SUBJECT: Italian Barracks - Moveable Property

TO: Chief Commissioner
Allied Commission
APO 394
FOR: Land Forces Sub-Commission, MMIA

1. The War Department has established definite policies for the derequisition and disposal of United States Army installations and for the removal of United States Army equipment and materials installed therein. These policies are embodied in MTOUSA Circular Number 111, dated 14 September 1945, subject: "Disposal of Surplus Installations and Release of Real Property" and inclosures as amended by MTOUSA Circular Number 121, dated 15 October 1945, and MTOUSA Cable Number FX 49727, dated 21 October 1945, copies of which are attached.

2. With particular reference to the United States Army materials installed in the Italian barracks at Cecchignola mentioned in paragraphs 2 and 4 of your letter, with the concurrence of the Office of the Foreign Liquidation Commissioner the items of United States materials such as window screens and other similar improvements which are not of salvageable value or saleable by Office of the Foreign Liquidation Commissioner may be left intact. The residual value of these improvements will be reported to the Allied Commission in the usual manner.

3. The policy which is to be followed for the disposal of installations which are requisitioned or constructed by the British has just been received from the War Office. A copy of your letter has been passed to Q Branch GHQ, CMF who will forward copies of their disposal policy to you as soon as they are available.

- c. MATCOSA Engineer Letter, subject: "Reports Required by Allied Commission", dated 21 August 1945.

I -- DISPOSAL OF SURPLUS ARMY INSTALLATIONS

3. Purpose - The purpose of this directive is to establish a procedure in this theater for the disposition of surplus US Army installations (except Special Signal installations) and for the removal of US Army equipment and materials installed therein in accordance with the policies established in War Department Memoranda Number 700-45, subject: "Disposal of Property Overseas", dated 9 May 1945, as amended 30 June 1945 and 20 July 1945 and Number 700-45, subject: "Policy With Respect to United States Installed Equipment in Overseas Army Installations", dated 24 July 1945, and letter from Chief of Engineers War Department, subject: "Report of Excess Fixed Installations and Disposal Actions", dated 19 June 1945. Special Signal installations will be disposed of in accordance with Item 3, Section IV AFHQ Signal Instructions, dated 22 November 1944.

RESTRICTED - 1 -

Re JCSA Circular #111 (cont'd)

4. Definitions

a. Fixed installation

(1) A unit of real property not in a combat zone, leased, purchased or otherwise acquired by agreement, expressed or implied, together with any improvements constructed thereon, for the United States Army, at which a specific military function is performed.

(2) A unit of real property not in a combat zone at which there have been accomplished repairs, modifications, or replacements to existing facilities such as roads, railroads, bridges, utilities, ports, airfields, depots and similar properties utilized by the US Army, where the repairs, modifications or replacements are of such type construction as to have a potential postwar economic value.

b. Removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which can be removed without damage to the structure or real property or without rendering the structure or property useless. Examples of removable installed equipment are boilers, power plants, motor generator sets, industrial production equipment, communication equipment, pre-fabricated huts, etc.

c. Non-removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which cannot be removed without damage to the structure or real property or without rendering it useless. Examples of non-removable installed equipment are sewage piping, water piping, steam piping, electrical or communications wiring, etc.

d. Definitions listed in paragraph 2, JCSA Circular Number 92, 1945, are applicable to this directive.

5. Base Section Commanders and the Commanding General, AF/ATO, will take aggressive action to insure that all installations and real property, not absolutely essential to the needs of logistic and occupational forces, are immediately released in accordance with instructions below. Special attention will be given to the release of civilian hospital, industrial, educational and agricultural facilities.

6. Disposal of Installations

a. Installations to be reported to this Headquarters prior to disposal - Installations of the following categories determined to be excess to the needs of the Base Section Commander or Commanding General, AF/ATO, will be reported to this Headquarters for reference to the War Department for disposition instructions (See paragraphs 7a and 8 below).

(1) All installations regardless of United States investment which have major strategic or economic value.

(2) All airfields in which the estimated United States investment at the time of determination as excess is more than \$100,000.

(3) All installations which are terminal stations of or stations tributary to the Army Command and Administrative Network.

AFMOTUSA Circular #111 (Cont'd)

(4) All petroleum and port installations of the following types in which the United States investment at the time of determination as excess is more than \$100,000:

- (a) Tank farms.
- (b) Petroleum pipe lines.
- (c) Petroleum pumping installations.
- (d) Petroleum distribution systems.
- (e) Petroleum refineries.
- (f) Petroleum loading terminals.
- (g) Can and drum plants.
- (h) Piers and wharves.
- (i) Berths.
- (j) Fixed port unloading facilities.
- (k) Tanker unloading facilities.
- (l) Marine repair facilities.

b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this headquarters, the installation will be reported on Form WB-3 by the command concerned to the Field Commissioner, AFMOT, for disposal in accordance with AFMOTUSA Circular Number 92, 1945.

c. Installations to be disposed of by authority of Base Section Commander or Commanding General AAF/PTO - all other types of installations not included in paragraph a, above, will be considered surplus without further authorization when they are determined by the Base Section Commander or Commanding General, AAF/PTO, to be excess to current needs. However, clearance will be obtained from this headquarters prior to disposition of any airfield, port facility or petroleum installations, or of installations with a housing capacity of over 5,000 men, installations specifically constructed or acquired by direction of this headquarters, or installations which may, in the opinion of the controlling command, be of use to another agency or command.

d. Disposal of surplus installations (except real estate on which no expenditures have been made by the United States other than for maintenance - see paragraph 6e, below) included in the categories outlined in paragraph c, above will be as follows:

(1) As soon as it is known when the installation will become surplus, the Field Commissioner AFMOT, will be advised directly by informal memorandum and arrangements made with him for inspection of the property. He will be furnished with any data required to assist him in determining whether the installation has a commercial value and whether the cost of its care, handling and disposition would exceed the estimated proceeds.

111/

RESTRICTED

Hq. HTOUSA Circular #111 (cont'd)

(2) When the installation is actually declared surplus, the Base Section Commander, or Commanding General, AAF/HQ, will report the installation on Form SPB-3 to the Field Commissioner, ALC, for disposal in accordance with paragraphs 8 through 11, HTOUSA Circular Number 92, 1945. (See paragraph 7b and 8 below). If the ALC notifies the reporting officer that disposal by ALC is not warranted, the Base Section or Air Force Commander will make the following disposition:

(a) All items of removable installed equipment which are serviceable or economically repairable will be removed and returned to the appropriate supply depot.

(b) Items of non-removable installed equipment will not be removed if the cost of removal and labor involved will not justify such removal.

(c) All other items will be disposed of as scrap in accordance with paragraph 7, HTOUSA Circular Number 92, 1945, either in place or dismantled and turned in to a Quartermaster Salvage Depot.

(d) Real Estate will be de-requisitioned and the residual value of improvements made by the US Forces will be reported to Allied Commission in accordance with letter referred to in paragraph 2a, above and Section II below. The report to Allied Commission will not include any part of the installation disposed of by the Field Commissioner, ALC, or disposed of as scrap.

e. Real estate on which no expenditures have been made other than for maintenance will be de-requisitioned in accordance with Section II below.

7. Report of excess fixed installations and disposal actions

a. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department in accordance with paragraph 6a, above, is or will be excess to the needs of a Base Section or AAF/HQ, a report will be submitted in 4 copies on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess" to this headquarters, attention: Chief Engineer. The report of excess will be forwarded by this headquarters to the War Department in accordance with current War Department instructions.

b. Where an installation has been disposed of under the authority contained in paragraph 6c, above, and the installation is required to be reported on Parts A, B or C of "Real Property Records", (reference paragraph 2b, above) a report will be submitted in 4 copies on Part D (Eng. Form 1266, 1 May 1945) "Report of Disposal" to this headquarters, attention: Chief Engineer, upon completion of disposal action. Part E will not be submitted on those installations which are reported for disposition to the Field Commissioner, ALC, on Form SPB-3.

8. Policy with respect to US installed equipment in Army installations to be disposed of through ALC or reported to the War Department

a. The policy of the War Department is to remove from installations all removable equipment which is in short supply; to leave as part of the installation all removable installed equipment which is in excess, surplus, or obsolete to supply; and to remove equipment in normal supply only if such removal does not interfere with ultimate disposal. Non-removable installed equipment will

RESTRICTED

AFMUSA Circular #111 (cont'd)

not be removed. The above policy and the procedure outlined below will govern with respect to removal of installed equipment from installations to be disposed of through the Field Commissioner, ALC, or reported to the War Department.

b. A list of items in short, excess, surplus, and obsolete supply will be furnished each command by this headquarters. In addition to this list, the supply status of items listed in War Department ST 38-1 will apply. All items not included in either the short or in excess, surplus, or obsolete supply categories will be considered as being in normal supply.

c. All items of removable installed equipment in short supply will be removed from the installation and returned to depot stocks prior to its disposition or preparation of the report of excess (Part D of the Real Property Record).

d. Removable installed equipment in excess, surplus, or obsolete supply will not be removed unless specifically required by this headquarters.

e. With respect to removable installed equipment in normal supply the Base Section Commander or Commanding General, AAF/ITO, will by informal inquiry to the Field Commissioner, ALC, determine whether the retention of such equipment is desirable as a means of facilitating the ultimate disposal of the installation. If there is a desire for retention of such equipment, it will not be removed. In the case of installations required to be reported as excess on Part D, Eng. Form 1266, a statement of desire for retention of the equipment will be included in the transmittal letter forwarding the report of excess. If there is no desire for the retention of such equipment, it will be removed only if it is economically desirable, taking into consideration the cost of removal, repair, packing and shipment. Equipment removed from an installation prior to the submission of a Report of Excess (Part D, Eng. Form 1266) will be indicated in letter of transmittal forwarding the report of excess.

9. Custodial responsibility - The Base Section Commander or Commanding General, AAF/ITO, will have continuing custodial responsibility for all property declared excess to his needs until it is transferred or abandoned in accordance with instructions of the Field Commissioner, ALC, or until the installation is dismantled and real estate is returned to the owner. All such property will be retained in his control as US Army property until disposition is determined. Pending such determination the installation will not be abandoned or entirely evacuated. A garrison of personnel will be retained for maintenance, security and preservation of the rights of the United States Government.

II---DECOMMISSIONING OF REAL ESTATE

10. Subject to the above, the procedure set forth below will be followed by all US Commands when decommissioning real estate in Italy.

11. For the purposes of this directive, the following definitions will apply:

a. Controlling agency - Any major command which holds territorial jurisdiction for the area concerned. Examples of a controlling agency are FE3, Rome Area Command, or a British District.

RESTRICTED

RESTRICTED

Hq MPOUSA Circular #111 (cont'd)

b. Requisitioning agency - A major command responsible for requisitioning and derequisitioning real estate. Examples are AAF/MPO, US Navy. A controlling agency may be, in some cases, the requisitioning agency.

12. Prior to derequisitioning, all household and office furnishings added by the US during the US occupancy will be removed and returned to the appropriate US supply depot. Such furnishings belonging to the owner will not be removed.

13. Notice of intent to derequisition - The requisitioning headquarters will address notice of intent to derequisition specific real estate to the nearest office of the Genio Militare ten days in advance of evacuation date. At the same time, Genio Militare will be requested to send a representative to make a final inventory of the premises in conjunction with a representative of the requisitioning agency. In those cases where the requisitioning agency is not the controlling agency, the real estate officer of the controlling agency will also be notified of intent to derequisition. If the Genio Militare representative cannot be present at the time of evacuation, derequisitioning procedure will not be delayed. It is, however, most desirable that Genio Militare view all real estate and contents at the time of evacuation since that office will make settlement of claims arising from occupancy.

14. Derequisitioning

a. Inventory

(1) The final inventory will be made by a representative of the requisitioning agency together with the Genio Militare and the owner or the owner's representative. In the absence of both the Genio Militare and the owner, the owner will be represented on the joint inventory by a disinterested officer appointed by the requisitioning agency, or he may be represented by the local Sindaco, Genio Civile or Prefettura. In the case of a quasi-military organization such as the ARS, where the owner of the property is unknown or cannot be located and the Genio Militare is not available, a disinterested officer will be appointed by the requisitioning agency to represent the owner when making the joint inventory.

(2) There will be noted on the final inventory form the following information:

- (a) Contents, fixtures, etc., and condition thereof.
- (b) A full description of any damages to buildings or contents caused by the occupying unit and not the result of fair wear and tear.
- (c) A full description of any damage caused by the occupying unit to crops or land.
- (d) A full description of any improvements made to the property by US Forces. Lists of materials used and an estimate of man and/or equipment hours will also be noted.
- (e) Any failure in agreement between persons conducting the inventory as to contents or condition of premises.
- (f) Signature of all parties making the inventory.

RESTRICTED

44 USA Circ. 4111 (cont'd)

(7) A copy of the final inventory will be retained by the requisitioning agency and a copy will be furnished the real estate officer of the controlling agency and the Genio Militare.

8. The United States will not be divested of responsibility for the real estate until it is returned to the owner, or in the absence of the owner, returned to the Genio Militare, Sindaco, Genio Civile or Prefettura and a receipt obtained therefor. Quit-claims will be obtained whenever possible, copies of which will be furnished the Genio Militare and the real estate officer of the controlling agency.

15. The requisitioning agency will be responsible for maintaining adequate guards for the protection of the real estate and property until divested in responsibility as outlined in paragraph 14b, above. The requisitioning agency will also be responsible that the property is left in a clean and sanitary condition.

16. Misuse, such as willful destruction or looting, of requisitioned property will not be permitted. If such misuse is discovered, the real estate officer will present all available information to the Commanding General or Commanding Officer of the requisitioning agency for appropriate action.

17. The Genio Militare will receive and adjust all claims arising from authorized occupancy of real estate.

18. The principal office of the Genio Militare is:

Ufficio Centrale Controllo Requisizioni,
Via XX Settembre - Roma

Branch offices are called Ufficio Genio Militare Per Requisizioni AA and are located in the following cities:

Ancona	Naples
Bari	Palermo
Bologna	Perugia
Comobasso	Rome
Catania	Taranto
Florence	Turin
Genoa	Vasto
Leghorn	Venice
Milan	

RESTRICTED

Hq MTOUSA Circular #111 (cont'd)

19. Headquarters releasing real estate will report residual value of any improvements made to the property by United States Forces in accordance with reference mentioned in paragraph 2a, above. The value thus reported will be reconciled with the value of improvements listed on inventory required in paragraph 14a, above.

CE 601.1 SPELY

19 June 1945

SUBJECT: Report of Excess Fixed Installations and Disposal Actions

TO: ALL THEATERS, DEPARTMENTS AND SEPARATE BASE COMMANDS

1. Attention is invited to the following references:
 - a. War Department Memorandum No. W 100-44, dated 9 March 1944, "Report on Army Installations in Theaters, Departments and Separate Base Commands."
 - b. Letter from the Chief of Engineers, File CE 601.1 SPELY, dated 5 May 1945, Subject: "Report on Overseas Army Installations."
 - c. War Department Memorandum No. 700-45, dated 9 May 1945, as amended, Subject: "Disposal of Property Overseas," requiring that certain fixed installations if excess to the needs of a theater will be reported on Part D "Report of Excess" to the Chief of Engineers, and reports of disposal action for fixed installations on Form Part E "Report of Disposal" to the Chief of Engineers.
2. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department under War Department Memorandum No. 700-45, as amended, is or will be excess to the needs of a theater, there will be submitted to the Chief of Engineers, Attention: Real Estate, Washington 25, D. C., a report on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess." Upon receipt in the Office, Chief of Engineers, appropriate action will be taken by the War Department and necessary instructions will be issued to the theater commander who will take appropriate action in accordance with Memorandum No. 700-45, as amended.
3. Where the theater commander has authority to dispose of fixed installations in accordance with War Department Memorandum No. 700-45, as amended, and the installations are required to be reported on Parts A, B and C of "Real Property Record," a report will be submitted on Part E (Eng. Form 1266, 1 May 1945) "Report of Disposal" to the Chief of Engineers, Attention: Real Estate, Washington 25, D. C., upon completion of disposal action. This report is required in order to complete the records of the Chief of Engineers with respect to fixed installations reported to him. Part E will not be submitted on those installations which are reported for disposition to Army-Navy Field Liquidation Commissioner on Form SPE-3.

Sincerely,

E. REYBOLD
Lieutenant General
Chief of Engineers

Reports of Investigation (TD AGO Form No 51) (Death (Non Battle) and Injury).....I
 Disposal of Surplus Installations and Release of Real Property.....II

I -- REPORTS OF INVESTIGATION (TD AGO FORM NO 51) (DEATH (NON BATTLE) AND INJURY)

Circular Number 48, this headquarters, 1945, is amended as follows:

1. So much of paragraph 1a(2) as reads "AR 345-415, dated 23 November 1933" is amended to read "AR 345-415, dated 14 August 1945".

2. Paragraph 1c is added as follows:

"1c. Delegation of authority

The following Commanders are hereby delegated authority to take final action on reports of investigation involving only cases of Injury under the provisions of paragraph 11a, AR 345-415 dated 14 August 1945:

- a. Commanding General, 4 USC/ATO
- b. Commanding General, 18th Infantry Division
- c. Commanding General, FLS
- d. Commanding General, Rome Area, ATOUSA."

3. Paragraph 15 is rescinded.

4. Paragraph 16 is rescinded and redesignated as paragraph 15 and the following substituted:

"15. Expediting Reports of Investigation - Every possible effort will be made to expedite the completion and submission of this report, when death is involved, within 15 days after date of death; and when injury only is involved, within 15 days after request by either the soldier's unit commander or the surgeon for an investigation. In cases where an extension of time is necessary, this headquarters will be so informed of reasons for delay, present status of the case, and approximate date of completion of the report of investigation."

5. Paragraph 17 is redesignated paragraph 16.

II - DISPOSAL OF SURPLUS INSTALLATIONS AND RELEASE OF REAL PROPERTY

ATOUSA Circular Number 111, 1945, is amended as follows:

1. All references made to ATOUSA Circular Number 92, 1945, are rescinded.

Hq AFMMA Circular Number 121 (cont'd).

2. Paragraph 6b, is amended to read as follows:

"b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this headquarters, the installation will be reported on Form SPE-3 by the command concerned to the Field Commissioner, AFIC, for disposal in accordance with applicable directives."

3. Paragraph 6c, is rescinded and the following substituted therefor:

"d. Disposal of surplus installations outlined in paragraph c, above, will be as follows:

(1) As soon as it is known when an installation or any portion thereof will become surplus, the base section or air force commander will determine whether the installation or a portion thereof, as the case may be, has a commercial value as such, and in the best interest of the United States Government should be disposed of as an installation; or, whether the sum total of:

- (a) the cost of the care, handling, and maintenance, pending possible sale;
- (b) the estimated recoverable value of removable property;
- (c) the estimated proceeds of scrap sales

would exceed any possible proceeds from sale as an installation.

(2) If it is determined that the installation or a portion thereof has a commercial value as such, it will be reported to the Field Commissioner, AFIC, on Form SPE-3, in accordance with applicable directives.

(3) If it is determined that the installation or any portion thereof has no commercial value the base section or air force commander will make the following disposition:

- (a) All items of removable and non-removable installed equipment which are serviceable or economically repairable will be removed and returned to the appropriate supply depot, provided, the cost of removal and labor involved will justify such removal.
- (b) All other items of U.S. property will be disposed of as scrap in accordance with applicable directives, either in place or dismantled and turned in to a Quartermaster Supply Depot; or, in the event that the residue has no commercial value as scrap or that the cost of its care, handling and disposition would exceed the estimated proceeds, it will be destroyed or abandoned. Any agency authorizing destruction or abandonment shall make and retain a record of the surplus property destroyed or abandoned and the reasons therefor.

RESTRICTED

Hq. ATOUSA Circular Number 121 (cont'd).

- (c) Real Estate will be derequisitioned and the residual value of improvements made by the U.S. Forces will be reported to Allied Commission in accordance with letter referred to in paragraph 2c, above, and Section II below. The report to Allied Commission will not include any part of the installation disposed of by the Field Commissioner, AMIC, or disposed of as scrap.
- (d) When an installation or any portion thereof is disposed of under the provisions of paragraph 6d (3), the agency authorizing such action shall make and retain a record of its findings justifying such action. Two copies of this record will be forwarded to the Chief Engineer, ATOUSA. Attached as Inclosure 1 is a suggested form to be used in recording justification for disposal by this procedure.
- (e) The record outlined in paragraph (d) above will not be required on real estate where no expenditures have been made by the United States other than for maintenance."

4. Paragraph 6e, is rescinded.

Ref: 0/010

3 December 1945

SUBJECT: Cecchiola Barracks (Italian)

TO : Commanding General, STUSA, APO 312, US Army
Attn: Major Coe, G-4 Section

FROM: Commanding General, Rome Area MTOB, APO 784, US Army

1. In accordance with telephone conversation between Major Coe and Lt Colonel Albert this date, request that the Italian Army be authorized to occupy all buildings in Blocks 1200, 1400, 2000, and 2200 of Cecchiola Barracks (six miles south of Rome) which they are now guarding while negotiations between Army-Navy Liquidation Commission (ANLC) and Italian Azienda Ricoveri Alloggiamenti Residenti (ARAR) are in progress. The ARAR plan to turn over the above-mentioned property to the Italian Army when negotiations are completed.

2. These barracks, which are being guarded by the Italian Army since 13 November 1945, are urgently required to house Italian training troops of the newly-organized Italian Army. No Allied troops are occupying same. Part of the barracks at Cecchiola are now occupied by British and Polish, but these barracks are not included in our request in par 1 above and have no bearing on same.

3. On 13 November 1945 when the Italian Army took over the barracks to guard, an officer of the Italian Army signed an inventory statement of removable equipment that was physically present in buildings of Blocks 1200, 1400, 2000, and 2200. This signed statement is held by G-4 Rome Area, STUSA.

4. Due to urgency of getting troops in under cover and to proceed with our plan for training, request that immediate action be taken on the above request.

MEMO TO: See Distribution (For Info)

Data on Cassinagnola Bks.

1. HISTORY. a. Allied combat troops drove Germans out and occupied at the fall of Rome. In unfinished and damaged condition.

b. 12 Oct 44 occupied by 1st Airborne Tug Center. No major improvements made.

c. Feb. 44, 1st Replacement Depot occupied and most of the improvements were made. In Feb. 45, Replacement and Training Comd HQ took over.

d. 1 July 1945, Replacement Co. CPTA occupied until they became non-operative, 15 Oct 45 when RAAC took over to derocquisition.

2. LOCATIONS AND ACCOMMODATIONS. Six (6) miles south of Rome. Capacity 560 male officers, 30 female officers, 20,900 EM, and 1,758 civilians. 160 buildings now in good condition.

3. NATURE OF IMPROVEMENTS. Completely refinished many bldgs. Layed water pipe line six (6) miles from camp to deep well. Installed chlorination and pumping system that supplies 2,400,000 gals water daily. Installed telephone system within camp and to Rome and electric wiring and recepticals in camp. Also installed many toilets, urinals, boilers, heaters, sinks, hot water heaters, showers, windows and built many roads, sidewalks etc.

4. MEDICAL. a. No Hosp accommodations but many buildings would be satisfactory for a 250 bed Sta. Hosp.

b. Prevalent disease at first malaria but many cases have been eliminated.

5. GENERAL. a. Estimated values when U.S. took over \$15,500,000 and in poor condition.

b. Cost of improvements by W.S. \$933,792.89. However, this may be reduced to approx. \$540,717.32 if the amount paid for local labor and material were paid for by lire not backed by W.S. dollars. This question is being clarified by ANLC by 1 Dec.

15 November 1945

To : AFHQ

Attention: General Eberle

1. The question which has been worrying my staff for some time is that of the method by which materials and improvements which have been put into Italian barracks by the U.S. Army while in occupation by them are to be disposed of when those barracks are handed back to the Italian Ministry of War. As far as I can trace, we have had no written directive on this subject, although my Second-in-Command has had certain telephone conversations with officers of MTOUSA, RAAC and ANLAC.
2. In the near future, many of these barracks are to be handed back in accordance with AFHQ Administrative Memorandum No. 48 of 2 November which deals only with the buildings and not with any American material which has been put into them. Under an arrangement made verbally between my Second-in-Command, Major Atkinson, G-4 AFHQ and Major Toliver, RAAC, the movable property which had been put into the large Italian barracks at CECCHIGNOLA were to be turned over to the Italians on a shipping ticket. On the other hand, ANLAC has stated verbally that their instructions are to dispose of this material by auction to the highest bidder. In this case, the Italian barracks have been placed under guard of Italian troops, and the question arises whether the Ministry of War will allow outsiders to enter the premises for the purpose of bidding, although I do not suggest that this will happen.
3. Another side of the question is the desirability of coordinating the methods used by the U.S. with those used by the British, about which we are also in doubt. May I therefore ask for a ruling in writing covering the method of disposing of the various classes of movable and semi-movable material which has been installed by the Allies into Italian barracks, when those barracks are handed back to the Italian Army.

4. I recommend the course advocated in para 2 as being the most practical way of dealing with interior fittings supplied by the U.S. Authorities to Italian Army Barracks.

A.F.H.Q. Admin Memo NO. 48 2 November (copy attached) states that Military Barracks will be returned to the Italian Army. As the War Ministry are the logical users of the barracks fittings they should be handed over to M.M.I.A. on shipping tickets. Compensation would be made by the Italian Government, ~~who would retain the right to offer for resale~~ equipment "on loan" to the War Ministry.

This procedure would be an exception to the general rule and apply only to such Military Barracks as are required for occupation by Italian troops.

APO 512ADMINISTRATIVE MEMORANDUM)
(CORRECTED COPY)
NUMBER 48) (DESTROY ALL OTHERS)

2 November 1945

Accommodation for Italian Armed Forces I
Conditions of Employment, Wage Scales, Bonuses and Allowances, for civilians
employed by the Allied Forces in Italy, Sicily and Sardinia III -- ACCOMMODATION FOR ITALIAN ARMED FORCES

1. The bulk of the Italian Army is shortly to be returned to the control of the Italian Government, when it will become responsible for the preservation of law and order over the mainland of Italy (with certain exceptions) and the islands of SICILY and SARDINIA. In these circumstances it is logical that the Italian War Ministry should be able to locate Italian units from an operational point of view.

2. a. Formation, District, and US major commands will therefore insure that Italian Commanders are given assistance in finding suitable accommodation in the areas required for their troops.

b. Urgent consideration will also be given to releasing to the Italian authorities barracks and other Italian military accommodation which may be in Allied occupation.

c. Any cases where release of accommodation to the Italian Army would be detrimental to the living conditions, morale, or administration of the Allied forces, will be referred for the personal decision of the Commanders of XIII Corps, 2 District, 3 District, RAAG, or US major command, as applicable, for a decision.

d. In all other cases barracks or Italian military accommodation required by the Italian Armed Forces will be returned to the Italian authorities as rapidly as possible.

II -- CONDITIONS OF EMPLOYMENT, WAGE SCALES, BONUSES AND ALLOWANCES, FOR CIVILIANS EMPLOYED BY THE ALLIED FORCES IN ITALY, SICILY AND SARDINIA

1. Paragraph 5c, AFHQ Administrative Memorandum Number 34, 1945, is rescinded and the following substituted therefor with effect from 15 October 1945

"5. c. Overtime - Overtime may be paid at the rate of time-and-one-half for all completed hours worked over forty-eight (48) in any normal pay week or for all completed hours in excess of eight (8) per day where a normal pay week cannot be established. A normal pay week is a pay week during which hours amounting to forty-eight (48) in total are scheduled over a fixed number of days. The computation of overtime in weeks other than normal shall be done on a daily basis of

RESTRICTED

4062

RESTRICTED

AFHQ Administrative Memorandum Number 43 (cont'd).

eight (8) hours per day. Excepted from these conditions are those employees specifically designated in the Appendices as being ineligible for overtime pay. Overtime rates may also be paid in any locality for the seventh consecutive day of working, whether Sunday or a week day. Overtime should be discouraged in the interests of efficiency and the employment of surplus labor.

2. Paragraph 2, AFHQ Administrative Memorandum Number 37, 1945, is amended by the deletion of paragraphs 6b(2) and 6b(3) and substituting the following therefor, with effect from 15 October 1945:

"6. b. (2) The maximum permissible bonus which may be paid is determined by the basic wage applicable to the individual. For this purpose, the basic wage is the remuneration due to an individual upon completion of:

For Monthly Wage Group

30 days work for hotel, mess and club employees.
26 days for other than hotel, mess and club employees.

For Daily Wage Group

either 48 hours within any normal work week
or 8 hours on any one day.

(3) The proportion of bonus payable varies directly with the proportion of basic wage due (as defined in (2) above), subject to the proviso that Cost-of-Living Bonus will not be paid in respect of any day on which no work is performed.

(4) The Cost-of-Living Bonus is not part of the basic wage and will be excluded, for example, from the computations and adjustments for overtime pay and female differential."

Real Property Record, Engineer Form 1266, Part E
Report of Disposal is subject

(signed COMGENMED, CITE NAENG)

Chief of Engineers letter dated 5 May 1945, File CE 601.1 SPELY requires Part A, B, and C on all reportable installations whether active, inactive, excess and surplus or disposed of. In order to complete the records of fixed installations, Part E of the Real Property Record must be submitted upon completion of disposal action on all installations for which Parts A, B, and C are required whether installations are declared surplus by Theater Commander under delegated authority or by the War Department. As to surplus installations reported for disposition to the Army-Navy Field Liquidation Commissioner on SPB-3 or to the surplus property board SPB-5, whether under delegated authority or by War Department authority, a final report submitted on Part E must indicate in "Remarks" to whom custody of the installation was released and the date of such final disposal action. Last sentence of letter from Chief of Engineers, 19 June 1945, File CE 601.1 SPELY, Subject, "Report of excess fixed installations and disposal actions," and last sentence of paragraph 7b of MTOUSA Circular #111, 14 September 1945, are rescinded. As to Surplus Installations reported for disposition to the Army-Navy Field Liquidation Commissioner, whether under delegated authority or by War Department authority, a preliminary report on Part E will be submitted with a statement under "Remarks" indicating that the installation was reported to the Army-Navy Field Liquidation Commissioner and the date of such action.

Reports of Investigation (WD AGO Form No 51) (Death (Non Battle) and Injury)..... I
Disposal of Surplus Installations and Release of Real Property II

I -- REPORTS OF INVESTIGATION (WD AGO FORM NO 51) (DEATH (NON BATTLE) AND INJURY)

Circular Number 48, this headquarters, 1945, is amended as follows:

1. So much of paragraph 1a(2) as reads "AR 345-415, dated 23 November 1933" is amended to read "AR 345-415, dated 14 August 1945".

2. Paragraph 1c is added as follows:

"1c. Delegation of authority

The following Commanders are hereby delegated authority to take final action on reports of investigation involving only cases of injury under the provisions of paragraph 11a, AR 345-415 dated 14 August 1945:

- e. Commanding General, AAFSC/MTG
- b. Commanding General, 88th Infantry Division
- c. Commanding General, PBS
- d. Commanding General, Rome Area, MTUSA.

3. Paragraph 15 is rescinded.

4. Paragraph 16 is rescinded and redesignated as paragraph 15 and the following substituted:

"15. Expediting Reports of Investigation - Every possible effort will be made to expedite the completion and submission of this report, when death is involved, within 15 days after date of death; and when injury only is involved, within 15 days after request by either the soldier's unit commander or the surgeon for an investigation. In cases where an extension of time is necessary, this headquarters will be so informed of reasons for delay, present status of the case, and approximate date of completion of the report of investigation."

5. Paragraph 17 is redesignated paragraph 16.

II - DISPOSAL OF SURPLUS INSTALLATIONS AND RELEASE OF REAL PROPERTY

MTUSA Circular Number 111, 1945, is amended as follows:

1. All references made to MTUSA Circular Number 92, 1945, are rescinded.

C O P YR E S T R I C T E DC O P Y

Hq MPOUSA Circular Number 121 (cont'd).

2. Paragraph 6b, is amended to read as follows:

"b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this headquarters, the installation will be reported on Form SPB-3 by the command concerned to the Field Commissioner, ANLC, for disposal in accordance with applicable directives."

3. Paragraph 6d, is rescinded and the following substituted therefor:

"d. Disposal of surplus installations outlined in paragraph c, above, will be as follows:

(1) As soon as it is known when an installation or any portion thereof will become surplus, the base section or air force commander will determine whether the installation or a portion thereof, as the case may be, has a commercial value as such, and in the best interest of the United States Government should be disposed of as an installation; or, whether the sum total of:

- (a) the cost of the care, handling, and maintenance, pending possible sale;
- (b) the estimated recoverable value of removable property;
- (c) the estimated proceeds of scrap sales

would exceed any possible proceeds from sale as an installation.

(2) If it is determined that the installation or a portion thereof has a commercial value as such, it will be reported to the Field Commissioner, ANLC, on Form SPB-3, in accordance with applicable directives.

(3) If it is determined that the installation or any portion thereof has no commercial value the base section or air force commander will make the following disposition:

- (a) All items of removable and non-removable installed equipment which are serviceable or economically repairable will be removed and returned to the appropriate supply depot, provided, the cost of removal and labor involved will justify such removal.
- (b) All other items of U.S. property will be disposed of as scrap in accordance with applicable directives, either in place or dismantled and turned in to a Quartermaster Supply Depot; or, in the event that the residue has no commercial value as scrap or that the cost of its care, handling and disposition would exceed the estimated proceeds, it will be destroyed or abandoned. Any agency authorizing destruction or abandonment shall make and retain a record of the surplus property destroyed or abandoned and the reasons therefor.

RESTRICTED

Hq MTOUSA Circular Number 121 (cont'd).

- (c) Real Estate will be derequisitioned and the residual value of improvements made by the U.S. Forces will be reported to Allied Commission in accordance with letter referred to in paragraph 2c, above, and Section II below. The report to Allied Commission will not include any part of the installation disposed of by the Field Commissioner, ANLC, or disposed of as scrap.
- (d) When an installation or any portion thereof is disposed of under the provisions of paragraph 6d (3), the agency authorizing such action shall make and retain a record of its findings justifying such action. Two copies of this record will be forwarded to the Chief Engineer, MTOUSA. Attached as Inclosure 1 is a suggested form to be used in recording justification for disposal by this procedure.
- (e) The record outlined in paragraph (d) above will not be required on real estate where no expenditures have been made by the United States other than for "maintenance."

4. Paragraph 6e, is rescinded.

Reports of Investigation (WD AGO Form No 51) (Death (Non Battle) and Injury)..... I
Disposal of Surplus Installations and Release of Real Property II

I -- REPORTS OF INVESTIGATION (WD AGO FORM NO 51) (DEATH (NON BATTLE) AND INJURY)

Circular Number 46, this headquarters, 1945, is amended as follows:

1. So much of paragraph 1a(2) as reads "AR 345-415, dated 26 November 1933" is amended to read "AR 345-415, dated 14 August 1945".

2. Paragraph 1c is added as follows:

"1c. Delegation of authority

The following Commanders are hereby delegated authority to take final action on reports of investigation involving only cases of Injury under the provisions of paragraph 11a, AR 345-415 dated 14 August 1945:

- a. Commanding General, AAFSC/MTO
- b. Commanding General, 88th Infantry Division
- c. Commanding General, PBS
- d. Commanding General, Rome Area, MTUSA".

3. Paragraph 15 is rescinded.

4. Paragraph 16 is rescinded and redesignated as paragraph 15 and the following substituted:

"15. Expediting Reports of Investigation - Every possible effort will be made to expedite the completion and submission of this report, when death is involved, within 15 days after date of death; and when injury only is involved, within 15 days after request by either the soldier's unit commander or the surgeon for an investigation. In cases where an extension of time is necessary, this headquarters will be so informed of reasons for delay, present status of the case, and approximate date of completion of the report of investigation."

5. Paragraph 17 is redesignated paragraph 16.

II -- DISPOSAL OF SURPLUS INSTALLATIONS AND RELEASE OF REAL PROPERTY

MTUSA Circular Number 111, 1945, is amended as follows:

1. All references made to MTUSA Circular Number 92, 1945, are rescinded.

R E S T R I C T E D

C O P Y

Hq MTOUSA Circular Number 121 (cont'd).

2. Paragraph 5b, is amended to read as follows:

"b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this headquarters, the installation will be reported on Form SPB-3 by the command concerned to the Field Commissioner, ANLC, for disposal in accordance with applicable directives."

3. Paragraph 5d, is rescinded and the following substituted therefor:

"d. Disposal of surplus installations outlined in paragraph c, above, will be as follows:

(1) As soon as it is known when an installation or any portion thereof will become surplus, the base section or air force commander will determine whether the installation or a portion thereof, as the case may be, has a commercial value as such, and in the best interest of the United States Government should be disposed of as an installation; or, whether the sum total of:

- (a) the cost of the care, handling, and maintenance, pending possible sale;
- (b) the estimated recoverable value of removable property;
- (c) the estimated proceeds of scrap sales

would exceed any possible proceeds from sale as an installation.

(2) If it is determined that the installation or a portion thereof has a commercial value as such, it will be reported to the Field Commissioner, ANLC, on Form SPB-3, in accordance with applicable directives.

(3) If it is determined that the installation or any portion thereof has no commercial value the base section or air force commander will make the following disposition:

- (a) All items of removable and non-removable installed equipment which are serviceable or economically repairable will be removed and returned to the appropriate supply depot, provided, the cost of removal and labor involved will justify such removal.
- (b) All other items of U.S. property will be disposed of as scrap in accordance with applicable directives, either in place or dismantled and turned in to a Quartermaster Supply Depot; or, in the event that the residue has no commercial value as scrap or that the cost of its care, handling and disposition would exceed the estimated proceeds, it will be destroyed or abandoned. Any agency authorizing destruction or abandonment shall make and retain a record of the surplus property destroyed or abandoned and the reasons therefor.

R E S T R I C T E D

Hq MTOUSA Circular Number 121 (cont'd).

- (c) Real Estate will be derequisitioned and the residual value of improvements made by the U.S. Forces will be reported to Allied Commission in accordance with letter referred to in paragraph 2c, above, and Section II below. The report to Allied Commission will not include any part of the installation disposed of by the Field Commissioner, ANLC, or disposed of as scrap.
- (d) When an installation or any portion thereof is disposed of under the provisions of paragraph 6d (3), the agency authorizing such action shall make and retain a record of its findings justifying such action. Two copies of this record will be forwarded to the Chief Engineer, MTOUSA. Attached as Inclosure 1 is a suggested form to be used in recording justification for disposal by this procedure.
- (e) The record outlined in paragraph (d) above will not be required on real estate where no expenditures have been made by the United States other than for maintenance."

4. Paragraph 6c, is rescinded.

DISPOSAL OF SURPLUS INSTALLATIONS
AND RELEASE OF REAL PROPERTY

Disposal of Surplus Army InstallationsI
Derequisitioning of Real EstateII

1. The following instructions are hereby rescinded:

- a. MATSUSA letter, file AG 686/235 DTC-D, subject, "Release or Abandonment of Airfields", dated 8 January 1944, addressed to Commanding General, AAF/MTO.
- b. MATSUSA letter, file AG 600.91/110 EACR-D, subject, "Reports on Army Overseas Installations", dated 31 May 1945.
- c. MATSUSA letter, file AG 602.1/320 D-D subject: "Vacating of Requisitioned Property", dated 7 July 1945.
- d. TOSUSA Redeployment Circular Number 13, dated 12 May 1945 and Change Number 1, dated 27 Apr 1945.
- e. Paragraph 6, MATSUSA Circular Number 92, dated 29 June 1945.

2. References

- a. MATSUSA Circular Number 92, dated 29 June 1945.
- b. MATSUSA letter, file AG 600.91/110 EACR-D, subject: "Report on Overseas Army Installations", dated 1 August 1945.
- c. MATSUSA Engineer Letter, subject: "Reports Required by Allied Commission", dated 21 August 1945.

I -- DISPOSAL OF SURPLUS ARMY INSTALLATIONS

3. Purpose - The purpose of this directive is to establish a procedure in this theater for the disposition of surplus US Army installations (except Special Signal installations) and for the removal of US Army equipment and materials installed therein in accordance with the policies established in War Department Memoranda Number 700-45, subject: "Disposal of Property Overseas", dated 9 May 1945, as amended 30 June 1945 and 20 July 1945 and Number 700-45, subject: "Policy With Respect to United States Installed Equipment in Overseas Army Installations", dated 24 July 1945, and letter from Chief of Engineers War Department, subject: "Report of Excess Fixed Installations and Disposal Actions", dated 19 June 1945. Special Signal installations will be disposed of

RESTRICTED - 1 -

4047

in accordance with Item 3, Section IX, AFHQ Signal Instructions, dated 22 November 1944.

4. Definitions

a. Fixed Installation

(1) A unit of real property not in a combat zone, leased, purchased or otherwise acquired by agreement, expressed or implied, together with any improvements constructed thereon, for the United States Army, at which a specific Military function is performed.

(2) A unit of real property not in a combat zone at which there have been accomplished repairs, modifications, or replacements to existing facilities such as roads, railroads, bridges, utilities, ports, airfields, depots and similar properties utilized by the US Army, where the repairs, modifications or replacements are of such type construction as to have a potential postwar economic value.

b. Removable installed equipment - (Applies to equipment installed by or ~~for~~ for the US Army). Equipment which can be removed without damage to the structure or real property or without rendering the structure or property useless. Examples of removable installed equipment are boilers, power plants, motor generator sets, industrial production equipment, communication equipment, pre-fabricated huts, etc.

c. Non-removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which cannot be removed without damage to the structure or real property or without rendering it useless. Examples of non-removable installed equipment are sewage piping, water piping, steam piping, electrical or communications wiring, etc.

d. Definitions listed in paragraph 2, POWSA Circular Number 92, 1945, are applicable to this directive.

5. Base Section Commanders and the Commanding General, MAT/HTC, will take aggressive action to insure that all installations and real property, not absolutely essential to the needs of redeployment or occupational forces, are immediately released in accordance with instructions below. Special attention will be given to the release of civilian hospital, industrial, educational and agricultural facilities.

6. Disposal of installations

a. Installations to be reported to this Headquarters prior to disposal - Installations of the following categories determined to be excess to the needs of the Base Section Commander or Commanding General, MAT/HTC, will be reported to this headquarters for reference to the War Department for disposition instructions (See paragraphs 7a and 8 below).

(1) all installations regardless of United States investment which have major strategic or economic value.

(2) all airfields in which the estimated United States investment at the time of determination in excess is more than \$100,000.

(3) All installations which are terminal stations or of stations tributary to the Army Command and Administrative Network.

(4) All petroleum and port installations of the following types in which the United States investment at the time of determination in excess is more than \$100,000:

- (a) Tank farms.
- (b) Petroleum pipe lines.
- (c) Petroleum pumping installations.
- (d) Petroleum distribution systems.
- (e) Petroleum refineries.
- (f) Petroleum loading terminals.
- (g) Can and drum plants.
- (h) Piers and wharves.
- (i) Barges.
- (j) Fixed port unloading facilities.
- (k) Tanker unloading facilities.
- (l) Marine repair facilities.

b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this headquarters, the installations will be reported on Form 3-3-3 by the command concerned to the Field Commissioner, AMC, for disposal in accordance with AFMRA Circular Number 92, 1945. (Amended by Cir. 121)

c. Installations to be disposed of by authority of Base Section Commander or Commanding General AMF/MC - all other types of installations not included in paragraph a, above, will be considered surplus without further authorization when they are determined by the Base Section Commander or Commanding General, AMF/MC, to be excess to current needs. However, clearance will be obtained from this headquarters prior to disposition of any airfield, port facility or petroleum installation, or of installations with a housing capacity of over 5,000 men, installations specifically constructed or acquired by direction of this headquarters, or installations which may, in the opinion of the controlling command, be of use to another agency or command.

d. (Repealed) - (See Cir. 121)

7. Report of excess fixed installations and disposal actions.

e. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department in accordance with paragraph 6-1 6a, above, is or will be excess to the needs of a

Base Section or AF/AFG, a report will be submitted in 4 copies on Part D (Mag. Form 1206, 1 May 1945) "Report of Excess" to this headquarters, attention: Chief Engineer. The report of excess will be forwarded by this headquarters to the War Department in accordance with current War Department instructions.

b. Where an installation has been disposed of under the authority contained in paragraph 6c, above, and the installation is required to be reported on Parts A, B or C of "Real Property Records", (reference paragraph 2b, above) a report will be submitted in 4 copies on Part E (Mag. Form 1205, 1 May 1945) "Report of Disposal" to this headquarters, attention: Chief Engineer, upon completion of disposal action. Part E will not be submitted on those installations which are reported for disposition to the Field Commissioner, AFCE, on Form SPB-3.

3. With respect to GS installed equipment in army installations to be disposed of through AFCE or reported to the War Department

a. The policy of the War Department is to remove from installations all removable equipment which is in short supply; to leave as part of the installation all removable installed equipment which is in excess, surplus, or obsolete supply; and to remove equipment in normal supply only if such removal does not interfere with ultimate disposal. Non-removable installed equipment will not be removed. The above policy and the procedure outlined below will govern with respect to removal of installed equipment from installations to be disposed of through the Field Commissioner, AFCE, or reported to the War Department.

b. A list of items in short, excess, surplus, and obsolete supply will be furnished each command by this headquarters. In addition to this list, the supply status of items listed in War Department SS 38-1 will apply. All items not included in either the short or in excess, surplus, or obsolete supply categories will be considered as being in normal supply.

c. All items of removable installed equipment in short supply will be removed from the installation and returned to depot stock prior to its disposition or preparation of the report of excess (Part D of the Real Property Record).

d. Removable installed equipment in excess, surplus, or obsolete supply will not be removed unless specifically required by this headquarters.

e. With respect to removable installed equipment in normal supply the Base Section Commander or Commanding General, AF/AFG, will by informal inquiry to the Field Commissioner, AFCE, determine whether the retention of such equipment is desirable as a means of facilitating the ultimate disposal of the installation. If there is a desire for retention of such equipment, it will not be removed. In the case of installations required to be reported as excess on Part D, Mag. Form 1206, a statement of desire for retention of the equipment will be included in the transmittal letter forwarding the report of excess.

If there is no desire for the retention of such equipment, it will be removed only if it is economically desirable, taking into consideration the cost of removal, repair, packing and shipment. Equipment removed from an installation prior to the submission of a Report of Excess (Part D, Eng. Form 1266) will be indicated in letter of transmittal forwarding the report of excess.

9. Custodial responsibility - The Base Section Commander or Commanding General, AAF/MTO, will have continuing custodial responsibility for all property declared excess to his needs until it is transferred or abandoned in accordance with instructions of the Field Commissioner, ANLS, or until the installation is dismantled and real estate is returned to the owner. All such property will be retained in his control as US Army property until disposition is determined. Pending such determination the installation will not be abandoned or entirely evacuated. A minimum of personnel will be retained for maintenance, security and preservation of the rights of the United States Government.

II---DEREQUISITIONING OF REAL ESTATE

10. Subject to the above, the procedure set forth below will be followed by all US Commands when derequisitioning real estate in Italy.

11. For the purposes of this directive, the following definitions will apply:

a. Controlling agency - Any major command which holds territorial jurisdiction for the area concerned. Examples of a controlling agency are PES, Rome Area Command, or a British District.

b. Requisitioning agency - A major command responsible for requisitioning and derequisitioning real estate. Examples are AAF/MTO, US Navy. A controlling agency may be, in some cases, the requisitioning agency.

12. Prior to derequisitioning, all household and office furnishings added by the US during the US occupancy will be removed and returned to the appropriate US supply depot. Such furnishings belonging to the owner will not be removed.

13. Notice of intent to derequisition - The requisitioning headquarters will address notice of intent to derequisition specific real estate to the nearest office of the Genio Militare ten days in advance of evacuation date. At the same time, Genio Militare will be requested to send a representative to make a final inventory of the premises in conjunction with a representative of the requisitioning agency. In those cases where the requisitioning agency is not the controlling agency, the real estate officer of the controlling agency will also be notified of intent to derequisition. If the Genio Militare representative cannot be present at the time of evacuation, derequisitioning

procedure will not be delayed. It is however, most desirable that Genio Militare view all real estate and contents at the time of evacuation since that office will make settlement of claims arising from occupancy.

14. Derequisitioning

a. Inventory

(1) The final inventory will be made by a representative of the requisitioning agency together with the Genio Militare and the owner or the owner's representative. In the absence of both the Genio Militare and the owner, the owner will be represented on the joint inventory by a disinterested officer appointed by the requisitioning agency, or he may be represented by the local Sindaco, Genio Civile or Prefettura. In the case of a quasi-military organization such as the ARC, where the owner of the property is unknown or cannot be located and the Genio Militare is not available, a disinterested officer will be appointed by the requisitioning agency to represent the owner when making the joint inventory.

(2) There will be noted on the final inventory form the following information:

- (a) Contents, fixtures, etc., and condition thereof.
- (b) A full description of any damages to buildings or contents caused by the occupying unit and not the result of fair wear and tear.
- (c) A full description of any damage caused by the occupying unit to crops or land.
- (d) A full description of any improvements made to the property by US forces. Lists of materials used and an estimate of man and/or equipment hours will also be noted.
- (e) Any failures in agreement between persons conducting the inventory as to contents or condition of premises.
- (f) Signature of all parties making the inventory.

(3) A copy of the final inventory will be retained by the requisitioning agency and a copy will be furnished the real estate officer of the controlling agency and the Genio Militare.

b. The United States will not be divested of responsibility for the real estate until it is returned to the owner, or in the absence of the owner, returned to the Genio Militare, Sindaco, Genio Civile or Prefettura and a receipt obtained therefor. Quit-claims will be obtained whenever possible, copies of which will be furnished the Genio Militare and the real estate officer of the controlling agency.

15. The requisitioning agency will be responsible for maintaining adequate guards for the protection of the real estate and property until divested in responsibility as outlined in paragraph 14b, above. The requisitioning agency will also be responsible that the property is left in a clean and sanitary condition.

16. Misuse, such as willful destruction or looting, of requisitioned property will not be permitted. If such misuse is discovered, the real estate officer will present all available information to the Commanding General or Commanding Officer of the requisitioning agency for appropriate action.

17. The Genio Militare will receive and adjust all claims arising from authorized occupancy of real estate.

18. The principal office of the Genio Militare is:

Ufficio Centrale Controllo Requisizioni,
Via XX Settembre - Rome

Branch offices are called Ufficio Genio Militare Per Requisizione AA and are located in the following cities:

Ancona	Naples
Bari	Palermo
Bologna	Perugia
Comobasso	Rome
Catania	Taranto
Florence	Turin
Genoa	Vasto
Leghorn	Venice
Milan	

19. Headquarters releasing real estate will report residual value of any improvements made to the property by United States forces in accordance with reference mentioned in paragraph 2c, above. The value thus reported will be reconciled with the value of improvements listed on inventory required in paragraph 14a, above.

BY COMMAND OF GENERAL MCNARNEY:

OFFICIAL
/s/ C. W. Christenberry
C. W. CHRISTENBERRY
Colonel, AGD
Adjutant General

H. G. WHITE
Major General, GSC
Acting Chief of Staff

CE 601.1 SPELY

19 June 1945

SUBJECT: Report of Excess Fixed Installations and Disposal Actions

TO: ALL THEATERS, DEPARTMENTS AND SEPARATE BASE COMMANDS

1. Attention is invited to the following references:
 - a. War Department Memorandum No. W 100-44, dated 9 March 1944, "Report on Army Installations in Theaters, Departments and Separate Base Commands."
 - b. Letter from the Chief of Engineers, File CE 601.1 SPELY, dated 5 May 1945, Subject: "Report on Overseas Army Installations."
 - c. War Department Memorandum No. 700-45, dated 9 May 1945, as amended, Subject: "Disposal of Property Overseas," requiring that certain fixed installations if excess to the needs of a theater will be reported on Part D "Report of Excess" to the Chief of Engineers.
2. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department under War Department Memorandum No. 700-45, as amended, is or will be excess to the needs of a theater, there will be submitted to the Chief of Engineers, Attention: Real Estate, Washington 25, D. C., a report on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess." Upon receipt in the Office, Chief of Engineers appropriate action will be taken by the War Department and necessary instructions will be issued to the theater commander who will take appropriate action in accordance with Memorandum No. 700-45, as amended.
3. Where the theater commander has authority to dispose of fixed installations in accordance with War Department Memorandum No. 700-45, as amended, and the installations are required to be reported on Parts A, B and C of "Real Property Record," a report will be submitted on Part E (Eng. Form 1266, 1 May 1945) "Report of Disposal" to the Chief of Engineers, Attention: Real Estate, Washington 25, D. C., upon completion of disposal action. This report is required in order to complete the records of the Chief of Engineers with respect to fixed installations reported to him. Part E will not be submitted on those installations which are reported for disposition to Army-Navy Field Liquidation Commissioner on Form SPE-3.

Sincerely,

E. REVBOLD
Lieutenant General
Chief of Engineers

I -- DISPOSAL OF SURPLUS ARMY INSTALLATIONS

3. Purpose - The purpose of this directive is to establish a procedure in this theater for the disposition of surplus US Army installations (except Special Signal installations) and for the removal of US Army equipment and materials installed therein in accordance with the policies established in War Department Memoranda Number 700-45, subject: "Disposal of Property Overseas", dated 9 May 1945, as amended 30 June 1945 and 20 July 1945 and Number 700-45, subject: "Policy With Respect to United States Installed Equipment in Overseas Army Installations" dated 24 July 1945, and letter from Chief of Engineers War Department subject: "Report of Excess Fixed Installations and Disposal Act" dated 19 June 1945. Special Signal installations will be dis

RESTRICTED - 1 -

4039

in accordance with Item 3, Section IX, AFHQ Signal Instructions, dated 22 November 1944.

4. Definitions

a. Fixed Installation

(1) A unit of real property not in a combat zone, leased, purchased or otherwise acquired by agreement, expressed or implied, together with any improvements constructed thereon, for the United States Army, at which a specific military function is performed.

(2) A unit of real property not in a combat zone at which there have been accomplished repairs, modifications, or replacements to existing facilities such as roads, railroads, bridges, utilities, ports, airfields, depots and similar properties utilized by the US Army, where the repairs, modifications or replacements are of such type construction as to have a potential postwar economic value.

b. Removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which can be removed without damage to the structure or real property or without rendering the structure or property useless. Examples of removable installed equipment are boilers, power plants, motor generator sets, industrial production equipment, communication equipment, pre-fabricated huts, etc.

c. Non-removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which cannot be removed without damage to the structure or real property or without rendering it useless. Examples of non-removable installed equipment are sewage piping, water piping, steam piping, electrical or communications wiring, etc.

d. Definitions listed in paragraph 2, AFMCA Circular Number 92, 1945, are applicable to this directive.

5. Base Section Commanders and the Commanding General, AAF/WFO, will take aggressive action to insure that all installations and real property, not absolutely essential to the needs of redeployment or occupational forces, are immediately released in accordance with instructions below. Special attention will be given to the release of civilian hospital, industrial, educational and agricultural facilities.

6. Disposal of Installations

a. Installations to be reported to this Headquarters prior to disposal - Installations of the following categories determined to be excess to the needs of the Base Section Commander or Commanding General, AAF/WFO, will be reported to this headquarters for reference to the War Department for disposition instructions (See paragraphs 7a and 8 below).

- (1) All installations regardless of United States investment which have major strategic or economic value.
- (2) All airfields in which the estimated United States investment at the time of determination as excess is more than \$100,000.
- (3) All installations which are terminal stations of or stations tributary to the Army Command and Administrative Network.
- (4) All petroleum and port installations of the following types in which the United States investment at the time of determination as excess is more than \$100,000:

- (a) Tank farms.
- (b) Petroleum pipe lines.
- (c) Petroleum pumping installations.
- (d) Petroleum distribution systems.
- (e) Petroleum refineries.
- (f) Petroleum loading terminals.
- (g) Can and drum plants.
- (h) Piers and wharves.
- (i) Berths.
- (j) Fixed port unloading facilities.
- (k) Tanker unloading facilities.
- (l) Marine repair facilities.

b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this Headquarters, the installations will be reported on Form SB-3 by the command concerned to the Field Commissioner, AMIS, for disposal in accordance with TOWA Circular Number 92, 1945. (Amended by Cir. 121)

c. Installations to be disposed of by authority of Base Section Commander or Commanding General AAF/AFK - all other types of installations not included in paragraph a, above, will be considered surplus without further authorization when they are determined by the Base Section Commander or Commanding General, AAF/AFK, to be excess to current needs. However, clearance will be obtained from this Headquarters prior to disposition of any airfield, port facility or petroleum installations, or of installations with a housing capacity of over 5,000 men, installations specifically constructed or acquired by direction of this Headquarters, or installations which may, in the opinion of the controlling command, be of use to another agency or command.

d. (Rescinded) - (See Cir. 121)

7. Report of excess fixed installations and disposal actions.

a. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department in accordance with paragraph 6a, above, is or will be excess to the needs of a

Base Section or AAF/MTO, a report will be submitted in 4 copies on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess" to this headquarters, attention: Chief Engineer. The report of excess will be forwarded by this headquarters to the War Department in accordance with current War Department instructions.

b. Where an installation has been disposed of under the authority contained in paragraph 6c, above, and the installation is required to be reported on Parts A, B or C of "Real Property Record", (reference paragraph 2b, above) a report will be submitted in 4 copies on Part E (Eng. Form 1266, 1 May 1945) "Report of Disposal" to this headquarters, attention: Chief Engineer, upon completion of disposal action. Part E will not be submitted on those installations which are reported for disposition to the Field Commissioner, AAF, on Form 1266-3.

5. Policy with respect to be installed equipment in Army installations to be disposed of through AAF or reported to the War Department

a. The policy of the War Department is to remove from installations all removable equipment which is in short supply; to leave as part of the installation all removable installed equipment which is in excess, surplus, or obsolete supply; and to remove equipment in normal supply only if such removal does not interfere with ultimate disposal. Non-removable installed equipment will not be removed. The above policy and the procedure outlined below will govern with respect to removal of installed equipment from installations to be disposed of through the Field Commissioner, AAF, or reported to the War Department.

b. A list of items in short, excess, surplus, and obsolete supply will be furnished each command by this headquarters. In addition to this list, the supply status of items listed in War Department SB 18-1 will apply. All items not included in either the short or in excess, surplus, or obsolete supply categories will be considered as being in normal supply.

c. All items of removable installed equipment in short supply will be removed from the installation and returned to depot stocks prior to its disposition or preparation of the report of excess (Part D of the Real Property Record).

d. Removable installed equipment in excess, surplus, or obsolete supply will not be removed unless specifically required by this headquarters.

e. With respect to removable installed equipment in normal supply the Base Section Commander or Commanding General, AAF/MTO, will by informal inquiry to the Field Commissioner, AAF, determine whether the retention of such equipment is desirable as a means of facilitating the ultimate disposal of the installation. If there is a desire for retention of such equipment, it will not be removed. In the case of installations required to be reported as excess on Part D, Eng. Form 1266, a statement of desire for retention of the equipment will be included in the transmitted letter forwarding the report of excess.

if there is no desire for the retention of such equipment, it will be removed only if it is economically desirable, taking into consideration the cost of removal, repair, packing and shipment. Equipment removed from an installation prior to the submission of a Report of Excess (Part D, Eng. Form 1286) will be indicated in letter of transmittal forwarding the report of excess.

9. Custodial responsibility - The Base Section Commander or Commanding General, AAF/WFO, will have continuing custodial responsibility for all property declared excess to his needs until it is transferred or abandoned in accordance with instructions of the Field Commander, AAFG, or until the installation is dismantled and real estate is returned to the owner. All such property will be retained in his control as US Army property until disposition is determined. Pending such determination the installation will not be abandoned or entirely evacuated. A minimum of personnel will be retained for maintenance, security and preservation of the rights of the United States Government.

II--DEREGUISHIONING OF REAL ESTATE

10. Subject to the above, the procedure set forth below will be followed by all US Commands when deregquisitioning real estate in Italy.

11. For the purposes of this directive, the following definitions will apply:

a. Controlling agency - Any major command which holds territorial jurisdiction for the area concerned. Examples of a controlling agency are PHS, Rome Area Command, or a British District.

b. Requisitioning agency - A major command responsible for requisitioning and deregquisitioning real estate. Examples are AAF/WFO, US Navy. A controlling agency may be, in some cases, the requisitioning agency.

12. Prior to deregquisitioning, all household and office furnishings added by the US during the US occupancy will be removed and returned to the appropriate US supply depot. Such furnishings belonging to the owner will not be removed.

13. Notice of Intent to deregquisition - The requisitioning headquarters will address notice of intent to deregquisition specific real estate to the nearest office of the Genio Militare ten days in advance of evacuation date. At the same time, Genio Militare will be requested to send a representative to make a final inventory of the premises in conjunction with a representative of the requisitioning agency. In those cases where the requisitioning agency is not the controlling agency, the real estate officer of the controlling agency will also be notified of intent to deregquisition. If the Genio Militare representative cannot be present at the time of evacuation, deregquisitioning

procedure will not be delayed. It is however, most desirable that Genio Militare view all real estate and contents at the time of evacuation since that office will make settlement of claims arising from occupancy.

14. Derequisitioning

a. Inventory

(1) The final inventory will be made by a representative of the requisitioning agency together with the Genio Militare and the owner or the owner's representative. In the absence of both the Genio Militare and the owner, the owner will be represented on the joint inventory by a disinterested officer appointed by the requisitioning agency, or he may be represented by the local Sindaco, Genio Civile or Prefettura. In the case of a quasi-military organization such as the ARC, where the owner of the property is unknown or cannot be located and the Genio Militare is not available, a disinterested officer will be appointed by the requisitioning agency to represent the owner when making the joint inventory.

(2) There will be noted on the final inventory form the following information:

- (a) Contents, fixtures, etc., and condition thereof.
- (b) A full description of any damages to buildings or contents caused by the occupying unit and not the result of fair wear and tear.
- (c) A full description of any damage caused by the occupying unit to crops or land.
- (d) A full description of any improvements made to the property by US Forces. Lists of materials used and an estimate of man and/or equipment hours will also be noted.
- (e) Any failure in agreement between persons conducting the inventory as to contents or condition of premises.
- (f) Signature of all parties making the inventory.

(3) A copy of the final inventory will be retained by the requisitioning agency and a copy will be furnished the real estate officer of the controlling agency and the Genio Militare.

b. The United States will not be divested of responsibility for the real estate until it is returned to the owner, or in the absence of the owner, returned to the Genio Militare, Sindaco, Genio Civile or Prefettura and a receipt obtained therefor. Quit-claims will be obtained whenever possible, copies of which will be furnished the Genio Militare and the real estate officer of the controlling agency.

15. The requisitioning agency will be responsible for maintaining adequate guards for the protection of the real estate and property until divested in responsibility as outlined in paragraph 14b, above. The requisitioning agency will also be responsible that the property is left in a clean and sanitary condition.

16. Misuse, such as willful destruction or looting, of requisitioned property will not be permitted. If such misuse is discovered, the real estate officer will present all available information to the Commanding General or Commanding Officer of the requisitioning agency for appropriate action.

17. The Genio Militare will receive and adjust all claims arising from authorized occupancy of real estate.

18. The principal office of the Genio Militare is:

Ufficio Generale Controllo Requisizioni,
Via XX Settembre - Rome

Branch offices are called Ufficio Genio Militare Per Requisizioni AA and are located in the following cities:

Ancona	Naples
Bari	Palermo
Bologna	Perugia
Compiobasso	Rome
Catania	Taranto
Florence	Turin
Genoa	Vasto
Leghorn	Venice
Milan	

4032

19. Headquarters releasing real estate will report residual value of any improvements made to the property by United States forces in accordance with reference mentioned in paragraph 2c, above. The value thus reported will be reconciled with the value of improvements listed on inventory required in paragraph 14a, above.

DISPOSAL OF SURPLUS INSTALLATIONS
AND RELEASE OF REAL PROPERTY

Disposal of Surplus Army Installations I
Deacquisition of Real Estate II

1. The following instructions are hereby resolded:

- a. MATOUSA letter, file AG 686/235 DTI-0, subject, "Release or Abandonment of Airfields", dated 8 January 1944, addressed to Commanding General, SAG/MTD.
- b. MATOUSA letter, file AG 600.91/110 MWR-0, subject, "Reports on Army Overseas Installations", dated 31 May 1945.
- c. MATOUSA letter, file AG 602.1/320 D-0 subject: "Vacating of Requisitioned Property", dated 7 July 1945.
- d. MATOUSA Redeployment Circular Number 13, dated 12 May 1945 and Change Number 1, dated 27 Apr 1945.
- e. Paragraph 6, MATOUSA Circular Number 92, dated 29 June 1945.

2. References

- a. MATOUSA Circular Number 92, dated 29 June 1945.
- b. MATOUSA letter, file AG 600.91/110 MWR-0, subject: "Report on Overseas Army Installations", dated 1 August 1945.
- c. MATOUSA engineer letter, subject: "Reports Required by Allied Commission", dated 21 August 1945.

I -- DISPOSAL OF SURPLUS ARMY INSTALLATIONS

3. Purpose - The purpose of this directive is to establish a procedure in this theater for the disposition of surplus US Army installations (except Special Signal installations) and for the removal of US Army equipment and materials installed therein in accordance with the policies established in War Department Memoranda Number 700-45, subject: "Disposal of Property Overseas", dated 9 May 1945, as amended 30 June 1945 and 20 July 1945 and Number 700-45, subject: "Policy With Respect to United States Installed Equipment in Overseas Army Installations", dated 24 July 1945, and letter from Chief of Engineers War Department, subject: "Report of Excess Fixed Installations and Disposal Actions", dated 19 June 1945. Special Signal installations will be disposed of

R E S T R I C T E D - 1 -

in accordance with Item 3, Section IX, AFHQ Signal Instructions, dated 22 November 1944.

4. Definitions

a. Fixed installation

(1) A unit of real property not in a combat zone, leased, purchased or otherwise acquired by agreement, expressed or implied, together with any improvements constructed thereon, for the United States Army, of which a specific Military function is performed.

(2) A unit of real property not in a combat zone at which there have been accomplished repairs, modifications, or replacements to existing facilities such as roads, railroads, bridges, utilities, ports, airfields, depots and similar properties utilized by the US Army, where the repairs, modifications or replacements are of such type construction as to have a potential postwar economic value.

b. Removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which can be removed without damage to the structure or real property or without rendering the structure or property useless. Examples of removable installed equipment are boilers, power plants, motor generator sets, industrial production equipment, communication equipment, pre-fabricated huts, etc.

c. Non-removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which cannot be removed without damage to the structure or real property or without rendering it useless. Examples of non-removable installed equipment are sewage piping, water piping, steam piping, electrical or communications wiring, etc.

d. Definitions listed in paragraph 2, AFHQ Circular Number 92, 1945, are applicable to this directive.

5. Base Section Commanders and the Commanding General, AAF/MTG, will take aggressive action to insure that all installations and real property, not absolutely essential to the needs of redeployment or occupational forces, are immediately released in accordance with instructions below. Special attention will be given to the release of civilian hospital, industrial, educational and agricultural facilities.

6. Disposal of installations

a. Installations to be reported to this Headquarters prior to disposal - Installations of the following categories determined to be excess to the needs of the Base Section Commander or Commanding General, AAF/MTG, will be reported to this headquarters for reference to the War Department for disposition instructions (See paragraphs 7a and 8 below).

(1) All installations regardless of United States investment which have major strategic or economic value.

(2) All airfields in which the estimated United States investment at the time of determination in excess is more than \$100,000.

(3) All installations which are terminal stations of or stations tributary to the Army Command and Administrative Network.

(4) All petroleum and port installations of the following types in which the United States investment at the time of determination in excess is more than \$100,000:

- (a) Tank farms.
- (b) Petroleum pipe lines.
- (c) Petroleum pumping installations.
- (d) Petroleum distribution systems.
- (e) Petroleum refineries.
- (f) Petroleum loading terminals.
- (g) Can and drum plants.
- (h) Piers and wharves.
- (i) Barges.
- (j) Fixed port unloading facilities.
- (k) Tanker unloading facilities.
- (l) Marine repair facilities.

b. Upon the declaration of an installation of the above categories as surplus to the War Department, and upon instructions from this headquarters, the installations will be reported on Form 278-3 by the command concerned to the Field Commissioner, ARMO, for disposal in accordance with ARMO Circular Number 92, 1943. (Amended by Cir. 121)

c. Installations to be disposed of by authority of Base Section Commander or Commanding General ARV/STO - all other types of installations not included in paragraph a, above, will be considered surplus without further authorization when they are determined by the Base Section Commander or Commanding General, ARV/STO, to be excess to current needs. However, clearance will be obtained from this headquarters prior to disposition of any airfield, port facility or petroleum installations, or of installations with a housing capacity of over 5,000 men, installations specifically constructed or acquired by direction of this headquarters, or installations which may, in the opinion of the controlling command, be of use to another agency or command.

d. (Repealed) - (See Cir. 121)

7. Report of excess fixed installations and disposal actions.

a. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department in accordance with paragraph 6a, above, is or will be excess to the needs of a

Base Section or AAF/MFO, a report will be submitted in 4 copies on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess" to this headquarters, attention: Chief Engineer. The report of excess will be forwarded by this headquarters to the War Department in accordance with current War Department instructions.

b. Where an installation has been disposed of under the authority contained in paragraph 6c, above, and the installation is required to be reported on Parts A, B or C of "Real Property Records", (reference paragraph 2b, above) a report will be submitted in 4 copies on Part E (Eng. Form 1266, 1 May 1945) "Report of Disposal" to this headquarters, attention: Chief Engineer, upon completion of disposal action. Part E will not be submitted on those installations which are reported for disposition to the Field Commissioner, ANLC, on Form SPB-3.

3. Policy with respect to US installed equipment in Army installations to be disposed of through ANLC or reported to the War Department

a. The policy of the War Department is to remove from installations all removable equipment which is in short supply; to leave as part of the installation all removable installed equipment which is in excess, surplus, or obsolete supply; and to remove equipment in normal supply only if such removal does not interfere with ultimate disposal. Non-removable installed equipment will not be removed. The above policy and the procedures outlined below will govern with respect to removal of installed equipment from installations to be disposed of through the Field Commissioner, ANLC, or reported to the War Department.

b. A list of items in short, excess, surplus, and obsolete supply will be furnished each command by this headquarters. In addition to this list, the supply status of items listed in War Department SP 38-2 will apply. All items not included in either the short or in excess, surplus, or obsolete supply categories will be considered as being in normal supply.

c. All items of removable installed equipment in short supply will be removed from the installation and returned to depot stock prior to its disposition or preparation of the report of excess (Part D of the Real Property Record).

d. Removable installed equipment in excess, surplus, or obsolete supply will not be removed unless specifically required by this headquarters.

e. With respect to removable installed equipment in normal supply the Base Section Commander or Commanding General, AAF/MFO, will by informal inquiry to the Field Commissioner, ANLC, determine whether the retention of such equipment is desirable as a means of facilitating the ultimate disposal of the installation. If there is a desire for retention of such equipment, it will not be removed. In the case of installations required to be reported as excess on Part D, Eng. Form 1266, a statement of desire for retention of the equipment will be included in the transmittal letter forwarding the report of excess.

If there is no desire for the retention of such equipment, it will be removed only if it is economically desirable, taking into consideration the cost of removal, repair, packing and shipment. Equipment removed from an installation prior to the submission of a Report of Excess (Part B, Eng. Form 1266) will be indicated in letter of transmittal forwarding the report of excess.

9. Custodial responsibility - The Base Section Commander or Commanding General, IAP/MTO, will have continuing custodial responsibility for all property declared excess to his needs until it is transferred or abandoned in accordance with instructions of the Field Commissioner, AFM, or until the installation is dismantled and real estate is returned to the owner. All such property will be retained in his control as US Army property until disposition is determined. Pending such determination the installation will not be abandoned or entirely evacuated. A minimum of personnel will be retained for maintenance, security and preservation of the rights of the United States Government.

II--DEREQUISITIONING OF REAL ESTATE

10. Subject to the above, the procedure set forth below will be followed by all US Commands when derequisitioning real estate in Italy.

11. For the purposes of this directive, the following definitions will apply:

a. Controlling agency - Any major command which holds territorial jurisdiction for the area concerned. Examples of a controlling agency are PAC, Rome Area Command, or a British District.

b. Requisitioning agency - A major command responsible for requisitioning and derequisitioning real estate. Examples are IAP/MTO, US Navy. A controlling agency may be, in some cases, the requisitioning agency.

12. Prior to derequisitioning, all household and office furnishings added by the US during the US occupancy will be removed and returned to the appropriate US supply depot. Such furnishings belonging to the owner will not be removed.

13. Notice of intent to derequisition - The requisitioning headquarters will address notice of intent to derequisition specific real estate to the nearest office of the Genio Militare ten days in advance of evacuation date. At the same time, Genio Militare will be requested to send a representative to make a final inventory of the premises in conjunction with a representative of the requisitioning agency. In those cases where the requisitioning agency is not the controlling agency, the real estate officer of the controlling agency will also be notified of intent to derequisition. If the Genio Militare representative cannot be present at the time of evacuation, derequisitioning

procedure will not be delayed. It is however, most desirable that Genio Militare view all real estate and contents at the time of evacuation since that office will make settlement of claims arising from occupancy.

14. Requisitioning

a. Inventory

(1) The final inventory will be made by a representative of the requisitioning agency together with the Genio Militare and the owner or the owner's representative. In the absence of both the Genio Militare and the owner, the owner will be represented on the joint inventory by a disinterested officer appointed by the requisitioning agency, or he may be represented by the local Sindaco, Genio Civile or Prefettura. In the case of a quasi-military organization such as the ABC, where the owner of the property is unknown or cannot be located and the Genio Militare is not available, a disinterested officer will be appointed by the requisitioning agency to represent the owner when making the joint inventory.

(2) There will be noted on the final inventory form the following information:

- (a) Contents, fixtures, etc., and condition thereof.
- (b) A full description of any damages to buildings or contents caused by the occupying unit and not the result of fair wear and tear.
- (c) A full description of any damage caused by the occupying unit to crops or land.
- (d) A full description of any improvements made to the property by US Forces. Lists of materials used and an estimate of man and/or equipment hours will also be noted.
- (e) Any failure in agreement between persons conducting the inventory as to contents or condition of premises.
- (f) Signature of all parties making the inventory.

(3) A copy of the final inventory will be retained by the requisitioning agency and a copy will be furnished the real estate officer of the controlling agency and the Genio Militare.

b. The United States will not be divested of responsibility for the real estate until it is returned to the owner, or in the absence of the owner, returned to the Genio Militare, Sindaco, Genio Civile or Prefettura and a receipt obtained therefor. Quit-claims will be obtained whenever possible, copies of which will be furnished the Genio Militare and the real estate officer of the controlling agency.

15. The requisitioning agency will be responsible for maintaining adequate guards for the protection of the real estate and property until divested in responsibility as outlined in paragraph 14b, above. The requisitioning agency will also be responsible that the property is left in a clean and sanitary condition.

16. Misuse, such as willful destruction or looting, of requisitioned property will not be permitted. If such misuse is discovered, the real estate officer will present all available information to the Commanding General or Commanding Officer of the requisitioning agency for appropriate action.

17. The Genio Militare will receive and adjust all claims arising from authorized occupancy of real estate.

18. The principal office of the Genio Militare is:

Ufficio Centrale Controllo Requisizioni,
Via XX Settembre - Rome

Branch offices are called Ufficio Genio Militare Per Requisizioni AA and are located in the following cities:

Ancona	Naples
Bari	Palermo
Bologna	Perugia
Comobasso	Rome
Catania	Taranto
Florence	Turin
Genoa	Vasto
Leghorn	Venice
Milan	

19. Headquarters releasing real estate will report residual value of any improvements made to the property by United States forces in accordance with reference mentioned in paragraph 2c, above. The value thus reported will be reconciled with the value of improvements listed on inventory required in paragraph 14a, above.

Special Signal installations will be disposed of

R E S T R I C T E D - 1 -

4026

in accordance with Item 3, Section IX, AFHQ Signal Instructions, dated 22 November 1944.

4. Definitions

a. Fixed installation

(1) A unit of real property not in a combat zone, leased, purchased or otherwise acquired by agreement, expressed or implied, together with any improvements constructed thereon, for the United States Army, at which a specific Military function is performed.

(2) A unit of real property not in a combat zone at which there have been accomplished repairs, modifications, or replacements to existing facilities such as roads, railroads, bridges, utilities, ports, airfields, depots and similar properties utilized by the US Army, where the repairs, modifications or replacements are of such type construction as to have a potential postwar economic value.

b. Removable installed equipment - (Applies to equipment installed by or ~~for~~ for the US Army). Equipment which can be removed without damage to the structure or real property or without rendering the structure or property useless. Examples of removable installed equipment are boilers, power plants, motor generator sets, industrial production equipment, communication equipment, pre-fabricated huts, etc.

c. Non-removable installed equipment - (Applies to equipment installed by or for the US Army). Equipment which cannot be removed without damage to the structure or real property or without rendering it useless. Examples of non-removable installed equipment are sewage piping, water piping, steam piping, electrical or communications wiring, etc.

d. Definitions listed in paragraph 2, STACSA Circular Number 92, 1945, are applicable to this directive.

5. Base Section Commanders and the Commanding General, AAF/MTO, will take aggressive action to insure that all installations and real property, not absolutely essential to the needs of redeployment or occupational forces, are immediately released in accordance with instructions below. Special attention will be given to the release of civilian hospital, industrial, educational and agricultural facilities.

6. Disposal of installations

a. Installations to be reported to this Headquarters prior to disposal - Installations of the following categories determined to be excess to the needs of the Base Section Commander or Commanding General, AAF/MTO, will be reported to this Headquarters for reference to the War Department for disposition instructions (See paragraphs 7a and 8 below).

(1) All installations regardless of United States investment which have major strategic or economic value.

(2) All airfields in which the estimated United States investment at the time of determination as excess is more than \$100,000.

(3) All installations which are terminal stations of or stations tributary to the Army Command and Administrative Network.

(4) All petroleum and port installations of the following types in which the United States investment at the time of determination as excess is more than \$100,000:

- (a) Tank farms.
- (b) Petroleum pipe lines.
- (c) Petroleum pumping installations.
- (d) Petroleum distribution systems.
- (e) Petroleum refineries.
- (f) Petroleum loading terminals.
- (g) Gas and steam plants.
- (h) Piers and wharves.
- (i) Berths.
- (j) Fixed port unloading facilities.
- (k) Tanker unloading facilities.
- (l) Marine repair facilities.

b. Upon the declaration of an installation of the above categories as surplus by the War Department, and upon instructions from this headquarters, the installations will be reported on Form SFB-3 by the command concerned to the Field Commissioner, AFAC, for disposal in accordance with AFMFA Circular Number 92, 1945. (Amended by Cir. 121)

c. Installations to be disposed of by authority of Base Section Commander or Commanding General AAF/MTC - all other types of installations not included in paragraph a, above, will be considered surplus without further authorization when they are determined by the Base Section Commander or Commanding General, AAF/MTC, to be excess to current needs. However, clearance will be obtained from this headquarters prior to disposition of any airfield, port facility or petroleum installations, or of installations with a housing capacity of over 5,000 men, installations specifically constructed or acquired by direction of this headquarters, or installations which may, in the opinion of the controlling command, be of use to another agency or command.

d. (Repealed) - (See Cir. 121)

7. Report of excess fixed installations and disposal actions.

a. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department in accordance with paragraph 6a, 6b, above, is or will be excess to the needs of a

Base Section or AAF/MTC, a report will be submitted in 4 copies on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess" to this headquarters, attention: Chief Engineer. The report of excess will be forwarded by this headquarters to the War Department in accordance with current War Department instructions.

b. Where an installation has been disposed of under the authority contained in paragraph 6c, above, and the installation is required to be reported on Parts A, B or C of "Real Property Records", (reference paragraph 2b, above) a report will be submitted in 4 copies on Part E (Eng. Form 1266, 1 May 1945) "Report of Disposal" to this headquarters, attention: Chief Engineer, upon completion of disposal action. Part E will not be submitted on those installations which are reported for disposition to the Field Commissioner, ANIC, on Form SPB-3.

3. Policy with respect to US installed equipment in Army installations to be disposed of through ANIC or reported to the War Department

a. The policy of the War Department is to remove from installations all removable equipment which is in short supply; to leave as part of the installation all removable installed equipment which is in excess, surplus, or obsolete supply; and to remove equipment in normal supply only if such removal does not interfere with ultimate disposal. Non-removable installed equipment will not be removed. The above policy and the procedure outlined below will govern with respect to removal of installed equipment from installations to be disposed of through the Field Commissioner, ANIC, or reported to the War Department.

b. A list of items in short, excess, surplus, and obsolete supply will be furnished each command by this headquarters. In addition to this list, the supply status of items listed in War Department SA 33-1 will apply. All items not included in either the short or in excess, surplus, or obsolete supply categories will be considered as being in normal supply.

c. All items of removable installed equipment in short supply will be removed from the installation and returned to depot stocks prior to its disposition or preparation of the report of excess (Part D of the Real Property Record).

d. Removable installed equipment in excess, surplus, or obsolete supply will not be removed unless specifically required by this headquarters.

e. With respect to removable installed equipment in normal supply the Base Section Commander or Commanding General, AAF/MTC, will by informal inquiry to the Field Commissioner, ANIC, determine whether the retention of such equipment is desirable as a means of facilitating the ultimate disposal of the installation. If there is a desire for retention of such equipment, it will not be removed. In the case of installations required to be reported as excess on Part D, Eng. Form 1266, a statement of desire for retention of the equipment will be included in the transmittal letter forwarding the report of excess.

If there is no desire for the retention of such equipment, it will be removed only if it is economically desirable, taking into consideration the cost of removal, repair, packing and shipment. Equipment removed from an installation prior to the submission of a Report of Excess (Part D, Eng. Form 1286) will be indicated in letter of transmittal forwarding the report of excess.

9. Custodial responsibility - The Base Section Commander or Commanding General, AAP/WFO, will have continuing custodial responsibility for all property declared excess to his needs until it is transferred or abandoned in accordance with instructions of the Field Commissioner, ABLC, or until the installation is dismantled and real estate is returned to the owner. All such property will be retained in his control as US Army property until disposition is determined. Pending such determination the installation will not be abandoned or entirely evacuated. A minimum of personnel will be retained for maintenance, security and preservation of the rights of the United States Government.

II---DEREQUISITIONING OF REAL ESTATE

10. Subject to the above, the procedure set forth below will be followed by all US Commands when derequisitioning real estate in Italy.

11. For the purposes of this directive, the following definitions will apply:

a. Controlling agency - Any major command which holds territorial jurisdiction for the area concerned. Examples of a controlling agency are PBS, Rome Area Command, or a British District.

b. Requisitioning agency - A major command responsible for requisitioning and derequisitioning real estate. Examples are AAP/WFO, US Navy. A controlling agency may be, in some cases, the requisitioning agency.

12. Prior to derequisitioning, all household and office furnishings added by the US during the US occupancy will be removed and returned to the appropriate US supply depot. Such furnishings belonging to the owner will not be removed.

13. Notice of intent to derequisition - The requisitioning headquarters will address notice of intent to derequisition specific real estate to the nearest office of the Genio Militare ten days in advance of evacuation date. At the same time, Genio Militare will be requested to send a representative to make a final inventory of the premises in conjunction with a representative of the requisitioning agency. In those cases where the requisitioning agency is not the controlling agency, the real estate officer of the controlling agency will also be notified of intent to derequisition. If the Genio Militare representative cannot be present at the time of evacuation, derequisitioning

procedure will not be delayed. It is however, most desirable that Genio Militare view all real estate and contents at the time of evacuation since that office will make settlement of claims arising from occupancy.

14. Derequisitioning

a. Inventory

(1) The final inventory will be made by a representative of the requisitioning agency together with the Genio Militare and the owner or the owner's representative. In the absence of both the Genio Militare and the owner, the owner will be represented on the joint inventory by a disinterested officer appointed by the requisitioning agency, or he may be represented by the local Sindaco, Genio Civile or Prefettura. In the case of a quasi-military organization such as the ARC, where the owner of the property is unknown or cannot be located and the Genio Militare is not available, a disinterested officer will be appointed by the requisitioning agency to represent the owner when making the joint inventory.

(2) There will be noted on the final inventory form the following information:

- (a) Contents, fixtures, etc., and condition thereof.
- (b) A full description of any damages to buildings or contents caused by the occupying unit and not the result of fair wear and tear.
- (c) A full description of any damage caused by the occupying unit to crops or land.
- (d) A full description of any improvements made to the property by US Forces. Lists of materials used and an estimate of man and/or equipment hours will also be noted.
- (e) Any failure in agreement between persons conducting the inventory as to contents or condition of premises.
- (f) Signature of all parties making the inventory.

(3) A copy of the final inventory will be retained by the requisitioning agency and a copy will be furnished the real estate officer of the controlling agency and the Genio Militare.

b. The United States will not be divested of responsibility for the real estate until it is returned to the owner, or in the absence of the owner, returned to the Genio Militare, Sindaco, Genio Civile or Prefettura and a receipt obtained therefor. Quit-claims will be obtained whenever possible, copies of which will be furnished the Genio Militare and the real estate officer of the controlling agency.

15. The requisitioning agency will be responsible for maintaining adequate guards for the protection of the real estate and property until divested in responsibility as outlined in paragraph 14b, above. The requisitioning agency will also be responsible that the property is left in a clean and sanitary condition.

16. Misuse, such as willful destruction or looting, of requisitioned property will not be permitted. If such misuse is discovered, the real estate officer will present all available information to the Commanding General or Commanding Officer of the requisitioning agency for appropriate action.

17. The Genio Militare will receive and adjust all claims arising from authorized occupancy of real estate.

18. The principal office of the Genio Militare is:

Ufficio Centrale Controllo Requisizioni,
Via XX Settembre - Rome

Branch offices are called Ufficio Genio Militare Per Requisizione AA and are located in the following cities:

Ancona	Naples
Bari	Palermo
Bologna	Perugia
Compobasso	Rome
Catania	Taranto
Florence	Turin
Genoa	Vasto
Leghorn	Venice
Milan	

19. Headquarters releasing real estate will report residual value of any improvements made to the property by United States forces in accordance with reference mentioned in paragraph 2c, above. The value thus reported will be reconciled with the value of improvements listed on inventory required in paragraph 14a, above.

BY COMMAND OF GENERAL MCNARNEY:

OFFICIAL
/s/ C. W. Christenberry
C. W. CHRISTENBERRY
Colonel, AGD
Adjutant General

H. G. WHITE
Major General, GSC
Acting Chief of Staff

CE 601.1 SPELY

19 June 1945

SUBJECT: Report of Excess Fixed Installations and Disposal Actions

TO: ALL THEATERS, DEPARTMENTS AND SEPARATE BASE COMMANDS

1. Attention is invited to the following references:
 - a. War Department Memorandum No. W 100-44, dated 9 March 1944, "Report on Army Installations in Theaters, Departments and Separate Base Commands."
 - b. Letter from the Chief of Engineers, File CE 601.1 SPELY, dated 5 May 1945, Subject: "Report on Overseas Army Installations."
 - c. War Department Memorandum No. 700-45, dated 9 May 1945, as amended, Subject: "Disposal of Property Overseas," requiring that certain fixed installations if excess to the needs of a theater will be reported on Part D "Report of Excess" to the Chief of Engineers.
2. Upon determination that a fixed installation or a portion thereof required to be reported to the War Department under War Department Memorandum No. 700-45, as amended, is or will be excess to the needs of a theater, there will be submitted to the Chief of Engineers, Attention: Real Estate, Washington 25, D. C., a report on Part D (Eng. Form 1266, 1 May 1945) "Report of Excess." Upon receipt in the Office, Chief of Engineers appropriate action will be taken by the War Department and necessary instructions will be issued to the theater commander who will take appropriate action in accordance with Memorandum No. 700-45, as amended.
3. Where the theater commander has authority to dispose of fixed installations in accordance with War Department Memorandum No. 700-45, as amended, and the installations are required to be reported on Parts A, B and C of "Real Property Record," a report will be submitted on Part E (Eng. Form 1266, 1 May 1945) "Report of Disposal" to the Chief of Engineers, Attention: Real Estate, Washington 25, D. C., upon completion of disposal action. This report is required in order to complete the records of the Chief of Engineers with respect to fixed installations reported to him. Part E will not be submitted on those installations which are reported for disposition to Army-Navy Field Liquidation Commissioner on Form SPE-3.

Sincerely,

E. REYBOLD
Lieutenant General
Chief of Engineers
