The following ltr HQ 5th Army G-5 Section reference 319.1-V, subject: Communication through channels, dtd 9 July 1945 is quoted for the information, guidance and compliance of all concerned:
"1. In recent weeks there have been an increasing number of instances in which AMG officers in the field have addressed requests or communications direct to various other sections of HQ Fifth Army, e.g. G-4, Engineers, Quartermaster etc. This practice is contrary to established procedure and all officers are directed to address such communications in the future through proper channels, i.e. through Provincial and Regional channels to the G-5 Section, HQ Fifth Army.
2. Attention is called to the fact that not only is the practice above mentioned contrary to established military procedure but it tends to defeat its own aims. Frequently such requests are made in apparent ignorance of established Army policy or regulations and when received direct by other sections of this staf they tend to bring AMG generally into disrepute with such sections and thereby make more difficult the task of securing proper consideration of such requests as should legitimately be made by this section on behalf of officers in the field. 6. COMMUNICATION THROUGH CHANNELS:

The following ltr HQ 5th Army G-5 Section reference 319.1-V, subject: Communication through channels, dtd 9 July 1945 is quoted for the information, guidance and compliance of all concerned:

"1. In recent weeks there have been an increasing number of instances in which AMG officers in the field have addressed requests or communications direct to various other sections of HQ Fifth Army, e.g. G-4, Engineers, Quartermaster etc. This practice is contrary to established procedure and all officers are directed to address such communications in the future through proper channels, i.e. through Provincial and Regional channels to the G-5 Section, HQ Fifth Army.

2. Attention is called to the fact that not only is the practice above mentioned contrary to established military procedure but it tends to defeat its own aims. Frequently such requests are made in apparent ignorance of established Army policy or regulations and when received direct by other sections of this staf they tend to bring AMG generally into disrepute with such sections and thereby make more difficult the task of securing proper consideration of such requests as should legitimately be made by this section on behalf of officers in the field. It is for this reason that this section feels it must insist on strict adherance to ordinary military procedure in respect of these matters in the future."

The following ltr, A.F.H.Q., ref : AG 311.5/199 SIG-O, subject: Proper use of classification and precedence in signal messages, dtd 11 June 1945, is quoted for the information, guidance and compliance of all concerned:

"1. The volume of messages originated in this theater has decreased slightly since the cessation of hostilities, but difficulties are being experienced in many instances in the expeditious handling of those messages by electrical means. These difficulties may be expected to increase with the early redeployment of many of the Signal troops and cipher personnel. Under current regulations, only message classified as "CONFIDENTIAL" or lower may be transmitted by certain land lines in the clear; all other classified messages require encipherment. The temporary inadequacy of land encipherment of all classified messages, has increased the already heavy load on cipher offices. With the cessation of hostilities the urgency requiring rapid transmission of many of the messages appears to be reduced. This should permit greater use of letters in lieu of messages with increased use of the various messenger services, especially in those areas where a shortage of electrical facilities exists.

2. It is hoped shortly to relax regulations regarding classification of messages, thus permitting the transmission of more signal traffic in the clear. Pending the issuance of such relaxations, all originators are cautioned to avoid overclassification. Overclassification debases the value of the higher security classifications and tends to add to delay owing to the special handling required. At the present time therefore, it is more than ever essential that current rules regarding the classification and precedence of messages be scrupulously observed in the interests of all concerned.

3. Originators are furthermore cautioned against the abuse of precedence. Where the volume of "Priority" and "Operational Priority" traffic becomes disproportionately heavy, these precedences necessarily lose their value.

4. Care must be taken in the drafting of messages to reduce their length

7. USE OF PERSONAL SIGNALS: The following is republished from Daily Bulletin No. 118, this HQ, dated 29 April '45 for the information, guidance and compliance of all concerned:

"The number or "Personal" messages which are being received at AFHQ is increasing.

Where the originator of a message desires to ensure that the message is seen by a particular individual, the correct address would be "AFHQ for JONES", but the word "Personal" will not be used.

Where messages of a confidential nature, e.g. a report on an officer, are received at AFHQ, the internal distribution is a very limited one. (Adj)

"It is my duty as Secretary of War to announce to the army the death of Franklin Delano Roosevelt, President of the United States, which occurred at Warm Springs, Georgia, at 1635 hours, 12 April 1945. The army is deeply grieved at the untimely death of our Commander in Chief. He prepared us to meet the savage onslaught of our enemies, and he led us through the bitterness of our early reversals. His unwavering courage in the face of overwhelming odds, his abiding faith in the final triumph of democratic ideals, and his clear vision of the paths to be followed were a source of constant inspiration. He gave the army unstintedly of his strength and wisdom, and his unremitting labors hastened his death. Although he leaves us while there is still much hard fighting ahead, the ultimate victory has been fashioned of his heart and spirit.

Memorial services shall be held on the day of the funeral 15 April at all posts, camps and stations, war operations permitting, at which time this order will be read.

The former Vice President of the United States, Harry S. Truman, has taken the oath of office and assumed the duty of President in accordance with the provisions of the Constitution.

The National Flag will be displayed at half-staff at the Headquarters of all military commands and vessels under the control of the War Department from 0800 hours local time, 13 April 1945, until sunset, 12 May 1945, West longitude dates, war operations permitting.

The wearing of Mourning Bands, the draping of colors and standards and the firing of salutes will be dispensed with because of war conditions.

The following is extracted from HQ MTOUSA ltr AG 400.73/346-O, subject: Supply Security Control, dated 24 Feb 45, and published for the information, guidance and compliance of all concerned:

"1. Loss of supplies through pilferage, organized thefts, barter and the illegal diversion of government property, will continue to be an acute command problem so long as the present economic situation in Italy continues. a. Carelessness and looseness of control measures.
b. Pilferage by civilian population who are destitute.
c. Dishonest personnel, including laborers, checkers, drivers, guards, etc., whom it is difficult to screen effectively.

The following is extracted from HQ A.C. Daily Bulletin No. 78, dtd 19 March '45, and published for the information, guidance and compliance of all concerned:

Under orders received from the Chief Signal Officer, AFHQ, this practice will cease immediately. It is pointed out that the highest precedence classification that can be assigned an administrative long distance telephone call is "Priority", and officers using the Rome Long Distance facilities from this headquarters are expected to comply.

The classification of a long distance telephone call as "Urgent" causes "Operational Priority" and other "Priority" calls to be immediately disconnected through the switchboards concerned, and officers originating such calls are liable to severe disciplinary action."

5. REQUEST FOR THE RETURN OF INDIVIDUALS FROM OVERSEAS AND THE UTILIZATION OF PERSONNEL ALREADY RETURNED:

The following is extracted from War Department ltr AGPP-M 210.31 (30 Jan 45) SPGAR, Subject: Request for the return of individuals from overseas and the utilization of personnel already returned, dtd 9 Feb. '45, and published for the information, guidance and compliance of all concerned:

"2. Many requests are being made by individuals returned to the United States on temporary duty for rehabilitation, recuperation, and recovery in violation of the instructions set forth in paragraph 17d, Circular No. 8, which states that "Personnel, prior to departure from the oversea command, will be advised that while on temporary duty status they will not be considered for reassignment to stations within the United States, its territories or possessions, or other oversea commands. A statement will be included in each temporary duty order that the individual concerned accepts this privilege with the definite understanding that he is to be returned to the same oversea command upon completion of temporary duty in the United States."

3. Violations of the spirit of the temporary duty policy for rehabilitation, recuperation, and recovery add a great load to already overburdened administrative channels, and are contrary to the principles on which the policy for this duty was established. In addition, the morale of the individual is considerably lowered when he is advised that he must return to his proper station upon completion of temporary duty in the United States." (Adj)

2. Examination of such correspondence disclosed that a large quantity had originated with civilians in Switzerland and the Balkan nations, while others had been written by civilians in Italy. Such action represents a serious threat to security and affords a means by which valuable enemy intelligence may be transmitted exempt from censorship.

3. Personnel will not carry or cause to be posted in APO channels any communication in behalf of civilian inhabitants in this theater, or otherwise act as intermediaries therefor." (Adj)

3. CENSORSHIP RESTRICTIONS ON PERSONNEL RETURNING TO THE UNITED STATES:

When questioned concerning their return, they may say only that they are on temporary duty in the United States as a result of orders of this theater or the War Department, whichever is appropriate. (Adj)

4. DISCIPLINE:

The following is extracted from Area Routine Orders 86 (Army) Area, Serial No. 9 Nos. 109-114, dated 2 Mar '45, and published for the information, guidance and compliance of all concerned:

6. MILITARY COURTESY AND DISCIPLINE - AMERICAN PERSONNEL: The following is extracted from HQ. A.C. Daily Bulletin No. 63, dtd 4 Mar '45, and published for the information, guidance and compliance of all concerned:

"1. During the past several months the standard of military courtesy and discipline in the 2675th Regiment has been far from satisfactory. The attention of all concerned is directed to FM 21-50, "Military Courtesy and Discipline".

2. Unit commanders will insure that all personnel under their command are given sufficient review of military courtesy and discipline during the weekly training periods and sufficient supervision outside of the training period to bring about a marked improvement. This training will also emphasize military bearing, neatness of the individuals, proper wearing of the uniform, alertness on the part of the soldier, and the promptness with which the salute is rendered. The only standard which is satisfactory is the highest standard which can be attained by each individual soldier under vigorous, energetic, and capable leadership. Only when unit commanders realize the responsibilities of command, can this be accomplished. (Adj)

The following General Order, HQ MTOUSA, No 3, dtd 7 January 45, is published for the information of all concerned:

"1. Attention is invited to the following statement of our President and Commander-in-Chief in his annual address on 'The State of the Union' made on the opening of the 79th Congress:

' 'The tremendous operations in Western Europe have overshadowed in the public mind the less spectacular but vitally important Italian front. Its place in the strategic conduct of the war in Europe has been obscured, and by some people, unfortunately underrated.

It is important that any misconception on that score be corrected now.

What the Allied Forces in Italy are doing is a well considered part in our strategy in Europe, now aimed at only one objective, the total defeat of the Germans. These valiant forces in Italy are continuing to keep a substantial portion of the German Army under constant pressure, including some 20 first line German Divisions and the necessary supply and transport and replacement troops, all of which our enemies need so badly elsewhere.

Over very difficult terrain and through adverse weather conditions, our Fifth Army and the British Eighth Army, reinforced by units from other United Nations, including a brave and well equipped unit of the Brazilian Army, have, in the past year, pushed north through bloody Cassino and the Anzio beachhead, and through Rome until now they occupy heights overlooking the valley of the Po.

The greatest tribute which can be paid to the courage and fighting ability of these splendid soldiers in Italy is to point out that although their strength is about equal to that of the Germans they oppose, the Allies have been continuously on the offensive.

That pressure, that offensive by our troops in Italy will continue.

The American people, and every soldier now fighting in the Appeninnines,

5. ITALIAN POPULATION FIGURES: The tabulation of results of the Census of liberated Italy has now progressed sufficiently to enable revised estimates of the resident population to be prepared.

Comparison of the figures resulting from the present census with the corresponding figures in the 1936 census provides an index which has been applied to the 1936 population figures for the 56 provinces of Italy not included in the present census.

Below is a tabulation of the population of Emilia Region. The population of the provincial capital, which is included in the total for the province, is shown separately.

It is requested that all future staff studies, appreciations, etc., involving calculations based on populations, be based on these figures throughout, so that all planning, in this respect, will be working on a common basis.
