Ricevuti n. 6010 sacchi dal "22" C.R.A.S.C." durante il periodo 18/1 - 7/2/1945.-

Cause che hanno determinato il danno-
Stivaggio della derrata bagnata o giacenza in ambiente umido.- Trattasi di merce non risanata prima della cessione ai Magazzini italiani.-

Conclusione-
La farina in questione composta di farinaccio, grumi e rifiuti vari, e' il residuo delle operazioni di risanamento, selezione e stacciatura dell'intera partita.
Trattasi di farina di vecchia molitura (dicembre 1943- Gennaio 1944) in gran parte composta in sacchi non originali.-
La presenza di parassiti nella derrata in questione era stata gia' segnalata dal locale Distaccamento M.M.I.A. con foglio n.ST/24 del IO/1/45.-

Ritengo:
- che i sacchi di cui al n. 1) essendo stati in precedenza debitamente spazzolati dal 9 Panificio Militare di Bari, sono da passare al lavaggio per il ricupero delle tele.

./.

Declassified E.O. 12065 Section 3-402/NND NO. 785020

- che la farina di cui al n. 2) presenta odore forte di muffa, sapore acido, scricchiolio sotto i denti per presenza di sostanze minerali e vegetali, infestata da numerosi parassiti animali (tenebrio molitor)

Pertanto le Ios.11.935 di farina non sono alibili per l'alimentazione umana, ma esclusivamente per l'alimentazione degli animali da cortile.-

7 June 1945

TO : MGIA LO Naples

1. We are returning herewith Analysis Report covering 2,243 pounds of Pasta.

2. From the Analysis Report the Pasta is shown to be in sacks with the remarks "Said to be U.S Stocks". We invite your attention to the fact that Pasta has not been turned over to the Italian Depots from U.S. Depots in sacks, therefore the Pasta shown on this Analysis Report cannot be from U.S. stocks. In all probability it was from Pasta which was manufactured locally by the Italian Government.

3. Please Investigate this matter further and instruct the Board to always state whether the stocks are from U.S. sources, British sources, or Italian sources, and not use the phrase of, "Said to be U.S Stocks", on Analysis Reports in the future.

4. Cause of Damage: This Analysis Report covers the 6,629,700 lbs of Flour received off the S.S. Seloman and S.S. Bacon during Sept. and Oct. 1944.

During the off loading there was a continuous heavy rain. At this time the docks were ~~dampstick~~ using trucks with no tops. As a result many sacks became wet in transit.

Capt. Freeland instructed them to resack all good Flour and set aside all encrustated sacks and bad Flour. This was done but was never inspected by Analysis Commission. This amount was sacked and has remained within the Bakery ever since.

LAND FORCES SUB COMMISSION
A.C. (M. M. I. A.) A G M K
4/1/17-100
11 May 1945

TO : MMIA LO 54 Area

Ref. your ST/3 dated 7 May 45.

1. We are returning herewith Analysis Report covering 30,956 pounds of flour which was found unfit for human consumption.

2. We request that the Analysis Commission convene to review and reconsider this Analysis Report, since the flour was offloaded during the months of September and October 1944; and that the commission examined the articles five months later and made the recommendation that the responsibility and negligence for the loss of the flour was due to the dispatching of trucks from the docks without tarps while raining. Considering that this is the cause of the damage, we cannot understand why the flour was allowed to remain in the depot for five months without any attention or any effort being made by the Depot Commander to salvage the flour.

3. Request you take immediate steps to reconsider this case and to recommend that the Italian Government not be given credit for the flour.

the barrel down the vehicle to the ground; sacks on the ground to take the shock and details controlling the barrel as it was rolled down. On this occasion this method was adopted. When the barrel was about a quarter of the way down, one pole slipped away completely from under the barrel. The barrel fell down on to the ground and the two ends came out, allowing the whole contents of the barrel to be split. There were five I.C., details handling the barrel down the ramp.

Asked by Member : Q. Did the poles roll away from the top, that is from the truck?

A. It fell away from the top. The barrel had only a quarter of the way down.

Asked by President: Q. Was the barrel intact ?.

A. The barrel was leaking when it arrived.

Q. What was the angle of the ramp ?.

A. About 35°.

Q. Can you say how far the poles extended inside the truck ?.

A. Not more than about 2' inches.

I am a member of 73 Fd Bn.Platoon. On the afternoon of the 5 March last I, together with others, was called in to offload two barrels of wine from a 3 ton truck. It was too heavy to handle and we put two scale folding planks from the truck to the ground. The barrel was lifted on to the planks and we started to roll it down. There were two details in the lorry and somethere on the ground. The men on the ground were controlling the descent of the barrel. The one plank slipped away and the barrel fell to the ground. When the barrel hit the ground it broke and all the wine was split.

Asked by Member : Q. Was the planks all you used?.
A. We had bales of nets at the end of the planks to take the weight of the barrel and prevent the planks from slipping.

A. I thought the planks were quite firm and safe to take the barrel.

The Court Finds :-

1. The Court is satisfied with the credibility of the witnesses.

2. That whilst unloading a barrel of wine from a 3 Ton Truck the pole being used as a ramp slipped allowing the barrel to fall to the ground and bursting, the contents being lost.

3. No persons were directly or indirectly to blame.

4. The loss was not due to the negligence, irregularity or lack of discipline on any persons part.

5. That the fall of the barrel was accidental and beyond the control of the persons unloading same. At most the weight and security of the ramp were misjudged, a barrel of the size not having been handled previously by this platoon.

6. The value of the loss is £ 21/18/9.

7. It is recommended that the loss be written off as a charge against Public Funds.

SUBJECT: Analysis Report

TO : G.O.C., Land Forces Sub Comm. AC (MMIA) ROME

1. Herewith Analysis Report on destruction of spoiled food at Palermo Distribution Depot on 9 March 1945.

2. It will be noted that a large quantity of corned beef on the last two (2) analysis reports has appeared. This is due to a bad shipment received 2 February 1945. This shipment of corned beef appeared to have been repacked as the boxes were in good condition but upon opening them we found some of the cans were covered with mud and about fifty percent of the cans were rusty on the outside and inside.
