AIR FORCES SUB COMMISSION
ALLIED COMMISSION

H.Q.

REPORT ON ITALIAN AIRCRAFT

Type C.R. 42 (Reg. N.C.M.N. 9853)

DESCRIPTION - Single seat, single engine, fighter-bomber, - with fixed undercarriage, - flaps are not fitted.

DATA - Wing span - 11m - Length 8m.

Powered by one 800 H.P. Fiat A 74RC 38 engine; driving a constant speed airscrew.

Wing Loading - 120 kg/m² Stalling Speed - 150 km/hr.

One petrol tank with a capacity of 350 litres, gives a range of 900 km, when flying straight and level at 280 km/hr. The endurance is quoted as three hours at a speed of 210 km/hr.

Engine full pressure is 0.2 to 0.3 kg/cm².

Oil Pressure is 6 kg/cm²

Oil Temp. IN 30°C

Oil Temp. OUT 50°C.

REMARKS

An initial flight was made in this aircraft by the F.T.I. - on the 13th December, 1945, - duration one hour.

The cockpit arrangement is simple, and the throttle has been modified to correspond to the British. Forward visibility on the ground is restricted by the high position of the nose. The brake lever is positioned on top of the control column, and should be used sparingly, as the brakes rely on air pressure, which does not build up too rapidly. The tail wheel should be unlocked for taxiing, and locked for take-off and landing.

Full power is required for take-off, the aircraft becoming airborne at approximately 160km/hr. Immediately airborne and climbing, throttle back to indicated boost figure of 36, and reduce r.p.m. to 2150. The rate of climb at this power setting should be 8 - 9m/sec. at 180 km/hr. Normal cruising speed is 230 km/hr.

The controls handled very stiffly, due probably to the aircraft being comparatively new. The rudders in particular are very sensitive. Approach speed is 180 km/hr and gives a slightly nose high attitude. Slowly reduce power all the way down the approach, - until the final check for landing when all power should be cut off. Under normal wind conditions a fairly long float period can be expected before the mains remain retracted.

One petrol tank with a capacity of 350 litres, gives a range of 900 km, when flying straight and level at 280 km/hr. The endurance is quoted as three hours at a speed of 210 km/hr.

Engine full pressure is 0.2 to 0.3 kg/cm².

Oil Pressure is 6 kg/cm²
Oil Temp. IN 30°C
Oil Temp. OUT 60°C.

REMARKS

An initial flight was made in this aircraft by the F.T.I. - on the 13th December, 1945, -- duration one hour.

The cockpit arrangement is simple, and the throttle has been modified to correspond to the British. Forward visibility on the ground is restricted by the high position of the nose. The brake lever is positioned on top of the control column, and should be used sparingly, as the brakes rely on air pressure, which does not build up too rapidly. The tail wheel should be unlocked for taxiing, and locked for take-off and landing.

Full power is required for take-off, the aircraft becoming airborne at approximately 160km/hr. Immediately airborne and climbing, throttle back to indicated boost figure of 36, and reduce r.p.m. to 2150. The rate of climb at this power setting should be 8 - 9m/sec. at 180 km/hr.

Normal cruising speed is 290 km/hr.

The controls handled very stiffly, due probably to the aircraft being comparatively new. The rudders in particular are very sensitive.

Approach speed is 180 km/hr and gives a slightly nose high attitude. Slowly reduce power all the way down the approach, - until the final check for landing when all power should be cut off. Under normal wind conditions a fairly long float period can be expected before the final touch down, - the total landing run required being approximately 1500 yards.

It is planned to make a further flight in the near future.

ITALIAN AIRCRAFT INDUSTRY - CR 42s AT TRENTO

During a visit to the firm of Caproni at TRENTO on 15th May 1945 the following facts were learned regarding progress on the repair or modification of aircraft, and are forwarded herewith for your information.

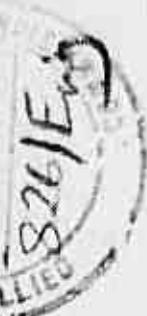

2. Three aircraft CR 42 from Lecce are being converted from one-seater to two-seater dual-control types for training purposes. Upon completion of these will be flown back to Lecce. 100-octane petrol is available. Estimated dates of completion of individual planes are :

- (a) First. June 1st (approx.).
- (b) Second. June 30th(").
- (c) Third. July 30th(").

3. In addition to this work there are five aircraft CR 42, one-seater types, which were flown here for repair and engine change. Two engines have already been delivered from Turin and fitted. These two aircraft will be despatched shortly. The remaining three engines are expected to arrive from Turin within one month, when they will be immediately installed and the remaining three aircraft despatched.

CR.42 AIRCRAFT - DUAL CONTROL.

Reference is made to your letter 370303/ST/3/33/1204 Coll,
dated the 26th March, 1946 on the above subject.

2. Authority is hereby given for the conversion of a further
three aircraft provided that the first one nearing completion at
Caproni firm is found satisfactory on test.

3. There seems to be still some delay in collecting aircraft
from Trento; a recent report from Padua showing 4 CR.42 aircraft
awaiting collection for Lecce. It is assumed that these aircraft
belong to a batch which have been ready since January, and in view
of the shortage of training aircraft at the Pilot's school the delay
in collecting these aircraft is not understood.

CR.42 AIRCRAFT AT CAFFONI'S TRENTO.

During a recent visit to the above factory by the technical staff of this R.Q., it was noted that there were 8 Cr.42 aircraft standing in one of the hangars, and inquiries showed that they were aircraft which were allocated to Lecce. 4 of these aircraft had been awaiting collection for 6 weeks, and the remainder had minor electrical faults which it is anticipated would be rectified within 14 days.

In view of the shortage of training aircraft at Lecce, it is requested that steps be taken to transfer these aircraft at an early date.

With reference to letter 73-742 of 26.9.51, U.S.A.
the following information has been put in our
records at our own disposal. The
U.S. officer inspected the 1st. - 4th. - 5th. - 6th. - 7th. - 8th. - 9th. -
10th. and 11th. battalions in the 2nd. - 3rd. -
4th. and 5th. regiments, because these were material
located in Trento and Mto Nine area is controlled by 5th Army, and
particularly in Trento by the "Gruppo di combattimento Poligore".
In order to carry out the regular inspections according with the
instructions issued by AFSC, it is necessary to contact 5th Army.

the aircraft was found to have been damaged in the accident. The engine was found to be intact, although it had been located in front and above the main gear area. The engine was noted as being controlled by "5th Army" and particularly in front of the "Grado di combattimento Tolore". In order to carry out the regular inspections according with the regulations issued by AGCO, it is necessary to extract controls.

The u/m a/o were stated as follows: Item, "Front of":
On 1/2 in 320 engine disk A 32 D/36 - 1027, - 1027,
Turbine - compressor - assembly 1/70 17/30 106
On 1/2 in 320 engine disk A 32 D/36 - 1027, - 1027,
Turbine - compressor - assembly 1/70 17/30 106
Turbine - compressor - assembly: above, a general inspection were
made to be referred.

On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
Hull on propeller - drivable; engine to be tested, due to service
expenses - damage.
Propeller - propeller: as above.
On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
Propeller - propeller: initial assembly, testing
On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
Hamilton propeller 32007 - general check, ventilation
propeller On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
propeller General check as above.
On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
propeller General check as above.
On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
on propeller check and repair as above.
On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
propeller - wheel and minor repairs.
On 1/2 in 320 in the engine disk A 32 D/36 - 1027, - 1027,
General check and repairs - indications to be noted.

The seven e/c which is one now want trouble minor repairs, improve 15 days for each e/c.

The E.N. 305 requires minor repairs (3 or 6 days) and major instructions received by Ldn. 51. It was sent it to Gernon's P.M. for repairs. (At the head of typed has a handwritten note)

The A.M. I. will contact AFSC, in order that this a/c be used for transport purposes. We request to acknowledge this above.

Previous flight 4/73 en route I.V.M. C-16 propellers are stored in the a/n line, there are also spare parts for a/c and instruments for use - 3.7g - 5. - Cont'd 1007 hrs + On 310 - 7. - 11 - 14.

On the 29th May 1975 Lt. Lieutenant reported to Gernon's di Sandolo and told him to take at the disposal of I.A.C. all Or. 42 and I.L.S. material stored in that farm. Besides the a/c Lt. wanted to collect a CR. 42 in order to take it to its unit. The requested a regular authority issued by the Authorities concerned.

We request you to let us know if we had to start repairing and rendering serviceable CR. 42.

OGGETTO: Ditta Caproni Trento - Velivoli C.R. 42.-

Prot. n. 0463/00.5

Declassified E.O. 12356 Section 3.3/NND No. 785017

In riscontro al foglio n° 7323 - C - 23 del 9 Luglio 45
si comunica che è stato incaricato il Ten. Garibaldi Malfertiner Arturo,
presentatosi al C.A.R. di Trento, di assumere l'Ufficio di S.T. presso
la Ditta Caproni - Trento - e Alto Atesina di Bolzano. Il predetto Uf-
ficiale ha provveduto a effettuare la ricognizione del materiale aero-
nautico esistente presso le ditte sopracitate. Non ha potuto però pro-
cedere alla presa in consegna neanche del materiale di Indubbia appar-
tenenza alla R.A. perché tutto il materiale bellico dislocato nel Trentino e Alto Adige è controllato dalla 5° Armata Alleata e in particolare
presso la Commissione Alleata nella zona del Trentino dal Gruppo da combattimento Fol-
gore. Affinché si possa provvedere alle regolari operazioni di reperi-
mento elencazione e custodia di tutto il materiale aeronautico sia di
provenienza R.A. che A.R. e tedesca da parte degli Enti della R.A. per
conto delle A.F.S.C. - A.G. come stabilito dalle disposizioni generali
ricevute è necessario che questo Ministero provveda tramite la prede-
ta Commissione Alleata a interessare il Comando della 5° Armata perché
riconosca dette attribuzioni al personale della R.A.

Presso la Ditta Caproni - Trento - sono giacenti i seguen-
ti apparecchi :

C.R. 42 MM. 4325 Motore Fiat A/74 RI C/38 MI. 33237 Elica
Fiat Hamilton - Efficiente: prova di motore a terra e volo di prova.
Pronto al volo.

C.R. 42 MM. 5508 Motore Fiat A/74 RI C/38 MI. I4330 Elica
Fiat Hamilton - Efficiente: necessario controllo di regola e prova mo-
tore a terra e volo di controllo e sostituzione emblemi tedeschi.-
C.R. 42 MM. 5853 Motore Fiat A/74 RI C/38 MI. 10074 Elica
Fiat Hamilton - Efficiente: come sopra. Occorre verniciatura coccarda
nazionale.-

Controllo generale.- Riparazione deriva.- Montaggio ali.

I sette apparecchi non pronti al volo abbisognano di controllo
di piccole riparazioni della durata media prevedibile di una decina
di giorni per velivolo comprendendo l'eventuale smontaggio dell'armamen-
to di caduta (spezzoniera, lanciabombe alare).

L'apparecchio FW.305 è anche abbisognevole di piccole ripa-
razioni della durata di 5 o 6 giorni, per cui in seguito ad ordine avu-
to dal Comandante dell'A.A.I. Gen. BIFFI la scrivente ha disposto la
rimessa in efficienza e cura della Ditta Caproni.

Il Comando A.A.I. farà la praticia con A.P.S.C. per l'assegna-
zione di detto velivolo in dotazione per i servizi di trasporto e col-
legamento. Si prega di sanzionare quanto sopra.

Presso la stessa Ditta sono giacenti motori vari Fiat A/74 -
P.VII C.16 eliche di tipo vario e parti di ricambio e piazzette e installa-
zioni per CR. 42 - S.79 - S.81 - Cnt 7 1007 bis - Ca.310-11-13-14 di
cui è in corso l'elencazione esatta.

In data 29 maggio 45 si presentava allo stabilimento Caproni
di Gardolo il Ten. Pilota Grusmaroli dichierando che era autorizzato dal
Ministero delle R.A. a comunicare alla Ditta di tenere a disposizione del-
la R.A. in attesa di ulteriori ordini tutti i velivoli CR.42 ed 11 mate-
riale aeromutico esistente in Ditta.

Inoltre il tenente intendeva ritirare un CR.42 per portarlo
al proprio Reparto. La Ditta si oppose alla richiesta rappresentando
la necessità di ottenerne una regolare autorizzazione alla cessione dell'
apparecchio da parte delle competenti autorità ed osservando che non
aveva ~~la~~ disposizioni né benzina né olio necessari al trasferimento del
velivolo.

Si prega di voler comunicare se deve essere dato corso alla
riparazione e rimessa in efficienza dei velivoli CR.42.
