Subject: Movement of Arms and Ammo.

5 B.L.U. Udine

Ref letter G/121 dated 14 Nov 46.

Your Command has taken note of the directions stated in the above mentioned letter in connection to movement of arms and amm. towards, out and inside Udine Province, assured to have issued some orders to dependent Units.

It is considered however to be necessary to explain that will not be always possible to inform your Command a week in advance of the movement itself because it is necessary to consider that sometimes the material arrives to this Command with telegraphic notice which compel a prompt delivery and transportation.

In this case the information to your Command will be sent simultaneously or immediately after the transportation.

We inform you, then, that the munitions which arrives by train are almost always classified by weight and not specified by type, through which it is necessary a previous inspection in order to find out the real quantity of the material arriving into Udine Province and to be stored. Also in this case this HQ will take care to inform timely your Command as soon as the data arrives.

Risposta foglio n. G/121 di prot. del 14/11/45.-

Questo Comando ha preso atto delle disposizioni contenute nel foglio sopracitato in merito a movimenti di armi e munizioni verso, fuori o entro la provincia di Udine, ed assicura di avere dato analoghe disposizioni agli enti dipendenti.-

Si ritiene però opportuno far presente che non sarà sempre possibile informare codesto Comando una settimana prima che il movimento abbia luogo, perchè è necessario tener conto che molte volte il materiale di assegnazione giunge al Comando scrivente con preavviso telegrafico, imponendo il sollecito ritiro e trasporto a destinazione.-

In questo caso l'informazione a codesto Comando sarà contemporanea o subito dopo il trasporto.-

Si rappresenta infine che le munizioni che giungono per ferrovia sono quasi sempre indicate a peso e non specificate per cui la segnalazione importa una precedente verifica allo scopo consentire di stabilire il reale immagazzinamento di quanto giungerà provincia di Udine.- Anche in questo caso sarà cura di questo Comando di informare tempestivamente codesto non appena in possesso dei dati

1. With ref to your 13576/5/9/3 att dated 11 Nov 46, which states that a considerable amount of ammunition has been moved from MULLINO to LOWARIO.

2. I would once again draw your attention to this office letter No. 6/118 dated 8 Oct 46 which enclosed a copy of IMIA letter No. 6/92/1/A dated 2 Oct 46. Para 3 of the latter states "any movements (of arms and ammunition) into, out of, or within the ^{area} (UDINE Province) should be notified at least one week prior to implementation." It will be noted that the IMIA letter states "any" movement, this taken literally could mean 1 rifle or 1 round of ammunition. This HQ however proposes to take a reasonable view, and assumes that GHQ are not interested in the move of any consignment under say 10 rifles and 250 rounds ammunition.

3. Will you please ensure that your Service Directorate 3 Alpini Regt, 22 Recovery Commission, Army Sec and any other department concerned in the movement of arms and ammunition is alive to the necessity of informing this HQ prior to the implementation of any move.

4. It is appreciated that the above will cause some extra work, and will entail a good deal of thinking ahead. The matter has been taken up with GHQ and the suggestion made that only major moves are notified. But until further instructions are received from GHQ, the original order must stand.

Ref: AFM Letter 6-5 241 44 dated 20 Sept 46.

1. The attached statement shows a movement of arms which has taken place in this Province. The movement took place without any notification to this HQ. I have again warned 5 Provincial Command that movement of arms and ammunition without notice is irregular.
2. The issue of the arms to the 5th Brigade by 5 Light Regt is in fact a normal routine matter of bringing the arms up to scale. The issue to 5 Troop Coy by the Army S.O. is also normal.
3. It will be noted in the AFM letter that one week's prior notification is to be given to 13 Corps (GHC) of any intended movement. Taken literally this would mean that permission must be sought one week in advance for the movement of arms. Such a delay with his rifle and 50 rounds was from time to time a distance of 3 miles.
4. It is suggested for your consideration that the authority for normal routine moves of arms and ammunition could be given by this HQ; and in fact this is what we expect 5 Troop Coy to do. Authority to move any other 10 rifles and 250 rounds etc.

Re: your 5873/G dated 5 Nov 46.

- (a) The dump was discovered as the result of information received from a local informer
- (b) The arms were very heavily greased, a detailed report of their efficiency has not yet been received. The Arm is stated to be in bad condition.
- (c) Information regarding the dump is extremely scarce, no particular people appear to be concerned in it, no arrests have been made and none are likely. Carabinieri are of the opinion that the dump has been in existence for a considerable time, and that it probably originated in the Partisan days. They do not think that any additions have been made to the original dump.

No. 13915/3/9/4

Udine 6 Nov 46/

SUBJECT: - Report on finding of arms

MO: 5 B. I. U.

Carabinieri Insurgent - Palmanova, on 22 Oct 46, by letter 18/74 reported to the Writing Command, to Carabinieri Commands concerned, to "Prefetto" and "Questore" Udine, as well as to Allied Military Police Command, that arms, ammunition and materials, whereof in the appendix attached, were found by Carabinieri at DONNACCIATA near by TRIVIGNANO DI UDINE.

The arms were carried into 5 Composite Artillery Stores, and ammunition into PENTUSIA Duna.

As soon as the above report came in, the writing Command asked Army Command to check the condition of efficiency of the recovered arms and ammunition, and further report will be forwarded on their state of use and on the missing parts, as they are arms and parts of incomplete and heavily oxidized parts of arms and the ammunition is in bad condition of maintenance.

Subject:- Control of Illegal Movement of Arms
and Munitions in AMG Territory.

To :- Chief Commissioner, Allied Commission, APO 794.

1. In order to prohibit illegal possession and traffic in unauthorised arms and munitions in Military Government territory, the Allied Military authorities carry out a systematic system of checks and control. In the territory in which this action, in the interests of public safety takes place, there are stationed elements of the Italian armed forces including the CC.RR. In order that there should be no doubt in the minds of the Military Authorities as to when genuine despatches of arms and ammunition are being made by the Italian Government to ou-lying CC.RR. posts or elsewhere in the critical area both while the items are in movement or when dumped, it is necessary that timely information be made available.

2. It is desired that you explain to the Italian Government the necessity for the action herein directed, and request that the following information be furnished in respect of UDINE Province :

- a) Quantities and location of all arms and ammunition now held by the Italian army including the CC.RR.
- b) Full particulars of any future movement of arms and ammunition into the subject area.

3. The desired information should be furnished to Headquarters 13 Corps, with copy to AMG Headquarters, UDINE Province. Any movements into, out of or within the Area should be notified at least one week prior to implementation. Inasmuch as periodic spot checks will be made of movements it is most desirable that those making authorised shipments shall be possessed of properly authenticated documents to prevent interference by the Allied Military Authorities.

4. You will ascertain the approximate date when the report of present holdings will be forthcoming, and will inform AFHQ thereon.
