12 British Liaison Unit.

1. The U.S. Central Military Schools have advised this U.S. that they have suggested to Ministry of War that the 249 Field Bakery be disbanded and that the units served by this bakery should collect their bread ration from Rome.

2. This decision is agreed for the following reasons:-

(a) The Bakery is not supplying all the schools, only the following:-

(i) U.S. Central Military Schools.

(ii) Infantry School.

(iii) P.A. School.

(iv) Police School.

(v) Commandant.

with a total daily ration strength of from 3,200 - 3,500 (1 Bakery load).

(b) The bakery is in a very bad location, with very poor accommodation, to which a vehicle cannot approach nearer than 150 yards. The machine oven is very old fashioned and the "baking" and "moulding" all have to be done by hand. The water supply too is precarious. All work throughout the 24 hours has to be done by artificial light, and there is no ventilation in the bakery whatsoever.

(c) The bakery could never be used for training purposes since although technical side of bread production is up to standard, the whole general appearance would give students the wrong impression of food. Also there is very little for students in addition to normal shift personnel.

that the units served by this battery should collect their bread ration from Rome.

2. This decision is agreed for the following reasons:-

(a) the battery is not supplying all the soldiers, only the following:-

- (i) U.S. Central Military School.
- (ii) Infantry School.
- (iii) P.T. School.
- (iv) Police School.
- (v) Carabinieri.

with a total daily ration strength of from 3,200 - 3,300 (1 Levy Unit).

(b) The battery is in a very bad location, with very poor accommodation, to which a vehicle cannot approach nearer than 150 yds. The civilian oven is very old fashioned and the "baking" and "cooking" all have to be done by hand. The water supply too is precarious. All work throughout the 24 hours has to be done by artificial light, and there is no ventilation in the battery whatsoever.

(c) The battery could never be used for training purposes since although technical side of bread production is up to standard, the whole general appearance would give students the wrong impression as bread. Also there is very little extra room for students in addition to normal student personnel.

3. In view of the above no report will be submitted for the 22649 on of this unit on 27 March 46. The following points are however forwarded for information:-

(a) The battery is at present using 70 national flour (for Italian sources) and 30 white flour and the yield is 124. The old dough process is used. The amount of salt used was checked and found to be correct.

(b) A constant complaint of the men is that they still receive no bread pay.

(c) It appears that previously soldiers used to be issued with money or coffee which helped them, especially in the hot season and they want this issue restarted.

(d) The following accounts are kept:-

- (1) Commodity account showing commodities received and commodities struck off charge as bread.
 - (ii) Account of 270 showing commodities issued to ovens and % bread yield.
 - (iii) Register of units issued.
 - (iv) Register of unit drawings showing signature of representatives.
- This book also contains a "General column" where units can make complaints.

1. Further to this office letter ST/302 dated 10 Jan 46, a report has now been received showing action taken in accordance with the recommendations embodied in the above letter.
- (a) The civilian oven (requisitioned) has been overhauled and is now being used alone for the total production figure.
 - (b) Infested flour has been cleaned by sieving.
 - (c) Fire points have been established and fire extinguishers are on demand.
 - (d) Further accommodation has been found and a hut is being built resulting in improved sleeping accommodation and in due course, in the provision of a recreation room.
 - (e) Action has been taken to improve the condition of boots and clothing and an additional soap issue has been obtained.
2. This branch is most favourably impressed by the manner in which the suggestions in the above letter have been received and moreover by the prompt and vigorous action which has been taken to rectify the deficiencies noted.
