FUEL AND LUBRICATING OIL SUPPLIES FOR ITALIAN ROYAL NAVY SHIPS AT BARI.

(Copies to: The Flag Officer Taranto,

The Navy Sub Commission,
Headquarters, Allied Commission.)

I am informed by the Italian Navy in Bari that the temporary inability to supply fuels and oils referred to in the Ministry of Marine's letter No. SM/8259 dated 25th April, 1945, was immediately following the explosion in the Port of Bari on 9th April, 1945, when, without reference to me or to my knowledge, to the temporary fuelling staff lent to me, they made fuel demands direct to the Italian Navy in Taranto as a result of which Ministry of Marine's letter to the Allied Commission was presumably written.

2. There appears to have been a misunderstanding in that although the pipe line to the fuelling hulk was fractured as a result of the explosion, repairs were completed in five days and during this period limited supplies of diesel fuel were available from the gravity tanks on board the fuelling hulk. Stocks of lubricating oil and grease were relatively undamaged and any inability to supply could only have occurred during the day of and the day following the explosion as a temporary Fuelling Office and organisation was in operation within 48 hours.

3. The following fuel and oils were supplied from Naval Stocks at Bari in April and May to Italian Craft:-

DIESEL OIL.

April - 162 tons (includes 2 Italian Corvettes and a Merchant Vessel)
May - 22 tons (Italian Small Craft - Launches, Schooners, etc.)

VARIOUS LUBRICATING OILS.

The attached translation of letter No.SM/3259 of the 25th April, 1945, from the Ministry of Marine, is forwarded for consideration.

1. From information received by the I.R.N. Headquarters in Brindisi from the B.E.O. there it would seem that the instructions as laid down in respect of accounting for fuels from Allied Sources are to be suspended in that port.

Furthermore it has been stated by the B.E.O. that when the fuels are turned over to the Italian Authorities, it is expected in the near future, the Italian Authorities will be given new standard instructions concerning communications advising the movements of fuels.

2. Since the information received by Maristat does not conform with the Navy Sub Commission letter cited above it is requested that the procedure to be followed in forwarding these advices may be clarified.

16. Coal stocks at bases and in colliers are to be accounted for in the same way as for fuel oils, i.e. on D.15 and S.131 accounts, but figures of expenditure are not required in the summaries to the Petroleum Section, Allied Force Headquarters.

Subject: Allocation of Petroleum Products to I.R.N. Command ANCONA.

With reference to conversations held.

1. Traffic to recently liberated Northern Bases has occasioned an exceptional influx of through M/traffic at Ancona which frequently needs to refuel before proceeding further.

2. For above reason, allocation of petroleum products to Ancona Base should be doubled, as follows :-

| | | |
|---|---|---|
| - Gasoline ..... | 1040 gals | monthly |
| - Gasoil ..... | 360 gals | " |
| - Kerosene ..... | 6 ~~gals~~ Lbs. | " |
| - Motor oils ..... | 30 gals | " |
| - C 600 ..... | 6 gals | " |
| - Greases ..... | 3 Lbs | " |

3. In view of difficulties already experienced in regard to carrying on the services, request increase may come into effect as from current month.

It is considered that above increase would be required temporarily and that allocation could be reduced to normal once exceptional traffic requirements will have ceased.

ARGOMENTO: Assegnazione carburanti per il Comando R.Marina di ANCONA.=

Riferimento alle intese verbali.=

1°) - Lo sviluppo del traffico automobilistico verso le Basi Navali dell'Italia Settentrionale recentemente liberate ha provocato una eccezionale affluenza ad Ancona di mezzi di passaggio i quali hanno spesso necessità di eseguire in quella Sede dei rifornimenti supplementari di carburanti onde poter proseguire il viaggio.=

2°) - Per i motivi sopra esposti si richiede che venga raddoppiata l'assegnazione dei prodotti petroliferi per le Basi di Ancona. I nuovi quantitativi dovrebbero essere i seguenti:

| | | | |
|---|---|---|---|
| - Gasolina | 1040 | gals | al mese |
| - Gasoil | 360 | gals | al mese |
| - Kerosene | 6 | gals | al mese |
| - Motor oils | 30 | gals | al mese |
| - C 600 | 6 | gals | al mese |
| - Grassi | 3 | lbs | al mese |

3°) - In considerazione delle difficoltà che già si verificano nello svolgimento dei servizi, si prega di voler apportare l'aumento richiesto a partire dal mese in corso.=

Si ritiene che tale aumento possa essere a carattere temporaneo e che l'assegnazione possa essere riportata nei limiti normali appena vengano a cessare le esigenze eccezionali del traffico.=

1. The Italian National programme covering all Petroleum Products - fuels, lubricants, asphalts, and miscellaneous packed POL - is now in operation.

2. Releases of sufficient POL to cover all future requirements of the Italian Civil, Army, Airforce and Navy are now being made from Military controlled stocks. Such releases are being made to CIP (Comitato Italiano Petrole) who has been appointed by the Italian Government as their representative to handle all future transactions until further advised.

3. It is therefore essential that no further issues be made to Italian Government units direct by any stock holding agency. All such requests should be referred to CIP for action.

4. In the case of Italian Navy units operating outside the Theatre at the request of C-in-C Med and fuelling at such points as Malta and/or Gibraltar such vessels should be fuelled on the basis of return of product in kind in Italy. It will be the responsibility of C-in-C Med to follow through on such transactions.

MOST URGENT

Subject: Allocation of fuels and lubricants for the Italian Navy in respect of period from 1st July 1945 to 1st July 1946.

1. With reference to letter SM/16217 of 8th August 1945, it is brought to your notice that in calculating the quantity of gasoline required for the period 1.7.45. to 1.7.46. as communicated in the above letter, an error was made inasmuch as no allowance was made for the gasoline needed for many vessels operating with petrol-engines among which there are also those engaged in mine-sweeping.

2. In consequence of this the yearly demand for gasoline should be increased from 3000 tons to 8300 tons.

3. For the same reason the gasoline requirement for naval vessels and for the Lighthouse service for the month of November - communicated to you in our letter SM/23609 of 27th October 1945 - should be corrected in the column referring to 100 octane gasoline to read as follows :

| | | |
|---|---|---|
| - Venice | 1011 | bls. |
| - Brindisi | 985 | bls. |
| - Taranto | 240 | bls. |
| - Augusta | 51 | bls. |
| - Palermo | 160 | bls. |
| - Naples | 240 | bls. |
| - Leghorn | 252 | bls. |
| - La Spezia | 754 | bls. |
| - Genoa | 505 | bls. |
| - La Maddalena | 50 | bls. |
| - Cagliari | 20 | bls. |
| Total | 4268 | bls. |

4123

4. Concerning fuel oil it is observed that the quantity requested in the above letter does not include the consumption of vessels of category (A) operating for the Allies. Should these vessels be returned to the I.R.N. an increase is to be foreseen of the allocation first requested.

1. - Con riferimento al foglio SM/I62I7 dell'8 Agosto I945, si fa presente che nel computare il quantitativo di benzina occorrente per il periodo I/7/45 - I/7/46 segnalato col foglio surriferito, fu commesso un errore in quanto non fu tenuto conto della benzina necessaria per molte unità funzionanti con motori a benzina fra le quali anche quelle destinate al dragaggio.

Con riferimento al foglio N3C/26IO dell'II Giugno I945, si prega chiarire se nel fabbisogno Luglio I945 - Luglio I946 di combustibili e lubrificanti per la R.Marina Italiana debbono essere compresi solo i consumi per le navi e gli enti a terra inerenti le ristrette esigenze della R.Marina oppure anche quelli inerenti le attività ordinate dalle Autorità Alleate in quanto, in quest'ultimo caso, non si avrebbero elementi sufficienti per poter stabilire un preventivo sia pure approssimato.

2. The time is shortly approaching when it will be desirable to arrange for the Italian Armed Forces to draw their requirements nationally, and to make their own arrangements for internal distribution.

3. For some time to come, it is anticipated that the world supply and tanker situation will make it desirable to restrict the consumption of petroleum in all countries. In order that this Section may plan for future importation, it is requested that you will arrange for this Section to be supplied with an estimate of the requirements of the Italian Armed Forces, under the 12 months commencing 1 July 45.
