching across the road. On the right side (going to Usenno) the broken surface is approx 4 ft in width with holes from 3 inches to 6 inches in depth. On the left hand side the damaged road extends in width to 10 ft with larger holes. The mound of rubble is approx 18 inches high and situated about 6 ft from the holes on the right hand side.

Yours,

7 May 45

(Sgd) J.N. Hammond Cpl
230 Troop Coy

Statement by:-

Mr SOMMAGAL ROBERTO, 1500 Transport Platoon
FUSCO Division

who states:-

On the 24th of Apr 45, I went to Rome at about 1400 hrs on a duty trip. There were two Italians and two British soldiers on board, all of them on the strength of the Clothing Store, 1500 Coy. These soldiers were detailed to collect tyres in Rome at the General Stores.

On my way back, at No 1 km milestone of the Braschi road, and exactly 300 m beyond the level crossing on the Rome-Viterbo railway, the steering rod cracked, without any undue pressure or brisk movement on the steering wheel, causing me to lose control of the vehicle. At that moment I was travelling in third gear at a speed of approx 20 m.p.h. The vehicle went off the road to the right and overturned after going for some metres up the bank, which at that point is along the roadway. The vehicle overturned twice, then stopped upside down. Some of the soldiers on board hurt themselves seriously, as I and one of the two British soldiers were not hurt. The other two in the

(82d) For brevity.

Ref. Traffic Accident, dated 24 Apr 42

Statement by:-

2923237 Pte GALLAGHER J., RACQ. 'F' Br Liaison Unit
=====

Who states:-

On 24 Apr 45 at about 1400 hrs S/Sgt Stockley, DADOS Stores, ordered me to go to Rome to collect some stores and to pick two Italian storemen and to take them to Rome with a 3-ton Bedford with an Italian driver. I don't know the name of the Italian, but I know them well by sight, I work with them ever day.

At about 1415 hrs the three Italians and myself started off; just before we started Spr Brownfoot asked to go to Rome on the truck. I told him "Yes", and he got on the back. The drive and I were alone in the front. I dropped Spr Brownfoot off at Rome and went and collected some tyres and on the way back I picked him up, he got in the back again with the two Italian storemen, the driver and I were alone in the front. We started back then and we came through La Storta and across the railway crossing. About half a km past the railway crossing there was a bump right across the road. To go over the bump the driver cut in towards the grass verge on his right to avoid the worst of the bump. As we got to the other side of the bump there was a heap of rubble and the right hand front wheel went over the rubble. As we did so the lorry swerved and the driver didn't seem to be able to pull the wheels back round again. We hit a tree and the lorry ran up the side of the bank on the right hand side and turned over right upside down, with the front part in the ditch and the rear lying in the middle of the road. There was nothing else on the road at the time of the accident. I scrambled out and found Spr Brownfoot lying beside the lorry with his head out. The lorry was without cover or superstructure. The two Italian storemen - one was lying down at the side of the road and the other was sitting on the bank, holding his arm. Just then a civilian lorry pulled up and took Spr Brownfoot and the Italian who had been lying down, to La Storta. I accompanied them to La Storta, where I stopped a British 15 cwt. when the 15 cwt stopped, an officer got out, he was a Captain in the RAMC. He told us to put the two injured men into the back of his truck, and he told us that he would take them to hospital in Rome.

I picked him up, he got in the truck again with the other storermen, the driver and I were alone in the front. We started back then and we came through La Storta and across the railway crossing. About half a km past the railway crossing there was a bump right across the road. To go over the bump the driver cut in towards the grass verge on his right to avoid the worst of the bump. As we got to the other side of the bump there was a heap of rubble and the right hand front wheel went over the rubble. As we did so the lorry swerved and the driver didn't seem to be able to pull the wheels back round again. We hit a tree and the lorry ran up the side of the bank on the right hand side and turned over right up-side down, with the front part in the ditch and the rear lying in the middle of the road. There was nothing else on the road at the time of the accident. I scrambled out and found Spr Brownfoot lying beside the lorry with his head out. The lorry was without cover or superstructure. The two Italian storermen - one was lying down at the side of the road and the other was sitting on the bank, holding his arm. Just then a civilian lorry pulled up and took Spr Brownfoot and the Italian who had been lying down, to La Storta. I accompanied them to La Storta, where I stopped a British 15 cwt. When the 15 cwt stopped, an officer got out, he was a Captain in the WMEC. He told us to put the two injured men into the back of his truck, and he told us that he would take them to hospital in Rome. I walked back to the scene of the accident and arrived there about 20 minutes after it had happened. By that time the Italian who had hurt his arm, had made his way back to camp. About half an hour later S/Sgt Stockley came along in a truck and took me back to camp. The Italian driver stopped at a wagon to await the arrival of the breakdown lorry. I what had happened to S/Cdr Saunders of my Unit who truck with S/Sgt Stockley. It would be getting on for 7 o'clock by the time to camp.

TRANSLATION

2/47

SUBJECT: Clothing Stores, organization of.

HQ PICENO DIV.

Ref: 07/1132/S/Comm

5 May 1945

Ref. our Ord/2/42, dated 27 April 1945.

Due to the various sets of clothing and equipment materials, and the large quantities of them that exist in the Stores, also the continuous issuing and receiving daily effected by the Stores, it is thought by this HQ that it is not possible at the moment to lay all materials on proper shelves.

As soon as planks for shelving are available (the stores have already the vertical supports), shelves will be erected, and used ~~at present~~ only for the items which belong to bales already opened or which have a small volume.

It is hoped that the maximum quantity of materials will be laid out, as soon as the shelves are completed.

loro sedi

1°-Il 2 maggio p.v. verrà iniziato un corso teorico-pratico d'istruzione
tecnica per i 100 militari di sussistenza in forza al IX btg. cpl. misto.-

Durata del corso: 10 giorni lavorativi.

Inizio: mercoledì 2 maggio - ore 8.

Orario delle istr: 8 - 10.15 --- 13 - 16.15

2°-Il corso sarà effettuato in due turni distinti di 50 uomini l'uno e
precisamente:

(1° turno : dal 2 al 14 maggio .

(2° turno : dal 15 " 25 maggio .

I 50 militari di ciascun turno dovranno essere ripartiti in tre gruppi:

- nr. 16 al magazzino V.B.

- nr. 17 al magazzino viveri

- nr. 17 alla 319 Squadra panettieri.-

Ogni gruppo permarrà tre giorni presso lo stabilimento ove è stato as-
segnato dopo i quali ruoterà presso gli altri stabilimenti secondo le
indicazioni del Capo sezione commissariato .-

3°-Al 10° giorno -ore 8- i militari verranno riuniti a cura del sottuffi-
ciale di sussistenza del btg. cpl. misto nei pressi della stazione ferro-
viaria di Cesano dove il capitano commissario MAZZA Emilio completerà
le istruzioni con una lezione riepilogativa.-

Nelle ore pomeridiane dello stesso giorno e nella stessa località il

Ref. ORD/2/42.

April 27th 1945

1. It is considered that the present storage amenities for clothing and equipment in the Central Storehouse would be greatly improved by the introduction of shelves of a type similar to those actually in use in the Training Equipment shed.

2. This point has been discussed by Officer i/c Central Storehouse who informed me several weeks ago that he had put in a demand for such shelves.

3. No action appears to have been taken.

4. At present clothing is stored in bales stacked on the ground, sorting by sizes is not easy, and the whole set up is primitive.

5. Can something be done please to make the Clothing Store better equipped to help the staff carry out their important role in the maintenance of this Centre.

Ref: - 03/10/7

Date: - 9th April 1945.

A number of packages from a consignment of stores despatched from Base to this Unit under the code name HAM have been mislaid at this end, and as it is known that a quantity of our stores were in fact sent in error to GESANA Sidings mixed with stores for R.T.C. - I.C.F., it is thought that the missing packages may still be with you.

The packages in question are:-

Case	No	71	containing	brown shoes
"	No	33	"	cellular vests
Bale	No	27	"	wool & cotton vests
"	No	93	"	ties, vests etc.

The following stores are also missing from a previous consignment despatched under the code name TOWN and it may be that these too have reached you in error:-

Bale	No	9	containing	Tropical Shirts
"	No	12	"	" "
"	No	147	"	Handkerchiefs.

It would be appreciated if you would make enquiries at your end to assist us in tracing these stores.

SUBJECT: Italian Army Newspapers.

Land Forces Sub Comm. A.C.
(M.M.I.A.) ROME.
A/27/2.
16 Mar. 45.

To all MMIA LO's and BHU's.

1. A report is required on the Italian army newspapers "La Patria" and "Italia", to reach this H.Q. by 7 April.

2. These newspapers are published by the army for the soldier, and it is desired to do everything possible to make them efficient and of high morale value. Information is required on the present distribution system, on the numbers actually reaching the soldiers, and on their attitude to the papers.

3. The report should, therefore, be based on the following headings :

1. Distribution.
2. Numbers received by formations
3. Material.
 - (a) News
 - (b) Morale and human aspect.
 - (c) Entertainment and Sport.
4. General Suggestions.

4. Practical suggestions for improvement of the paper in any way are particularly required. It is desired to have your views and this report is independent of any reports called for through Italian channels.

The attached letter ref: 21GT(9) dated 8 Mar.45 is the only information available as to G.1098 equipment still outstanding for No.2 G.T. Company. Since this list was prepared I am informed by the O.G. that the binoculars have been received. Difficulty is being experienced in obtaining the relevant G.1098 scale to check the actual holdings of this unit.

SUBJECT: Vehicle Signs.

To: H.Q.
R.T.C., I.C.F.

From: P.L.U., R.T.C., I.C.F.

Ref: G/6A/97

21 March 1945.

1. Authority has been granted for the painting of formation and unit signs on vehicles of the R.T.C., I.C.F. R.T.C., I.C.F. will adopt the appropriate markings for the PICENO Group.

2. Vehicle marking numbers are shown at Appendix 'A'. Unit numbers are not yet available for the following units :-

H.Q. 152 Italian Training School.
152 Italian Infantry School.
152 Italian Instructors School (All Arms).
152 Italian Mechanics School.

These have been applied for and will be forwarded as soon as possible.

3. The formation sign will be painted on the left and the unit sign on the right, both front and back, (see sketch attached). The signs on the front will be painted on the mudguards, but where there are no mudguards, signs will be painted as near as possible to the corresponding position.

4. In addition to the above signs, the following will also be painted :-

(a) SPEED LIMIT SIGN in RED, on the rear of the vehicle.
See list of speed limits attached, at Appendix 'B'.

(b) TIRE PRESSURE SIGNS - painted in white on the edge of the front and rear offside mudguards. See list of tire pressures at Appendix 'C'.

5. Enclosed please find sketches for guidance. The formation, unit and speed limit signs are ACTUAL size.

6. PAINT.

Supplies of Olive Drab paint (Idiak) and green, red and white paint are available shortly. There

1. Authority has been granted for the painting of formation and unit signs on vehicles of the R.F.C., I.C.F., I.F.C., I.C.F. will adopt the appropriate markings for the PICENO Group.
2. Vehicle marking numbers are shown at Appendix 'A'. Unit numbers are not yet available for the following units :-

H.Q. 152 Italian Training School.
 152 Italian Infantry School.
 152 Italian Instruction School (All Arms).
 152 Italian Mechanics School.

These have been applied for and will be forwarded as soon as possible.

3. The formation sign will be painted on the left and the unit sign on the right, both front and back, (see sketch attached). The signs on the front will be painted on the mudguards, but where there are no mudguards, signs will be painted as near as possible to the corresponding position.
4. In addition to the above signs, the following will also be painted :-

- (a) SPEED LIMIT SIGN in RED, on the rear of the vehicle.
 See list of speed limits attached, at Appendix 'B'.
- (b) TYRE PRESSURE SIGNS - painted in white on the edge of the front and rear offside mudguards. See list of tyre pressures at Appendix 'C'.

5. Enclosed please find sketches for guidance. The formation, unit and speed limit signs are ACTUAL size.

PAINT.

Supplies of Olive Drab paint (Maki) and green, red and white paint have been demanded by this Headquarters and should be available shortly. Where necessary, vehicles should be completely repainted, but it is particularly stressed that where a vehicle needs complete repainting, the signs are painted on after the repainting has taken place.

7. It is suggested that the quickest way to paint the signs is by using a stencil. Contact should be made with Major Hilton, Mechanics School, and he will organise the production of the stencil, thus ensuring that all signs will be of uniform size.

SPEED LIMITS TO VEHICLES (GRO 848/44 refers)

The following are maximum speeds in miles per hour at which vehicles may be driven. These speeds are for British vehicles and they must not under any circumstances be exceeded.

Motor cycles.	40	mph
Cars, Light Utility, 2 str 4 x 2.	40	mph
Trucks, 15 cwt, 4 x 2.	35	mph
Lorries, 3-ton, GS, 4 x 2	30	mph
Lorries over 3-ton.	20	mph
Tractors, LAA, 4 x 4	25	mph

All vehicles must comply with the speed limits which are sign-
posted in villages and towns.

APPENDIX 'C' to
G/6A/97 atd.
21 March 45.

TYRE PRESSURES.
(G.R.O. 546/44 refers).

The following is a list of tyre pressures for various sizes of tyres. Tyre pressures are measured in pounds per square inch by means of a tyre gauge, which should be in the tool kit of each driver. The pressures given below, therefore, are the ones which should show on the tyre gauge of the driver for his particular vehicles, when he tests his tyres.

Type of Vehicle.	Tyre Size. (marked on the tyre).	Pressure in lbs. per square inch.	
		Front tyre.	Rear tyre
Motor Cycle.	all sizes.	18	20
Light Utility 2-str. 4 x 2.	7.00 x 16	24	26
	9.00 x 16	20	22
Trucks 15-cwt. 4 x 2 G.S., Motor, W/T and Air Compressor.	9.00 x 16	20	28
	9.00 x 13	22	23
	10.50 x 16	22	36
Lorry 3-ton G.S. 4 x 2 Stores.	10.50 x 16	25	70
	10.50 x 16 HF	20	30
Lorry 6-wld. 30-cwt. Workshop.	7.50 x 20	25	45
Tractors Heavy Breakdown. 6 x 4.	15.50 x 20	40	40
Tractor Heavy Breakdown. 4 x 4.	--	40	50
Tractor L.A.A. 4 x 4.	10.50 x 20 HF	26	36

pressures given below, therefore, are the ones which should show on the tyre gauge of the driver for his particular vehicles, when he tests his tyres.

Type of Vehicle.	Tyre Size. (marked on the tyre).	Pressure in lbs. per square inch.	
		Front tyre.	Rear tyre
Motor Cycle.	all sizes.	18	20
Light Utility 2-str. 4 x 2.	7.00 x 16 9.00 x 16	24 20	26 22
Trucks 15-cwt. 4 x 2 G.S., Water, W/T and Air Compressor.	9.00 x 16 9.00 x 13 10.50 x 16	20 22 22	28 23 36
Lorry 3-ton G.S. 4 x 2 Stores.	10.50 x 16 10.50 x 16 DF	25 20	70 30
Lorry 6-wild. 50-cwt. Workshop.	7.50 x 20	45	45
Tractors Heavy Breakdown. 6 x 4.	15.50 x 20	40	40
Tractor Heavy Breakdown. 4 x 4.	--	40	50
Tractor L.A.A. 4 x 4.	10.50 x 20 DF	26	36
Water Trailer 15-cwt. two-wheeled, 130-gallons.	2.00 x 20	50	1462

Tyre pressures for other vehicles may be obtained on application to 'A' B.L.U.

SUBJECT: Training of Italians in Gas Warfare - Directive.

TO : 15 Army Group
56 F.L.U.
Italian Reinforcement Trg Centre, CESANO.
INIA (for onward transmission to SMRE).

1. Italian personnel of the Combat Groups and the Rft Trg Centre Italian Combat Force will be trained in defense against gas warfare to the standard required for British soldiers as outlined in "Gas Training, 1942" Section 2 para 1. This training will be included in the normal training programmes of all ranks.
2. The scale of personal anti-gas equipment will be as shown at Appendix 'A'.
3. (a) A special course is being organised at the Chemical Warfare School CMTC to train the necessary instructors.
(b) Personnel to attend this course will be drawn from Combat Groups and the Reinforcement Training Centre ICF.
(c) The number of vacancies allotted to each Combat Group and the Rft Trg Centre will be forwarded later together with joining instructions.
(d) A small trg team consisting of one officer and two senior NCOs is being formed and will be available to Combat Groups w.e.f. a date to be announced later.
4. On return to their units the Instructors trained at the CMTC will organise cadres of Junior leaders who will be trained to give unit instruction.
5. All respirators will be tested in a gas chamber as soon as possible after issue.
6. Extracts from "Gas Training 1942" are being translated and will be issued, when available, to all instructors.

10 March 1945.

To: R.Q.
Land Forces Sub Comm.AC (M.M.I.A).

1. Attached report by S.O.R.E.; the conditions described are typical of those throughout the Centre, though No.3 Regiment, to which this report refers, is probably an outstanding example.
2. After a month's experience, I am satisfied that intensive training on A and Q matters is as essential as G Training, which is the prime responsibility of D.M.T.
3. I suggest that for a period of from two to three months each Regiment should have a British officer, preferably of Field rank, permanently attached to them to initiate and maintain a proper A & Q system based on British practice, throughout each Regimental organisation. Such a task would require constant and unremitting attention throughout each day, and cannot be accomplished by the present B.L.U. staff, who are physically incapable of being in sufficient places at the same time, to ensure their recommendations are carried out.

SUBJECT: Stock returns of Ordnance Stores.

'P' BLU RUC ICF.

Ref: ORD/2/16.

7 March 1945.

To: D.A.A. & C.M.G.

'P' BLU RUC ICF.

1. As all Ordnance Stores of British origin held by the Central Storehouse, R.T.C., I.C.F. are D.A.D.O.S. controlled, a stock return is submitted to this office at the end of each day by the Officer i/c Storehouse.
2. By chance, this morning, while in the Storehouse settling a few minor points on last night's return, I observed that the tallies kept by the Storemen for each item in the Equipment Shed showed quantities in stock which did not agree with those on the return I was holding.
3. On making a check of all the tallies in the Shed there was not one instance where the quantities agreed with those of the same items on the Stock Return. In some cases the discrepancies were quite small, but in others they were considerable, and sufficiently so to upset completely any calculation for the provision and distribution of stores.

4. Examples of the worst discrepancies are as follows :-

Water Bottles	-	Stock Return	2922.	Storehouse Tally:	8864
Straps, Web, Supporting.	"	"	2156	"	13000
Tins, Mess, rectangular.	"	"	2451	"	7017
Carriers, Cartridge.	"	"	4442	"	12870
Straps, shoulder H'sack.	"	"	9220	"	13348
Packs.	-	"	4095	"	7018
Spoons.	-	"	2788	"	2090

Offhand it is impossible to say which figures are right, but at a glance of stocks, etc., the tallies would seem more correct.

5. The Officer i/c Storehouse could offer no satisfactory explanation for these discrepancies, and it seemed that he was not previously aware of them.
6. The nightly stock return, which is signed by Officer i/c Storehouse, is presumably calculated from separate ledgers kept in the Stores office.
7. It is apparent that the office accounting and storehouse tallies

kept by the Storemen for each item in the Equipment Shed showed quantities in stock which did not agree with those on the return I was holding.

3. On making a check of all the tallies in the Shed there was not one instance where the quantities agreed with those of the same items on the Stock Return. In some cases the discrepancies were quite small, but in others they were considerable, and sufficiently so to upset completely any calculation for the provision and distribution of stores.

4. Examples of the worst discrepancies are as follows :-

	Stock Return	Storehouse Tally
Water Bottles	2922	8864
Straps, Web, Supporting	2456	13000
Tins, Mess, rectangular	2451	7017
Carriers, Cartridge	4412	12870
Straps, shoulder H'back	9220	13848
Packs	4098	7018
Spoons	2788	2090

Offhand it is impossible to say which figures are right, but at a glance of stocks, etc., the tallies would seem more correct.

5. The Officer i/c Storehouse could offer no satisfactory explanation for these discrepancies, and it seemed that he was not previously aware of them.

6. The nightly stock return, which is signed by Officer i/c Storehouse, is presumably calculated from separate ledgers kept in the Stores ~~offices~~.

7. It is apparent that the office accounting and storehouse tallies have seldom, if ever, been compared and checked by the Officer i/c Storehouse, and if that is the case a basic principle of Store-keeping has been ignored, which calls for very drastic action to remedy the situation.

8. It should not be difficult for accurate records to be kept in the Central Storehouse, especially as all Receipts from Base Depots and A.D.O.S. Rome Area are counted and checked in a separate Receipts Shed by British Storemen, on loan to B.L.U., and handed over to Officer i/c Storehouse with a note stating designations and quantities. The system of issue from the Central Storehouse has also been simplified, separate days being allotted to each Regiment, leaving three clear days a week when no normal issues are made, and giving ample time and opportunity for the Storehouse to be put in order.

9. Unless I have correct facts and figures my work as D.A.D.O.S. is seriously hampered, especially as I am still without my War Establishment staff of British O.Rs.

10. I reported this matter verbally to Magg. Rambaldi of the Ufficio Servizio H.A., RTC. ICT., who promised to effect a remedy.

11. Your support will be appreciated.

Ref conversation Chief Clerk to Capt. McCARTNEY-Major
GREENWOOD spoke 26 Feb/45.

1. War establishment CM/732/1 for a British Liaison Unit with Reinforcement Training Centre, Italian Combat Forces provides for a W.O. Class I as B.O.W.O.
2. No B.O.W.O. has yet been appointed.
3. As the training centre is only very recently formed, it will be appreciated that D.A.D.O.S. is encountering a great deal of work and it is therefore requested that a B.O.W.O. be posted as soon as a suitable one can be found.
