PRO-FORMA

ANALYSIS REPORT

APPENDIX 'B'

1. Location of Suspected Rations Depot or Unit concerned 8 Distribution Depot
2. Date Supplies Examined 25 Feb 46

5. Commodity	Unit	Manufacturer & Contract No.	Net Weight in LBS.	Expiring Date	Warrenty Date (if any)
Corned Beef	36	British	27		Not Known

4. Cause of Damage. Blown tins - contents putrified

5. Technical Analysis Findings. (Attach separate sheet if necessary).

6. Condition of Supplies as assessed by Commission.
Unfit for human or animal consumption

7. Responsibility and/or Negligence attributed by Commission.
No indication of negligence in handling by Italian Authorities

8. Disposal action recommended by Commission.
To be destroyed by burning

9. Whether Credit to Italian Government recommended and reason why.
Yes - in view of paragraph 7 above

Signature of Commission

5/11/46

Destruction Certificate.
Perishing commodities destroyed in our presence at:-

Signature of Commission

Destruction Certificate.
 foregoing certificate destroyed in our presence at:-

<u>Date</u>	<u>Time</u>	<u>Place</u>
25 Feb 46.	11-00 hrs	Via Ostiense, Rome

Address

Corynebacterium

19 FEB 46

1. Herewith enclosed 4 copies of Analysis Report in respect of the above.
2. In order to carry out the "water-test" specimen samples were taken from a large number of sacks. Only 2/3% floated, thus indicating that the larger percentage of peas were good. It was found, however, that most of the peas which sunk were filled with larvae, and in the opinion of the committee the water test was unsatisfactory. A specimen quantity of 1 Kilo was examined by hand and it was found that about 50% of the peas were infested with larvae and most of the remainder covered with eggs. As the water-test is unsuccessful and selection by hand impracticable for units, the whole quantity must be considered unfit for human consumption.
3. Authority has therefore been given to sell the peas, either for roasting as a substitute for coffee or for animal consumption, depending on which accrues the most benefit.

Receipt voucher and certificate of sale for animal consumption only, will be forwarded as soon as received.

Formulation of Food Analyst's Report attach.

20/2/46

3871

MILITARY HOSPITAL OF MILAN

N /

Milan, 15 Feb. 1946

TO THE COMMISSION FOR THE ANALYSIS OF 207,60 Quintals of CHICK-PEAS FROM ALLIED SOURCE, IN EXISTENCE AT THE III SPECIAL FOOD DEPOT IN MILAN.

In order to ascertain the condition of the chick-peas mentioned above, on the 14 Feb. 1946 the Commission took in all and from nearly every bag 20 kilos of chick-peas.

The organoleptic examination of the above lot showed that it was completely infested by insects which have completed their cycle of life and by large quantities of larvae and eggs.. These insects belong to the following species: MULTICA RUPIES - SISTONIA LINEATA - and probably also to the American species BRUCHIDIUS OBLETUS and BRUCUS OBLETUS.

To establish the proportion of infested and weevilled seeds we have made the following experiments:

1. by FLOATING THE DAMAGED SEED : 2 kilos of seeds were dropped into a pail of cold water and stirred. The seeds that came to the surface were in the proportion of 2-3%, viz of those that were ~~nibbled~~ eaten and half empty. The greatest part of the infested seeds went to the bottom of the pail, together with those in good conditions of which they possess the same specific weight.

HAND

2? - by MECHANICAL SELECTION - One Kilo of seeds gave :

Foreign matters: (straw, pebbles & Heterogeneous substances)	2.5%
Whole seeds (but all egg infested)	52.5%
Damaged seeds infested by larvae & eggs	45.0%
Total	100.00

So, more than half of the lot must be considered unfit for consumption, because it is damaged. And, as the floating selection has given a negative result, and the hand selection cannot be effected, THE WHOLE LOT MUST BE CONSIDERED UNFIT FOR HUMAN CONSUMPTION.

CAUSES OF THE DAMAGE - The seeds under examination are very old, as it is shown by their appearance (wrinkled outside, pale colour, and much tougher than any other pulse of the year).

So one sure cause of the infection and consequent damage is due to the old quality of the lot which was probably not kept with due care, specially during the months of summer.

5873

-2-

UTILISATION OF PULSE - These seeds must be got rid of immediately, to prevent next Spring the hatching of the eggs, and consequent infection of the storehouses and food stored therein. The recovered bags should be disinfected by washing them in an alkaline solution.

The damaged seeds could satisfactorily used as forage for cattle, (provided they are boiled first), or as food for fowls. They could also be used for the toasting and consequent preparation of mixtures for coffee substitutes, but in this case the rules of hygiene make the smashing and sifting of the seeds compulsory in order that the greatest part of the insects may be got rid of.

SUBJECT: Condemnation - Flour

LAND FORCES SUB COMMISSION
A.C. (M. M. I. A.) FORM E
6/1/17-101
23 February 1946

TO : No. 3 B.L.M.,

Reference your 6/33/9 of 19 Feb. 46.

1. Returned herewith Analysis Report for flour condemned on 12 Feb. 46.
2. Authority will be given to write-off the eleven (11) tons of flour declared fit for animal consumption.
3. An important factor in determining whether credit be given to the Italian Government for condemned foodstuffs sold for animal consumption or some industrial use is that frequently the compensation derived from such sale exceeds the original charge made against the Italian Government for the foodstuffs. In this particular case it is quite possible that the remuneration derived from the sale of the eleven (11) tons may be as much as the charge made against the Italian Government for thirty-six (36) tons of flour.
4. It is requested that you
 - a. report, and include on the Analysis Report, the amount of flour recovered of the twenty-five (25) tons fit for animal consumption.
 - b. procure a statement from the local Commissariato Directorate or O.C. #3 Military Bakery concerning the compensation derived from the sale of the flour fit for animal consumption.

HQ M.M.I.A. (ST)

Q/35/9

19 Feb 46

1. A total of 565 tons of flour was received at 3 Military Bakery, Milan, during the period Sept. and Oct. 45. This flour was collected from British sources at Ancona and Naples and was conveyed in covered railway trucks.
2. On arrival at Milan, it was found that the flour was in bad condition and Maj. Cotton gave instructions for the whole amount to be aired and sieved.
3. As the result of this, 529 tons have been recovered and issued. The Analysis Commission have examined the remaining 36 tons and found 11 tons fit for consumption by swine. The remaining 25 tons presented a greater difficulty in checking. This figure is arrived at by subtracting the amount of flour fit for human and animal consumption from the total received. The only available evidence was found by examining the sacks. A layer of solid flour varying from 1/4 to 1 inch in thickness coats each sack. The total weight of sacks is approx 22 1/2 tons and the remaining 2 1/2 tons can only be considered as loss suffered during cleansing.
4. Owing to the danger of the contamination of fresh supplies of flour, authority has been given for the sale of the flour fit for animal consumption and the immediate cleansing of all sacks and recovery of as much flour as possible. A certificate signed by the firm concerned to the effect that the flour will not be resold for human consumption and a copy of the receipt voucher will be forwarded to you when available.
5. This flour was loaded at Ancona by British personnel on to covered railway trucks guarded by Italians. The damage to the flour was caused by rain leaking through badly covered trucks and soaking many of the sacks.
6. The question of liability is a difficult one and your decision regarding this matter is requested.

MILAN
AHW/LOCapt.
J. A. S. C.

(AH WILTHER)

COL. KERR:

1. I intend to give credit for flour which can not be disposed of for animal consumption.

2. In the past we have given authority to write-off items, found unfit for human consumption, but salable for animal consumption. The compensation derived from sale of this food is normally as much, if not more, than the price (to be) paid by the Italian Gov't; therefore, no financial credit has been given.

3. I intend to return the reports to 3 B L U requesting that the final figures of the 25 tons for (1) animal consumption and (2) amount to be destroyed or lost as unfit for industrial or animal consumption.

4. In any case, the sale of the 11 plus tons of flour "for swine" would probably be sufficient to compensate for the loss of the entire 36 tons. In a similar situation in 1985 the Italians received about twice the value by sale

II

as animal food (x)

5x What is your opinion?

PRN 21/2

Major Nelson

I agree with you par 1, and 3, except.

I think the amount received from sale for animal consumption should be deducted from the total charged the Italian Government. If the amount realized by the I. Government does not equal the cost of the flour as charged by the British then we should give the Italian Government credit so they will not have any loss. I am inclined to believe that the Italians will get more out of the sale than their cost, so neither the I. Govt or British Govt will lose.

LAND FORCES SUB COMMISSION
A.C. (L. F. I. A.) ROME
C/1/17-183
5 February 1946

TO : MINISTERS OF WAR

Ref. your letter 610/81t of 2 Feb 46.

1. It is not understood why the report of the Analysis Commission convened on 5 Sept 45 was not forwarded for consideration at an earlier date.
2. It is also not understood why the 302 Reinforcement Camp received rations from "1st Supply RASC, Arrecs" when its normal source of supply was from your Naples Bulk Food Depot.
3. On the basis of the data contained in the report no credit can be given for the damaged subsistence.

N° 18 di regolamento del magazzino

Verbale di accertamento della commestibilità per animali di una partita di pasta, farina, e di legumi secchi (ceci) risultata non idonea all'alimentazione umana .-

L'anno milionovecentoquarantesi agli inizi del mese di Gennaio in ANCONA

SIA NOTO

che, in seguito ad ordine della Sezione di Commissariato Militare di Ancona la sottoscritta Commissione composta dal Cap. Veterinario Casetti Cino del Presidio Militare di Ancona, dal Ten. Commisario Salvi Federico affetto alla Sezione di Commissariato di Legumi e dal Ten. di Sussistenza Caciocchino Condottario del 75° Magazzino Militare Viverrì di Ancona, si è riunita nei locali del suddetto magazzino per procedere all'accertamento della commestibilità in parte di quadrupedi di una partita di pasta, farina e legumi secchi risultata non idonea all'alimentazione umana

che, esaminata scrupolosamente la pasta, lbs. 618 pari a Kg. 282,572, è risultata notevolmente ammuffita per cui si esclude la commestibilità da parte dei quadrupedi del R. Esercito mentre si ritiene adatta per l'alimentazione di equini ecc....;

che, invece la farina (lbs. 573 pari a Kg. 441,742) e i legumi secchi (ceci) lbs. 2045 pari a Kg. 828,438, ammuffata e di sapore leggermente amaro, sono stati dichiarati adatti all'alimentazione dei quadrupedi;

che, pertanto si propone la vendita della pasta per suini ed invece la distribuzione della farina e dei legumi secchi ai reparti per l'alimentazione dei quadrupedi del R. Esercito;

che, in fede di quanto sopra si è redatto il presente verbale per tutti gli effetti che ne conseguono

fatto, letto, chiuso e sottoscritto alla data e nel luogo di cui sopra .-

N° 13 di reg.ne del magazzino

Verbale di accertamento della commerciabilità per animali di una partita di casta, farina e di legumi secchi (ceci) risultata non idonea all'alimentazione umana.

L'anno millenovecentoquarantasei addì quindici del mese di gennaio la
Ancona

CIA NOTO

che, in seguito ad ordine della sezione di Commissariato all'Ufficio di Ancona la sottoscritta Commissione composta dal Cap. Veterinario Masetti Gino del Pressio Militare di Ancona, dal Gen. Commissario Calvi Federico addetto alla Sezione di Veterinaria di Ancona e dal Ten. di Sussistenza Emidio D'Amico Comandante del 73° Magazzino Militare Viveri di Ancona, si è riunita nel locale del suddetto magazzino per procedere all'accertamento della commerciabilità da parte di quadrupedi di una partita di casta, farina e legumi secchi risultata non idonea all'alimentazione umana

che, esaminata separatamente la casta, lbs. 610 pari a 12. 280, 57, è risultata notevolmente amuffita per cui si esclude la commerciabilità da parte dei quadrupedi del N. 330000 mentre si ritiene adatta per l'alimentazione di suini ecc.....;

che, invece la farina (lbs. 975 pari a 19. 441, 74) e i legumi secchi (ceci) lbs. 1045 pari a 20. 970, 44, aggregata e di sapore leggermente amaro-gnolo la farina e con i grandi baccelli ed infestati da acari e eccendi, sono stati dichiarati adatti all'alimentazione dei quadrupedi;

che, pertanto si propone la vendita della parte per suini se invece la distribuzione della farina e dei legumi secchi si riparte per l'alimentazione dei quadrupedi del N. 330000;

che, in fede di quanto sopra si è redatto il presente verbale per tutti gli effetti che ne conseguono

OSPEDALE MILITARE DI ANCONA

UFFICIO FARMACIA

Ancona, li 24 dicembre 1945

N. di Protocollo 573/3
Risposta al foglio N.
del

ALLA DIREZIONE DI COMMISSARIATO MILITARE

OGGETTO

A N C O N A

Analisi chimica di pasta e farina.

E' stata eseguita l'analisi chimica di un campione di pasta di una partita di libbre 618 e di un campione di farina di una partita di libbre 973.-

La pasta presenta segni evidenti di muffa, ha il sapore poco gradevole e alle prove di cottura rimane collosa. Il glutine non è estraibile.

All'analisi chimica ha dato i seguenti risultati:

Umidità 12,5% == Acidità in acido solforico 0,20%

La farina si presenta in gran parte agglomerata ed ha il sapore fortemente amaro. Il glutine è poco elastico.

All'analisi chimica ha dato i seguenti risultati;

Umidità 12,8% == Acidità in acido solforico 0,23%.-

Dei risultati ottenuti si conchiude che tanto la pasta quanto la farina in esame non sono adatti per l'alimentazione umana.

analisi chimica di pasta e farina.

E' stata eseguita l'analisi chimica di un campione di pasta di una partita di libbre 618 e di un campione di farina di una partita di libbre 973.-

La pasta presenta segni evidenti di muffa, ha il sapore poco gradevole e alle prove di cottura rimane collosa. Il glutine non e' estraibile.

All'analisi chimica ha dato i seguenti risultati:

Umidità 12,5% == Acidità in acido solforico 0,20%

La farina e' presente in gran parte agglomerata ed ha il sapore fortemente amaroacido. Il glutine e' poco elastico.

All'analisi chimica ha dato i seguenti risultati:

Umidità 12,6% == Acidità in acido solforico 0,23%.-

Dai risultati ottenuti si conclude che tanto la pasta quanto la farina in esame non sono adatti per l'alimentazione umana.

OSPEDALE MILITARE DI ANCONA

UFFICIO - Farmacia

N° di Protocollo 573/P

Ancona, li 24/12/45

ALLA DIREZIONE DI COMMISSARIATO MILITARE

ANCONA

Oggetto: Analisi chimica di pasta e farina.

È stata eseguita l'analisi chimica di un campione di pasta di una partita di libbre 618 e di un campione di farina di una partita di libbre 973.-

La pasta presentava segni evidenti di muffa, ha il sapore poco gradevole e alla prova di cottura rimane collosa. Il glutine non è estraibile.

All'analisi chimica ha dato i seguenti risultati:

Umidità 12,5% - Acidità in acido solforico 0,20%

La farina si presenta in gran parte agglomerata ed ha il sapore fortemente saporoso. Il glutine è poco elastico.

All'analisi chimica ha dato i seguenti risultati:

Umidità 12,8% - Acidità in acido solforico 0,23%.-

Dai risultati ottenuti si conclude che tanto la pasta quanto la farina in esame non sono adatti per l'alimentazione umana.

4) - Causes of deterioration: abnormal fermentation of cans, defect of sterilization, tinning, varnishing, of tin used.

5) - Rations are unacceptable: the examined rations are not even fit for animals; not even the fats contained are possibly used.

6) - Condition of feeds checked by Commission: as above-said, they smell very badly being in a very serious putrid state.

7) - Responsibility or carelessness from the part of the commission: no; it is a question of defect of production.

5737

9) - suggestions of compensation as for the credit to the Italian Army and reasons: being a question of original defects the is not responsible and thus the crediting is suggested."

Derrate in scatola : - Non è possibile dimostrare con certezza che dette derrate siano state prelevate già avariata dal magazzino del I.R.C.A.S.C.; però, essendo state aperte dai singoli reparti al momento del consumo ed immediatamente restituite al magazzino di Forlì per la sostituzione, si ritiene possibile che l'avaria risalga all'origine.

Si propone pertanto l'accreditamento, meno il ricavato della vendita per una industriali.

Farine, Piscotti e Cedi : - E' ancora meno dimostrabile che l'avaria di detti generi possa risalire all'origine.

Pertanto, per queste derrate, non si propone l'accreditamento.

421

Par. 12, 28 dicembre 1945

Generi sospetti d'analisi: carne scottata, poco scottata, formaggio scottato, biscotti, farina, legumi secchi.

77° Magazzino Vivari Presidario.

Generi	Unità	Ditta	Descrizione	Quantità	Unità	Descrizione	Quantità
(1) Carne	scottata n. 1041 da 12 once	Non è conosciuta	Idem	1,495	Idem	Idem	1,495
(1) Salmone	scott. to 12.37 da 1 libo	"	Idem	37	Idem	Idem	37
(1) Aringhe	scott. n. 36 da 14 once	"	Idem	49	Idem	Idem	49
(1) Sordine	scott. n. 8 da 3 1/4 once	"	Idem	3	Idem	Idem	3
(1) Formaggio	scott. n. 1 da 7 libo	"	Idem	28	Idem	Idem	28
(2) Biscotti	n. 1 da 10 once	"	Idem	14	Idem	Idem	14
(3) Farina	n. 5 da 10 once	"	Idem	500	Idem	Idem	500
(4) Legumi	n. 5 da 10 once	"	Idem	710	Idem	Idem	710

Dopo dell'analisi per i generi contrabbastanti col numero (1) l'averla è dovuta a ruggine prodotta sugli involucri di latte, dall'umidità e conseguente formazione di muffe; per i generi (2) e (3) a formazione di muffe per i legumi in parte e muffe e soprattutto alla presenza del vecchio che ha perforato i chiodi.

Risultato dell'analisi: Le derrate non sono atte all'alimentazione umana.

Condizioni delle derrate sottoposte alla commissione: Le derrate in questione presentano l'involucro o rotto o aperto o rigonfio; in ogni caso sono alterate. La farina si presenta rugginosa e solida. I biscotti si presentano umidati, i ceci ammuffiti o perforati.

Generi	Unità	Ditta Contratto n.	Peso netto in libbre scatola- mento	Data di scatola- mento	Data di (se c'è)
(1) Carne scatola n. 1241 da 12 once " 15 da 6 lbs		Non al concorso	1,495	all'Es- sile	(illeggi- bile o in- sistente)
(1) Salmone scat. n. 137 da 1 lbs		"	37	idem	
(1) Aringhe scat. n. 56 da 14 once		"	43	idem	
(1) Sardine scat. n. 8 da 3 1/4 once " 3 " 7 once		"	3	idem	
(1) Formaggi scat. n. 3 da 7 lbs " 2 " 30 once " 3 " 10 " once		"	28	idem	
(2) Biscottini n. 1 scatola da 5.5		"	11	idem	
(3) Farina " 3 colli peso vario		"	300		
(4) Legumi " 5 " "		"	718		

Causa dell'avaria: Per i generi contraddistinti co. numero (1) l'avaria è do-
vuta a ruggine prodotta sugli involucri di latta, dall'umidità e conseguente
formazione di muffe; per i generi (2) e (3) a formazione di muffe per i legu-
mi in parte a muffe e soprattutto alla presenza del turchio che ha perforato i
chiodi.

Risultato dell'analisi: Le derrate non sono atte all'alimentazione umana.

Condizioni delle derrate sottoposte dalla commissione: Le derrate in latta
presentano l'involucro o rotto o aperto o in conflitto in ogni caso sono altera-
te. Le farine si presentano rugginate e acide. I biscotti si presentano umidifi-
ti. I ceci ammuffiti e perforati.

Responsabilità o negligenza attribuita dalla commissione: Si ritiene che debba
assolvere ogni responsabilità da parte del Comunque del 77° Magazzino

3708

Militare distribuzione viveri da Forlì.

Provvedimenti proposti dalla commissione: Le derrate seminate verranno adibite ad usi industriali perchè contengono grassi recuperabili. Le farine, i legumi e i biscotti si ritengono idonei per alimentazione animale.

Se si debbono accreditare i generi al governo italiano e perone, parzialmente, come da foglio allegato.
