HEADQUARTERS
ALLIED ARMIES IN ITALY
(Rear Adm. Echelon)
APO 400

ALH/rjs
21 May 1944

SUBJECT: Write off of Unfit Foodstuff.

TO : Army Sub-Commission, Allied Control Commission, APO 394.

1. Reference your AG/2, 23 April, System of Write off of unfit for issue Foodstuff.

2. The procedure for writing off subsistence unfit for human food should preferably be contained as an appendix to your SOP instructions. Subsistence unfit for human food will not be sold, exchanged, bartered or otherwise disposed of, except by destruction, except as noted below in paragraph 6, without the approval of HQ AAI. Where practicable it will be destroyed in the presence of an Allied officer detailed by MMIA. Where this is not practicable, it may be destroyed in the presence of an Allied non-commissioned officer and an Italian officer provided the value is not in excess of $100.00. If neither of these cases is practicable, it may be destroyed in the presence of two Italian officers one of whom will be of at least the grade of captain, and where the value is not in excess of $50.00.

3. It will be the policy that no food shall be destroyed without previous analysis by an analysis commission composed of a commissioned food chemist, a commissioned subsistence officer and a commissioned representative of the holding depot. The functioning and procedure of the analysis commission will be supervised by an Allied officer detailed by MMIA. When the unfit subsistence is valued at less than $50.00 and its destruction is essential for the safe keeping of other subsistence or for other reason destruction is so urgent that previous analysis is impractical, destruction may be ordered at the personal direction of the commander of the holding depot. Unfit subsistence found unserviceable in units and organisations will normally be returned to depots for replacement in kind. Subsistence destroyed within units and organisations will not be replaced in kind without a full report of circumstances and without the approval of MMIA.

4. Subsistence issued from Allied sources will be presumed to be fit for human food. If after analysis and a full investigation of facts which shall be recorded, it shall be determined that subsistence was in fact unfit at the time of issue, after approval

Second Copy passed to ST

of the report by MMIA, report will be made to the Chief Accountant, ACC, so that proper credit may be given the Italian Government. In no case will the subsistence be replaced in kind to the Italian Government regardless of where destroyed.

5. Whenever it becomes necessary to destroy subsistence, the witnessing officials will certify that they have so witnessed the destruction, listing in detail the items destroyed, the time, place and method of destruction and will attach to the certificate the findings of the analysis commission, or if destroyed without analysis, the orders directing the destruction. All such certificates with supporting papers will be forwarded to MMIA where they will be carefully scrutinized and, if in order, will be approved and filed.

6. Subsistence which is unfit for human consumption but may be suitable for animal consumption or contain recoverable fats or other essential recoverable components, will be recommended by the analysis commission to MMIA to be disposed of so as to retain the maximum benifit to the Italian Armed Forces and the Allies. Prior to approval MMIA will assure that the proposed action is proper and that none of the items find their way to the black market or are otherwise diverted illegally. Items which are received from Allied sources unfit for human consumption but fit for animal consumption or other authorized uses by the Italian Armed Forces will be charged to the Italians at full value unless specially authorized otherwise by Headquarters AAI.

7. Similar procedure will be carried out in the case of forage, except that forage to be destroyed will be destroyed at its existing location without return to depots. Its destruction will be witnessed by at least one Allied officer designated by MMIA, who will previously assure that proper destruction orders have been issues by an analysis commission.
