SAFETY PRECAUTIONS DURING MINE WARFARE TRAINING

(Precis of General Routine
Orders Nos 517/44 & 654/45)
+++++

1. RECENT ACCIDENTS

The following three cases of accidents during mine warfare training occurred recently in this theatre. They are not isolated cases!!

On one occasion the detonation of one GS Mk IV anti-tank mine resulted in the death of 69 men and injury to 87 others of an instructional class. Some of the 87 injured men subsequently died from their wounds.

Later the detonation of a single Grenade No. 75 resulted in the instantaneous death of 2 men and injury to 37 others of an instructional class. Many of the injured men were blinded.

Recently 20 officers and men were killed and 20 seriously injured when a R Mi 43 detonated on being demonstrated to an instructional class.

2. PRECAUTIONS

The following safety precautions will in future be adhered to:-

- (a) Whenever possible, mines which have been emptied of their explosive charge should be used for instructional purposes.
- (b) A live mine will never be used for demonstration or instructional purposes if it contains a live igniter or a detonator.
- (c) Enemy Mines. A live igniter or a detonator will never be actually inserted into a live enemy mine.
- (d) Allied Mines. Types of Allied Mines which are armed with a "Fuze" comprising detonator, igniter and booster (Mk IV, 'S' Mine, etc), may be so armed under the following precautions.
 - (i) Arming to be done out of doors.
 - (ii) The class to be limited to eight (8) students.
No one else within 100 yards.
 - (iii) Safety pins will not be withdrawn.

2. PRECAUTIONS

The following safety precautions will in future be adhered to:-

- (a) Whenever possible, mines which have been emptied of their explosive charge should be used for instructional purposes.
- (b) A live mine will never be used for demonstration or instructional purposes if it contains a live igniter or a detonator.
- (c) Enemy Mines. A live igniter or a detonator will never be actually inserted into a live enemy mine.
- (d) Allied Mines. Types of Allied Mines which are armed with a "Fuze" comprising detonator, igniter and booster (LM, 'S' Mine, etc), may be so armed under the following precautions.

- (i) Arming to be done out of doors.
 - (ii) The class to be limited to eight (8) students.
No one else within 100 yards.
 - (iii) Safety pins will not be withdrawn.
- (e) Igniters. Before an igniter is used for instructional training with mines it will be rendered safe as under.
- (i) Percussion type - cap will either be removed or fired.
 - (ii) Chemical type - chemicals will be removed.
 - (iii) Friction type - igniter will be operated by pulling.

Igniters thus rendered safe will have a narrow white band painted round them.

- (f) Laying Drill. (i) Only Allied Mines will be used for laying drill.
- (ii) Safety pins will NCT be removed.

- (iii) Before the drill commences the Instructor will check all mines to ensure no fuzes, igniters or detonators are in position and he will list all explosive stores.

- (iv) At the conclusion of the period the instructor will again check all mines and ensure all stores are present according to his former list.

Date 13 Jan	File A15

6146

Page 2

(v) As handling is liable to weaken shear wires and increase the sensitivity of the explosive in fuzes and detonators, both these latter will be destroyed at the end of each days training.

(g) Discipline. It is of paramount importance that no untrained or incompetent individual is allowed access to mines, detonators, fuzes, etc, etc.

3. RENDERING SAFE.

- (a) Only a really competent person familiar with the mine concerned should be allowed to remove detonators or igniters or explosive from a mine.
- (b) He must work alone and out of doors. No one is to be within 100 yards of him.
- (c) No attempt is to be made to remove the detonator from a Teller mine T Mi 35 or T Mi 35 (Steel) without the use of the special tool.
- (d) If the detonator sticks (as is prone to happen in the R Mi 43) no attempt will be made by force to remove it and the mine will be destroyed.

4. ASSISTANCE.

The British RE Staff at BRACCIANO and CESANO will give any help or advise concerning safety precautions and should be approached direct on any such matter.

Copy to:- D.M.T.

1. A simple method of making the Lifbuoy Flamethrower eqpt less conspicuous has been evolved, and details are shown on the enclosed sketch.

2. The same method can also be used for the Ack-Pack Flamethrower, but supplies of this eqpt have not yet been received in this theatre.

3. A limited number of sketches are held at this H.Q. and further 6137 copies will be forwarded if required.
