GR

EXTRACT FROM DIRECTOR'S MEMO OF A CONFERENCE HELD ON CIVIL
AVIATION AT A.F.S.C. ON 4TH JULY. MEMO WILL BE FOUND ON
FILE AFC/39/AIR.

Paragraph 8 reads:

As for flying clubs and gliding, General Callo said they would be good for training and would help to give work etc, but the Director pointed out that since there is a surplus of pilots at the moment, the training angle does not arise. It is up to the Government to decide whether it is a good time to make this request, but the Director felt that his authority would probably not be in favour yet. It was agreed to postpone the request for about three months.

RE: AFSC/53/1/RM.

CURIE AIRPORT CONSTRUCTION IN ITALY.

With reference to your letter 272206/31.3.5/1174/Coll dated 3rd March and my conversation with you this morning, I wish to confirm that Glider construction and flying in Italy is not at present permitted. The permission authority given by the Italian Government to begin internal civil air lines does not cover this form of flying.

2. Thank you for the detailed information given in your above quoted letter.

Office of the Executive Commissioner

Ref: 3506/55/DC

26 November 1945

SUBJECT: Italian Glider Activities

TO : G-5, AFHQ

1. It appears that considerable interest in forming Glider Clubs in Northern Italy is being shown by several groups of Italians. The Italian Air Ministry has been instructed that no gliding and no glider construction are to take place on the grounds that Italian civil aviation is not allowed.

2. There are a certain number of gliders, some completed and some not yet completed. These have all been impounded and grounded.

3. If no mention of glider activities has yet been included in the draft peace treaty with Italy it is suggested that consideration might well be given to the inclusion of some such terms in the treaty. It is recommended that a limited amount of gliders be permitted. It is realised that in view of the use to which the Germans put gliders after the last war, namely for the training of future war-time pilots, such activities may well be forbidden in Italy. Nevertheless if it is the policy to treat Italy as a friend it is requested that it be borne in mind that gliding is a useful and cheap form of training for commercial and military pilots and that the cheaper the training in Italy the better, as she will undoubtedly be economically hard hit for a number of years.

GLIDER CONSTRUCTION AND FLYING IN ITALY.

Consideration has been given to defining Allied policy with regard to gliding in Italy, and it has been decided that this sphere of activity must be considered in the same light as civil aviation. No gliding or glider construction is, therefore, to be carried out.

2. Completed gliders may remain grounded at their present locations. Numbers and locations should be ascertained and notified to this Sub-Commission. In the event of a proposed change of ownership or a proposed change in location, it is requested that you will ensure that this U.C. is notified before such changes take place.

ITALIAN GILDED ACTIVITIES.

It appears that considerable interest in forming Glider Clubs in Northern Italy is being shown by several groups of Italians. The Italian Air Ministry has been instructed that no gliding and no glider construction are to take place on the grounds that Italian Civil Aviation is not allowed.

2. There are a certain number of gliders, some completed and some not yet completed. These have been impounded and grounded.

3. If no mention of glider activities has yet been included in the draft peace treaty with Italy, it is suggested that consideration be given to the inclusion of some such terms in the peace treaty. It is recommended that a limited amount be permitted. In this connection it is known that after World War No. 1, the Germans made much use of gliders for training war-time pilots. This factor may be taken into consideration by higher authorities and consequently they may not allow glider activities in Italy. Nevertheless, if it is the policy to treat Italy as a friend, it is requested that it be borne in mind that gliding is a useful and cheap form of training for commercial and military pilots, and that the cheaper the training in Italy the better, because Italy will undoubtedly be economically hard-hit for a number of years.

L.E. BRODIE,
