ADMINISTRATIVE INSTRUCTION NO.

SUBJECT: Reorganization of Provincial and Communal Administration.

TO : All Senior Civil Affairs Officers.

1. In order to restore Provincial and Municipal Administration to a pre-Fascist level, and in the interest of securing uniformity in the form and structure of local government, the following instructions are laid down for immediate application in each individual province.

2. The various government officers and organs herein mentioned derive their powers and functions from certain fundamental laws embodied in a Unified Text of Municipal and Provincial Laws of 1915, N. 148. It is necessary to revise certain provisions of these laws which were superseded or repealed under fascism. It will be found that local officials are conversant with the legislation and procedure in regard to local government bodies, and, upon issuance of the attached General Order (Appendix A), can proceed with its immediate execution.

3. The top position in provincial administration is that of Prefect. Next in order come the Vice-Prefect and Vice-Prefect Inspector (Vice Prefetto Inspektore). When the post of Prefect is vacant, and a suitable civil service career official of the necessary grade and qualification is not available, a person must be nominated to the position who, beside the requisite executive ability, should have a suitable political background. The same principle applies when a vacancy exists for a Vice-Prefect and no suitable career official is available for appointment.

4. In both instances nominations, supported by information as to the qualifications of nominees, are to be submitted to the Regional Civil Affairs Officer for transmission through channels for approval by the combined Chiefs of Staff.

5. The selection of officials outside the civil service, as an emergency measure, is warmly recommended, for the choice of public spirited men with personality and universally accepted probity should not only enable the system of indirect rule to be greatly extended, but also infuse into the organs of local government a fresh vitality which is so abundantly needed.

6. A table of administrative grades of civil service career personnel in the Prefecture is attached for information (Appendix B), together with a chart outlining local government organization in re-

to a pre-fascist level, and in the interest of the form and structure of local government, the following instructions are laid down for immediate application in each individual province.

2. The various government officers and organs herein mentioned derive their powers and functions from certain fundamental laws embodied in a Unified Text of Municipal and Provincial Laws of 1915, N. 148. It is necessary to revise certain provisions of these laws which were superseded or repealed under fascism. It will be found that local officials are conversant with the legislation and procedure in regard to local government bodies, and, upon issuance of the attached General Order (Appendix A), can proceed with its immediate execution.

3. The top position in provincial administration is that of Prefect. Next in order come the Vice-Prefect and Vice-Prefect Inspector (Vice Prefetto Ispettore). When the post of Prefect is vacant, and a suitable civil service career official of the necessary grade and qualification is not available, a person must be nominated to the position who, beside the requisite executive ability, should have a suitable political background. The same principle applies when a vacancy exists for a Vice-Prefect and no suitable career official is available for appointment.

4. In both instances nominations, supported by information as to the qualifications of nominees, are to be submitted to the Regional Civil Affairs Officer for transmission through channels for approval by the combined Chiefs of Staff.

75

6. A table of administrative grades of civil service career personnel in the Prefecture is attached for information (Appendix B), together with a chart outlining local government organization in relation to the Ministry of the Interior (Appendix C).

7. The principal organs of provincial government which are to be revived in consultation with the Prefect are the following:

a) CONSIGLIO DI PREFETTURA ("Prefectural Council"): It is normally composed of the Prefect or his substitute, who presides, and two senior Councillors ("Consiglieri") of the Prefecture. Its powers

"1"

and

and functions are principally advisory and are regulated by specific laws, although the Prefect may request the opinion of the Council on any matter. It also has certain functions relating to the approval of accounts of communes and certain institutions, in which capacity its composition is enlarged to include additional officials.

b) GIUNTA PROVINCIALE AMMINISTRATIVA ("Provincial Administrative Board"): The formation and functions of this body are regulated by a series of laws and regulations which date from 1865. It is composed of ten members with the Prefect or his substitute as President of the Board, and includes the following officials of the Prefecture: a Vice-Prefect Inspector, two Councilors, the Chief Accountant ("Regioniere Capo") and the Intendant of Finance ("Intendente di Finanza"). The remaining four members are citizen appointees chosen from experts in legal, administrative or technical matters, nominated by the Prefect and approved by the Senior Civil Affairs Officer acting for Allied Military Government.

c) DEPUTAZIONE PROVINCIALE ("Provincial Deputation"): This body is revived to replace the fascist-created Rettorato, the latter body being now abolished. In pre-fascist provincial government, the Deputation was normally appointed by, and from among the members of, a larger elected body known as the Consiglio Provinciale ("Provincial Council"). For present purposes, since the elective Consiglio is not possible at this time, the Deputation is to be nominated by the Prefect and approved by the Senior Civil Affairs Officer on behalf of the Allied Military Government. It consists of a President and ten unpaid citizen members. The President is also the Head of Provincial Administration ("Capo dell'Amministrazione Provinciale"). In provinces of less than six hundred thousand inhabitants, the number of members is reduced. The duties and powers are regulated by the Unified Text of 1915, above mentioned, which should be consulted if further details are required.

8. Municipal Administration is to be organized as follows:

a) SINDACI: In place of "Podestà" the democratic title of "Sindaco" (Mayor) must be universally adopted. As it is not possible to revive the electoral system at this time, new appointments or changes in the position of Mayor will be made by the Prefect who will issue a regular decree for this purpose after the person nominated has been approved by the Senior Civil Affairs Officer acting for the Allied Military Government. Appointments of Vice-Sindaci are to be similarly effected.

b) SEGRETARIO COMUNALE ("Town Clerk"): This official is a civil servant and cannot be appointed mayor, nor be lightly dismissed. The Prefect has full power to effect transfers, retirements, and appointments of Town Clerks, and changes should be effected only through him under the standing procedure which must be closely followed.

c) GIUNTA COMUNALE ("Municipal Board of Alderman"): This body

Chief Inspector, the Councilors, the Mayor, the Assistant Mayor (Capo) and the Intendant of Finance ("Intendente di Finanza"). The remaining four members are citizen appointees chosen from experts in legal, administrative or technical matters, nominated by the Prefect and approved by the Senior Civil Affairs Officer acting for Allied Military Government.

c) DEPUTAZIONE PROVINCIALE ("Provincial Deputation"): This body is revived to replace the fascist-created Rettorato, the latter body being now abolished. In pro-fascist provincial government, the Deputation was normally appointed by, and from among the members of, a larger elected body known as the Consiglio Provinciale ("Provincial Council"). For present purposes, since the elective Consiglio is not possible at this time, the Deputation is to be nominated by the Prefect and approved by the Senior Civil Affairs Officer on behalf of the Allied Military Government. It consists of a President and ten unpaid citizen members. The President is also the Head of Provincial Administration ("Capo dell'Amministrazione Provinciale"). In provinces of less than six hundred thousand inhabitants, the number of members is reduced. The duties and powers are regulated by the Unified Text of 1915, above mentioned, which should be consulted if further details are required.

8. Municipal Administration is to be organized as follows:

a) SINDACI: In place of "Podestà" the democratic title of "Sindaco" (Mayor) must be universally adopted. As it is not possible to revive the electoral system at this time, new appointments or changes in the position of Mayor will be made by the Prefect who will issue a regular decree for this purpose after the person nominated has been approved by the Senior Civil Affairs Officer acting for the Allied Military Government. Appointments of Vice-Sindaci are to be similarly effected.

b) SEGRETARIO COMUNALE ("Town Clerk"): This official is a civil servant and cannot be appointed mayor, nor be lightly dismissed. The Prefect has full power to effect transfers, retirements, and appointments of Town Clerks, and changes should be effected only through him under the standing procedure which must be closely followed.

c) GIUNTA COMUNALE ("Municipal Board of Aldermen"): This body is revived to replace the fascist-created Consulta Comunale. Normally, as in the case of the Provincial Deputation, its members, called "assessori" ("Aldermen"), would be selected by, and from among the members of, an elected Consiglio Comunale ("Municipal Council"). Under

present

present emergency conditions, the Giunta Comunale is to be nominated by the Mayor with the concurrence of the Senior Civil Affairs Officer or local Civil Affairs Officer, and the appointments confirmed by the Prefect of the Province. The numerical composition of the Giunta varies according to population as follows:

<u>INHABITANTS</u>	<u>ASSESSORI (ALDERMEN)</u>
Over 250,000	10
" 60,000	8
" 30,000	6
" 3,000	4
Smaller Communities	2

In order to cope with exceptional conditions, however, Senior Civil Affairs Officers may consider it advisable to increase the number at their discretion. The above-mentioned Unified Text of 1915 defines the appointment, powers, duties, and responsibilities of Mayors and Town Councils.

9. In the selection of members of the above agencies, consideration should be given to various shades of political opinion. Labor and agriculture, including the small farmers, must be adequately represented.

10. For the purpose of securing a proper understanding and a uniform application of these instructions, as well as other matters affecting local governments, meetings of all Senior Civil Affairs Officers will be held at regular intervals. Similar meeting of all Prefects will also be held in order to assure a uniform application of the attached General Order (Appendix A) which is being issued to all Prefects in this Region.

11. In conformity with the above, from now onwards, all Provincial and Municipal Decrees and Orders must be issued in the name of the Prefect or local Mayor respectively and bear only the "VISTO" of the Senior Civil Affairs Officer or Civil Affairs Officer concerned.

PAYMENTS IN ITALIAN TERRITORY

1. The following instructions regarding payment by the military forces for goods and services in Italian territory will be observed.
2. It is important that the U.S. and British forces should, where possible, act in unison. Coordination of executive action, based on policies prescribed from time to time by this headquarters will be effected. Commanding officers will insure that competitive buying between the forces does not occur and that there is adequate coordination over the prices to be paid. Appropriate methods of financial control and economy in expending Allied Military live and other currencies in Italian Territory must be observed for military purposes.

3. a. Wherever practicable, arrangements are to be made in conjunction with Allied Military Government or Allied Control Commission local representatives for the Italian Government to make available for Allied use naval, military and air installations, power stations, oil refineries, public utility services, ports and harbors, transport and inter-communication facilities and equipment, and other local resources and services that are required.

b. Where any goods or services are provided under arrangements with the Italian Government no payment from military funds will be made without authority from this headquarters unless the need for same immediate payment is operationally essential and temporary financing cannot be arranged through the local Allied Military Government or Allied Control Commission representative on behalf of the Italian Government.

c. Wherever the policy in paragraph 3 a. above cannot be implemented, action will be taken as follows:

4. Privately-owned Goods.

a. Goods should not be seized or requisitioned without payment unless strictly required for military purposes, the test being whether, if payment had to be made, the charge would be admissible against public funds. Requisitioning will be confined to authorized officers of the procuring services. In all cases where payment is not made, accurate records must be maintained of the articles requisitioned, including the date, place, identification of article, and name of owner.

2. It is important that the U.S. and British forces should, where possible, act in unison. Coordination of executive action, based on policies prescribed from time to time by this headquarters will be effected. Commanding officers will insure that competitive buying between the forces does not occur and that there is adequate coordination over the prices to be paid. Appropriate methods of financial control and economy in expending Allied Military lire and other currencies in Italian Territory must be observed for military purposes.

3. a. Wherever practicable, arrangements are to be made in conjunction with Allied Military Government or Allied Control Commission local representatives for the Italian Government to make available for Allied use naval, military and air installations, power stations, oil refineries, public utility services, ports and harbors, transport and inter-communication facilities and equipment, and other local resources and services that are required.

b. Where any goods or services are provided under arrangements with the Italian Government no payment from military funds will be made without authority from this headquarters unless the need for some immediate payment is operationally essential and temporary financing cannot be arranged through the local Allied Military Government or Allied Control Commission representative on behalf of the Italian Government.

c. Wherever the policy in paragraph 3 a. above cannot be implemented, action will be taken as follows:

4. Privately-owned Goods.

a. Goods should not be seized or requisitioned without payment unless strictly required for military purposes, the test being whether, if payment had to be made, the charge would be admissible against public funds. Requisitioning will be confined to authorized officers of the procuring services. In all cases where payment is not made, accurate records must be maintained of the articles requisitioned, including the date, place, identification of article, and name of owner.

b. Consumable goods, of which continuous and regular supply is required by the Allied Forces and can only be maintained in return for payment, may be requisitioned and paid for under properly approved requisitioning arrangements or purchased under local purchase arrangements. However, it is the policy of this headquarters that only known surpluses, as determined by the Allied Force Local Resources (Italian) Board, will be purchased locally. Under present circumstances, the only articles falling under this category are perishable fruits and vegetables known to be in surplus. Small day to day requirements of spare parts may also be purchased. Where local purchases are made, it is essential to insure that excessive prices are not paid, in order to reduce the tendency towards inflation and to curb profiteering. Where excessive prices are demanded under local purchase arrangements, goods authorized to be purchased will be requisitioned and fair prices paid, these being fixed in cooperation with the local Allied Military Government or Allied Control Commission representatives. If such goods are concealed because the individual owners hope to secure blackmarket prices, they will be sought out. The local authorities are instructed to cooperate to the fullest extent in finding them, as it is essential to do everything possible to prevent soaring prices.

c. Durable goods which are unlikely to be in continuous, rapid, production in the occupied territory, or which the owners will be unable to replace locally or will not need to replace at present, will be requisitioned or seized by authorized officers without payment under properly approved arrangements pending further instructions. Such goods as motor and other transport vehicles, heavy plant and machinery, constructional materials, structural steel, railway plant and armament (particularly passenger), the in this way. In requisitioning motor vehicles (particularly passenger), the injunction in paragraph 4. a. above should be strictly observed. Unnecessary requisitioning of motor transport seriously disorganizes essential civilian communication.

d. In instances where durable goods are in continuous production they will normally be requisitioned without payment and the question of financing the firm's further operations will be handled as prescribed in paragraph 6 d. below.

e. It is impossible to define with exactness which privately-owned goods should, or should not, be paid for from military funds. The method of treatment will have to be resolved on common sense lines for each class of goods, bearing in mind the principles set out in paragraph 4. b, c, and d above and the following considerations:

- (1) The forces should not use manpower unnecessarily in negotiating prices, contracts and agreements for goods which can be secured in adequate quantities without immediate payment.
- (2) Excess unnecessary payment for goods leads to inflation. However, it is recognized that there will be cases where cash payments for small day to day requirements will be the most effective method of getting access to available local supplies.
- (3) Important, or long-term contractual commitments for goods should not be entered into by the forces without reference of the case with recommendations to this headquarters.

5. Privately-owned Real Estate (Land and Buildings).

This class of property, including accommodation and furnishings thereof, required for military purposes will be occupied without payment of rent or other recompense. The owner should be advised that both the determination of the rate to be paid and the payment thereof are the responsibility of the Italian authorities. Military authorities will not pay for machinery, equipment and plant installed in workshops, factories, etc., which it is essential to take over and operate. The operation of workshops and factories by the military should be avoided wherever reasonably possible in order to conserve military manpower.

6. Services Performed by Private Persons and Firms.

in paragraph 4.2. above should be strictly observed. Unnecessary requisitioning of motor transport seriously disorganizes essential civilian communication.

d. In instances where durable goods are in continuous production, they will normally be requisitioned without payment and the fixation of financing the firm's further operations will be handled as prescribed in paragraph 6 d. below.

e. It is impossible to define with exactness which privately-owned goods should, or should not, be paid for from military funds. (1) The forces should not use manpower unnecessarily in negotiating prices, contracts and agreements for goods which can be secured in adequate quantities without immediate payment.

(2) Excess unnecessary payment for goods leads to inflation. However, it is recognized that there will be cases where such payments for small day to day requirements will be the most effective method of getting access to available local supplies.

The operation of workshops and factories by the military should be avoided wherever reasonably possible in order to conserve military manpower.

6. Services Performed by Private Persons and Firms.

A. Labor employed by the Allied Forces will be paid fair wages, the same rates and same conditions of employment being observed by each force in the same localities. The rates of wages will be determined in consultation with appropriate Allied Military Government or Allied Control Commission Officials and the local military financial representatives. Inflated wages will not be paid.

B. Contracts may be made where necessary (by competitive tender, wherever possible) for ordinary military services such as repairs to clothing, equipment and vehicles, laundry, break-making, small manufacturing services, and minor works services. Important, or long-term contracts or agreements should not, at present, be entered into without authority from this headquarters. Examples are storage of petrol and use of cold storage plants.

C. Contracts should not be made, or expenditure incurred from military funds, for services, e.g., repairs to roads and bridges, which the

U.S. CONFIDENTIAL EQUALS BRITISH CONFIDENTIAL

State or local authorities should arrange and pay for. Such work will, of course, have to be undertaken under military arrangements when it is operationally essential and it is impracticable to arrange for the Italian Authorities to undertake it, but in all such cases Allied Military Government or Allied Control Commission officials should be consulted when possible.

2. Where private firms are required to turn over their whole output, or the greater part of it, regularly to the military forces but the factories are not taken over and run by the military, reference will be made to the Italian Authorities and to representatives of the Allied Military Government or Allied Control Commission and the local military financial representatives as to arrangements for financing the continued operation of such firms. At present contracts should not be made for buying the products of such firms.

7. Services Performed by Municipal Authorities and Public Utility Concerns.

At present no payments should be made by the military forces for such services as removal of refuse, supply of gas, water and electricity, use of port facilities, non-State-owned telephones, telegraphs, or railways. The method of dealing with the financing of such services should be explored with the Allied Control Commission or Allied Military Government and the local military financial representatives, bearing in mind paragraph 3 above.

8. Goods and Services Provided by State-Owned and Parastatal Concerns.

Payment may not be made from military funds for any goods taken over which are owned by the State or parastatal concerns or for any services provided by State-owned organizations, e.g., railway traffic. The methods of financing those State Services which the Allied Forces must utilize, is being considered by the Allied Control Commission, and they will arrange any temporary financing which may be necessary until a final decision is being considered by the Allied Control Commission, and they will arrange any temporary financing which may be necessary until a final decision is taken. Where it is necessary for parastatal concerns to produce goods or perform services for Allied military purposes, the method by which the cost of production shall be recovered may vary with the particular case or class of case and the arrangements under which the concern continues to operate. In particular cases proposals for financing the continued operation of such firms should be worked out in conjunction with the Allied Control Commission or the Allied Military Government and the local military financial representatives.

9. Claims for Damages. Traffic Accidents, etc.

Payments will not be made in respect of these claims. Separate

9. Claims for Damages, Traffic Accidents, etc.

Payments will not be made in respect of these claims. Separate instructions are being issued about Workmen's Compensation for Industrial Accidents.

10. General.

These instructions are intended as a guide to what may be paid from military funds in the interim period until the policy outlined in paragraph 3 can be fully implemented. It is impossible to make provisions now for every type of case and it is recognized that many individual cases will have to be considered on their individual merits.

b. In cases of military emergency, the Allied military commander responsible for defense and security will assume full command of Allied Military Government personnel and will issue such orders to them as the situation demands.

c. In special circumstances, e.g., where there is a very small garrison under a commander junior to the Allied Military Government officer, or where an Italian commander is responsible for the administration, defense or security, special instructions will be issued by this Headquarters.

3. It will be the duty of the Regional Civil Affairs Officer to assist military commanders in his region in their dealings with the civil population. Similarly it will be the duty of the military commander to assist the Regional Civil Affairs Officer, and to uphold this authority in the civil sphere, or military action if need be.

4. Military commanders and Allied Military Government officers will maintain liaison at all times and will carry out their respective functions in close cooperation. Any difference which may arise between them will be promptly reported to this Headquarters. If however an immediate decision is required, the military commander will make that decision and Allied Military Government Officers will comply with his orders, pending receipt of instructions from this Headquarters.

INSTRUCTIONS TO A.C.C. PERSONNEL

1. Effective on a date to be announced, probably in the near future, the Allied Military Government will turn over to the Italian Government certain portions of territory occupied by the Allied Forces. At that time Allied Military Government will cease and the Italian administration will assume full responsibility for civil government in such territory.

This will involve the withdrawal of Allied Military Government personnel from the territory or their employment under the Allied Control Commission. This memorandum is to outline certain general principles which will guide A.C.C. personnel in the territories administered by the Italian Government.

Present Status - Co-Belligerency

2. Effective September 3, 1943 the Italian Government concluded an Armistice with the Governments of the United States and Great Britain acting in the interests of the United Nations. On 1943 the Italian Government signed an instrument of surrender governing the relations between the United Nations and Italy, in which instrument there were both military and other provisions designed to protect the interests of the Allies and to promote the war effort, and calling for the appointment of a Control Commission to enforce and implement those provisions.

At that time Allied Military Government will cease and the Italian administration will assume full responsibility for civil government in such territory.

This will involve the withdrawal of Allied Military Government personnel from the territory or their employment under the Allied Control Commission. This memorandum is to outline certain general principles which will guide A.M.G. personnel in the territories administered by the Italian Government.

Present Status - Co-Belligerency

2. Effective September 3, 1943 the Italian Government concluded an armistice with the Governments of the United States and Great Britain acting in the interests of the United Nations. On 1943 the Italian Government signed an instrument of surrender governing the relations between the United Nations and Italy, in which instrument there were both military and other provisions designed to protect the interests of the Allies and to promote the war effort, and calling for the appointment of a Control Commission to enforce and implement those provisions.

3. The effect of the *instruments* ⁷³³ for-mentioned incidents is to give the Allies the opportunity through the Allied Control Commission of converting the economic resources of Italy into an effective instrument of war against Germany.

4. Following the declaration of war on Germany, Italy was accorded the status of co-belligerent.

5. According to the tripartite statement of 13 Oct. 1943

"The relationship of co-belligerency between the Government of Italy and the United Nations' Governments cannot of itself affect the terms (of the Instrument of Surrender) recently signed,

which retain their full force and can only be adjusted by agreement between the Allied Governments in the light of the assistance which the Italian Government may be able to afford to the United Nations' cause."

The situation of a co-belligerent does not mean that Italy is recognized as one of the United Nations or is admitted as an ally. It means that the Italian Government is fighting the same enemy and that the United Nations support it for that purpose.

General Functions Armistice Control Commission

6. The general functions of the Armistice Control Commission, as prescribed by the Combined Chiefs of Staff, are as follows:

(a) To enforce and execute the instrument of surrender under the orders and general directives of the Allied Commander-in-Chief.

(b) To insure that the conduct of the Italian Government conforms to the requirements of an Allied Base of Operations, especially transportation and communications.

(c) To be the organ through which the policy of the United Nations towards the Italian Government is conducted and the relations between the United Nations and the Italian Government are handled.

8. The Commission will be divided into four Sections: Military, Political, Economic and Administrative and Communications. Each Section will be in charge of a Vice President and comprise a number of Subcommittees, which are as follows:

Functions and General Duties of A.C.C. Officers in the Field

10. The nature and extent of the duties of A.C.C. field officers will depend on the ^{Sub-}Commission to which they are specifically assigned. However the following guides are applicable to all:

- (a) The primary function of A.C.C. officers in the field will be to give assistance and guidance to the local Italian officials on matters *entrusted in other specific instances or generally* within their competency and to convey such instructions as may be appropriate under this and further directives of A.C.C.
- (b) A.C.C. officers will also carefully observe the local operation of the Italian Government in their field in order to determine whether the terms of the surrender are being vigorously and effectively enforced. The

results of such observations will be the subject of periodic reports to higher headquarters.

(c) A.C.C. field personnel will have no power to command or direct Italian officials in connection with the performance of their duty. In this respect their partisan duties are to be sharply contrasted with those of officers of AMG. In administrative matters the function of A.C.C. officials is constantly to observe, assist and report to higher headquarters in order that representations may be made to the Italian Government at the appropriate level.

(d) Particularly during the transition stage and until the authority of the Italian Government is fully established and the administrative machine is functioning smoothly, the Italian officials will probably require the *considerable information,* advice and assistance of A.C.C. officers. It is entirely proper in this way to support the authority of the Italian officials. Great care should be taken, however, not to interfere directly or give the appearance of interfering directly in the local administration.

(e) A.C.C. personnel must also take great care to avoid becoming involved in political disputes or conflicts. An early resumption of political activity and discussion is to be anticipated. A.C.C. officers will deal only with the officials selected by the Italian Government. The competency of these officials and the quality of their administration is ^{now the} ~~not a~~ responsibility of the *Italian Government.* ~~field officers or of the Commission.~~ However, when local officials behave in a manner likely to prejudice the position of the Allied Forces by violation of the terms of surrender or otherwise ^{A.C.C.} personnel will promptly

submit a report and recommendations to higher headquarters *and to the extent that authority may have been delegated to them, take action.*

(5) In order to harness the economic resources of Italy to the war

It is entirely proper in this way to support the authority of the Italian officials. submit a report and recommendations to higher headquarters and *to the extent that authority may have been delegated to them, take action.*

(f) In order to harness the economic resources of Italy to the war effort, it will be necessary for the Italian Government rigidly to control many private industries and the use of much private property. Whenever an authorized Italian official requests the assistance of A.C.C. field officers in order to render this control more effective, such requested assistance should be rendered. On occasions the authority of A.C.C. may be persuasive in securing the necessary cooperation of the Italian citizen or property owner.

11. The specific duties of A.C.C. field personnel of the various Subcommissions will be separately set forth in a memo *admin* supplemental to this general instruction. These specific instructions will be in accordance with the following:

(a) Generally there will be no A.C.C. field officers in the command or in a position comparable to that of the C.A.O. or C.A.P.O. under AMG. General administration will therefore be subject to A.C.C. control at the provincial level. Such local inspection as may be required will be worked out from A.C.C. provincial HQ.

(b) In the transition stage and until the Italian administration is functioning satisfactorily A.C.C. personnel will, subject to subparagraph

(a) above, be disposed on a basis approaching that of AMG. An effort will be made to reduce numbers as quickly as conditions permit. Probable exceptions to the foregoing will exist in the case of personnel in (i) transportation, *shipping*, and communication fields by reason of military requirements (ii) in the supply field, including fuel, because of the responsibility of the Allied Forces for assisting in provision of adequate civilian supplies and the necessity of coordinating the supply program with the military supply and shipping requirements.

(c) Close coordination will be necessary between A.C.C. and military tactical and administrative forces in the area. Certain committees have already been established (i.e. Local Resources Boards and Transportation Coordinating Committee). The scope of the activity of these committees and other inter-service agencies will be communicated to field personnel. It is essential that confusion be avoided and that the channels of communication with the Italian authorities remain as few and as simple as possible.

(d) Personnel engaged in the supply services of the Communications Section and the Industry and Commerce and Public Works and Utilities Subcommittees will also be required to maintain close liaison with the Commissions of the military section who are responsible for war material production and war material disposal. The competency of and lines of authority between these Subcommissions within A.C.C. will be specified.

Regional Organization

12. It is anticipated that A.C.C. will in certain areas establish regional headquarters under a Regional Control Commissioner who will act as a counterpart to and work with the Italian Regional Commissioner who, it is understood, will be appointed to function until the national government is established at Rome or elsewhere and can effectively communicate with the provinces.

13. In areas where Allied Commissioners are appointed the following principles will apply:

(a) Personnel. The Regional Commissioners will command all personnel assigned to their respective regions. Together with the senior regional officer of the opposite nationality, they will have the power to discipline personnel under their command and will make recommendations for promotions and transfers to and from the Region.

In the case of most officers and some EM/ORs assigned to regions, the field of activity in which they are to be engaged will be specified. Any assignments of such specialist personnel must be observed except in cases of emergency and then only for the duration of the emergency.

(b) Communications. Orders to personnel in the Regions, including specialist personnel, will be issued only by the Regional Commissioner. Communications on technical matters must be sent from headquarters to the specialist personnel in the Regions through the Regional Commissioner.

Officers from A.C.C. HQ may and will make inspection trips within the Regions. On such occasions they will make their presence and the nature of their visit known to the Regional Commissioner, or where impracticable, to the nearest Provincial Commissioner. No orders or directives will be communicated by such officers to the specialists in the field; technical observations may, however, be so communicated either from personnel at headquarters to officers in the field or vice-versa. If such are in written form, copies will be furnished to the Regional Commissioner.

(c) Procedure. For obvious reasons it will be desirable that procedure adopted by Regional Commissioners, particularly in dealing with the Italian administration, shall be uniform throughout Italian territory. In cases where uniform procedure has been or is hereafter prescribed by A.C.C. HQ, such procedure will be binding uniformly on the staffs in each Region.

except in cases of emergency and then only for the duration of the emergency.

(b) Communications. Orders to personnel in the Regions, including specialist personnel, will be issued only by the Regional Commissioner. Communications on technical matters must be sent from headquarters to the specialist personnel in the Regions through the Regional Commissioner.

Officers from A.C.C. HQ may and will make inspection trips within the Regions. On such occasions they will make their presence and the nature of their mission known to the Regional Commissioner, or where impracticable, to the nearest Provincial Commissioner. No orders or directives will be communicated by such officers to the specialists in the field; technical observations may, however, be so communicated either from personnel at headquarters to officers in the field or vice versa. If such are in written form, copies will be furnished to the Regional Commissioner.

(c) Procedure. For obvious reasons it will be desirable that procedure adopted by Regional Commissioners, particularly in dealing with the Italian administration, shall be uniform throughout Italian territory. In cases where uniform procedure has been or is hereafter prescribed by A.C.C. HQ, such procedure will be binding uniformly on the staffs in each Region.

14. Where Regions exist it will be necessary for A.C.C. Regional Commissioners to keep in close touch with their counterparts under the Italian regional set up. Some control will be exercised under the Italian administration at this level, which control may vary in accordance with the needs of the different Subregions. In cases where no Regions have yet been established lesser control may be exercised over the Italian administration at the provincial level, but in general matters requiring the execution of any pressure on the Italian administration will be referred to headquarters in advance.

15. Details in regard to the division of functions between A.G.C. headquarters and any such Regional headquarters will be worked out and specified in further instructions, depending upon the exact powers and functions of the Italian regional administration.

Attitude toward Italian Officials.

16. The members of the Commission, whether acting officially or otherwise, should maintain a correct attitude toward members of Italian Government, neither autocratic on the one hand nor familiar on the other. They should bear in mind that the provisional arrangements between the Allied Governments and that of Marshal Badoglio are dictated by war needs and are not to stand in the way of the Italian people, after the elimination of Fascism and the eviction of the German Forces, having a government of their free democratic choice. In the meantime it is important that there be built up an anti-Fascist Government on the broadest base possible. It is, therefore, desirable that all healthy elements which can deliver some good be rallied to the common effort.

GENERAL EISENHOWER'S ANNOUNCEMENT OF THE ALLIED CONTROL COMMISSION

Released at 2200 hours, 10 November:

As Commander-in-Chief of Allied Forces, I wish to announce the formation of the Allied Control Commission for Italy which, following the Italian surrender, has today assumed the duty of carrying out the Armistice and of aligning Italian economy in complete support of the United Nations fight against Germany.

Major General Kenyon A. Joyce, USA, has been appointed Acting Deputy President of the Allied Control Commission with headquarters at the seat of the Italian Government. He is the active head of the Control Commission, operating directly under the Commander-in-Chief of Allied Forces to whom he is responsible. The Commission has control of the military and economic activities of Italy, as envisaged in the terms of the Armistice.

Italy has a new role in the war. That role is to fight the common enemy--Germany. The Control Commission will see that all of Italy's economic resources and manpower are utilized where they can do the most good in that fight.

In all areas behind the combat zone, Allied Military Government of Enemy Territory will gradually be replaced by Italian administration exercised under supervision of the Control Commission. We look to the Italian Government to broaden its political composition and strengthen its administrative structure, and the transfer from Allied Military Government to Italian administration will keep pace with this development. This does not mean the return of Italian territory to unrestricted Italian control.

Allied Military Government still goes forward with the 15 Army Group to organize the territory as the Germans are expelled. Allied Military Government continues to press onward as a spearhead, taking charge of communication disorganized by the Nazi retreat and destruction, restoring common civic life once burdened with Fascism, and clearing the path immediately for further military movements towards the front.

When the Armistice was granted, the Allied Commander-in-Chief appointed a Military Mission headed by Lieutenant General P. W. Mason MacFarlane to the Italian Government. It functioned at the temporary seat of the Italian Government, and the scope of the Mission corresponded to many of the duties of the Allied Control Commission. The Mission's duties have been performed as planned, and it is now replaced by the Allied Control Commission. 726

General MacFarlane, who has rendered outstanding service, is returning to his post as Governor of Gibraltar.

Well in advance of the surrender, plans were made and personnel brought forward so that we should be prepared for the problem of Post-Armistice control. The Allied Control Commission was established. It is divided into four

sections: (1) Military; (2) Political; (3) Economic and Administrative; (4) Communications. Each Section, with its proper Sub-Divisions, will operate in fields as so dictated by the times.

Personnel was drawn from especially military officers and civilian experts. Some of them were sent to this theatre for duties involving Civil Affairs. Others are technicians. Others were engaged in Allied Military Government work.

In all of this change it should be borne in mind that the Italian Government is bound by the terms of the Armistice which stipulates that "The Commander-in-Chief of Allied Forces reserves to himself the right to take any measures which in his opinion may be necessary for the protection of the interests of the Allied Forces for the prosecution of the war, and the Italian Government binds itself to take such administrative or other action as the Commander-in-Chief may require."

Pursuant to the agreement reached at the Tripartite Conference at Moscow, an Advisory Council for Italy has been established in conjunction with the work of the Allied Control Commission for Italy. The Advisory Council will deal with day-to-day questions other than military preparations and will make recommendations to coordinate Allied policy with regard to Italy. In the first instance the Advisory Council will be composed of representatives of the United States, the United Kingdom, the Soviet Union, and the French Committee of National Liberation. Later, representatives of Greece and Yugoslavia will be added to this Council.

The United Nations are converting Italy into an effective instrument of war against Germany. They look to the Italian Government to produce tangible results. By rallying the entire people to a vigorous resistance to the Germans, the Government of Italy may hasten the redemption of its country and prove its value to the United Nations.

ADMINISTRATIVE INSTRUCTIONS NO. 4

Capitolo 2

SUBJECT: Reorganization of Provincial and Communal Administration

TO : All Senior Civil Affairs Officers

1. In order to restore Provincial and Municipal Administration to a pre-fascist level and in the interests of uniformity the following instructions are laid down for immediate application in each individual province.
2. When the post of Prefect is vacant and a suitable civil service career official of the necessary grade and qualifications is not available an Acting Prefect must be nominated who, besides the requisite capabilities, should have a suitable political background. The same principle applies if a vacancy exists for a Vice-Prefect and no suitable career official is available to fill the appointment.

3. In both instances nominations, supported by information for guidance, are to be submitted to the Regional Civil Affairs Officer for transmission through channels for approval by the Combined Chiefs of Staff.

4. The selection of officials outside the civil service, although an emergency measure is warmly recommended, for the choice of public spirited men with personality and universally accepted probity should not only enable the system of indirect rule to be greatly extended, but also infuse into the organs of local government a fresh vitality which is so abundantly needed.

5. A table of organization of Prefecture personnel is attached for information (Appendix A) together with a chart outlining local government organization in relation to the Ministry of the Interior (Appendix B).

6. The organs of local government which are to be revived in consultation with the Prefect are the following:

CONSIGLIO DI PREFETTURA which is composed of the Prefect or his substitute, two Presidents, and two Senior Councillors of the Prefecture. Its powers and functions are regulated by specific laws and the Prefect may request the opinion of the Council on any matter. Included in its functions is the approval of accounts of communes and charitable institutions.

GIUNTA PROVINCIALE AMMINISTRATIVA: The formation and functions of this body are regulated by a series of laws and regulations which date from 1869. It is composed of 10 members with the Prefect or his substitute as President, and includes from the Prefecture, two Consiglieri, a Deputy Prefect-Inspector and the Chief Accountant. The remaining members are chosen from experts in legal, administrative or technical affairs, nominated by the Prefect and approved by the Senior Civil Affairs Officer acting for AMG.

DEPUTAZIONE PROVINCIALE: Replaces the Rettorato. The Deputazione consists of 10 members chosen from the Prefecture and approved

4. The selection of officials outside the civil service, although an emergency measure is warmly recommended, for the choice of public spirited men with personality and universally accepted probity should not only enable the system of indirect rule to be greatly extended, but also infuse into the organs of local government a fresh vitality which is so abundantly needed.
5. A table of organization of Prefecture personnel is attached for information (Appendix A) together with a chart outlining local government organization in relation to the Ministry of the Interior (Appendix B).
6. The organs of local government which are to be revived in consultation with the Prefect are the following:

CONSIGLIO DI PREFETTURA which is composed of the Prefect or his substitute, who presides, and two senior Councillors of the Prefecture. Its powers and functions are regulated by specific laws and the Prefect may request the opinion of the Council on any matter. Included in its functions is the approval of accounts of communes and charitable institutions.

GIUNTA PROVINCIALE AMMINISTRATIVA: The formation and functions of this body are regulated by a series of laws and regulations which date from 1865. It is composed of 10 members with the Prefect or his substitute as President, and includes from the Prefecture, two Consiglieri, a Deputy Prefect-Inspector and the Chief Accountant. The remaining members are chosen from experts in legal, administrative or technical affairs, nominated by the Prefect and approved by the Senior Civil Affairs Officer acting for A.G.

DEPUTAZIONE PROVINCIALE: Replaces the Rettorato. The Deputazione consists of a President and unpaid members nominated by the Prefect and approved by the Senior Civil Affairs Officer on behalf of A.G.O.T. The President is also head of Provincial Administration. In Provinces of less than six hundred thousand inhabitants, the number of members is reduced. The duties and powers of the President, and the Deputazione are regulated according to the unified text of communal and provincial laws which should be consulted if further details are required.

7. Communal Administration is to be regulated in the following manner:

SINDACI: In place of Podestà the democratic title of sindaco (mayor) must be universally adopted. As it is not possible to apply the electoral system at the present time, new appointments or changes were necessary will be made by the Prefect who will issue the regular decree after consideration of any nominations submitted by Senior Civil Affairs Officers.

SEGRETERIO COMUNALE: (Town Clerk):- This official is a civil servant and cannot be appointed mayor, nor be lightly dismissed. The Prefect has full power to effect transfers, retirements, and appointments of Town Clerks and changes should be effected only through him under the standing procedure which must be closely followed.

GIUNTA COMUNALE: Normally this body would be selected by the consiglio comunale from amongst its own members duly elected by public ballot. Under present emergency conditions, the Giunta Comunale is to be nominated by the mayor with the concurrence of Senior Civil Affairs Officers or local Civil Affairs Officers and the appointments confirmed by the Provincial Prefect. The numerical composition of the Giunta varies according to population as follows:

INHABITANTS

Over 250,000	10
" 60,000	8
" 30,000	6
" 3,000	4
Smaller Communities	2

ASSESSORI (ALDERMEN)

but in order to cope with exceptional conditions, Senior Civil Affairs Officers may consider it advisable to increase the number at their discretion. The afore-mentioned unified text of communal and provincial laws define the appointment, powers, duties, and responsibilities of Mayors and Town Councils.

8. In the selection of the members of the above agencies, consideration should be given to various shades of political opinion, excluding extremists, and labor and agriculture must be adequately represented.

9. It will be found that local officials are fully conversant with the legislation and procedure in regard to local government bodies, and can act upon Senior Civil Affairs Officers directives for the rapid execution of this order.

10. In conformity with the above, from now onwards, all Provincial and Communal Decrees and Orders must be issued in the name of the Prefect or local Mayor respectively and bear only the "VISTO" of the Senior Civil Affairs Officer or Civil Affairs Officer concerned.
