Subject: Army Code Sign Documents.

HQ 2 District, CIP.  
2522 K.

Distribution as below.

17 Oct 43.

1. Considerable sloppiness has recently been observed in the handling and accounting for Army Code Sign documents.
2. It is pointed out that Army Code Sign Books, Column Sequence Charts and Row Registers are 'SECRET' accountable documents and formations handling such documents must ensure that an officer's signature is held for documents re-distributed.
3. It is particularly important at the present time when units are being disbanded and Signal office are transferred from one formation to another, that a constant check is kept on these documents.
4. When this code sign material is no longer required, the code sign book, current sequence charts and all row registers must be returned to this office. Destruction certificates should be rendered for any sequence charts which are out of date.
5. In connection with row registers, it is emphasized that these should be returned complete. It is frequently necessary to re-issue the code sign ~~books~~ and they are quite useless without the relevant row registers.
6. Destruction certificates for column sequence charts must be rendered by the 5th of each month covering the previous month's sequence charts and such certificates must detail the copy numbers of the charts destroyed.
7. Army code sign books must always be despatched under separate cover from sequence charts and row registers.

Reference AFHQ letter X400 dated 5 Dec 44.

It is noticed from the latest Row Registers submitted that the instructions contained in this letter have not been fully understood, and the following is in clarification thereof.

Only HQs down to and including Infantry and Artillery regiments will have two codesigns allotted, one of which will be that HQs codesign and the other its Rear Link Sign. The HQs codesign will NOT be termed "Forward Link Sign", as, in the link sign procedure, the use of such a sign as a callsign is forbidden.

All other HQs down to and including Infantry Battalions and Infantry Regiments will have only ONE codesign which will serve as HQ codesign and Rear Link sign. This sign, with standard letter/figure affixes, will be used as codesigns for sub-units of these Battalions or Batteries.

Therefore the following rows will be deleted from the register which comes into effect 500100A Jan 45, and omitted from subsequent registers.

Subject:- Row Registers.TO: XXXXXXXX  
Signal Officer, NMIA.  
XXXXXXXX

1. A revision of row registers will be arranged to become effective at 0100A hrs, 30 Jan 45.

2. The purpose of the periodical revision of row registers is for security reasons and the main essential is to break continuity with regards to enemy intercept. To achieve this, all the rows in a register should be entirely rescrambled and a new frequency allotment should be made effective when the new registers are introduced. An interchange of operators at the same time is also highly desirable.

3. There will be no general change of sequence allotments. Such transfers of units between sequences as have become necessary owing to recent changes of command should be arranged mutually between the Sequences holders concerned.

4. New row registers should be prepared and distributed by 21 Jan 45.

5. Acknowledge.

ALLIED FORCE HEADQUARTERS  
OFFICE OF THE CHIEF SIGNAL OFFICER

5 December 1944

X400

SUBJECT:- Row Registers.TO : MMIA (Attention Signal Officer).

1. a. ....
- b. It is requested that CSO, AFHQ be provided with six copies of all future row registers.
2. a. It is noted that in many cases two rows are allotted to a headquarters, being shown respectively as "Rear Link" and "Forward link". Since one of the basic principles of link sign procedure forbids the use of the control stations code sign as a call sign, it follows that a "Forward link" cannot exist.
- b. Confusion to relayed messages will result from the apparent lack of headquarters code signs for many units.
3. The following action should be taken to correct the above errors:
  - a. All references to "Forward" links or controls should be deleted.
  - b. All headquarters down to and inclusive of Infantry and Artillery Regiments should be allotted specific headquarters code signs in addition to rear link signs.
  - c. All other units down to Infantry Battalions and Artillery Batteries should be allotted one code sign which will be used as that headquarters code sign and rear link sign. It will also be used with standard figure / letter affixes to derive code signs for sub-units of the parent unit.

For the Chief Signal Officer:

E.S. COLE  
Colonel,  
Executive Officer (BR).

1 A case has recently been brought to light of the loss of one Army Code Sign Book by CIL.

2 The loss of such a document is a breach of security of the gravest nature.

3 It is brought to the notice of all concerned that Army Code Sign Books and Sequence Charts are 'A' Category Secret Accountable Documents, and the greatest care must be taken to safeguard them at all times.

4 Careful accounting of these documents is essential and I/O must be able at all times, to produce either the documents, or if sub-circulated, signatures of recipients.

Officers upon whose charge these documents are, will be held responsible for their safe-keeping.
