C. M. F.

Ref BTU/35/33

27 Mar 45.

DND.

PIC ICF.

1. Attached is Appendix "A" showing ammunition requirements for the month of May.

2. It will be noticed that in most cases the indent is smaller than the previous one. The reason for this is that as ammunition generally was received before equipment, a small reserve has now accumulated; also some of the specialist schools have only just been started.

3. It is pointed out, however, that ammunition expenditure is at present on a scale to justify a larger indent and it is anticipated that future indents will be similar to our BTU/35/6 of 24 February.

4. All artillery ammunition has been demanded separately by 10 Training Team RA.
