R.T.E. MATERIEL BELONGING TO THE AIR FORCE

A large quantity of R.T.E. materiel belonging to the following Military Bodies (Air Force - Navy - Army) was in due time withdrawn by the same from the various ex-German Warehouses (Clorenza - Mauen - Verona) after regular authorization had been given by the 2nd Allied District in Milan.

Due to a misunderstanding on the part of the 2nd District in authorizing the release of this property, part of the materiel was removed by the Italian Navy and conveyed to the "Sacca Fisola" Warehouse in Venice.

Following agreements of this Ministry with the Ministry of the Navy, we have obtained permission to withdraw the above referred to materiel, which although property of the Air Force and urgently required for immediate use, was erroneously transferred to the "Alto Adige".

Consequently, the undersigned gave instructions to representatives of this office to contact the "Marinarmi" in Venice for the immediate release of the above mentioned materiel; however, the R.N.C. Command of Venice has made known that all materiel stored in "Sacca Fisola" cannot be removed.

The said R.N.C. of Venice with letter No. RAF CM 514/RV has notified the Flag Officer of this particular situation and also requested authority to remove from the afore-mentioned warehouse the materiel belonging to the Air Force.

As the material ~~laying~~ stored in the Sacca Fisola warehouse is indespensable and essential for the immediate requirements of this Air Ministry, we hereby ask you to grant us authority to remove the materiel reported in the attached list.

Materials of ex German Origin.

Large quantities of materials of ex German origin are stored in sheds at Sacca Fisola including Radio and Radar equipment, many of the packing cases have never been opened. There is no correspondence in this office to indicate the ownership of these stores.

The Italian Naval Authorities in Venice claim all the material but are unable to substantiate their claim by producing copies of reports called for in Enclosure 'A' to Navy Sub Commission letter No.NSC/2771 of 29th June 1945 para 3.

It is requested that it may be confirmed that all these stores are the legal property of the Italian Navy.

Subject : Ex-German war material.

Reference is made to enclosure (A) to your letter NSC/2771 of 29th June, 1945.

1. The I.R.N. Authorities at Bologna have been instrumental in ascertaining the existence at the Modena Captured Materials Collection Grand of a large number of motor-vehicles formerly belonging to the German Navy.

2. The I.R.N. Centre applied to HQ. No.2 District (Capt.Campbell, Coldstream Guards) for an allocation of a first lot of 18 vehicles, but the request was not granted since the recent instructions from General Alexander's Headquarters have been interpreted by Capt.Campbell in a sense governed by the following arguments put forward by him :-

a) Releases are restricted to the material already belonging to the I.R.N. before 8th September 1943 and to that of the so-called Republican Navy;

b) The word "Military" excludes all Naval Materials or materials of Naval origin.

3. Since the objections stated seem to be at variance with the instructions hitherto controlling allocations to the I.R.N. of this type of material, including material of German origin - not excluding motor vehicles (8th Category) - it is requested that you may take the question up with H.Q.No.2 District in order that it may be finally settled.

4. For your information it is drawn to your attention that in putting forward requests for ex-German motor-vehicles the I.R.N. Centre at Bologna has complied with the instructions contained in letter NSC/3685 of 14th September 1945 and previous letters, of which Maristat has no knowledge.

Enclosure: (A) Instructions for Disposal of Recaptured Enemy Material.

1. The Naval Allied Commander-in-Chief, Mediterranean has authorised release to the Ministry of Marine, subject to requirements of Allied Naval Authorities, of stores, equipment and supplies of all kinds formerly intended for and available to enemy naval forces, as provided in enclosure (A) hereto.

2. The Minister is requested to form Material Recovery Parties under the Officers-in-Charge of Italian Royal Naval Centers at Genoa, Turin, Milan, Venice and La Spezia to carry out the provisions of enclosure (A). This matter should be treated as urgent to prevent the loss of valuable materials during the interim.

ENCLOSURE "A" to Navy Sub Commission letter No. N.S.C./2771 of the 29th June, 1945.

DISPOSAL OF RECAPTURED ENEMY MATERIAL.

1. The following instructions govern the procedure to be followed with reference to former Italian Navy material which has been recaptured from the Italian Republican Navy or otherwise retaken or found, including material or German origin, except :

(A) Material recaptured or found in that part of the Venezia Giulia are recently transferred from Jugoslavia to Allied Military control.

(B) Material of Allied origin irrespective of the manner in which it was acquired.

2. The above material includes consumable naval stores and supplies and military equipment of all kinds formerly intended for and available to enemy naval forces in Italy and, subject to the requirements of the Allied Naval Authorities, all materials found and reported to the Navy Sub Commission, Allied Commission, may be utilized at the discretion of the Ministry of Marine for the maintenance of the Italian Navy.

3. The Ministry will form Material Recovery parties at the earliest practicable date in areas designated to take possession and control of all such material not required for Allied Naval use. The functions of these parties are :

(A) To locate, sort, classify and list materials;
(B) To report on 31 July 1945 and monthly thereafter to the Navy Sub Commission through the Ministry of Marine particulars of all material taken over under the following headings, distinguishing in each case between (a) material of Italian origin (b) material of German origin. It is particularly emphasised that these reports are not required to specify details of minor items of stores and equipment and for the most part statements in total of the various items located will suffice.

Subject: Enemy material recovered in N.Italy

Reference is made to letter NSC/4354 dated 4th January 1946 and NSC/4643 dated 25th February 1946.

The notes of the materials present in the Upper Adige zone, to which reference is made in the above letters, were compiled by the committee responsible in the middle of 1945.

Owing to the long time which elapsed between compilation of these lists and the granting of the authorisation by the Navy Sub Commission, it is presumed that it will be possible to recover only a small amount of the material today.

However, the I.R.N. Authorities at Venice have been able to arrange through the British Authorities (C.E.M. 2 District, Milan - Major Toon) to collect a part of the material of which I.R.N. ownership is certain.

The work of identifying and taking delivery of all other materials belonging to the I.R.N. or the so-called Republican Navy, continues.

As soon as this has been completed the complete list of all the above materials will be forwarded, and will show separately those definitely owned by the I.R.N. and all other materials of other origin.

ARGOMENTO: Materiale nemico ricuperato nell'Italia del Nord.-

Riferimento fogli NSC/4354 in data 4 Gennaio 1946 e NSC/ /4643 in data 25 Febbraio 1946.

Le note relative ai materiali giacenti nelle località dell'Alto Adige, cui si riferiscono i fogli in riferimento, sono state compilate da apposita commissione sin dalla metà dello scorso anno.

Dato il lungo tempo trascorso fra la compilazione di detti elenchi e l'autorizzazione concessa da codesta N.S.C., si presume che ben poco materiale si potrà oggi ricuperare.

Comunque le Autorità della R.Marina di Venezia hanno potuto provvedere attraverso le Autorità Inglesi (C.E.M. 2° Distretto di Milano - Maggiore Toon) al prelevamento di una parte dei materiali che risultano di sicura appartenenza alla R.Marina.

Continuano tuttora le operazioni di riconoscimento e di prelievo di tutti gli altri materiali di proprietà della R.Marina o della pseudo-marina repubblicana.

Appena ultimate dette operazioni sarà inviato l'elenco completo di tutti i materiali sopradetti, distinguendo quelli di sicura appartenenza alla R.Marina da tutti gli altri di origine diversa.=

Subject: Materials Recaptured in Northern Italy.

1. Reference is made to your letters 1176/2 of 17 January 1946 and 1924/2 of 28 January 1946.

2. Evidently the two lists forwarded in the letters mentioned above were of the same lot returned to the Ministry of Marine in NSC/4232 dated 13 December 1945. Inasmuch as it is difficult to screen lists of captured enemy materials that are forwarded to the Navy Sub-Commission in small lots and not in complete packets, it would be appreciated if the Ministry of Marine would hold up these lists until completed and forward them monthly in one lot, as requested in enclosure to NSC/2771 dated 29 June 1945, paragraph 3(B). This would facilitate the processing of captured enemy material lists more efficiently and quickly.

Subject: Materials recovered in N.Italy

Further reference is made to my letter SR/25964 dated 13th May 1946.

In order that a final decision may be reached the following information regarding the above material is forwarded :

a) - the torpedoes, the torpedo-heads are partly of Italian origin and partly of French origin; the latter part has already been turned over to the French Navy which has loaded the material onto the SS. "HADRUMETTE";

b) - all the other materials shown in the lists held by the Navy Sub Commission are of Italian origin, as they come from the localities to which the I.R.N. had decentralised the stores of the I.R.N. Arsenal at La Spezia.

Subject: Material belonging to the I.R.N.

The following has been communicated to this Ministry by the I.R.N. Command, Genoa, and concerns material owned by the I.R.N. It is requested that an approach may be made to the proper Authorities in order to obtain the release of the material in question.

1. Following a communication sent to the I.R.N. Command, Genoa, on 24th September 1945, a Petty Officer of the Material recovery Dept. made a visit to a store belonging to the State Railways which stands on the square of the Genoa-Terralba Goods-Station. Besides materials belonging to the Italian Army, there was in this Store material of I.R.N. ownership, including 32 tons of paint and a block of 5 kgs. of pure nickel for accumulators. The Petty Officer succeeded in making the inventory copy of which is attached, witnessed by two clerical employees of the office of the State railways.

The above material was in the custody of the Salvage Committee of the local Committee of National Liberation.

2. In order to take possession of the material, the Senior Officer in charge of the Material Recovery Dept. visited Colonel Mac Phee, Provincial Chief of A.M.G. in order to agree upon the procedure for its release in conformance with circular NSC/2771 dated 29th June 1945.

The Colonel requested him to return when Lieutenant D'Erasmo of A.M.G. was present, he being in charge of the matter.

3. When approached a few days later this Lieutenant stated that some time would have to elapse before beginning the turn-over of the material since inventories were being made.

4. Towards the end of October the Senior Officer, having received no further communication, returned to A.M.G. to make another approach to Lieut. D'Erasmo and he learned that this officer had returned to America, the matter having been put in the hands of Major Newton of M.M.I.A.

5. When approached, Major Newton stated that new inventories were being compiled, and the I.R.N. could rest assured that the material would be handed over in good time.

...../.

Declassified E.O. 12065 Section 3-402/NNDG NO. 785020

6. In the meantime the Italian Army Command had been requested to convene a meeting of representatives of the armed forces to establish ownership of the "blocked" materials in the area under its jurisdication and to distribute them. However, early in December the same Italian Army Command made it known that it had received advice from the Provincial Commissioner of the A.M.G. that all materials belonging to the armed forces were released with the exception of those belonging to the I.R.N. which remained "frozen".

7. With the assistance of Cdr.Bamber, Naval Resident, the I.R.N. Command Genoa then obtained permission from A.M.G. to compile the official inventory of the materials, while waiting for the matter to be settled. A party comprising of a Lieutenant (E) from the Material Recovery Dept., the Lieutenant of CC.RR. at the I.R.N. Command, and a Senior Technician went to the store at once only to discover that all the paint, nickel, and many other materials had been taken away.

From information obtained on the spot it appeared that a few days beforehand the material had been loaded in various lots onto about twenty Allied trucks by a British Captain and Corporal with the assistance of about 200 German P.O.W. from Alessandria.

8. A Petty Officer was sent to Alessandria and he was able to discover that the material from Genoa had been taken to the C.M.M. - Dump No.3 in the "ORTI" locality. He was able also to approach the British Captain in charge of the Camp, from whom he obtained an assurance that he would be able to collect the material if he obtained its release from the General H.Q. in Milan.

9. An officer was sent at once to the I.R.N. Centre, Milan, to explain the situation and to apply to the proper Authorities for the release.

After visiting the Allied Command the Liaison Officer of the I.R.N. Centre, Milan, confirmed that release of the materials would be granted upon presentation of the note of the material sought.

10. To the contrary, the matter began to suffer delays from one day to another. Information obtained later at Alessandria indicates that part of the material is now missing.

1) - In seguito a segnalazione fatta al Comando R.Marina di Genova il 24 Settembre 1945, fu eseguita da un Sottufficiale del dipendente Ufficio Ricuperi Materiali una ricognizione in un magazzino delle Ferrovie dello Stato situato sul piazzale della stazione merci di Genova-Terralba. Il Sottufficiale riuscì ad eseguire l'inventario allegato, in copia firmato da due testimoni impiegati alla Provvida delle FF.SS.

Il suddetto materiale era in consegna al Commissariato Ricuperi del locale Comitato Liberazione Nazionale.

2) - Allo scopo di entrarne in possesso, l'Ufficiale Superiore, Capo dell'Ufficio Ricuperi Materiali, si recò dal Colonnello Mac Phee, Capo dell'A.M.G. Provinciale, per concordare le modalità della cessione in relazione alla circolare NSC/2771 del 29 Giugno 1945.

Il suddetto Colonnello pregò di ritornare quando fosse stato presente il Tenente dell'A.M.G. D'Erasmo, incaricato della pratica.

3) - Il suddetto Tenente interpellato alcuni giorni dopo comunicò che prima di iniziare la consegna del materiale occorreva del tempo perchè erano in corso di compilazione gli inventari.

./.

Declassified E.O. 12065 Section 3-402/NNDC No. 185020

4) - Verso la fine di Ottobre, non avendo ottenuta nessuna comunicazione, l'Ufficiale Superiore ritornato all'A.M.G. per interpellare nuovamente il Tenente D'Erasmo, apprese che il predetto Ufficiale era ritornato in America e che la pratica era stata passata al Maggiore Newton della M.M.I.A.

5) - Interpellato il Maggiore Newton, questi informò che erano in corso di compilazione nuovi inventari e che la R.Marina poteva stare tranquilla perchè il materiale le sarebbe stato tempestivamente consegnato.

6) - Nel frattempo il locale Comando Militare Territoriale era stato avvertito dalla M.M.I.A. di organizzare la riunione dei rappresentanti delle FF.AA. allo scopo di stabilire la proprietà dei materiali bloccati nel territorio di sua giurisdizione e di procedere alla distribuzione. Invece ai primi di Dicembre lo stesso Comando territoriale informò di aver ricevuta comunicazione dal Commissariato Provinciale della A.M.G. che tutti i materiali delle FF.AA. erano sbloccati ad eccezione di quelli della R. Marina che restavano "congelati".-

7) - Con l'appoggio del Comandante BAMBER, Naval Resident, il Comando R.Marina di Genova ottenne allora dall'A.M.G. il permesso di poter compilare l'inventario ufficiale dei materiali, in attesa della definizione della pratica.

Una Commissione composta di un Capitano del Genio Navale dell'Ufficio Ricuperi Materiali, del Tenente dei CC.RR. del Comando Marina e di un Capo Meccanico, si recò immediatamente nel magazzino; ma dovette constatare che tutta la pittura, il nichel e molti altri materiali erano stati asportati.

Da informazioni raccolte sul posto risultò che pochi giorni prima il materiale era stato caricato in varie riprese su una ventina circa di autocarri alleati da un Capitano e da un Caporale Inglese, con l'ausilio di circa 200 prigionieri tedeschi provenienti da Alessandria.

8) - Un Sottufficiale inviato ad Alessandria, riuscì a sapere che il materiale proveniente da Genova era stato trasportato in località "ORTI" presso il C.E.M. - DUMP N° 3. Egli riuscì pure ad interpellare il Capitano Inglese, Comandante del Campo, dal quale ebbe assicurato che avrebbe potuto ritirare il materiale

Egli riuscì pure ad interpellare il Capitano Inglese, Comandante del Campo, dal quale ebbe assicurato che avrebbe potuto ritirare il materiale facendosi rilasciare lo sblocco dal Comando Generale di Milano.

9) - Un Ufficiale fu immediatamente inviato al Centro Marina di Milano per spiegare la situazione ed intervenire presso le Autorità competenti per ottenere lo sblocco.

L'Ufficiale di Collegamento del Centro R.M. Milano, dopo essere stato al Comando Alleato, assicurò che lo sblocco sarebbe stato immediatamente concesso dopo la presentazione di una nota del materiale che si richiedeva.

10) - Al contrario la pratica incominciò a subire rinvii da un giorno all'altro. Da successive informazioni prese ad Alessandria risulterebbe che parte del materiale è ora mancante.

Ref your CEM/3c/326 of 23 May 1946.

Considerable difficulty has been experienced by the War Ministry in obtaining prompt release from ARAR of stores of Italian Military origin.

Approval was only recently obtained from G.H.Q. for such material to be released direct to the Italian Army prior to the Depot being handed over to ARAR.

It is therefore suggested that the draft letter under reference be amended as follows :-

Delete para 4 and substitute:-

"4. H.Q. A.C. will release to ARAR all material except

(a) Material required for technical intelligence
(b) materials required by the Allied Forces in accomplishment of their assigned mission.
(c) materials of United Nations origin reported in considerable quantities and of value.

} which will be reported to AFHQ for disposal instructions

Enclosure: (A) List of Enemy Materials Stored in Genoa made available to the Ministry of War Transport Survey.

1. The Navy Sub-Commission has informed the Ministry of War Transport Survey that enclosure (A) lists the quantities of German meterials in Genoa that may be made available to them.

2. Of the materials itemized it is noted that those listed on pages four (4), five (5), and six (6) of enclosure (A) are in fact, not captured enemy material but the property of an Italian firm transferred from La Spezia to Genoa by the German Navy. These materials are made available to the Ministry of Marine for suitable disposal.

3. Any of the subject stores not required by the Ministry of War Transport Survey are also made available to the Ministry of Marine for the maintenance of the Italian Navy.

22 June 1945

SUBJECT: Disposition of Captured Enemy Material in ITALY

TO: Commanding Generals,
15th Army Group, APO 777
Fifth Army, APO 464
Peninsular Base Section, APO 782
Headquarters, Eighth Army
General Officer Commanding, Number 1 District
General Officer Commanding, Number 2 District
General Officer Commanding, Number 3 District

1. OBJECT OF THIS DIRECTIVE - The object of this directive is to indicate the manner of dealing with captured and/or surrendered enemy war material in ITALY. The following pertinent letters, this headquarters, are hereby rescinded:

AG 386.3/163 LOG-O, dated 22 April 1945, subject as above
AG 386.3/163 LOG-O, dated 2 May 1945, subject as above
AG 386.3/163 GCT-O, dated 13 May 1945, subject as above
AG 386.3/163 GCT-O, dated 9 June 1945, subject as above.

2. RESPONSIBILITY FOR THE CONTROL, ALLOCATION AND DISPOSAL OF ENEMY MATERIAL

a. The control of all enemy material in this theater is vested in the Supreme Allied Commander.

b. The allocation, use and disposal of enemy material (either captured in the course of operations or as a result of enemy disarmament following a surrender) is a responsibility of command, which will be exercised in accordance with the provisions of this directive.

3. DEFINITIONS

a. Captured or Surrendered Enemy War Material - (hereafter referred to as enemy material) includes any material of whatever nature and wherever situated, intended for war on land, at sea, or in the air, or which is, or may be, or has been at any time in use by, or intended for use by, the armed forces, civil defense or other formations or organizations under the control or influence of the German Government, German authorities, or Governments or authorities of any states now allied to or associated with GERMANY.

b. Withdrawal Authority is the military authority in whom power to authorize withdrawals is vested.

Incl #1

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

4. PRINCIPLES TO BE APPLIED

a. Allied Naval, Ground and Air Forces Responsibilities - Enemy Naval and Air Forces material will be dealt with and the necessary reports and returns made by the Allied Naval and Air Forces respectively, subject to such conventional adjustments as may be necessary to deal with cases where the enemy Naval or Air Services do not correspond in their scope with the Allied Naval and Air Services. Enemy Ground Forces material will be dealt with by the Allied Ground Forces and coordination, where necessary, between the Allied Naval, Ground and Air Forces will be effected by the Ground Forces Commanders. The latter in the appropriate cases, must be prepared to assist Allied Naval and Air Force Commanders in the location and guarding of material peculiar to the enemy Naval and Air Forces. Common user items will normally be the responsibility of the Allied Ground Forces.

b. Allied Ground Forces Staff and Service Responsibilities for safeguarding and control - The responsibility for the taking over (or the collection where necessary) and the safeguarding of all enemy Ground Forces war material is placed upon the Commanding Generals of Fifth and Eighth Armies, Headquarters 1 and 2 Districts, and Commanding General Peninsular Base Section in their respective areas. This responsibility will be exercised through the normal Allied staff and technical service channels appropriate to the type of material concerned. It is desired that the arrangements made by Armies be such that continuity of management can be maintained when Headquarters of 1 and 2 Districts and Peninsular Base Section take over Armies' areas in Northern ITALY.

5. CONTROLLING AUTHORITIES AT AFHQ - The control of enemy material will be exercised by AFHQ through normal command and technical channels appropriate to the material concerned.

6. CLASSIFICATION AND WITHDRAWAL -

a. Enemy Ground Forces war material will be classified as to categories by the authorities designated below. Notes amplifying classification and withdrawal are at Appendix "J" to this directive.

CATEGORY	DESCRIPTION	CLASSIFICATION AND WITHDRAWAL TO BE DONE BY
1.	Material required for intelligence purposes and technical research.	AFHQ
2.	Material required by the Supreme Allied Commander for use within his sphere of responsibility.	Ground Forces Commanders
3.	Material required for such exceptions as may any nations shall negotiate at any time with the Allies.	AFHQ

Ltr, AFHQ, AG 30[illegible]/163 LCG-O,
dtd 22 June 1945 (Cont'd)

4.	Material required for equipping national forces of liberated countries or for distribution among the United Nations.	AFHQ
5.	Material which requires special handling (e.g. Toxic Gases)	Classifying authorities: Ground Forces Commanders. Withdrawal authority: AFHQ

b. Any war material not placed in categories 1 - 5 above will be known as uncategorized material, for which AFHQ will be the withdrawal authority.

c. The powers of classification and withdrawal will under no circumstances be delegated to Italian Commanders.

7. REPORTS

a. Addressees will report as of the 15th of each month (commencing with 15 June 1945) to reach this headquarters by the 20th of the same month all serviceable captured enemy material in dumps. Initially such reports will be in broad terms and special efforts will be made to insure the fullest possible reports on material which is significant for maintenance of PCA or Allied troops including redeployment operations. In addition to the inventories called for above, addressees will as of the 15th of each month designate such material as is in excess of their requirements. The first report of excesses will be as of 15 July 1945.

b. No special reports are required in connection with material which is not repairable. It should be rendered innocuous (where necessary) and turned over to Allied military salvage organizations.

c. As of the 15th of each month (commencing with 15 June 1945) to reach this headquarters by the 20th of the same month addressees will report the following information in respect of all captured general purpose (B) vehicles showing vehicles of Italian make separately.

(1) Numbers and types organized into car/truck companies, held by units within establishments, or otherwise.

(2) Numbers and types handed over to other agencies.

(3) Numbers and types awaiting issue.

(4) Numbers and types awaiting repair.

8. PRIORITIES FOR TAKING OVER AND COLLECTION

a. Material will be taken over (or collected where necessary) in the following order:

1302

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

Ltr, AFHQ, AG 386.3/163 LCG-O,
dtd 22 June 1945 (Cont'd)

(1) Category 1.

(2) Category 2.

(3) Category 3.

(4) Other categories and uncategorized material as convenient unless otherwise ordered by this headquarters.

(5) Unserviceable material and scrap.

b. The order in which material in category 2 is to be taken over or collected will normally be as follows:

(1) Vehicles which are serviceable or a source of spares.

(2) Food, clothing and coal.

(3) Animals.

(4) Petrol, oil, lubricants (including containers therefor).

(5) Signal Stores.

(6) Medical, dental and veterinary stores, equipment and drugs.

(7) Technical railway stores and equipment.

(8) Docks and inland water transport, stores and equipment.

(9) Engineer stores and equipment.

(10) All other serviceable and repairable Ground Forces material.

9. POLICIES

a. Retention of material by units or individuals - Retention by units or individuals of such material unless properly authorized in accordance with this instruction and other pertinent directives is forbidden.

b. Use of material by Allied Commanders - Authority is granted for the maximum use to be made of enemy material required for the support of Allied Forces (including essential civil requirements) or for the maintenance of enemy forces.

c. Recaptured material of Italian Military Origin - Recaptured material of Italian Military origin which is not required for military purposes including maintenance of POW will be turned over immediately to the Italian military authorities for Italian maintenance. Such material may also be used by Italian troops for support of operations. The channel of transaction in material of Italian origin which is to be returned to the Italian military authorities will be AMIA. Receipt for material so handed over will be taken

Declassified E.O. 12065 Section 3-402/NNDC No. 785020

by the issuing Allied Services and forwarded to this headquarters through normal channels. All remaining recaptured Italian war material will be reported to AFHQ and disposal instructions awaited.

d. War Material of US, British, Russian, or French Origin

(1) It will be the policy for material of US or British origin recovered from the enemy by recapture or surrender to be turned over to the American or British services normally responsible for the class of material concerned.

(2) It will be the policy to return to the Russian and French authorities all material which was formerly the property of the Russian and French Governments. Pending further instructions all material that is apparently of Russian and French ownership will be segregated and reported to this headquarters.

e. War Factories and War Factory Production - The policies contained in letter, this headquarters, file AG 386.3/087 GEG-O, dated 11 February 1945, subject: "Policy on Italian Munitions Production" will apply.

f. Ammunition

(1) Attention is drawn to current instructions on the handling of enemy ammunition.

(2) Ammunition of German manufacture if in Category 3 and in original containers will be centralized in a few selected parks under arrangements to be made by addressees. German transport and personnel will be used for this purpose under Allied supervision.

(3) Small quantities of loose ammunition in unguarded dumps which constitute a hazard to life or property will, under arrangements to be made by MMLA, be reported by Carabinieri to the Italian Ministry of War. MMLA will authorize the destruction by the Italian Ministry of War without reference to this headquarters of all such small quantities of German or Italian ammunition. Explosives will, if not available in the dumps, be demanded by MMLA from Armies, Districts, or Base Section.

(4) Small Dumps of German and Italian ammunition (other than that in Category 3 in original containers) of 500 tons or less will be destroyed by the most suitable means by German personnel under Allied supervision. German technical units may be formed for this purpose. If practicable the brass will be recovered and be returned through Allied Army Salvage organizations.

(5) Larger Dumps of German and Italian ammunition in excess of 500 tons will be placed under guard, their contents reported and disposal instructions awaited.

Declassified E.O. 12065 Section 3-402/NNDC #0. 785020

(6) Nothing in these instructions is to be regarded in any way as restricting the authority of addressees to destroy ammunition in any quantity which is in a dangerous condition or constitutes a hazard to internal security, utilizing German personnel, under Allied supervision, for the work.

g. Animals

(1) It is expected that a large proportion of enemy-held animals will disappear before Allied control becomes effective. The remainder will be classified and where possible Vallein-tested and Preston-branded from numbers allotted to Armies by this headquarters.

(2) Animals required for the maintenance of surrendered German forces will remain under German army care and supervision.

(3) Animals in Categories 2 and 3 will be moved as soon as possible into Allied animal collecting centers. Separate instructions will be issued on this subject.

(4) The remainder will be handed over on temporary loan to civil authorities by A.C who will obtain receipts.

h. War Material alienated by the Enemy - Any alienation of war material by the enemy, out of the ordinary course of army administration (for example, materials which may have been sold to the civilians in anticipation of surrender) entered into within three (3) months before the date of surrender shall be provisionally regarded as voidable, and, if required, the material so alienated will be summarily recovered.

i. Repairs to Enemy Material - Except on instructions from this headquarters, no attempt will be made to repair enemy material other than that categorized as 1 and 2, but category 3 material will be preserved to the extent of being put in grease and under cover where appropriate. With the exception of category 1, enemy material may be modified as required for abnormal uses.

j. Passenger and Load-Carrying Vehicles

(1) To allow for the maintenance of enemy forces and in order to save Allied transport, car and truck companies of vehicles of German make, by types, will be formed. Whenever practicable, however, such vehicles will not be issued without workshop inspection and never without TM numbers and full registration.

(2) The issue of enemy vehicles to existing Allied units will be permitted only in cases where such units have deficiencies in their TEs (&Es).

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

(3) Italian Army vehicles captured after the armistice with Italy will be dealt with in accordance with Section II, AFHQ Circular Number 5, 1945, and returned to the appropriate Italian authorities through MMIA. All other captured Italian vehicles whether requisitioned or not will be turned over to Allied Commission. Italian vehicles are defined as vehicles of Italian make. Italian military vehicles can usually be identified by the R-E on the dashboard or instrument panel. If doubt arises as to whether a vehicle of Italian make is a civilian or military vehicle, such vehicle will be turned over to MMIA who will determine the ownership and subsequent allocation in conjunction with Allied Commission. Receipts for all vehicles handed over to Allied Commission or MMIA will be obtained. As the retention of vehicles of Italian make against deficiencies in unit establishments is, at present, authorized, the ultimate hand-over to Allied Commission or MMIA of such vehicles may be postponed until further orders are issued by this headquarters. Every effort will be made to hand-over to MMIA all stocks of spare parts including tires for Italian military vehicles which are marked with R-E or are otherwise identifiable as having been the property of the Italian Ministry of War. Stocks of spares for Italian civilian vehicles will similarly be handed-over to Allied Commission or in doubtful cases to MMIA. Sufficient spares may be retained for such Italian vehicles as are held against deficiencies in Unit establishments. Addressees will not normally be responsible for repairing vehicles of Italian make before they are handed over to Allied Commission or MMIA. The responsibility for insuring the proper registration of, and the provision of drivers for all vehicles handed over to them will be that of Allied Commission or MMIA as the case may be.

k. Captured Civilian Material

(1) Captured material, which is not required for military purposes including maintenance of PW, which is apparently of a civil character and of Italian origin will be turned over to Allied Commission or CAC as appropriate, who will investigate ownership and authorize its return to its owners under such financial arrangements as may be appropriate. Material of this character, the ownership of which cannot be determined, will be disposed of by sale or otherwise as Allied Commission may determine. Proceeds of sales will be deposited in the Allied Finance Agency under Allied Commission direction and held pending further instructions from CCS. (2)

(2) Captured German civil material which is not required by the controlling service at this headquarters will be turned over to Allied Commission for disposal as above.

(3) Captured civil material, which is of neither German or Italian origin will be reported to this headquarters and disposal instructions awaited.

1. (Salvage (Scrap) - Unrepairable enemy ground forces war material for which there is no further use, will be regarded as salvage (scrap) and will be dealt with in accordance with existing procedures.

LOG-O, dtd 22 June 1945

NOTES ON CLASSIFICATION AND WITHDRAWAL OF ENEMY AMMUNITION

1. CATEGORY 1 MATERIAL. AFHQ will be responsible for indicating to addressees(by means of a list or through liaison officers) what material is to be placed in Category 1 and where it is to be consigned. Material thus placed in Category 1 is not available for any purpose. AFHQ is responsible for maintaining records of all material withdrawn under their authority.

2. CATEGORY 2 MATERIAL. Addressees, subject only to limitation in 1 above, will keep any material which they need or are likely to need in Category 2. They will maintain sample records of all Category 2 material which they are ordered to be withdrawn (e.g. copies of the documents and consignment notes to make this up). Addressees will not prepare consolidated returns of material thus used until ordered by this headquarters.

3. CATEGORY 3 MATERIAL. A list of Category 3 material which may be required for the FAR EAST is attached as Appendix "B". Addressees will locate such material and report the quantities held to this headquarters. Such inventories must be accurate and the material so reported must be frozen. AFHQ will declare how much of this material is to be placed in Category 3. AFHQ will be responsible for issuing disposal instructions and maintaining the records of withdrawals of Category 3 material.

4. CATEGORY 4 MATERIAL. If the policy in connection with the equipping of liberated armies is completed during the period this headquarters will issue a list of material that might be required under Category 4. The procedures will then be as for Category 3 material in paragraph 3 above.

5. CATEGORY 5 MATERIAL.

a. Material which must be destroyed for any reason e.g. spoiled foodstuffs, dangerous ammunition, will be placed in Category 5 by the addressees and destroyed. Simple records in broad terms of material which has been thus destroyed will be maintained by the addressees (e.g. a copy of the authorization to destroy the material). No returns of such destructions are required from the addressees until ordered by this headquarters.

b. All stocks of Toxic Gases will be placed in Category 5 and if practicable segregated under normal safety precautions. The approximate tonnages by types of fillings and locations will be reported to this headquarters, which will then give disposal instructions. Isolated stocks of less than 100 tons may be destroyed by any suitable means if such destruction will help to reduce guarding, transportation, or any other problem.

Ref: 2006/Ops.

15 February 1946.

SUBJECT: Captured Enemy material - Disposal of to Italian Army.

TO : Allied Force Headquarters.

1. Reference is made to AFHQ Directive No.386.3/G(AG)-0 dated 2 October 1945.

This directive cancelled No.386.3/163.100-0 dated 22.Nov.45 and deals with the disposal of captured enemy material in the Mediterranean Theatre. The important difference between these two documents is the wording of the paragraph 8(c), from which the following extract is quoted:

"Recaptured material of Italian origin which is not required for military purposes, including maintenance of POW, will be turned over immediately to the Italian military authorities for maintenance of the Italian forces, within the authorised ceilings."

In the original directive (para 9(c)), the wording was as follows:

"Recaptured material of Italian military origin which is not required for military purposes, including maintenance of POW will be turned over immediately to the Italian military authorities for Italian maintenance."

2. I am informed by G(O), Land Forces Mediterranean that this directive as it stands at present is being construed as limiting the right of the Italian War Ministry to re-possess material of Italian military origin that proven necessary for "maintenance". In certain cases, the release of equipment of patterns not now current in the Italian Army has been refused on these grounds even though by adaptation or the use of component parts, a considerable amount of needed material could have been obtained. For example, in letter AFHQ/3067B/5(G(AD)) dated 31 Jan 46, general release of arms and ammunition of Italian origin has been refused. Furthermore, the control of weapons newly manufactured in arms factories in the North is still exercised by HQ, 2 District.

It is submitted that AG, which is the instrument (under SACMED) responsible for ensuring that such material is not used for purposes contrary to the Armistice terms should be the sole arbiter in such matters.

3. Full details as to the holding of arms and ammunition have been submitted to your HQ by Land Forces Sub-Commission. It is understood that the Allied intention is to equip the Italian Army, less CS, with British

1636

CFM-3

Declassified E.O. 12065 Section 3-402/NNDC No. 785020

weapons. The re-organisation of the C.M.H., however, requires the allocation of the most modern Italian weapons, and it is therefore most undesirable that the Italian Government should be deprived of the right (controlled by AC) to possess themselves of Italian arms of recent manufacture.

4. I am informed that a further amendment to the directive dated 6 Feb 45, not yet received, gives title to the Italian Government so far as acquisition of Italian manufacture is concerned, but this will not entirely remedy the present situation. There are no satisfactory signs that the Italian Government is making adequate arrangements for the maintenance of the Army, which in any event is still dependent on the supply of equipment and spare parts from Allied sources. I feel the time has come when this subject should be discussed at a conference to be held at your H.Q. I suggest that Land Forces Sub-Commission should produce the agenda for such a meeting, indicating the points on which AFHQ assistance is sought.

5. I accordingly recommend:

(a) A further amendment to the AFHQ directive of 2 Feb 45, as under, be approved forthwith

"Para 4a, 3rd line, delete sub-paragraph 8(c), delete in line 4 "for maintenance of the Italian Forces within the determined ceilings".

(b) As in the case of the Navy and the Air Forces, the appropriate Sub-Commission of AC should be charged with the interpretation of the Armistice Terms and dependent directives in matters of the allocation of material to the Italian Army.

(c) A conference at AFHQ to consider progress made in supplying the Italian Army in accordance with the directive of the Combined Chiefs of Staff, and the measures needed to ensure the maintenance of this Italian Army during 1945.

Subject: Restitution of motor-transport belonging to Italian Royal Navy.

References: (a) AFHQ Directive AG 386.3 Q(AF)-O dated 2 Oct. 1945.

1. With regard to reference (a), paragraph 9 g(3), page 7, the statement is made that "Italian military vehicles can usually be identified by two stars to be found on the engine".

2. The Italian Ministry of Marine is having difficulty recovering its motor vehicles from CEM dumps because of the above statement, it being assumed by some officers in the field that the two-star identification applies to Italian naval vehicles. The Ministry of Marine has informed the Navy Sub-Commission of the following on the subject:

(a) "That I.R.N. regulations have never provided for motor vehicles to be marked in this manner.

(b) "That the only distinctive markings on I.R.N. motor vehicles are the engine and chassis numbers.

(c) "That from information received it would appear that the above marking - two five-pointed stars - was adopted by the Italian Army for several lots of motor vehicles.

(d) "That all Italian manufacturers have been approached formally in the matter and have given assurances that in supplying motor vehicles to the I.R.N. in no case have they used this marking to distinguish them from those supplied to the public."

1823

3. It is desired that information be promulgated to the effect that the two five-pointed star identification does not hold true for Italian naval vehicles.

Declassified E.O. 12065 Section 3-402/NNDC NO. 785020

From: MINISTRY OF MARINE (Maristat)
To N.S.C. - Rome
Date: 7th January 1946
Ref.: SM/844

Subject: Restitution of motor-transport belonging to the I.R.N.

1. The Allied Authorities at Caserta have given orders to external A.M.G. Authorities for the return to the Italian Armed Forces of those motor-vehicles only which are identified by a particular marking: being "two five-pointed stars" punched on the engine head.

2. With regard to this it is drawn to your attention :

a) - that I.R.N. Regulations have never provided for motor-vehicles to be marked in this manner;

b) - that the only distinctive markings on I.R.N. motor-vehicles are the engine and chassis numbers;

c) - that from information received it would appear that the above marking - two five-pointed stars - was adopted by the Italian Army for several lots of motor-vehicles.

d) - that all Italian Manufactures have been approached formally in the matter and have given assurances that in supplying motor-vehicles to the I.R.N. in no case have they used this marking to distinguish them from those supplied to the public.

3. It is requested that early action may be taken with the Headquarters at Caserta, in view of the above considerations, to obtain the issue of instructions to the external A.M.G. Authorities which will clarify the question so that the I.R.N. may have restored to it all motor-transport of which legitimate ownership has been proved by exhibition of the prescribed documents.

Subject : Ex-German war material.

Reference is made to enclosure (A) to your letter M30/2771 of 29th June, 1945.

1. The I.R.N. Authorities at Bologna have been instrumental in ascertaining the existence at the Modena Captured Materials Collection Ground of a large number of motor-vehicles formerly belonging to the German Navy.

2. The I.R.N. Centre applied to H.Q. No.2 District (Capt.Campbell, Coldstream Guards) for an allocation of a first lot of 18 vehicles, but the request was not granted since the recent instructions from General Alexander's Headquarters have been interpreted by Capt.Campbell in a sense governed by the following arguments put forward by him :-

a) Releases are restricted to the material already belonging to the I.R.N. before 8th September 1943 and to that of the so-called Republican Navy;

b) The word "Military" excludes all Naval Materials or materials of Naval origin.

3. Since the objections stated seem to be at variance with the instructions hitherto controlling allocations to the I.R.N. of this type of material, including material of German origin - not excluding motor vehicles (8th Category) - it is requested that you may take the question up with H.Q.No.2 District in order that it may be finally settled.

4. For your information it is drawn to your attention that in putting forward requests for ex-German motor-vehicles the I.R.N. Centre at Bologna has complied with the instructions contained in letter M30/3685 of 14th September 1945 and previous letters, of which Maristat has no knowledge.

Subject : Store House on Embriaco Jetty, Genoa.

With reference to the Ministry of Marine's letter SM.24113 dated 3rd November, 1945, at the request of the Navy Sub Commission, the Resident Naval Officer, Genoa, carried out an investigation into the matter in conjunction with the Italian and French Naval representatives.

2. The following facts, which are agreed upon by both the French and Italian Naval representatives, have emerged from this investigation :-

(a) The store house referred to is divided into two parts by a solid wall.

(b) In one portion is an air compressor, high pressure piping, benches, etc., used for charging and servicing torpedoes. This portion was handed over to the French by the Royal Navy in September, 1945, and is now in use by the French. It contained no M/S stores of any kind - but had various hawsers, wires and ropes which have been retained by the French.

(c) The other portion is, as stated in sub para.(a) above, quite separate from the foregoing, and contained the M/S material referred to in your letter. The whole of this material has been returned to the Italian Navy by the Royal Navy.

(d) The French Naval Authorities have never blocked any of this material in the store house.

1. During September last the Royal Navy turned over the Embriaco Jetty Storehouse to the control of the Italian Navy at Genoa, making it known, however, that all the material in it was blocked and at the disposal of the French Authorities.

2. From an examination made by I.R.N. personnel it has emerged that the material contained in this store is all M/S equipment which obviously belongs to the I.R.N.

3. In view of the above and of the scarcity of this material it is requested that an approach may be made to the appropriate Authorities in order to obtain the release of this equipment for the Italian Navy.

DISPOSAL OF RECAPTURED ENEMY MATERIAL.

1. The following German Navy and Army instructions govern the procedure to be followed with reference to former Italian Navy material which has been recaptured from the Italian Republican Navy or otherwise retaken or found, including material of German origin, except :

(A) Material recaptured or found in that part of the Venezia Giulia and recently transferred from Jugoslavia to Allied Military control.

(B) Material of Allied origin irrespective of the manner in which it was acquired.

2. The above material includes consumable naval stores and supplies and military equipment of all kinds intended for and available to enemy naval forces in Italy and, subject to the requirements of the Allied Naval Authorities, all materials found and reported to the Navy Sub Commission, Allied Commission, may be utilized at the discretion of the Ministry of Marine for the maintenance of the Italian Navy.

3. The Ministry will form Material Recovery Parties at the earliest practicable date in areas designated to take possession and control of all such material not required for Allied Naval use. The functions of these parties are :-

(A) To locate, sort, classify and list materials;

(B) To report on 31st July, 1945, and monthly thereafter to the Navy Sub Commission through the Ministry of Marine particulars of all material taken over under the following headings, distinguishing in each case between (a) material of Italian origin (b) material of German origin. It is particularly emphasized that these reports are not required to specify details of minor items of stores and equipment and for the most part statements in total of the various items located will suffice.

Subject: Recovery of equipment in Storehouses Nos.93 and 94 at Pergine.

1. The I.R.N. Collection Centre at Venice has notified this Ministry that a visit has been made to storehouses Nos.93 and 94 at PERGINE which contain I.R.N. wireless equipment. near Bologna and Modena

2. It has been discovered as a result of this visit that already a part of that costly equipment - comprising among other things radio range-finders, echo detection goniometers, short and medium wave transmitters, generators, short-wave receivers, and W/T. valves - has been taken away.

3. In view of the high value of the equipment which remains, and of the danger that a further delay in taking delivery of it would lead to even greater harm to the I.R.N., it is requested that A.F.H.Q. Caserta be approached in order that the orders for the release of the equipment contained in your letter NSC/3219 of 14th August 1945 may be confirmed to the Commands which have relieved the 5th and 8th Armies.

SUBJECT: Salvage of equipment in warehouses nos.93 & 94 at PERGINE.

1. The Italian R.Naval Center, Venice, has informed the Ministry that a survey has been made to warehouses nos. 93 and 94 at PERGINE, which contain Italian Naval W/T. equipment.

2. Such a survey has shown that some of the valuable equipment mentioned above has been removed. The equipment contained in the warehouses consists of Radio range-finders, Asdic sets, short and medium wave-length transmitters, electric generators, short wave receiving sets and radio tubes.

3. In view of the value of the equipment which still exists in subject warehouses and of the danger that any further delay in withdrawring it may damage the Italian Navy still more, it is requested you will approach A.F.H.Q. Caserta so that they may give the commands that have taken over from the 5th and 8th Armies confirmation of their instructions to which Navy Sub Commission's letter No. NSC/3219 of 14th August 1945 refers.

ARGOMENTO: Ricupero materiali nei magazzini 93 e 94 di Pergine.

1. Il Centro Raccolta R.Marina di Venezia ha segnalato a questo Ministero di aver visitato i magazzini nn.93 e 94 di PERGINE che contengono materiale radio della R.Marina Italiana.

2. Dalla visita è risultato che già una parte di detto costoso materiale che consiste tra l'altro di radiotelemetri, ecogoniometri, trasmettitori ad onde corte e medie, gruppi elettrogeni, ricevitori ad onde corte e valvole radiotelegrafiche, è stata asportata.

3. Dato l'alto valore del materiale ancora esistente ed il pericolo che un ulteriore ritardo nel ritiro si tramuti in un danno ancora maggiore per la R.Marina Italiana, pregherei voler interessare l'A.F.H.Q. di Caserta perchè riconferma ai Comandi che hanno sostituito la 5^ ed 8^ Armata gli ordini di cessione del materiale di cui al foglio NSC/3219 in data 14 agosto 1945 di codesta S.Commissione Navale.

Memorandum by Captain Butler U.S.N.

Urgent.

The Ministry of Marine has received the following information by telephone from Captain CICOGNA, Liaison Officer with the 5th Army :-

I have visited in the company of Captain CAMICIA several centres at which equipment has been collected; of these many belonged to the I.R.N.

The 5th Army Command does not return the equipment to the Army, to the Navy, or to the Air Force, but to the various Allied Sub-Commissions which then do as they think fit.

In order that the I.R.N. may take charge of its own equipment it is necessary, in consequence, for an Allied Officer of the Navy Sub-Commission in possession of all the A.F.H.Q. authorities to proceed to Gardone; he will be able then to release the material to the I.R.N.

Only in this way can anything be obtained.

It is necessary for action to be taken quickly as the 5th Army H.Q. will leave in a short time.

1. In reply to reference (a), as stated in paragraph 3 of reference (b) Allied Naval and Military authorities, including the 5th Army, were informed by letter on 5 July 1945 that the Ministry of Marine had been directed to form Material Recovery Parties to take possession or control of former Italian Navy material which has been recaptured from the Italian Republican Navy or otherwise retaken or found, including material of German origin. In connection with the instructions which are enforced by 5th Army authorities at Venice, it is probable that the provisions of reference (b) have not yet been disseminated to all Army Commanders. Fifth Army authorities, however, have been informed as to the situation at Venice and requested to take appropriate action.

2. In order to facilitate the recovery of material, the Italian Officers-in-Charge of Material Recovery Parties should be directed by the Ministry of Marine to conduct, whenever practicable, their negotiations with Allied Military or Naval authorities through the British Naval Officers-in-Charge in the various localities who are cognizant of the instructions which have been issued.

1. The Italian Ministry of Marine was directed by enclosure (A) to reference (a) to form Material Recovery Parties under the Officers-in-Charge of Italian Royal Naval Centers at Genoa, Turin, Milan, Venice and La Spezia to take possession and control of former Italian Navy material which has been recaptured from the Republican Navy or otherwise retaken or found, including material of German naval origin. Information has been received through the Italian Ministry of Marine from the Italian Royal Naval Center at Venice that 5th Army authorities consider all material formerly belonging to enemy forces to be under 5th Army control for disposition in accordance with the following priorities:

(a) For the requirements of surrendered German Forces in Italy still in the area under 5th Army control.
(b) For civilian requirements.
(c) For the requirements of Italian Forces operating with the 5th Army.
(d) For Italian Forces.

2. If the above instructions are in fact in force, it is presumed that they are applicable only to materials belonging to the enemy land forces and not to enemy naval materials. Accordingly, it is requested that appropriate instructions be issued to 5th Army Commands as soon as practicable in order to permit Italian Naval authorities to carry out the directives contained in reference (a) for the assembly and disposal of recaptured enemy naval material.

Subject: Recovery material - ex enemy and of the Repub. Navy.

Naval Sub Commission with letter No.2771 dated 29th June, issued instructions with regard to the recovery of the material in question by I.R.N.

Orders in the same tenor have been given to I.R.N. centres at Genoa-Torin-Milan-Venice and La Spezia.

As a first result, the I.R.N. Centre at Venice, advise that the Commission sent to the Upper Adige, after difficult interviews with the Commander of the 5th Army, was informed that the material of the Nazi-Fascist Armed Forces was considered as prize-in-war of the 5th Army which will dispose of it in the following order of priority :-

a) for necessary use by German Armed Forces surrendered in Italy and still in V Army area;

b) for civilian purposes;

c) for the use of Italian Armed Forces operating with the 5th Army;

d) for Italian Armed Forces.

Owing to this situation, it is requested that you will inform the 5th Army Command (or its successor) Allied Command's intention so that the I.R.N. centres in the North can carry out the instructions issued by N.S.C. as mentioned above.

DISPOSAL OF RECAPTURED ENEMY MATERIAL.

1. The following instructions govern the procedure to be followed with reference to former Italian Navy material which has been recaptured from the Italian Republican Navy or otherwise retaken or found, including material of German origin, except :

(A) Material recaptured or found in that part of the Venezia Giulia and recently transferred from Jugoslavia to Allied Military control.

(B) Material of Allied origin irrespective of the manner in which it was acquired.

2. The above material includes consumable naval stores and supplies and military equipment of all kinds intended for and available to enemy naval forces in Italy and, subject to the requirements of the Allied Naval Authorities, all materials found and reported to the Navy Sub Commission, Allied Commission, may be utilised at the discretion of the Ministry of Marine for the maintenance of the Italian Navy.

3. The Ministry will form Material Recovery Parties at the earliest practicable date in areas designated to take possession and control of all such material not required for Allied Naval use. The functions of these parties are :-

(A) To locate, sort, classify and list materials;

(B) To report on 31st July, 1945, and monthly thereafter to the Navy Sub Commission through the Ministry of Marine particulars of all material taken over under the following headings, distinguishing in each case between (a) material of Italian origin (b) material of German origin. It is particularly emphasized that these reports are not required to specify details of minor items of stores and equipment and for the most part statements in total of the various items located will suffice.

ITALIAN NAVY STORES, EQUIPMENT AND REALTY

(a) Captured enemy material consists of all equipment, stores and supplies previously belonging to all arms and services of the ground forces of the enemy.

(b) Italian material. All Italian material belonging to all arms and services of the Italian ground forces and in possession of the Italians at the time of the Armistice with Italy is considered as Italian material and, except as otherwise directed by Allied Force Headquarters, is reserved for the use of the Italy Army under direction of the Army Sub-Commission, Allied Commission.

(c) Italian Naval Material and Italian Naval Property. All captured Italian naval material which came into the possession of the Allied Governments prior to the Armistice with Italy is the property of the Allied Government concerned. Italian naval material which was in possession of the Italian Navy at the time of the Armistice with Italy is reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission and is not to be removed from Italian naval jurisdiction and control without express written authority from the Navy Sub-Commission. This restriction does not preclude the right of the utilisation of such materials for operational requirements only. The Italian Navy has been authorised to post suitable notices at Italian Naval Depots and installations after they have been stamped with the seal of, and countersigned by, the Navy Sub-Commission.

(ii) All buildings and land, hospitals, depots, navy yards and offices belonging to the Italian Navy are reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission, and are not to be requisitioned without express written authority from the Navy Sub-Commission unless required operationally. The Italian Navy has been authorised to affix suitable notices as above.

(iii) All private Italian industrial and munition plants engaged in work for the Italian Navy are to be utilised to the maximum extent to further the allied war effort and for the rehabilitation of Italian economy, and the output of such plants is not to be impaired without prior consent of the Commander-in-Chief through the Navy Sub-Commission, but this does not preclude the right to use such plants for operational requirements only. These plants are authorised to post notices as above prohibiting the requisition of materials or equipment without authority from the Navy Sub-Commission.

Subject: I.E.N. Materials to be found in N.Italy.

1. In various N.Italian localities I.E.N. materials are to be found which had been taken away from different Stores either by the Germans or the Republican Navy.

2. Said materials can easily be drawn as there is nothing to shew that they are I.E.N. property and should not be taken away without special authorization from N.S.C.

3. As is under consideration by C. in C. Med. in regard to placing bi-lingual notices (on I.E.N. property) in S.Italy, it is requested that this system also be applied in N.Italy, with the understanding that such materials which may be required by the Allies may be drawn on authorization from N.S.C.

4. Until such regulations are implemented, request that Allied Authorities up North be asked to stop withdrawals of materials unless authorized by N.S.C.

5. At the same time we shall be glad to know C.in C. Med.'s attitude re. directives prepared by N.S.C. in letter N°N.S.C./2039 of 5 Apr. last.

66. INSTRUCTIONS COVERING CAPTURED ENEMY MATERIAL

Definitions.

(a) Captured enemy material consists of all equipment, stores and supplies previously belonging to all arms and services of the ground forces of the enemy.

(b) Italian material. All Italian material belonging to all arms and services of the Italian ground forces and in possession of the Italians at the time of the Armistice with Italy is considered as Italian material and, except as otherwise directed by Allied Force Headquarters, is reserved for the use of the Italy Army under direction of the Army Sub-Commission, Allied Commission.

(c) Italian Naval Material and Italian Naval Property. All captured Italian naval material which came into the possession of the Allied Governments prior to the Armistice with Italy is the property of the Allied Government concerned. Italian naval material which was in possession of the Italian Navy at the time of the Armistice with Italy is reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission and is not to be removed from Italian naval jurisdiction and control without express written authority from the Navy Sub-Commission. This restriction does not preclude the right of the utilisation of such materials for operational requirements only. The Italian Navy has been authorised to post suitable notices at Italian Naval Depots and Installations after they have been stamped with the seal of, and countersigned by, the Navy Sub-Commission.

(ii) All buildings and land, hospitals, depots, navy yards and offices belonging to the Italian Navy are reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission, and are not to be requisitioned without express written authority from the Navy Sub-Commission unless required operationally. The Italian Navy has been authorised to affix suitable notices as above.

(iii) All private Italian industrial and munition plants engaged in work for the Italian Navy are to be utilised to the maximum extent to further the allied war effort

Italy Army under direction of the Army Sub-Commission, Allied Commission.

(c) Italian Naval Material and Italian Naval Property. All captured Italian naval material which came into the possession of the Allied Governments prior to the Armistice with Italy is the property of the Allied Government concerned. Italian naval material which was in possession of the Italian Navy at the time of the Armistice with Italy is reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission and is not to be removed from Italian naval jurisdiction and control without express written authority from the Navy Sub-Commission. This restriction does not preclude the right of the utilisation of such materials for operational requirements only. The Italian Navy has been authorised to post suitable notices at Italian Naval Depots and installations after they have been stamped with the seal of, and countersigned by, the Navy Sub-Commission.

(ii) All buildings and land, hospitals, depots, navy yards and offices belonging to the Italian Navy are reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission, and are not to be requisitioned without express written authority from the Navy Sub-Commission unless required operationally. The Italian Navy has been authorised to affix suitable notices as above.

1568

(iii) All private Italian industrial and munition plants engaged in work for the Italian Navy are to be utilised to the maximum extent to further the allied war effort and for the rehabilitation of Italian economy, and the output of such plants is not to be impaired without prior consent of the Commander-in-Chief through the Navy Sub-Commission, but this does not preclude the right to use such plants for operational requirements only. These plants are authorised to post notices as above prohibiting the requisition of materials or equipment without authority from the Navy Sub-Commission.

(d) Recaptured Material of Italian Naval Origin. Recaptured material of Italian naval origin, if not required by Royal Navy, may be turned over immediately to the Italian naval authorities for Italian maintenance. This is to be effected through the Navy Sub-Commission.

2. It is the responsibility of naval authorities at newly entered ports to locate equipment and materials peculiar to naval purposes and to undertake custody thereof in the interest of the allied naval forces and

/over ...

Declassified E.O. 12065 Section 3-401/NSDC No. 785020

for such Italian naval services as may be subsequently determined. In addition, liaison should be maintained with military authorities to ascertain availability of equipment and stores in army control which may be needed or can be spared for naval purposes.

3. A general classification of supplies etc. of which custody is taken by naval authorities, is to be undertaken as quickly as possible and the general situation reported to the Commander-in-Chief, Mediterranean, as a guide to subsequent action. Any such materials, etc. are to be regarded as available for repair work or issue to essential naval services as may be authorised by the Senior Naval authority at the port. As soon as circumstances permit, sorting, classification of stores etc. must be proceeded with in detail, the various articles being taken on charge in the usual manner.

4. Attention is directed to the importance of segregating specially all scientific and other specialised equipment captured or obtainable and which may be useful for naval intelligence or research. Such equipment must be kept under lock and key and reported without delay in order that directions may be given for its disposal.

5. The procedure for dealing with captured enemy documents is given in Mediterranean Standing Order No.13 and for Requisitionings and Hirings in Mediterranean Shore Standing Order No.2.

FIRST ENDORSEMENT ON
Minister Marine ltr.
SM/30460 of 13 Dec. 44.

From: Navy Sub-Commission, Hq. Allied Commission.
To : Commander-in-Chief, Mediterranean.

Subject: Italian Naval Vessels, Realty, Equipment and Stores.

1. The Italian Ministry of Marine in the basic letter, forwarded a copy of the Italian Ministry of War letter of 21 November 1944, outlining the procedure governing Italian Army War materials and a proposed letter by the Ministry of Marine governing the subject Italian Navy property, for approval. Allied Forces Headquarters Circular letter No. 13 of 1 May 1944, issued instructions for the allocation and assignment of captured enemy material. This directive relates primarily to Italian Army material. Paragraph 1(a) thereof states that a directive was to be issued by the Naval Allied Commander-in-Chief, Mediterranean, governing Italian Navy property. The Navy Sub-Commission, A.C. has no record indicating whether a directive has been issued. Allied Forces Headquarters circular letter No. 29 of 9 December 1944, modified circular letter No. 13 and provided in paragraph 2 that no material supplies or stores will be removed from Italian Navy depots without authority from the Navy Sub-Commission, A.C.

2. The proposed letter by the Ministry of Marine relates to Italian naval vessels and auxiliaries, realty, equipment and vehicles. AFHQ circular letter No. 13 refers primarily to consumable stores and supplies. Headquarters, AAI. CMF. letter 2030/12/Q2 of 1 July 1944, exempted Italian Navy buildings, real-estate, transportation and other material from requisitioning, without prior approval from that Headquarters, except for operational requirements.

3. Article 11 of the Armistice Terms with Italy provides that all Italian war material will be placed in store under such control as the Allied Commander-in-Chief may direct for ultimate disposal as prescribed by the United Nations. The Navy Sub-Commission, A.C. does not recommend approval of the proposed directive as prepared by the Italian Ministry of Marine, for the reason that it is too broad and is tantamount to a modification of the Armistice Terms. The directive contains no definition as to what Italian navy property is to be considered as captured enemy material. It defines as Italian property, ships of all

types, naval and auxiliary; realty including requisitioned buildings; equipment which was in the possession of the Italian Navy at the time of the Armistice including equipment which has been or will be salvaged and all transport. Paragraphs C and D of the proposed directive are not approved for the reason that they are premised on the assumption that Allied authorities continuously disregard Italian Navy property rights. Approval of these provisions would constitute a tacit admission of this contention.

4. Before taking action on the proposed directive by the Italian Ministry of Marine, information is requested whether the Naval Allied Commander-in-Chief, Mediterranean, has issued any instructions in this connection. If no instructions have been issued, it is recommended that a directive be promulgated defining Italian Navy property which is considered as captured enemy material and property which under the acceptance of Italy as a co-belligerent should be reserved for Italian Navy use. The directive should be applicable only to moveable equipment and consumable supplies and not to ships, realty and equipment which has been incorporated into the realty. A separate directive should further provide for the exemption of Italian Navy realty and buildings from being requisitioned without prior approval from a designated authority except for operational requirements. A form notice should be included in the directive for use by Italian Navy authorities to advise Allied authorities that the property is not subject to requisition. When promulgated, the Ministry of Marine will be informed as to the provisions of the directive and advised that, consistent with the provisions thereof, orders may be issued to the Italian Navy Commands for the implementation of the directive without prior reference to Allied authorities.

Enclosure No. 2 - Proposed Letter to I.R.N. Commands.

Subject: Italian War Materials.

Ref. letter from Marisegrege 6227 dated 6th Oct. last under above heading.

1. So as to enable Central Departments and outlying Commands to undertake the recovery and safekeeping of I.R.N. materials, the following instructions are hereby issued: -

A) Authorization to recover material originally in the charge of IRN.

(a) All material belonging to I.R.N. Ships and Shore Commands, or under delivery to them at the time of the Armistice, is considered as Italian material and, unless otherwise ordered by A.C., is reserved to the use of I.R.N. under the control of U.S.C.

(b) No building, land Ships, transport or other materials belonging to the Administration of the Ministry of Marine, or in the possession of I.R.N. Ships, Commands and Departments can be occupied, requisitioned, taken and used without prior authorization from M.S.C. unless it is a matter of using the transport and materials listed above for operational requirements, in which event Allied Operational Commands may make direct use of same.

(c) To avoid the occupation, requisitioning, confiscation, etc., other than by the procedure referred to in sub para (b), Allied Authorities have authorized the use of bilingual notices (see Encl. 1) on all Ministry of Marine Administration property, ordering Allied Commands and Departments to respect same.

(d) The new bilingual notices will be prepared by this Ministry and are to replace all those in use to date. The principal characteristic of the new notice is that it is to be numbered and refer to the property for which it had been issued and moreover it must bear the date, stamp and signature of a U.S.C. Officer.

(e) Request for the new bilingual notices are to be made at once by the Commands and Depts. concerned to Maristat M.D.S. Office C.R.A. specifying: -

- Address of the property to which the notice refers.
- Denomination of the property and its present use.

1650

(f) These notices: -

In areas South of the Army Rear Control Line will be distributed to Commands and Depts. concerned by M.M.I.A. Command through their own L/Os.

Declassified E.O. 12065 Section 3-402/NNDC No. 785020

In areas North of A.R.C.L., they will be applied by M.M.I.A. L/Os. to all I.R.N. property not required for immediate operational needs. These Officers each month will notify M.M.I.A. Command of the notices set up so that the corresponding list of properties bearing the bilingual notices may be kept up to date. M.M.I.A. Command will notify Muristat M.D.S. Office C.R.A. so that their similar list may be kept in the same manner.

(g) Copy is attached of Circular No. 29, Part I of 9 December, 1944 from A.F.H.Q. with a request that any doubts may be cleared up in regard to what Allied Forces Command has very clearly set forth.

B) Definition of what must be understood as being Italian Materials.

(a) Ships: I.R.N. Ships of any type and tonnage, including subsidiary and auxiliary vessels, requisitioned vessels and those chartered by I.R.N.; craft of any description engaged in coastal or port services.

(b) Buildings: Commands, Offices, Barracks, Working Establishments, Hospitals, Depots, Stores and all other real estate, property of I.R.N. Administration or requisitioned and occupied by I.R.N. personnel or Departments.

(c) Equipment, etc.,: All arms, ammunition, technical gear, equipment, Barracks gear, clothing as well as all Naval gear in possession of I.R.N. at the time of the Armistice and which has been or will be salvaged during the progress of the liberation of Italian soil.

(d) Vehicles: All means of transport belonging to or requisitioned by I.R.N. up to the time of the Armistice.

Civil establishments which were under the control of Ministry of Marine Administration are not considered as being war materials, nor those having contracts with this Ministry, nor real estate nor nother property belonging to them. Such are to be considered as civilian materials and thus cannot motivate demands to N.S.C. unless they do not directly interest I.R.N. for the maintenance of its own war efficiency.

1529

C) The infringements proven or those which may be verified subsequently in regard to what is set out in Para "A" should be made known to this Ministry in the following manner:

(a) Name of Ship or Command, Dept. of Establishment from whence materials have been drawn.
(b) Name of Allied Command which drew same.
(c) Date and time same was effected.
(d) Nature of the infringement in regard to Para "A".
(e) Materials drawn.
(f) Any particulars helpful to a prompt and efficient intervention.

Declassified E.O. 12065 Section 3-402/NNBC No. 785020

D) Moreover, a full list also is to be sent to this Ministry of all war materials of Ministry of Marine Administration property which have been requisitioned, drawn or in use by Allied Forces contrary to the rulings of Para "A".

Those materials in regard to which it will not be possible to gather particulars as called for in Para "C" are to be mentioned in a special list and considered as I.R.N. 's contribution to the Allied war effort.

E) Any eventual divergencies of opinion which may arise from application of Para "B" will be solved as set out below:

(a) Questions of a local character will be dealt with by CinC of the Department (Area) with the Senior Local British Naval Commands.

(b) Matters of a general nature which involve questions of principle are to be passed to this Ministry for discussion with N.S.C.

THE MINISTER.

REQUISITIONING AT VENICE.

1 CINC MED. SAC(S) 23rd May 45 , Papers will shortly be submitted containing a request for a definition by means of an Allied Force Headquarters directive of policy to be followed in respect of Italian Navy stores, equipment and property.

2. This includes the proposal that :-

Italian Navy Realty is reserved for the use of the Italian Navy under the direction of the Navy Sub-Commission, Headquarters, Allied Commission. No realty will be requisitioned by Allied Forces without express written authority from the Navy Sub-Commission, Headquarters, Allied Commission, Rome. This restriction does not preclude the right of Operational Commanders to utilize Italian Navy realty for operational requirements only.

3. If this is concurred in, it is requested that instructions may be issued accordingly to the Area Commander, Venice, as it is understood that action to requisition Italian Naval Premises is in fact being taken there.

Naval Officer in Charge, Pola.)

Subject: Recaptured Enemy Material.

Forwarded for information with reference to Mediterranean Message 26 1114 June, 1945.

2. The arrangement of supplies for the Italian Royal Navy is a British responsibility and reductions in the materials now being sent from the United Kingdom can be achieved if the Italian Royal Navy is able to recover recaptured enemy materials which were formerly available to enemy Naval forces in Northern Italy. It is requested, therefore, that, subject to Allied requirements, the Material Recovery Parties referred to in Enclosure (A) to the basic correspondence may be permitted to carry out their duties as expeditiously and effectively as practicable. Remarks on their activities would be of interest to the Navy Sub Comission, and serve as a check on the proper performance of the duties for which they are being formed.

From: Navy Sub Commission, Hq., Allied Commission
To : Ministry of Marine, Rome.

Subject: Disposal of Recaptured Enemy Material.

Enclosure: (A) Instructions for Disposal of Recaptured Enemy Material.

1. The Naval Allied Commander-in-Chief, Mediterranean has authorised release to the Ministry of Marine, subject to requirements of Allied Naval Authorities, of stores, equipment and supplies of all kinds formerly intended for and available to enemy naval forces, as provided in enclosure (A) hereto.

2. The Minister is requested to form Material Recovery Parties under the Officers in Charge of Italian Royal Naval Centres at Genoa, Turin, Milan, Venice and La Spezia to carry out the provisions of enclosure (A). This matter should be treated as urgent to prevent the loss of valuable material during the interim.

3. The appropriate Allied Naval and Military Authorities will be informed of these instructions.

Enclosure "A" to Navy Sub Commission Letter No. N30/2771 of the 29th June, 1945.

DISPOSAL OF RECAPTURED ENEMY MATERIAL.

1. The following instructions govern the procedure to be followed with reference to former Italian Navy material which has been recaptured from the Italian Republican Navy or otherwise retaken or found, including material of German origin, except :

(A) Material recaptured or found in that part of the Venezia Giulia and recently transferred from Jugoslavia to Allied Military control.

(B) Material of Allied origin irrespective of the manner in which it was acquired.

2. The above material includes consumable naval stores and supplies and military equipment of all kinds intended for and available to enemy naval forces in Italy and, subject to the requirements of the Allied Naval Authorities, all materials found and reported to the Navy Sub Commission, Allied Commission, may be utilised at the discretion of the Ministry of Marine for the maintenance of the Italian Navy.

3. The Ministry will form Material Recovery Parties at the earliest practicable date in areas designated to take possession and control of all such material not required for Allied Naval use. The functions of these parties are :-

(A) To locate, sort, classify and list materials;

(B) To report on 31st July, 1945, and monthly thereafter to the Navy Sub Commission through the Ministry of Marine particulars of all material taken over under the following headings, distinguishing in each case between (a) material of Italian origin (b) material of German origin. It is particularly emphasized that these reports are not required to specify details of minor items of stores and equipment and for the most part statements in total of the various items located will suffice.
