1. A Physical Training course is being run here for the benefit of students from the Gruppi. Attending will be 25 Officers and 35 NCOs.
2. At present cooking and messing facilities are inadequate with the Regiment to which they will be attached.
3. If, however, a No. 1 cooker for the NCOs and a No. 3 cooker for the Officers could be obtained pending the construction of a new cookhouse, this would solve the problem.
4. It is therefore desired that these be drawn against the normal equipment list of No. 1 Regiment, being returned on completion of cookhouses.

Officer i/o Training, RTO IGF.

1. A short time ago an indent was made by your office for Armourers kits to supply those armourers allowed for on the establishment of the various schools and Regiments.
2. Five outfits were received but instead of being distributed to those who are entitled to them, they were all sent to the workshops.
3. The workshops are already in possession of adequate armourers kits. Would you therefore please redistribute these to the sub-units for whom they were intended.

- Training Unit, etc.
1. As perhaps you are aware when this Centre was founded lists were made out asking what training equipment was required. Naturally it was almost impossible to include every item as it is difficult to visualise all needs and requirements off a paper establishment with no manuals to assist.
  2. We are at liberty to ask for further War Office Controlled Stores off DMT, but have no such authority for uncontrolled stores which we must ask off you as DADOS, with the possible exception of a vague DMT letter which is in your possession (DMT/88/ etc).
  3. If we get RE stores from RE sources they are held on 104 GRE ledgers. At present I own 450 shovels which is obviously unsatisfactory. I would wish this indent to be an Ordnance one so that the items may definitely be placed on Italian charge.
  4. If necessary an official authority for the items required can be applied for, but in the meantime much time is wasted.

1. Il Comando 235° Reggimento Fanteria, il 5 febbraio c.a., prelevò dal Magazzino del Centro n. 60 fucili mitragliatori Bren, in scatole di cartone regolarmente sigillate con strisce di carta gommata.
2. Il 26 aprile c.a., all'atto dell'apertura di una di dette scatole, contenente l'arma FT 9429, ~~si~~ riscontrava la mancanza della canna di ricambio e della guaina di tela. Ciò veniva fatto constare con regolare verbale, che si allega in copia.
3. Poichè l'arma in tal modo, risulta inefficiente, pregasi voler assegnare a questo Comando la canna e la relativa guaina mancanti od autorizzare il versamento del fucile incompleto.=

1. Is it possible for you to give me more precise information as to what is required?

2. While I appreciate that some trouble has been taken to prepare this list you have sent me, the very fact that only a small number of items are referred to in full with Catalogue Number and English designation, and that many items are referred to only in Italian makes it very difficult for my staff to be certain exactly what you require.

3. It would also help if you could state what this list of requirements is based upon.

4. I am aware of no entitlement for you to hold anti-gas training equipment and consequently I shall have to apply for such an authority on your behalf and that of the Training Staff here.

5. The decision as to equipment required is actually a Training matter, and if you experience any difficulty I recommend that you make a request for a British Officer connected with Anti-gas instruction to visit you. For my part I shall do everything I can to accelerate the provision of the required materials and equipment *once I am informed*

Ref ord/27/74 dated 20 May 1945.

With reference to the above mentioned letter, we wish to inform you that 4x2 is being very rarely indented for by the Units of this Centre, as it was thought that cotton cloths were to be used to clean weapons instead of 4x2. In fact 3 quintals (about 6cwt) of such cloths were requested from the War Ministry by this Centre, of which one quintal (2cwt) has recently been received and issued to the Units, that indented for them.

Would you please inform us:-

1. how long a period (one two or three months) are the issues of lubricants stated for each weapon supposed to last;
2. if it is possible to get lubricants and 4x2 also for the Italian weapons still on charge to the subunits; should this be the case, please inform this office the quantity and the period that such supplies are supposed to cover.

AL "F" = BDU = INFO = IOF = DADO = SEDE

- Riferimento foglio Gru/21/14 del 20 C.M. -

In riferimento al foglio in alto segnato, si comunica che la pianellina è stata richiesta solo rarissime volte dal reparto del C.A.C.T.I.C. perche gli stessi ritenevano di dover adoperare gli stracci di tela lasciati, per pulizia delle armi. In tutti questo tempo, in seguito a richiesta inoltrata al Ministero della Guerra di 3 quintali di questi stracci, ne ha recentemente ricevuto solo un quintale, che è stato già ripartito tra i corpi e reparti dipendenti che ne avevano fatta richiesta.

Con l'occasione, si prega compiacersi far conoscere :

- 1) - a quale periodo di tempo (mese, trimestre, ecc.) si ripresentano le assegnazioni dei munificanti fissate per ogni arma (cavallo A.B.D. N. 1 e 2) ;
- 2) - se anche per le armi italiane, tuttora in distribuzione ai corpi e reparti dipendenti, sia possibile prelevare i munificanti e la pianellina necessaria, in questo caso, si gradita conoscere ne la misura ed il periodo di tempo previsto.

1. The following notes are for general guidance concerning training equipment and its replacement.

2. All training equipment supplied here originates from a scale prepared by the Director of Military Training. A copy of this list is held by HQ PICMG Division.

All this material is for training purposes only and is not to be used for other purposes.

3. If the scale is inadequate, units can always apply for more. This is being done by the Italian Training Office.

4. Local adjustments in the actual distribution of the stores may be made to suit changes of training policy.

5. Some of this equipment, in fact the greater part of it, is what is known as controlled equipment. In other words the scale of issue is approved by AHQ. In general, controlled equipment is such material as Signal Stores, Arms, Optical Instruments, Vehicles etc i.e. the more expensive and scarce items.

6. Therefore, if a unit wants more wireless sets for training it must apply through the Divisional Training Office to Capt Shethurst.

7. If, however, a wireless set is broken in a valve or spare part, replacement must be made through British DADOS.

8. The same applies for all uncontrolled stores indents for which application should be made through Italian Headquarters at regular fortnightly intervals to DADOS, 1st HMU. This includes batteries, cleaning materials, etc.

9. The exception to this is for RE Stores, i.e. Sandbags, Wire, ~~Compass~~ <sup>Compass</sup> Iron, etc, which should be obtained from BORS (Major Blackland).

10. Arrangements are controlled by Italian HQ, bulk indents only being made by Captain Shethurst.

The above remarks apply only to training stores. Accommodation stores

  10. Ammunition is controlled by Italian HQ, bulk indents only being made by Capt Skothurst.
- The above remarks apply only to training stores. Communication stores and special equipment are issued to certain prepared units.
- It is noted, however, that if there is an armourer or a carpenter at the establishment that his tools are not an item of training equipment. Only in the case of there being an armourer or carpenter school would these items be training equipment concerns.

Herewith a list of stores required for your 6 pr guns. It is compiled on the following assumption that you should have what is required to maintain it, but no extra stores such as gun packings which are only issued since each number one must have an idea of what a complete gun kit looks like, I suggest that TWO are issued and kept for demonstration purposes-the packings etc being wired to a board and the Eng together with the Italian name typed on a slip of paper and stuck underneath it.

of stores required for your 6 pr guns. It is compiled on the following assumptions. First that each gun required to maintain it, but no extra stores such as gun packings which are only required in action. Secondly we must have an idea of what a complete gun kit looks like, I suggest that TWO complete demonstration kits for demonstration purposes-the packings etc being wired to a board and the English name and ordnance number Italian name typed on a slip of paper and stuck underneath it.

It should be clear that when after multiplying the first column by the number of guns held the a fraction it should be made up to the nearest whole number before indenting.

I hope that this list is more or less what you want.

Reference my OS/1000/954/10 of 6 March '45.

1. Para 2 of the aforementioned letter appears to require both clarification and qualification. In the first place, the intention was one of disposal of stock and thereby to assist you in making issues to reinforcements. Secondary, as the stocks remain on my charge, until issued by you, it was thought necessary to know of such issues at the time.

2. It is not intended to limit your freedom in making issues to reinforcements, and you will therefore make such issues as may be necessary from time to time without prior reference to this office.

3. Information as to the numbers so issued will be notified to this office by fastest possible means. This is required in order that the Area pool of 2000 may be utilized to the best possible affect according to the governing circumstances at the time. Occasions may arise where British reinforcements moving forward will have to be made up to scale from stocks held at Casano. Should particularly heavy discharges ex hospital etc. clear the pool held in Rome.

Subject:- Inspection of Small Arms.

1. I have been asked on occasions by G.S.O.2 (Infy) and D.A.D.O.S. R.T.C. I.C.F. to inspect weapons held for training, and for personal issue.

2. It would be advisable to attach permanently five armourers to the weapon store. This number may have to be increased if it found that they are unable to cope with the work.

3. The 935 Workshop Coy. A.A. administered by the third Regt. at Bracciano have five armourers whom I have selected and graded. Their names are as follows:-

|            |           |           |
|------------|-----------|-----------|
| Cap. Magg. | Giuseppe  | SEITE     |
| Soldato.   | Valentino | PIANI.    |
| "          | Isidoro   | SANETTI.  |
| "          | Giovanni  | MAURIZI.  |
| "          | Carlo     | BERTASIA. |

4. The Italian Armourer Instructor at the Mechanics School can be attached to the store for a period of two weeks, in order to:-

- (a) Assist in the inspection.
- (b) Instruct.
- (c) Report on the ability of the Armourers.
