Dear Wing Com: Thompson,
As I promised, I have
looked up the Macchi people
about the manufacturing
permit of the small plane
I told you about recently -

They have constantly been
in touch with your L^t. Reid
and therefore I believe they
are not "trespassing" in any
way at all. - No doubt
L^t Reid will be able to explain
the whole situation to you, and
their satisfaction -
With my very best regards
Yours Chamberlain

CONSTRUCTION OF LIGHT AIRCRAFT

Reference is made to your letter IFC/eb dated 6th August 1946 and to our telephone conversation of this morning date.

2. In accordance with orders issued by AFSC Rome all work on aircraft at Aeronautica Macchi, Varese, must cease.

3. It is again pointed out that the construction of "MB 308" was effected without authority and a very serious view will be taken of any further unauthorized work.

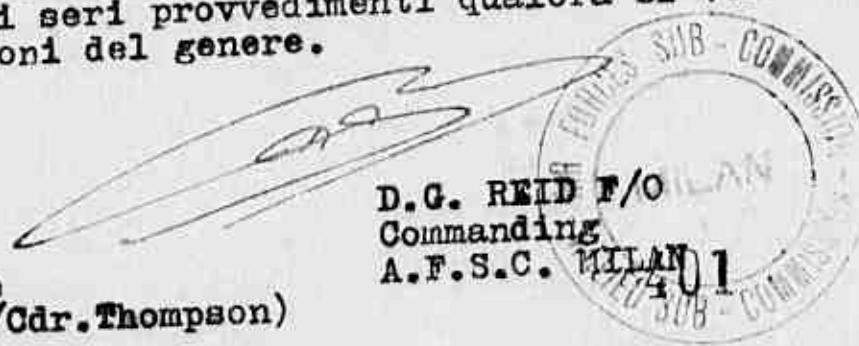

Di riferiamo alla vostra lettera IFC/eb del 6 Agosto 1946 ed alla nostra conversazione telefonica di questa mattina.

2. Come da ordini emanati dalla Sotto-Commissione Alleata per l'Aeronautica, Roma, tutti i lavori riguardanti aerei all'Aeronautica Macchi, devono cessare immediatamente.

3. Si fa rilevare che la costruzione di un "MB 308" fu effettuata senza alcuna autorizzazione e che in avvenire saranno presi seri provvedimenti qualora si verificassero infrazioni del genere.

CONSTRUCTION OF LIGHT AIRCRAFT.

Application has been made by a PRINCE RUSPOLI to test fly an aircraft constructed by MACCHI at VARESE.

2. This Headquarters has no knowledge of this construction and has certainly not authorised it.
3. You are to visit the MACCHI firm and inspect this aircraft, obtain particulars of design, performance, etc, and endeavour to find out who authorised the construction, and forward your report to this Headquarters.
4. Work on this aircraft is to cease.

Enclosure (1) report on Aircraft Firm.

MUCHI FIRM - VARESE

The firm is located at Varese, Via S. Silvestro and was damaged by bombs in April 1944.

The greatest part of hangars and buildings was destroyed. At present they are using the buildings in better conditions, while the greatest part of machinery has been installed in two workshops rented by the Firm respectively at Viale Olona (Varese) and Laino, the depots are at Schiranna, Casabeno, Viale Valganna (Varese).

The managers of the Firm are:-

Ing. Paolo FORESTO
Ing. Elio CANAVI
Ing. Vittorio PIANO
Ing. Ermanno BATTOCCHI
Ing. Piergianni MACHINERI

General Manager
Admin. Manager
Product. Manager
Technical Manager
General business

This last is also the president of the Firm's C.L.N. (National Liberation Committee), this committee does not interfere in the activities of the management as far as instructions and policy intentions are concerned.

Up to 1939 the Company was constructing also civilian a/c i.e. two engine seaplane in wood MC 94 and three engine MC 1000.

During these last years they constructed only metal a/c fighter MC 202 and MC 205. During the German occupation work continued constructing 80 MC 205. They also repaired and dismantled some Republican a/c.

At present the firm intends to keep the production of lorries (reaching a daily production of 4 - 5 lorries complete with trailers), and they have already orders for 700 - 800 lorries.

The Aeronautical Civilian Section is 1/4 of the aeronautical production and they have already planned the a/m a/c. Intentions of the Firm would be to construct some wooden a/c.

At present the firm is supplying only parts for MC 205 to I.A.R. and hopes to construct in future some a/c for training and school purposes and carry out repairs to a/c.

The raw material stocks are as follows:-

Steel	3250
Light alloy	"
Copper alloy	2000
Plywood	"
cubic meters	700

Technical Manager
General business

This last is also the president of the F.I.N.
(National Liberation Committee), this committee does not interfere
in the activities of the management as far as instructions and policy
interventions are concerned.

Up to 1939 the Company was constructing also civilian a/c i.e.
two engine seaplane in wood MC 94 and three engine MC 1000.

During these last years they constructed only metal s/c fighter
MC 202 and MC 205. During the German occupation work continued
constructing 80 MC 205. They also repaired and dismantled some
Republican a/c.

At present the firm intends to keep the production of
lorries (reaching a daily production of 4 - 5 lorries complete
with trailers), and they have already orders for 700 - 800 lorries.

The Aeronautical Civilian Section is i/c of the aeronauti-
cal production and they have already planned the a/n s/c.
Intention of the Firm would be to construct some
wooden a/c.

At present the Firm is supplying only parts for MC 205
to I.A.A. and hopes to construct in future some a/c for training and
school purposes and carry out repairs to a/c.

The raw material stocks are as follows:-

steel	quintals	396
light alloy	"	3250
Copper alloy	"	2000
plywood	"	140
coal	cubic meters	7
diesel	quintals	20
	"	15

=====

The Company has just now overcome, thank to the capability
of the managers and workers a very serious financial crisis. They
are in condition to assure a good production, like that for the
lorries which is steadily increasing. They are also making altera-
tions in order to render them more accurately finished.

=====

3A

AERONAUTICA MACCHI + VARESE

The present Engineer promoter and constructor is Mr. Ermanno Barocchi.

The number of workers as at 25/3/45 was 1678, the employees 392, at present there is a surplus in personnel of 30-50% among the workers and 24-30% among the employees. The Firm would like to keep 1200 workers, employing half for the aeronautical production.

The raw-material stocks would last for 20 work days. The average labour cost per hour is, excluding the cost of material L. 309,65.

The Firm is at present constructing motorlorries, but there is always an aeronautical section. This Firm in fact is trying to carry on its aeronautical activities and keep only for precautioning measure the present construction of motorlorries. At present the Aeronautical Section is being fitted for the construction of a touring two-seater "MB 308", the model of which is already under construction.

An other touring a/c already planned is an 8-10 seater MB 310. They also intend to build an a/c for pilot training purposes.

During the German occupation the Firm did not work with R.S.I., this factory was declared under German authority protection, and an office for military supervision was opened by them. During this period a/c repairs were carried out and at the end they built also Messerschmitt.

S.A. AERONAUTICA MACCHI. VARESE.

La sede della Ditta, situata in Via S. Silvestro in Varese, venne
fortemente danneggiata da un bombardamento aereo avvenuto nell'aprile
del 1944 che distrusse la maggior parte dei capannoni ed edifici.
Attualmente vengono utilizzati i fabbricati meno danneggiati con si-
stematici di fortuna, mentre la maggior parte del macchinario è sta-
to sistemato in due opifici affittati dalla Ditta e situati rispetti-
vamente a Valle Olona (Varese) ed a Laino; magazzini si trovano a
Schiranna, Casabeno, Viale Valganna (Varese).-

Gli attuali dirigenti dell'industria sono:

Ing. Paolo FORESIO Direttore Generale
Rag. Eligio CARONNI Direttore Amm/vo e Proc. Generale
Ing. Vittorio FRANO Direttore produzione
Ing. Ermanno BAZZOCCHI Direttore Tecnico
Ing. Piergiacomo PACCHINETTI Affari Generali.-

Quest'ultimo è pure presidente del C.L.N. aziendale, il quale
peraltro ha pure valore simbolico e non interferisce le attività del-
la direzione per ciò che riguarda le direttive e l'andamento delle
Ditta.-

Fino al 1939 la Società costruiva pure velivoli civili e
precisamente 4 idrovolante bimotore in legno MG 94 e idrovolanti
trimotori MG 100. Negli ultimi anni invece essa si era dedicata in-
teramente alla fabbricazione di velivoli metallici da caccia MG 202
e MG 205. Con l'occupazione tedesca proseguiva nei lavori in corso
ulteriormente circa 80 MG 205, e procedeva contemporaneamente alla ripa-
razione ed alle smontaggio dei velivoli dell'Aeronautica Repubblicana.
Attualmente la Ditta intende mantenere l'attuale produzione di mo-
tori elettrici fino ad una produzione giornaliera di circa 4-5 motocarri ^{30/4}
completi con rimorchio, e di cui se ne avrebbe già assicurata la

Attualmente vengono utilizzati i fabbricati meno danneggiati con sistematici di fortuna, mentre la maggior parte del macchinario è stato sistemato in due opifici affidati dalla Ditta e situati rispettivamente a Valle Olona (Varese) ed a Luino; magazzini si trovano a Schiranna, Casbeno, Viale Valganna (Varese).-

Gli attuali dirigenti dell'industria sono:

Ing. Paolo FORESIO	Direttore Generale
Rag. Eligio CARONNI	Direttore Amm/vo e Proc. Generale
Ing. Vittorio PEANO	Direttore produzione
Ing. Ermanno BAZZOCCHI	Direttore Tecnico
Ing. Piergiovanni FACCINETTI	Affari Generali.-

Quest'ultimo è pure presidente del Q.L.R. aziendale, il quale peraltro ha pure valore simbolico e non interferisce le attività della direzione per ciò che riguarda le direttive e l'andamento della Ditta.-

Fino al 1938 la Società costruiva pure velivoli civili e precisamente l'idrovolante bimotore in legno M94 e idrovolanti trimotori M100. Negli ultimi anni invece essa si era dedicata interamente alla fabbricazione di velivoli metallici da caccia M202 e M205. Con l'occupazione tedesca proseguiva nei lavori in corso ultimo circa 80 M205, e procedeva contemporaneamente alla riparazione ed allo smontaggio dei velivoli dell'Aeronautica Repubblicana. Attualmente la Ditta intende mantenere l'attuale produzione di motocarri sino ad una produzione giornaliera di circa 4-5 motocarri completi con rimorchio, e di cui se ne avrebbe già assicurata la produzione di circa 700-800.-

Della produzione aeronautica ~~è in corso~~ è in corso ~~è in corso~~ è in corso
~~è in corso~~ se ne occupa il "Reparto Aeronautica Civile" che ha progettato i già segnalati velivoli.

•/-

Inoltre in questo campo l'intenzione della Direzione dell'Azienda è di costruire per il momento apparecchi in legno basandosi sul concetto di produzione di qualità.

Livelli di linea.

Pertanto a tutt'oggi essa dispone approssimativamente delle seguenti scorte di materiali:

Acciaio	Ql.	3250
Leghe Leggere	"	2000
Leghe Fane	"	140
Compensato	mo.	7
Carbone	Ql.	20
Naftha	"	15.

Si segnala inoltre che la Società ha superato da poco tempo un periodo di crisi finanziaria gravissima, grazie alla capacità dei dirigenti e delle maestranze che sono incurvato di assicurare una ottima produzione, quale quella al presente dei motocarri il cui gettito va aumentando in seguito alle richieste sempre più favorevoli del mercato e delle successive modifiche che ne fanno un prodotto sempre più rifornito ed apprezzato degno della buona reputazione di cui gode ed ha sempre goduto la Ditta per la sua onesta commerciale e per l'accuratezza della lavorazione.-

AERONAUTICA MACCHI - VARESE

The following information was obtained during a visit to the Aeronautica Macchi, Varese by P/O Reid on 19th December 1945.

2. Considerable damage by bombing has been sustained at the main Varese establishment, a portion of which has been repaired and is back in use. Owing to the policy of decentralisation all machine-tools, which were moved to a another site, escaped damage.
3. No work of an aeronautical nature is in progress with the exception of studies and paper-work in connection with the light 2-seater aircraft, designed by Ing. Bazzocchi, of which one prototype was constructed and still exists in a battered and fragmentary state. The type is a 60 HP monoplane.

4. At present some 1700 women are employed on the following constructions at factories situated in Varese and Luino :-

397

- (a) Light 3-wheeler vans (23 H.P.) with trailers.
- (b) Threshing-machines for farm work.
- (c) Barges (to carry 60 and 300 tons), made in sections.

AERONAUTICA MACCHI - VARESE

The following information was obtained during a visit to the Aeronautica Macchi, Varese by F/C Reid on 19th December 1945.

2. Considerable damage by bombing has been sustained at the main Varese establishment, a portion of which has been repaired and is back in use. Owing to the policy of decentralisation all machine-tools, which were moved to a another site, escaped damage.
3. No work of an aeronautical nature is in progress with the exception of studies and paper-work in connection with the light 2-seater aircraft, designed by Ing. Bazzocchi, of which one prototype was constructed and still exists in a battered and fragmentary state. The type is a 50 HP monoplane.
4. At present some 1700 workmen are employed on the following constructions at factories situated in Varese and Luino :-
39?

 - (a) Light 3-wheeler vans (2½ H.P.) with trailers.
 - (b) Threshing-machines for farm work.
 - (c) Barges (to carry 60 and 300 tons), made in sections.
 - (d) Miscellaneous furniture, toys, cycle-parts.

5. Production of the listed items is anticipated to reach the following monthly output at maximum : -
 - (a) Vans :- 100 per month.
 - (b) Threshing-machines :- 6 per month.
 - (c) Barges :- according to order (contracts for bare in hand).

6. Workers are kept fully employed on the above programme and no unemployment difficulties exist. It is emphasised by the directors of the firm, however, that their real interest is aircraft-production and that they retain skilled workers and machine tools in readiness to recommence operations in the hope that, at some future date, authority for construction or repair work may be granted.
