GLIDER CONSTRUCTION AND FLYING IN ITALY.

With reference to your letter AFSC/53/1/Air dated 14th Nov. 1945, we notify you the details concerning what requested in para 2 of the above mentioned letter.

The gliders existing at to day's date in Italy are the following;

- N. 7 gliders of the type "Asiago" with numbers: 30111 - 30112 - 30113 - 30114-30115-30096 - 30098, which are at Milan at the Experimental Gliding Centre of the Politecnico, Mila.
- N. 1 glider of the type "AL. 12 P" N. 508 and
- N. 10 gliders of the type "Canguro" under construction at the CO. Ltd. Aeronautica Lombarda at Cantu'.
- N. 1 glider of the type "CAT TM 2" at the CO. Ltd. Construzioni Aeronautiche at Taliedo (Milano).
- N. 1 glider under construction at the Aircraft model School "Pietro Sacilotto" at Fardonone.
(The ribs of the wings have been ended). The construction has been suspended further to the prohibition of the A.M.G. The said School is waiting for authority from the Allied Authorities in order to carry out the project.

We confirm that in the case of these gliders being handed over to new owners or being transferred to new localities, your A.F.S.C. will be previously informed.

by order,
The Chief of Staff.

1413

LOOSE MINUTEExecutive Commissioner.*Rf/1A*

1. The relevant factors are as follows : -
 - (a) A direct approach has been made to Air Forces Sub Commission to obtain authorization for this project but it was stated verbally by the Director to the applicant that authorization could not at present be given.
 - (b) Although the Combined Chiefs of Staff have authorized the running of Italian internal civil air lines they have not authorized gliding, private or club flying. The Air Forces Sub Commission is therefore prohibiting such flying. It seems inadvisable to authorize a project which advertises an apparent freedom for such activity.
 - (c) It has also come to the notice of this Sub Commission that the motives of the sponsors of this project are at least partly political.
2. It is recommended that a reply be made stating that although the Combined Chiefs of Staff have authorized internal civil air lines, private flying is still prohibited by the terms of the armistice, and that therefore no authorization can at present be given for civil flying other than by aircraft of officially sponsored air lines.

Nº. 1735/C.G.I.

Rome, 15 March 1946.

Dear Admiral,

The Director of the Corriere Lombardo, Mr. COGNO, wishes to obtain permission to make a flight of sport and journalistic character, in a passenger plane.

I am enclosing his request with all the details of the flight.

I shall be grateful if you will kindly examine the question and let me know your decision.

With my very best regards

/s/ General Adolfo Infante.

The Director

Milan, 11 March 1946
Via Senato, 38.TO : ADMIRAL STONE
ROME

Contrary to the present restriction of civil flights as director of the "Corriere Lombardo" I am asking your authorization to make a flight, of sport and journalistic character, in a small passenger plane, Avistar (two seats, -60 HP) built in the Avia Plants of Vercelli, with the generous help of the Allied Governments.

The flight would cover the main Italian cities, as per attached schedule. The landing would be done outside the airfields. The flight would take place as soon as your permission has been granted and favorable meteorological conditions permit.

Hoping you will allow me to make this flight.

With my best greetings

/s/ Edgerdo Cogno.

Revia (or 4/4 with one arm)
Date 5/2/356

Following our conversation of today's date, we hereby request authority to carry out a flight with landings outside airfields perimeters on behalf of the "Avia" firm of Francis Lombardi in Vercelli and "Corriere Lombardo" in Milan.

The flight will be carried out by one or two "Aviastar" (LMS)
60 HP dual-control touring aircraft for publicity purposes in view of the forthcoming industrial reorganization. The flight will be effected on the following route : Milan, Brescia, Venice, Bologna, Ancona, Pescara, Bari, Foggia, Naples, Rome, Perugia, Florence, Viareggio, La Spezia, Genoa, Savona, San Remo, Turin, Milan.

Should the aircraft be forced to land on airfields under Allied jurisdiction, we shall request the necessary authority.

Best regards.

GLIDING- NORTHERN ITALY

In accordance with the directive contained in the minutes of Monthly General Staff Conference, 16 ref AFSC/1/53/1/Crg dated 10th February 1946 (Para 16 gliding) General Biffi has been informed that it is unlikely that gliding will be permitted under the peace terms.

2. Notwithstanding the publicity given to this ruling, clubs and sporting societies continue to make plans on the assumption that the ban will shortly be lifted or that exceptions may be made in special circumstances.

3. Enclosed herewith is the translation of a letter received by General Biffi from an Italian Glider Organisation and forwarded at his request, though it has been pointed out that little hope can be entertained for the approval of this proposal.

To General Staff
Milan

The Consiglio of P.I.V.V. (Italian Glider Organisation) has pleasure in submitting to you a programme for Glider activity for this year.

We hope that no difficulties will prevent the approval of this proposal as we have planned it after considering all the difficulties which exist at the present time as regard civil aviation.

We would like to organise a Glider meeting in order that interested Allied personnel may test our a/c.

Almost everything has been damaged but fortunately one g/c of each type remains serviceable (Cat 20 - CVV 2 "Asiago" CVV 3 "Areore" CVV 5 "Papier" Cat 23 - CVV 6 "Cangure")

The meeting could take place at the end of April or the beginning of May, and a week would be sufficient. The participation at this meeting of Swiss and French representatives would be appreciated in order to give an international aspect to the demonstration.

It would be much appreciated if at least the most famous Italian Glider pilots could be allowed to recommence their activities in this sphere.

We know that civil aviation is at present forbidden but therefore we think that a small number of temporary permits (a dozen) could be granted for those selected to participate.

We thank you very much for your kind consideration and your advice on this matter would be greatly appreciated.

Ing. Calimberti

REPORT ON GLIDER CONSTRUCTION AT CANTU'

Acting on the report of Glider training, raised at the monthly conference, the following information was obtained from the Intelligence Section of the I.A.F.

- (a) That seven gliders of the ASIAGO type were stored in the premises of the Aeronautica Firm at Cantù, and (b) That in the same premises were one glider CANGURO type complete and nine of the same type in the course of construction.
2. I visited the firm on 31 Oct with F/Lt Turner and found components of the seven ASIAGO gliders stored in different parts of the building. A CANGURO, a well designed fifteen passenger glider for military use was dismantled but under cover in an annex to the main building.
3. The firm which employs ~~are~~ three hundred employees was actively engaged in toy, furniture and stove manufacture as well as on car repairs and overhaul. At no time did I find any signs of aircraft construction except a petrol tank for a small 16HP single seater machine very similar to a Flying Flea.
4. Although the gliders were of a very attractive design, efficiently streamlined, skillfully finished and fitted with dual controls, flaps, air brakes and modern instruments, I do not consider that technical details would be of any value to the Allies.

4. Although the gliders were of a very attractive design, efficiently streamlined, skilfully finished and fitted with dual controls, flaps, air brakes and modern instruments, I do not consider that technical details would be of any value to the Allied.
5. All the gliders could be put into service within a very short time, but from ~~this~~ condition I would say that no work had been carried out on them for some months.
6. In view of this and because of transportation problems I recommend that they remain stored at Cantu where they could be inspected by Milan and visiting A.F.S.C. Officers.
